Do you need an abstract? An abstract is a short summary of your project.

**INTRODUCTION**
- Provides a brief background
- Gets the viewers interested
- Places work in the context of the literature
- Use bullets and graphics

**METHODS**
- How did you do it and what did you use?
- You can use references.
- Think about using flowcharts and figures.

**RESULTS/DISCUSSION**
- This is usually the largest section & can include your conclusions.
- Include the analyzed data here in graphic format, equations, etc.
- Include a brief summary of results and discussion.
- The Presenter will be providing additional detail.

**CONCLUSIONS**
- List the major results.
- Relate to the literature.
- Discuss any new hypotheses and future work.

**REFERENCES**
- Use the format for your field of study (APA, MLA, etc.)

**ACKNOWLEDGEMENTS**
- Acknowledge both the people: contributing to the research, the agencies funding the research, attendance at the conference, etc.
