Board members discussed the current PACE Mission Statement and Objectives and how they align with the UVU Core objective (attached sheets)

The definition of “Advocacy” was discussed – our role is to listen and assist employees in finding the correct resources on campus (HR, Benefits, etc.), we need to be knowledgeable and informed about related issues, and obtain and present feedback

Additional Discussion

Food is connected to how employees feel they are appreciated, often because they might not be included in social gatherings in their departments

We need to better marketing what we do and the services we provide

Employees “are” often supervisors, and we need to find tools to assist them in carrying out their duties; possibly partner with HR to provide tools (HR Academy etc.)

Sherry summed up by saying Influence is the main thing we have, so we need to take ownership of our organization and model and promote the changes we desire. If there are things that we are lacking, let’s make it happen.
