

$$f(x) = \frac{1}{\sqrt{2\pi}} e^{-\frac{x^2}{2}}$$

UVU's Career and Technical Education (CTE) program aims to prepare students to enter the job force upon graduation by training them for high-paying jobs. As part of that program, High School students can take CTE courses at UVU through the concurrent enrollment program.

In 2019-2020, students took nearly 40,000 career-ready classes through UVU.

While the CTE program continues to grow at about 4% per year, the High School Concurrent Enrollment program is growing at 12.4% per year (10-year AARG), and high school students now account for nearly 1/4 of CTE classes taken.
