A big welcome to Karrie Phillips who is now the program specialist in the Office Child Care and supervises the Care About Childcare agencies throughout the state. Karrie was hired in January and took over that position that was held by Steve Matherly. Steve now works for Early Childhood Utah as the Health Program Coordinator. Karrie is familiar face in the early childhood world. Most recently she was the south region manager for child care licensing and before that was a licensing trainer for the entire state of Utah. Karrie also worked for the Discovery Gateway in Salt Lake and had her own child care business here in Utah and also in the state of Washington. Karrie graduated from the University of Utah. She is a very happy person and is always smiling. Her favorite color is orange and she wears orange clothing every day. She even drives an orange car. We are pleased to be working with Karrie as our specialist in the Office of Childcare and know that each of you will welcome her when you see her as she visits our agency.

Emergency Preparedness Kits for Kids

As an adult, there are several things that you may not think to include in an emergency kit for kids, to help them cope with the trauma they are experiencing, so here's a few ideas of some items that may not typically be included in emergency kits.

- A **RED** wash cloth - Since kids are more likely to panic or get upset by the sight of blood, having a red or dark wash cloth to put on wounds helps them to stay calm, since they can't see the blood.
- A comfort item such as a stuffed animal or a blanket. This can be helpful to kids since it gives them an object to self soothe with.
- Family pictures - These are great because they can help give kids something to focus on, and it can help give them comfort in case they are separated from you or other family members. Your contact information, or your emergency out of state contact information can also be included in case they get lost.
- For young children and infants, make sure you have enough of their supplies such as diapers, wipes, formula, medicine, etc., and make sure you have enough water to clean the bottles in between feedings as well.
- Powdered or boxed milk - often, children need or want milk. Having some powdered milk on hand to mix with water can help them get extra nutrients. Stores also have milk that can be stored just like a juice box - some places, such as Gossner's in Logan, even have little boxes of flavored milk!

While these items are important to have, it's also good to not forget the essential items, such as making sure you have a 3 day supply of food, water, local maps, a whistle, etc. [Click here](#) for a complete list of emergency supplies for kids (the above items listed are additional items not found on the list.)

There are new requirements for pre-service training.

For current programs, all caregivers must receive training in the CCDF required topics before August 31, 2016. For new caregivers or programs, 2.5 hours of training is required, including the CCDF required topics and additional topics required by Child Care Licensing, before providing care for children.

Options for completing the Foundations for Success training on the CCDF required topics are available from your local Care About Childcare agency or by going to careaboutchildcare.utah.gov. Online, packets, and face-to-face training options are available.

Effective October 1, 2016, programs who have not submitted a pre-service training certificate for each caregiver will not receive any payments from the Office of Child Care, including subsidies, grants, and Professional Development Awards.
