Integrated Studies

Discipline Core Requirements: 18 Credits

- MILS 3200 Small Unit Leadership I 3
- MILS 3210 Small Unit Leadership II 3
- MILS 4200 The Profession of Arms I 3
- MILS 4210 The Profession of Arms II 3

Complete one of the following: 3
- HIST 345G The History of World War II (3)
- HIST 3740 American Revolution (3)

Complete 3 credits from the following: 3
- COMM 3520 Public Relations Case Studies (3)
- CJ 3040 Community Policing (3)
- ENGL 2310 Technical Communication (3)
- DGM 3261 Authoring Virtual Reality Experiences (3)
- DGM 3290 Developing Digital Media for Instruction and Training (3)
- MGMT 330G Survey of International Business (3)
- MGMT 332G Cross-Cultural Communications for International Business (3)
- HR 3430 Introduction to Human Resource Management (3)
- MGMT 3440 Managing Organizations (3)
- POLS 3100 Survey of International Terrorism (3)
- POLS 3400 American Foreign Policy (3)
- POLS 3600 International Relations of East Asia (3)

Notes:
1. Contracted Army ROTC Cadets must also satisfy the leadership laboratory and physical fitness terms of their contract in order to be commissioned officers in the US Army.
2. Military Science students who select this emphasis may not choose Physical Education, Outdoor Leadership, Leadership, or Office Management as their second emphasis.

IS Emphasis in Music

Requirements

For a complete list of program requirements see the BA Integrated Studies or the BS Integrated Studies.

Total Program Credits: 18

Discipline Core Requirements: 18 Credits

- MUSC 1110 Music Theory I 3
- MUSC 1130 Aural Skills I 1

Individual Musicianship Studies

- MUSC 250R Private Lessons for Music Majors (Repeated 3 times on major instrument or voice) 3
- MUSC 251R Performance Class (Repeated 3 times on major instrument or voice) 3

Complete 8 credits from the following: 8
- MUSC 306R Advanced Keyboard Skills (1)
- MUSC 320R Masterworks Chorale (1)
- MUSC 322R Chamber Choir (1)
- MUSC 327R Men's Choir (1)
- MUSC 328R Women's Choir (1)
- MUSC 330R Wind Symphony (1)
- MUSC 331R Percussion Symphony (1)
- MUSC 332R Jazz Orchestra (1)
- MUSC 333R Small Jazz and Commercial Ensembles (1)
- MUSC 334R Pep Band (1)
- MUSC 370R Symphony Orchestra (1)
- MUSC 372R Chamber Orchestra (1)
- MUSC 373R Advanced Small Ensembles (1)
- MUSC 423R Opera Workshop (1)

Footnote:
1-MUSC 250R and 251R require grade B or higher. All other MUSC classes require grade C or higher.

IS Emphasis in Office Management

Requirements

For a complete list of program requirements see the BA Integrated Studies or the BS Integrated Studies.

Total Program Credits: 18

Discipline Core Requirements: 18 Credits

Prerequisites (can fulfill elective requirements):
- IM 1010 Basic Computer Applications (2)
- IM 2600 Spreadsheet Applications (3)
- IM 3700 Database Applications (3)
- MKTG 2200 Written Business Communication WE (3)

Complete the following required courses:
- INFO 2420 Web Application Design 3
- IM 2300 Information Management Principles 3
- IM 2800 Integrated Software Projects 3
- IM 4300 Information Workflow Management 3

Complete 6 or more credits from the following: 6
- IM 183R IM Student Chapter (1)
- IM 2500 Graphic Applications (3)
- INFO 1000 E-Commerce Techniques for Small Business (3)
- ACC 3000 Financial Managerial and Cost Accounting Concepts (3)
- HR 3430 Introduction to Human Resource Management (3)
- LEGL 3000 Business Law (3)

Graduation Requirements:
1. A minimum of 2.5 GPA in all discipline core courses with no grade lower than a C- required for graduation.
### IS Emphasis in Peace and Justice Studies

Integrated Studies, B.A.

Careers

For those completing the bachelor degree in Integrated Studies, various opportunities exist for advanced academic and professional degrees (a wide variety of MA and PhD programs, law school, medical and dental schools, MBA, MPA, etc.) and in the business environment. Many employers seek students with skills gained from liberal arts programs like Integrated Studies. These skills include general problem solving, the ability to comprehend diverse material, to write clearly, to think critically, and to work cooperatively.

Related Careers

- NO MATCH

Integrated Studies, B.S.

Requirements

The individualized nature of the Integrated Studies degree is attractive to students with multiple interests. Students integrate course work in emphases such as biology, earth science, business, health, literature, languages, communication, philosophy, psychology, sociology, anthropology, and the arts. Emphases from computer science and information systems, accounting, technology management, and physical education are also offered as part of this degree.

Total Program Credits: 120

**Integrated Studies, B.S.**

**Careers**
For those completing the bachelor degree in Integrated Studies, various opportunities exist for advanced academic and professional degrees (a wide variety of MA and PhD programs, law school, medical and dental schools, MBA, MPA, etc.) and in the business environment. Many employers seek students with skills gained from liberal arts programs like Integrated Studies. These skills include general problem solving, the ability to comprehend diverse material, to write clearly, to think critically, and to work cooperatively.

**Related Careers**
- NO MATCH
Utah Valley University encourages students to extend learning beyond the classroom by participating in internships or other professional engagement activities. Students who participate in professionally engaged activities:

- network with employers
- acquire workplace knowledge and skills
- engage in their career path

To qualify for internship academic credit the experience must:

- relate to the student’s major or professional field of study
- integrate academic and experiential learning
- qualify for academic credit
- include written agreements and evaluations between the student, employer, academic department, and University

All departments in the University have integrated internship experience in their curriculum either as a required component or as an elective. Generally these courses are designated as 281R (lower division) or 481R (upper division). Some departments require an associated pre-requisite and/or co-requisite.

Each college/school within the university has an Internship Coordinator that the student will work with directly. Students can find their Internship Coordinator as well as the steps necessary to apply for internship credit by visiting this page: [https://www.uvu.edu/internships/student/credit_and_scholarships/apply_for_credit.html](https://www.uvu.edu/internships/student/credit_and_scholarships/apply_for_credit.html)

Academic credit for internships is granted according to learning objectives with the academic department and the number of hours a student works during the semester.

Internship Services and The Career Development Center

The University is committed to assisting students in making intelligent and informed career choices. Internship Services Coordinators and/or The Career Development Center Office can assist students in investigating internship opportunities by providing employer leads and information, helping students construct resumes, and assisting with interview preparation.

International Internships

- [Web](https://www.uvu.edu/internships/highimpact/international/index.html)

Internship Services and the Office for Global Engagement offer students a variety of international internship opportunities in a number of countries. Students have the option of setting up their own international experience or requesting the university to set up the internship for them. Students who go on an international internship will gain practical experience relevant to their major while experiencing a foreign culture. Students will work directly with the International Internship Coordinator.

Students planning on participating in an international internship should complete an application on the Internship Services website. The student is also required to obtain travel insurance and meet other prerequisites through the Office for Global Engagement. It is recommended that students desiring international experience plan at least six months in advance by meeting with Internship Services.

**Mission Statement**

The mission of the Department of Languages and Cultures at Utah Valley University is to prepare students to interact effectively in a global community by acquiring competent communicative skills, and developing sensitivity toward cultural differences. By engaging with linguistic and cultural artifacts such as history, literature, and contemporary social structures and systems, language and culture students learn to think critically and behave ethically as they mature in linguistic and cultural literacy. This department prepares students to enter the global work force, further graduate studies and enjoy lifelong enrichment.

Deaf Studies, Minor

Requirements

In the Deaf Studies minor, students will examine elements of what culturally-Deaf people in America have traditionally called "the Deaf-World" with special attention to the framework of meaning from within which culturally-Deaf people interpret what it means to be Deaf. This minor challenges students to approach cultural descriptions critically, and provides a historical, cultural, and linguistic foundation.

Total Program Credits: 21

Matriculation Requirements:

1. Declaration of a major in a bachelor degree program at UVU
2. Completion of ASL 202G or equivalent

Latin American Studies, Minor

Requirements

The minor in Latin American Studies (LAS) provides a comprehensive and interdisciplinary understanding of Latin American and Latino culture, history, and language. This is particularly important for preparing UVU students to be fully competitive in the global marketplace since two of the top ten trading partners of the United States, Mexico and Brazil, are located in Latin America. Students learn to comprehend the unique geographical and historical complexities of Latin America and its place in the world, as well as the multifaceted cultural backgrounds of their fellow students whose families are from that vast area. A minor in LAS complements a diverse number of majors giving our students the opportunity to prepare for a future working with either Utah’s growing Latino population or beyond the state pursuing opportunities abroad.

**Spanish for the Professions--Translation/Interpreting, Minor**

**Requirements**

Students in the Minor in Spanish for the Professions, Translation, and Interpreting will become familiar with Spanish terminology and different oral and written documents in Spanish from a variety of professional fields. This minor will also provide students with the opportunity to acquire translation and interpreting skills between Spanish and English.

**Total Program Credits: 18**

**Matriculation Requirements:**

1. Complete ENGL 2010 and 30 hours of college-level courses other than Spanish with a minimum GPA of 2.0
2. Complete lower division Spanish courses (1010, 1020, 2010, and 202G) or receive the equivalent through experiential credit (does not apply to native speakers).
3. Admitted to a bachelor degree program at UVU.

**Discipline Core Requirements:**

- **Spanish Conversation and Composition II (SPAN 3040)**
- **Advanced Spanish (SPAN 3050)**
- **Culture and Civilization--Spain (SPAN 351G)**
- **Culture and Civilization--Spanish America (SPAN 352G)**
- **Special Topics in Grammar Usage and Style (SPAN 4050)**

Choose 6 credit hours from the following:

- **Business Spanish (SPAN 3200)**
- **Spanish for Healthcare Professionals (SPAN 3310)**
- **Spanish for Mental Health Professionals (SPAN 3320)**
- **Spanish for Tourism and Hospitality Management (SPAN 3340)**
- **Spanish for Legal Professions (SPAN 3350)**
- **Advanced Business Spanish (SPAN 4200)**
- **Advanced Spanish for Healthcare Professionals (SPAN 4310)**

Choose 3 credit hours from the following courses:

- **Advanced Translation English and Spanish (SPAN 4120)**
- **English Spanish Interpreting (SPAN 4130)**

**Elective Requirements:**

- Complete 3 credits from any upper-division SPAN or LANG courses not previously taken

**Graduation Requirements:**

1. Completion of Baccalaureate Degree.
2. Any grade below a "C" (2.0) in a Spanish Minor course will not be accepted.

**Spanish, Minor**

**Requirements**

This minor can be earned in conjunction with any Bachelor degree major that UVU offers. The minor consists of 18 credit hours of upper division coursework. There are some specific courses required and a number of electives so be sure to contact the advisor for more information.

**Total Program Credits: 18**

**Matriculation Requirements:**

1. Complete ENGL 2010 and 30 hours of college-level courses other than Spanish with a minimum GPA of 2.0
2. Complete lower division Spanish courses (1010, 1020, 2010, and 202G) or receive the equivalent through experiential credit (does not apply to native speakers).
3. Admitted to a bachelor degree program at UVU.

**Discipline Core Requirements:**

- **Spanish Conversation and Composition II (SPAN 3040)**
- **Advanced Spanish (SPAN 3050)**
- **Culture and Civilization--Spain (SPAN 351G)**
- **Culture and Civilization--Spanish America (SPAN 352G)**
- **Special Topics in Grammar Usage and Style (SPAN 4050)**

Complete 9 credits from any upper-division SPAN or LANG courses not previously taken.

**Graduation Requirements:**

1. Completion of Baccalaureate Degree.
2. Any grade below a "C" (2.0) in a Spanish Minor course will not be accepted.
ASL and Deaf Studies Education, B.A.

Requirements

This four-year degree prepares students to teach ASL & Deaf Studies in secondary education (grades 7-12) settings. Students take major courses from the Languages department and licensure courses through the School of Education. This degree requires separate application to the School of Education. Bachelor of Arts in ASL and Deaf Studies Education

Total Program Credits: 120

Matriculation Requirements:

1. ACT exam minimums: Composite 21, English 20, Math 19; or SAT exam minimums: Critical Read/Math 1000, with Math and Reading scores of 450; or If student has a bachelor degree or higher, he/she does not need to meet this testing requirement.
2. GPA of 3.0 or higher with no grade lower than a C in content area courses.
3. Completion of all General Education requirements and the majority of content area courses.
4. Pass LiveScan Criminal Background Check.

General Education Requirements: 36 Credits

ENGL 1010 Introduction to Academic Writing 3
or ENGH 1005 Literacies and Composition Across Contexts (5.0)
ENGL 2010 Intermediate Writing/Academic Writing and Research 3
MATH 1050 College Algebra 4
or MATH 1055 College Algebra with Preliminaries (5.0)

Choose one of the following: 3

HIST 1700 American Civilization (3.0)
HIST 2700 US History to 1877 (3.0)
and HIST 2710 US History since 1877 (3.0)
POLS 1000 American Heritage (3.0)
POLS 1100 American National Government (3.0)
HIST 1740 US Economic History (3.0)

Complete the following:

PHIL 2050 Ethics and Values 3
HLTH 1100 Personal Health and Wellness 2
or PES 1097 Fitness for Life (2.0)

Distribution Courses:

Humanities Distribution 3
Social/Behavioral Science 3
Fine Arts Distribution 3
Biology 3
Physical Science 3
Biology or Physical Science 3

Discipline Core Requirements: 68 Credits

Must be completed with a grade of B- or higher.

ASL 3050 Advanced American Sign Language * 3
ASL 3310 Foundations of Interpreting 3
or ASL 4410 ASL Linguistics (3.0)
ASL 3510 History of Deaf People to 1817 3
or ASL 3520 History of Deaf People after 1817 (3.0)

Education Courses:

EDEL 1010 Introduction to Education 2
EDSC 3000 Educational Psychology 3
EDSP 340G Exceptional Students 2
EDSC 3250 Instructional Media 2
EDSC 4200 Classroom Management I (Dance Education majors take 4430 in place of EDSC 4200.) 2
EDSC 4250 Classroom Management II 2
EDSC 4440 Content Area Literacies (English Education majors take ENGL 4210, 4220, 4230 in place of EDSC 4440) 3
EDSC 445G Multicultural Instruction ESL 3
EDSC 4550 Secondary Curriculum Instruction and Assessment 3
EDSC 4850 Student Teaching--Secondary 8
EDSC 4990 Teacher Performance Assessment Project 2

Elective Requirements: 16 Credits

Complete 16 credits of any courses 1000-level or higher. 16

Graduation Requirements:

1. Complete a minimum of 120 credit hours with a minimum of 40 upper-division credits.
2. Overall Grade of 3.0 (B) or above with no grade lower than a C or better in major required content courses and no grade lower than a B- in Licensure and Methods courses.
3. Completion of General Education, ASL & Deaf Studies core, and elective requirements.
4. Meet residency and maximum years in program requirements and any other requirements stated in the University Catalog or established by the department.
5. Successful completion of at least one Global/Intercultural course.

NOTES:

Students should frequently review their program with faculty or department advisor.

Any grade below a C (2.0) in an ASL & Deaf Studies core or elective course will not be accepted toward the major. Students must maintain an overall GPA of 3.0 or higher and meet all other graduation requirements stipulated in the university catalog. Post-BA/BS students must take 30 hours of education courses, fulfill the MATH 1050 or MATH 1055 requirement, and meet all stipulated deadlines.

Footnote

* Requires ASL skills equivalent to those expected at the completion of ASL 202G. See advisor for more information.

ASL and Deaf Studies Education, B.A.

Deaf Studies - General Deaf Studies Emphasis, B.A.

Requirements
This four-year degree is a liberal arts degree that provides in-depth study into all facets of the Deaf-World. Students choose among two emphases. There is no special application process, but students should declare their major by contacting the academic advisor for the Languages Department.

This emphasis provides an opportunity for students to gain advanced ASL skills and thorough knowledge of the Deaf-World. Graduates with this emphasis will be prepared to work in various fields related to deafness. They will also work in fields that are not specifically tied to the Deaf-World but which require the skills and knowledge cultivated through the acquisition of any liberal arts degree. This emphasis is also terrific preparation for graduate school in any number of disciplines.

Emphasis Elective Requirements: 23 Credits

Complete 9 credits of any 3000- or 4000-level courses that are not part of the core nor emphasis requirements. 9

Complete 14 credits from any courses. ASL 3340 and ASL 3390 are strongly recommended. 14

Graduation Requirements:

1. 120 credit hours (minimum of 40 upper division)
2. Minimum cumulative G.P.A. of 2.0, with no grade lower than a "C" for all core and ASL elective requirements.
3. Completion of General Education requirements
4. Completion of Deaf Studies major core and elective requirements
5. Residency hours—minimum of 30 credit hours through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
6. Successful completion of at least one Global/Intercultural course.

Note: Students should frequently review their program with faculty or department advisor.
Deaf Studies - General Deaf Studies Emphasis, B.A. 

Careers:

Many of your clients will be Deaf or Hard-of-Hearing. It will be to your immense advantage to be able to communicate with them directly. As a NURSE, one will be able to communicate with your Deaf patients while doing routine tasks. ELEMENTARY SCHOOL TEACHERS will possibly have Deaf children mainstreamed in their classroom. MENTAL HEALTH WORKERS, SOCIAL WORKERS, and COUNSELORS who know and understand Deaf people are in high demand. In fact, Deaf people have sought out service providers who use ASL and helped augment the number of clients utilizing a particular service provider. ADVOCATES such as LAWYERS or LOBBYISTS who work with legislators will be able to use their knowledge and skill in ASL when parts of legislation affect Deaf people. Even if you don’t plan to focus on serving Deaf people, you can probably expand your client base by offering expertise in ASL. SALES ASSISTANTS in stores and shops will often encounter Deaf customers seeking to make purchases. In fact, a background in ASL will be useful in absolutely any field or employment.

Deaf Studies - Interpreting Emphasis, B.A. 

Requirements

This four-year degree is a liberal arts degree that provides in-depth study into all facets of the Deaf-World. Students choose among two emphases. There is no special application process, but students should declare their major by contacting the academic advisor for the Languages Department.

Emphasis #2: Interpreting:
This emphasis provides an opportunity for students and focuses on helping them to gain interpreting skills and certification. There is currently an intense shortage of interpreters for the Deaf across the United States. UVU offers two distinct programs to prepare students to enter the interpreting profession: The Novice-Level Interpreter Preparation Program (NLIPP) and the Advanced Certification Interpreter Preparation Program (ACIPP). These programs can accommodate students of any skill level and courses fit right into the Deaf Studies degree requirements.

Graduation Requirements:

1. Complete a minimum of 121 credit hours with a minimum of 40 upper-division credits.
2. Overall grade of 3.0 (B) or above with no grade lower than a C or better in major required content courses and no grade lower than a B- in Licensure and Methods courses.
3. Completion of General Education, French core, and elective requirements.
4. Residency hours—minimum of 30 credit hours through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
5. Successful completion of at least one Global / Intercultural course.

Secondary French Education, B.A.

Careers

Language expertise has specific application to a career in language teaching or translation. It becomes an attending, and often essential, skill in any business or government activity which involves domestic or international non-English speaking communities. Additionally, businesses and governments are increasingly global enterprises, while U.S. citizens are becoming more multilingual, which means the demand for language expertise is increasing throughout all facets of social interaction, particularly, but not limited to industry, commerce, and education.

Related Careers

- Secondary School Teachers, Except Special and Career/Technical Education

Spanish Education, B.A.

Requirements

This four-year degree prepares students to teach Spanish in Secondary education (grades 7-12) settings. Students take major courses from the Languages and Cultures department and licensure courses through the School of Education. This degree requires separate application to the School of Education.

Total Program Credits: 122

Matriculation Requirements:

1. ACT exam minimums: Composite 21, English 20, Math 19; or SAT exam minimums: Critical Read/Math 1000, with Math and Reading scores of 450; or If student has a bachelor degree or higher, he/she does not need to meet this testing requirement.
2. GPA of 3.0 or higher with no grade lower than a C in content area courses.
3. Completion of all General Education requirements and the majority of content area courses.
4. Pass LiveScan Criminal Background Check.
5. Other requirements as determined by the Department of Languages and Cultures

General Education Requirements: 36 Credits

- or ENGH 1005 Literacies and Composition Across Contexts (5.0)
- ENGL 2010 Introduction to Academic Writing
- MATH 1050 College Algebra
- or MATH 1055 College Algebra with Preliminaries

Choose one of the following:

- HIST 1700 American Civilization (3.0)
- HIST 2700 US History to 1877 (3.0)
- or HIST 2710 US History since 1877 (3.0)
- POLS 1000 American Heritage (3.0)
- POLS 1100 American National Government (3.0)
- or HIST 1740 US Economic History (3.0)

Complete the following:

The Literacies and Composition department understands that all students bring with them rich and diverse histories, knowledge, skills, and literacies that can be applied to the literacy work they will take part in as college students at UVU. We are committed to providing opportunities for students to recognize their own oral, written, and visual literacies as relevant to the academic setting and to helping them develop these literacies for the work they will do in the academy, in the workplace, and in their personal lives.

University College

University College serves a unique role and mission within Utah Valley University. Based on a national model, the name University College signifies opportunity for student success through curricular and co-curricular offerings, academic services, and innovative programs. University College welcomes students at present levels of academic achievement and challenges them with higher expectations. The programs and departments of Literacies and Composition, Student Leadership & Success Studies, Developmental Mathematics, English Language Learning, the University College Advisement Center, Academic Standards, Writing Center, Academic Tutoring, and the Math Lab promote interdisciplinary partnerships as students transition into university academics.

Course Descriptions

English Basic Composition
Marketing

Mission Statement
Through exceptional business education, we help students become successful professionals who build our community.

Core Themes - (University Alignment: Student Success, Engagement, Inclusivity, and Seriousness)

1. Delta: Maximize student improvement through engaged learning.
2. Placement: Help students obtain and succeed in careers aligned with their goals.
3. Scholarship with Impact: Produce and promote research that improves business education and practice.
4. Reach: Serve as many people in our community as we can through increased efficiency and inclusive outreach.

In December, 2006, The UVU School of Business earned its international accreditation from AACSB International - The Association to Advance Collegiate Schools of Business.

Marketing
Career Opportunities
For those trained in marketing, career opportunities are available in advertising, brand and product management, customer affairs, industrial marketing, international marketing, marketing research and intelligence, new product planning, marketing logistics (physical distribution), public relations, purchasing, retail management, internet marketing, and sales and sales management.

Job Outlook
Almost a third of all Americans are employed in marketing-related positions. From large corporations to small companies, both in manufacturing and service areas, firms rely on marketers.

Programs
Students in Marketing may receive a Bachelor of Science, Bachelor of Arts, or a Minor in Marketing. Also available is a Bachelor of Science in Digital Marketing and a Certificate of Proficiency in Professional Sales.

Professional Sales, Certificate of Proficiency

Careers

Every field of business has an integral need for professional sales specialists. Professional sales is central to virtually every industry and key to an organization's ability to grow and sustain business operations. As a profession, the field of sales provides a strong trajectory of earnings potential unmatched by those of other career paths. Professional sales specialists are in increasing demand nationally and especially within Utah. Sales as a career provides the opportunity for career advancement through management and senior management within organizations as well as the opportunity to work with a variety of customers to help them solve problems and identify solutions which will help their businesses grow. Traditional areas of employment for sales students include: account executive roles, account management, inside sales, project management, sales management, sales analytics, sales training and development, and senior management.

Related Careers

Marketing, Minor

Requirements

The Marketing Department offers students three different tracks in the marketing minor, each providing a theoretical and in-depth professional preparation in the field. The first is the Marketing Management track, which provides a broad base of experiential classes and the most flexibility in scheduling for employed students. The second is the Digital Marketing track, which provides courses in internet marketing, social media, and web analytics. The newest track is Professional Selling, which prepares students for a career in sales with courses in personal selling, sales management, and sales analytics. Whichever track is chosen, a professional internship is highly encouraged.

1. Completion of a minimum of 120 semester credits required in the BA degree; at least 40 credit hours must be upper-division courses.
2. Overall grade point average 2.0 or above with a minimum of 2.5 GPA in all Woodbury School of Business courses. No grade lower than a "C-" in core and specialization courses.
3. Residency hours: Minimum of 30 credit hours of business courses through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
4. Completion of GE and specified departmental requirements. Students are responsible for completing all prerequisite courses.
5. Successful completion of at least one Global/Intercultural course.

NOTE: Students will be limited to 9 hours of upper-division credit until matriculation is completed.

Footnote
*Cannot be taken until student is matriculated.
**Students are required to complete My Educator, IM 2010, or IM 2600 with a grade of B- or higher
***Maximum of 3 credits of internship count toward marketing electives.

Marketing, B.A.

Careers:

Almost a third of all Americans are employed in marketing-related positions. Marketing graduates are in high demand in business, non-profit, and government service. Traditional career paths for students with marketing degrees include: brand management, advertising and promotion, professional sales, market research, pricing, product strategy, consumer behavior, event management, and international marketing. Many marketing graduates begin their careers, and then continue their education with a master's degree in Marketing.

Requirements

The Marketing Department offers students three different tracks each providing a theoretical and in-depth professional preparation in the field. The first is the Marketing Management track which provides a broad base of experiential classes and the most flexibility in scheduling for employed students. The second is the Digital Marketing track which provides courses in internet marketing, social media, and web analytics. The newest track is Sales which prepares students for a career in sales with courses in personal selling, sales management, and sales analytics. Whichever track is chosen, a professional internship is highly encouraged.

Total Program Credits: 120

Matriculation Requirements

1. Students will be limited to 9 hours of upper-division credit until matriculation is completed.
2. Students must complete the following courses in order to matriculate: ACC 2010, ACC 2020, ECON 2010, ECON 2020, MyEducator or IM 2010 or IM 2600, MKTG 2200, MKTG 2390, MGMT 2340, MGMT 3400 or MGMT 2240 or MGMT 3345
3. Students cannot take the following courses until they have matriculated: FIN 3100, MGMT 3450, MGMT 4860

Program Description

The Master of Arts in Marriage and Family Therapy (MFT) trains students to be professionally competent in the field of marriage and family therapy. Through the application of systemic theories, skills, and ethics, students are prepared to serve a diverse client population. Students who successfully complete the program, including academic course work and supervised clinical practica, will be eligible for employment and licensure as an Associate Marriage and Family Therapist in the state of Utah.

Across a broad range of clinical employment settings, marriage and family therapists seek to improve the quality of life for individuals, couples, and families. The UVU Marriage and Family Therapy program emphasizes professional competence and stewardship within the local community. With an emphasis on systemic theories, clinical skills and professional ethics, the MFT program prepares graduates for licensure and employment in marriage and family therapy. The training of marriage and family therapy students champions inclusion and diversity through self-awareness and respect toward all people.

Admission Requirements

Potential students must apply for admission into the program. To be accepted, students must have completed a Bachelor’s degree, preferably in Family Studies, Psychology, Social Work, or a related area. However, applicants who have a Bachelor’s degree in another field may be admitted to the program if they can demonstrate significant work or volunteer experience in the Human Services field.

Mission Statement
The Utah Valley University Mathematics Department’s primary purpose is to educate students in mathematics, mathematics education, and statistics. The department prepares students for both graduate degrees and productive careers by fostering a rigorous development of cognitive skills, helping them to analyze logical inferences, reason critically, and apply mathematical ideas to solve real world problems. The department’s other functions include service which supports the mission of the University, and the development of scholarly work to both advance research and facilitate student engagement in current areas of interest.

Distribution Courses:
- Biology 3
- Physical Science 3
- Additional Biology or Physical Science 3
- Humanities Distribution 3
- Fine Arts Distribution 3
- Social/Behavioral Science 3

**Graduation Requirements:**
1. Completion of a minimum of 60 semester credits.
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. Residency hours—minimum of 20 credit hours through course attendance at UVU.
4. Completion of GE and specified departmental requirements.

* MATH 1050 and MATH 1060 are required as prerequisites for MATH 1210.

Choose at least two mathematics courses from the mathematics courses numbered 3210 and above 1
6

Graduation Requirements

To fulfill the requirements for a mathematics minor, students must achieve a minimum GPA of 2.4 for all attempted work in the seven mathematics courses required for the mathematics minor and have no course grade lower than "C" in any of the seven mathematics courses required for the mathematics minor (substitutions may be granted for some elective courses).

NOTE: The 6-credit pairs of courses, MATH 3210 and MATH 3400, or MATH 4610 and MATH 4620, are recommended for students pursuing majors in the physical sciences, engineering, or computer science. Another recommended pair for computer science majors is MATH 3300 and MATH 4340

Footnotes:

1 Elective courses may NOT include MATH 4030, MATH 4040, or MATH 481R.

**Graduation Requirements:**

1. Completion of a minimum of 120 semester credits with at least 40 credit hours in upper-division courses.

2. Overall grade point average of 2.0 (C) or above, a minimum GPA of 2.4 in all MATH and STAT courses listed above, with no grade lower than a "C" in all listed PHYS, STAT, and MATH courses (substitutions may be granted for some elective courses).

3. Residency hours—minimum of 30 credit hours through course attendance at UVU, with at least 10 hours earned in the last 45 hours.

4. Completion of general education and specified departmental requirements.

5. Complete an exit survey administered by the Mathematics Department Advisor.

6. Successful completion of at least one Global/Intercultural course.

**Footnotes:**

* Students planning to do graduate work in mathematics should take both of the year-long sequences MATH 4210, 4220, and MATH 4310, 4320, and acquire a reading knowledge of at least one foreign language chosen from French, German, or Russian.

** Elective courses may NOT include MATH 3100, MATH 3200, MATH 3010, MATH 3030, MATH 4030, or MATH 4040.

*** Requires completion of a prerequisite course, which fulfills elective requirements.

Program Description

Utah Valley University Mathematics Department offers a two-year part-time course of study for secondary-level teachers leading to a Graduate Certificate in Mathematics. This program is intended for students who wish to teach concurrent enrollment or college-level math courses, but lack the minimum 18 graduate credit hours in mathematics.

This program offers required courses in the areas of Topology, Combinatorics, Statistics, Numerical Analysis, Numerical Methods and Modeling, Modern Algebra and Ordinary Differential Equations.

Admission Requirements

Potential students must apply for admission into the program. To be accepted, students must have a current Mathematics Endorsement Level 4 certificate, attached to an Educator License Secondary teacher, exception, Alternative Routes to Licensure (ARL).

Mathematics Graduate Programs

Degrees & Programs
Mathematics, Graduate Certificate

Requirements
The Graduate Certificate in Mathematics aims to improve mathematics education and student achievement by focusing on two specific research-supported areas. First, by delivering high-quality content-based knowledge critical to student achievement, and second, by targeting in-service teachers who desire to teach dual credit in high school, given that dual-credit/dual-enrollment students are more likely to persist in college and are more likely to complete a bachelor’s degree in less time than those who did not attempt college credits in high school. Graduate courses for this program will be available to match in-service teacher’s schedules—evenings and during summer sessions—taught on the main campus and live-interactive by Utah Valley University’s full-time faculty.

Music

Mission Statement
The Department of Music promotes student success through innovative programs that enhance creativity, hone performance expertise, and sustain high standards of excellence. Our professional faculty provide learning opportunities essential to the competency of music students as they prepare for a global marketplace. The department engages diverse audiences through performances and activities representing an array of musical styles and traditions.

1. Provide nationally-competitive academic programs and general studies in music.
2. Promote an inclusive environment that provides students with resources that support their educational and professional needs.
3. Engage audiences with performances that reflect diverse musical styles and traditions.
4. Promote opportunities for students and faculty to explore their highest professional potential through creative and innovative activities on- and off-campus.

Music
Advisor: Clark Slater
- Office: GT 630
- Telephone: 801-863-5397
- Email: SCOADVISORS@UVU.EDU

Entrance Auditions
Entrance auditions are required for students wishing to pursue a degree in music. Live auditions are recommended, as they provide students with the opportunity to meet and perform for the faculty. Students also have the option to submit a recorded audition. More information: https://www.uvu.edu/music/apply/

Scholarship Auditions
Music majors and non-majors alike are eligible for a variety of scholarships, ranging from quarter to full tuition. Live auditions are recommended, as they provide students with the opportunity to meet and perform for the faculty. More information: https://www.uvu.edu/music/apply/

Ensemble Auditions
Ensemble auditions are held at the beginning of Fall and Spring semesters. More information: https://www.uvu.edu/music/ensembles/

Theory Placement
All new music major students are required to take a music theory placement examination prior to the first day of semester classes. The results of this test may indicate a need for further theory training before entrance into Music Theory I. More information: https://www.uvu.edu/music/students

Keyboard Proficiency
Music majors are required to pass keyboard proficiency examinations in preparation for their Sophomore review. Students who complete Group Piano I, II, III, and IV with a "B" or higher will fulfill exam requirements. Students who have attained a requisite level of competency in piano may be exempted from group piano coursework through a demonstration of exam requirements. More information: https://www.uvu.edu/music/students

Degrees & Programs

Music, A.S.

Requirements
The Associate in Science in Music is a two-year program that offers foundational studies in musicianship and performance. Prepares students for continuation in a four-year degree program in music.

Total Program Credits: 63

General Education Requirements: 35 Credits
- ENGL 1010 Introduction to Academic Writing 3
- or ENGH 1005 Literacies and Composition Across Context (5.0)
- ENGL 2010 Intermediate Writing Academic Writing and Research 3

Complete one of the following: 3
- MAT 1030 Quantitative Reasoning (recommended for Humanities or Arts majors) (3.0)
- MAT 1035 Quantitative Reasoning with Integrated Algebra (6.0)
- STAT 1040 Introduction to Statistics (recommended for Social Science majors) (3.0)
- STAT 1045 Introduction to Statistics with Algebra (5.0)
- MATH 1050 College Algebra (recommended for Business, Education, Science, and Health Professions majors) (4.0)
- MATH 1055 College Algebra with Preliminaries (5.0)
- MATH 1090 College Algebra for Business (recommended for Business majors) (3.0)

Complete one of the following: 3
- HIST 2700 US History to 1877 (3.0)
Music

and HIST 2710  US History since 1877 (3.0)
HIST 1700  American Civilization (3.0)
HIST 1740  US Economic History (3.0)
POLS 1000  American Heritage (3.0)
POLS 1100  American National Government (3.0)

Complete the following:
PHIL 2050  Ethics and Values 3
HLTH 1100  Personal Health and Wellness (2.0)
or PES 1097  Fitness for Life 2

Distribution Courses:
Biology  3
Physical Science  3
Additional Biology or Physical Science  3
Humanities Distribution  3
Fine Arts  3
Social/Behavioral Science  3

Discipline Core Requirements:  28 Credits
MUSC 1110  Music Theory I  3
MUSC 1120  Music Theory II  3
MUSC 1130  Aural Skills I  1
MUSC 1140  Aural Skills II  1
MUSC 2110  Music Theory III  3
MUSC 2125  Music Theory IV  3
MUSC 2130  Aural Skills III  1
MUSC 2140  Aural Skills IV  1

Complete 4 credits from the following:  4
MUSC 320R  Masterworks Chorale (1.0)
MUSC 322R  Chamber Choir (1.0)
MUSC 327R  Men's Choir (1.0)
MUSC 328R  Women's Choir (1.0)
MUSC 330R  Wind Symphony (1.0)
MUSC 332R  Jazz Orchestra (1.0)
MUSC 370R  Symphony Orchestra (1.0)

Complete 4 credits of the following on major instrument or voice:  4
MUSC 250R  Private Lessons for Music Majors (1.0)

Complete 4 credits of the following on major instrument or voice:  4
MUSC 251R  Performance Class (Repeated 4 times on major instrument or voice) (1.0)

Student must pass the Departmental Keyboard Proficiency Examination or complete MUSC 1150, MUSC 1160, MUSC 2150 and MUSC 2160

Graduation Requirements:
1. Completion of a minimum of 63 semester credits.
2. Overall grade point average of 2.0 (C) or above. MUSC 1150, MUSC 1160, MUSC 2150, MUSC 2160, and MUSC 250R courses require a grade B or higher. All other MUSC courses require a C grade or higher.
3. Residency hours -- minimum of 20 credit hours through course attendance at UVU.
4. Completion of GE and specified departmental requirements including concert attendance requirements.

Music, A.S.

Careers

UVU's music degree programs focus on three principal areas of professional music studies: education, performance, and commercial music. Students interested in broader studies, inclusive of other educational disciplines, may pursue a liberal arts or integrated studies major. In addition to professional careers, music is also an area that offers highly flexible self-employment opportunities, such as freelance performing and recording, as well as private teaching. Coursework in music technology and entrepreneurship further enhances opportunities for students who choose to pursue freelance employment. These opportunities are very dynamic, rapidly responding to advancing technology and an open and diverse media market. See http://www.uvu.edu/music/why/index.html for more information.

Related Careers
- Secondary School Teachers, Except Special and Career/Technical Education
- Musicians and Singers

Music Technology, Certificate of Proficiency

Requirements

The Music Technology Certificate of Proficiency prepares students for work in the commercial music industry. Coursework includes completion of the Avid Pro Tools User Certification and Sibelius Certification.

Total Program Credits: 17

Discipline Core Requirements: 17 Credits
MUSC 1110  Music Theory I  3
MUSC 1120  Music Theory II  3
MUSC 1130  Aural Skills I  1
MUSC 1140  Aural Skills II  1
MUSC 2110  Music Theory III  3
MUSC 2125  Music Theory IV  3
MUSC 2130  Aural Skills III  1
MUSC 2140  Aural Skills IV  1

Complete 4 credits from the following:  4
MUSC 320R  Masterworks Chorale (1.0)
MUSC 322R  Chamber Choir (1.0)
MUSC 327R  Men's Choir (1.0)
MUSC 328R  Women's Choir (1.0)
MUSC 330R  Wind Symphony (1.0)
MUSC 332R  Jazz Orchestra (1.0)
MUSC 370R  Symphony Orchestra (1.0)

Complete 4 credits of the following on major instrument or voice:  4
MUSC 250R  Private Lessons for Music Majors (1.0)

Graduation Requirements:
1. Overall grade point average of 2.0 (C) or above.
2. Residency hours -- minimum of 5 credit hours through course attendance at UVU.

Music Technology, Certificate of Proficiency

Careers

The Music Technology Certificate prepares student for professional work in the music media industry. Completion of the program includes certification in Avid's Sibelius and Pro Tools, widely recognized professional credentials. Music media is an expanding industry with a variety of employment opportunities such as producing, studio recording, editing, composing, arranging, distribution, advertising and marketing.

Related Careers
- Art, Drama, and Music Teachers, Postsecondary
- Music Directors and Composers
- Sound Engineering Technicians
Music, Minor

Requirements

A Minor in Music offers introductory studies in musicianship and performance, including theory, aural skills, private instruction, and ensemble participation.

Total Program Credits: 18

Matriculation Requirements:

1. Admitted to a bachelor degree program at UVU.

Discipline Core Requirements: 18 Credits

Complete the following:

- **MUSC 1110** Music Theory I (3)
- **MUSC 1130** Aural Skills I (1)

Complete 4 credits from the following:

- **MUSC 145R** Private Lessons I (1)
- **MUSC 245R** Private Lessons II (1)
- **MUSC 250R** Private Lessons for Music Majors (1)
- Six additional credit hours of music courses

Complete 4 credits from the following:

- **MUSC 306R** Advanced Keyboard Skills (1)
- **MUSC 320R** Masterworks Chorale (1.0)
- **MUSC 322R** Chamber Choir (1.0)
- **MUSC 327R** Men's Choir (1.0)
- **MUSC 328R** Women's Choir (1.0)
- **MUSC 330R** Wind Symphony (1.0)
- **MUSC 331R** Percussion Ensemble (1.0)
- **MUSC 332R** Jazz Orchestra (1.0)
- **MUSC 333R** Small Jazz and Commercial Ensembles (1)
- **MUSC 334R** Pep Band (1)
- **MUSC 370R** Symphony Orchestra (1.0)
- **MUSC 372R** Chamber Orchestra (1)
- **MUSC 373R** Advanced Small Ensembles (1)
- **MUSC 423R** Opera Workshop (1)

Graduation Requirements:

1. All MUSC courses require a C grade or higher.

- MUSC 322R
- MUSC 320R
- MUSC 3120
- MUSC 3050
- MUSC 3025
- MUSC 3010
- MUSC 1160, MUSC 2170, and MUSC 2180
- Examination for Commercial Music or complete MUSC 1150

Student must pass the Departmental Keyboard Proficiency Examination for Commercial Music or complete MUSC 1150, MUSC 1160, MUSC 2170, MUSC 2180, MUSC 360R

Graduation Requirements:

1. Completion of a minimum of 121 semester credits, 40 credits must be upper-division.
2. Overall grade point average of 2.0 (C) or above. MUSC 1150, MUSC 1160, MUSC 2170, MUSC 2180, MUSC 2180, 250R, and 360R courses require a grade of C or higher. All other MUSC courses require a grade of C or higher.
3. Residency hours—minimum of 30 credit hours through course attendance at UVU, with at least 10 hours in the last 45 hours.
4. Completion of GE and specified departmental requirements, including a sophomore review and concert attendance requirements.
5. Successful completion of at least one global/intercultural course.

Commercial Music, B.M.

Careers:

UVU’s music degree programs focus on three principal areas of professional music studies: education, performance, and commercial music. Students interested in broader studies, inclusive of other educational disciplines, may pursue a liberal arts or integrated studies major. In addition to professional careers, music is also an area that offers highly flexible self-employment opportunities, such as freelance performing and recording, as well as private teaching. Coursework in music technology and entrepreneurship further enhances opportunities for students who choose to pursue freelance employment. These opportunities are very dynamic, rapidly responding to advancing technology and an open and diverse media market. See [http://www.uvu.edu/music/why/index.html](http://www.uvu.edu/music/why/index.html) for more information.

Related Careers

- Art, Drama, and Music Teachers, Postsecondary
- Music Directors and Composers
- Sound Engineering Technicians

Music Education, B.S.

Requirements

The Bachelor of Science in Music Education degree provides students with the competencies essential for a professional career in music secondary education.

Total Program Credits: 129

Matriculation Requirements:

Students will apply for formal admission to the Secondary Ed program in the semester prior to the beginning of their junior year. Admission criteria include:

1. ACT exam minimums: Composite 21, English 20, Math 19; or SAT exam minimums: Critical Read Math 1000, with Math and Reading scores of 450; or if student has a bachelor degree or higher, he/she does not need to meet this testing requirement.
2. GPA of 3.0 or higher with no grade lower than a C in content area courses.
3. Completion of all General Education requirements and the majority of content area courses.
4. Pass LiveScan Criminal Background Check.

Music

Graduation Requirements:

1. Completion of a minimum of 120 semester credits, 40 credits must be upper-
division.
2. Overall grade point average of 2.0 (C) or above. MUSC 1150, MUSC 1160, MUSC 2150, MUSC 2160, MUSC 250R and MUSC 459R courses require a grade B or higher. All other MUSC courses require a C grade or higher.
3. Residency hours-minimum of 30 credit hours through course attendance at
UVU, with at least 10 hours in the last 45 hours.
4. Completion of GE and specified departmental requirements, including a
sophomore review and concert attendance requirements.
5. Successful completion of at least one Global/Intercultural course.

Music, B.S.

Careers

Careers:
UVU's music degree programs focus on three principal areas of professional music studies: education, performance, and commercial music. Students interested in broader studies, inclusive of other educational disciplines, may pursue a liberal arts or integrated studies major. In addition to professional careers, music is also an area that offers highly flexible self-employment opportunities, such as freelance performing and recording, as well as private teaching. Coursework in music technology and entrepreneurship further enhances opportunities for students who choose to pursue freelance employment. These opportunities are very dynamic, rapidly responding to advancing technology and an open and diverse media market. See http://

Performance, B.M.

Requirements

The Bachelor of Music in Performance degree prepares students for performance-related work and studio teaching. In addition to standard courses that focus on performance skills, it includes courses relevant to the music industry such as entrepreneurship, music technology, and studio recording.

Total Program Credits: 121

General Education Requirements: 35 Credits

**Graduation Requirements:**

1. Completion of a minimum of 121 semester credits, 40 credits must be upper-division.
2. Overall grade point average of 2.0 (C) or above. MUSC 1150, MUSC 1160, MUSC 2150, MUSC 2160, MUSC 250R and MUSC 455R courses require a grade B or higher. All other MUSC courses require a C grade or higher.
3. Residency hours- minimum of 30 credit hours through course attendance at UVU, with at least 10 hours in the last 45 hours.
4. Completion of GE and specified departmental requirements, including a sophomore review and concert attendance requirements.
5. Successful completion of at least one Global/Intercultural course.

**Performance, B.M. Careers**

Careers:

UVU's music degree programs focus on three principal areas of professional music studies: education, performance, and commercial music. Students interested in broader studies, inclusive of other educational disciplines, may pursue a liberal arts or integrated studies major. In addition to professional careers, music is also an area that offers highly flexible self-employment opportunities, such as freelance performing...
Music

and recording, as well as private teaching. Coursework in music technology and entrepreneurship further enhances opportunities for students who choose to pursue freelance employment. These opportunities are very dynamic, rapidly responding to advancing technology and an open and diverse media market. See http://www.uvu.edu/music/why/index.html for more information.

Nursing

Mission Statement

Our mission is to provide quality nursing education, helping students to cultivate requisite knowledge, sound clinical judgment, and a foundation for lifelong learning, as they progress toward becoming competent, caring nurses in a complex and changing health care environment.

Values

1. We are committed to the learning and success of our students. Student success is a measure of our success as nurse educators.
2. We believe that caring nurses promote the health of body, mind, and spirit in individuals, families and communities.
3. We are committed to serving our local, state and global communities. We promote and maintain positive relationships with our community partners. We promote health by educating nurses committed to work and service in their community.
4. We are dedicated to student-centered teaching. We value evidence-based teaching strategies and active, collaborative, experiential learning. Teaching and learning are a partnership in which students are ultimately responsible for their learning, and accountable for their nursing actions.
5. We encourage the pursuit of excellence through life-long learning. We expect our graduates to utilize sound clinical judgment and evidence-based nursing actions.
6. We believe honor and integrity are essential to learning and for nursing practice, and we promote professional standards of practice and behavior.
7. We value collegial collaboration as well as the rights and responsibilities of academic freedom. We encourage thoughtful and civil discourse, recognizing that free exchange of informed ideas enhances individual and community decision-making.
8. We appreciate the diversity and the interconnectedness in our faculty, students, and in the communities in which we practice. We celebrate diversity within our community.

Accreditation

The Associate (ASN), Baccalaureate (BSN completion), and Master of Science in Nursing (MSN) programs are accredited by the Accreditation Commission for Education in Nursing (ACEN).

The ACEN can be reached at:

- Mailing Address:
  Accreditation Commission for Education in Nursing
  3343 Peachtree Road NE, Suite 850
  Atlanta, GA 30326
  Telephone: 404-975-5000
  Fax: 404-975-5020
  Email: info@acenursing.org
  Web Address: www.acenursing.org

Nursing Programs

Undergraduate nursing education includes an Associate in Science in Nursing (ASN) with Bachelor of Science in Nursing (BSN) completion program. Students seeking initial licensure as a registered nurse must apply for entry into the ASN program. Students accepted to the ASN program will matriculate into the BSN completion program, without the need for reapplication, upon successful completion of the ASN. In order to remain in the BSN completion program, students must obtain RN licensure and graduate with the ASN per department policy. Students seeking initial licensure in nursing should contact a pre-nursing advisor for additional program information and application processes. Licensed nurses should contact the Department of Nursing advisor for information regarding the BSN completion and Master of Science in Nursing programs.

The ASN program prepares the graduate to function individually as a member of the healthcare team in structured healthcare settings in which clients have common health problems. The BSN completion program prepares graduates to design, coordinate and manage healthcare, to assume leadership roles, to enter graduate education in nursing, and to develop leadership and management skills. The Master of Science in Nursing program prepares graduates as educators in both academic and clinical areas.

Information to consider, regarding the demands and performance requirements of nursing as a career, is available on our website at www.uvu.edu/nursing.
Admission Requirements

Admission to a nursing program is required in order to enroll in any nursing course. Admission to any of the nursing programs is by competitive application and is contingent upon satisfactory results of both a federal criminal background check and a drug screen. The Department of Nursing has sole discretion to deny acceptance based upon the information contained in either of these two reports. For students where English is a second language, admission is also contingent upon current TOEFL scores, which must be at or above the required minimum levels set by the Department of Nursing.

Please contact the appropriate advisors for information and current admission requirements. Also see our website at www.uvu.edu/nursing.

Course Descriptions

Nursing

Pre-Nursing advisors in LC 404 at 863-6484. After completing the 4 semesters of the ASN program, students would be eligible to graduate with an ASN and apply to take the NCLEX-RN exam. Graduates of the ASN program would be eligible to remain in the program, and seamlessly transition to the Bachelor of Science in Nursing (BSN) portion of the program. BSN completion takes an additional 2 full time semesters if students have also completed all the GE requirements, ZOOL 4400, and MATH 1040 or MATH 2040.

Total Program Credits: 70

Matriculation Requirements:

1. Acceptance into Nursing program (see Advisor)

Nursing, ASN

Requirements

The UVU Nursing Program is a student-centered engaged learning experience where faculty facilitates learning nursing care through simulation and patient care. The Associate in Science in Nursing w/BSN Completion (ASN) program prepares the graduate to function individually as a member of the healthcare team in structured healthcare settings in which clients have common health problems. Acceptance into the ASN program is by a competitive, point-based application process. Prerequisite courses must be completed before applying to the program. For more information on applying to the ASN program see our website at www.uvu.edu/nursing or contact the
Nursing, B.S.

Requirements

A bachelor of science in nursing degree prepares students to practice across all types of health care settings. A BSN provides the greatest opportunity for advancement in the nursing field. A BSN is also required for entry into most graduate nursing programs including nurse practitioner, certified nurse anesthetist, nursing educator, or nurse researcher. Students interested in the BSN would first need to complete the ASN program. Acceptance into the ASN program is by a competitive, point-based application process. Prerequisite courses must be completed before applying to the program. For more information on applying to the ASN program see ou website at www.uvu.edu/nursing or contact the Pre-Nursing advisors in LC 404 at 863-6484. After completing the 4 semesters of the ASN program, students would be eligible to graduate with an ASN and apply to take the NCLEX-RN exam. Graduates of the ASN program would be eligible to remain in the program, and seamlessly transition to the Bachelor of Science in Nursing (BSN) portion of the program. The BSN at UVU is a completion program and students who are not entering directly from the UVU ASN program must be licensed RNs prior to admission. For more information on entering the program if you are already an RN see the RN to BSN program at www.uvu.edu/nursing.

Online Degree Plan

Total Program Credits: 120

Graduation Requirements:

1. Completion of a minimum of 70 semester credits.
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. Residency hours—minimum of 20 credit hours through course attendance at UVU.
4. Completion of specified departmental requirements

Nursing, ASN

Careers

Careers:

A nurse is a member of the healthcare team, focused on caring for individuals, families, and communities. Nurses work to ensure that patients attain, maintain, or recover optimal health and functioning. Nurses assess, plan, implement, and evaluate care.

UVU nursing graduates work in a wide variety of settings with varied job opportunities including:

- Hospital: staff nurses, administrators, educators, case managers
- Long-term care centers: staff nurses, administrators, educators
- Hospice and home health care
- Schools, colleges/universities
- Health centers, clinics, and surgical centers
- Armed services
- Public health
- Diabetes educators
- Inpatient and outpatient psychiatric care

Related Careers

- Nursing Instructors and Teachers, Postsecondary
- Registered Nurses

Courses Catalog 2020-2021

UVU. www.uvu.edu

Maturitization Requirements:

1. Associate of Science in Nursing
2. RN licensure complete - Prerequisite coursework: ENGL 1010 or ENGH 1005; Math Quantitative Literacy Course: PSY 1100: CHEM 1110: NUTR 1020: ZOOL 2320: MICR 2060 with lab, ZOOL 2420 with lab.
3. All prerequisite courses must be completed prior to application. A final grade of C or higher is necessary in all classes except Math Quantitative Literacy
4. Course work must be on an official transcript and articulation into the UVU system by the end of the application period or the application will be considered incomplete
5. Pass/Fail or Credit/No credit grades and ACT scores are not accepted for prerequisite course work. (see Advisor for details)
6. Each application for acceptance into the program is for a specific semester only

Complete a minimum of 5 credits of adviser approved electives, a minimum of 2 from any upper-division nursing courses, not otherwise required for the Bachelor of Science degree.

RNs returning to complete BS in Nursing should contact the nursing advisor for requirements.

### Graduation Requirements:

1. Completion of a minimum of 120 semester credits.
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. Completion of GE and specified departmental requirements.
4. Residency hours—minimum of 30 credit hours through course attendance at UVU.
5. Successful completion of at least one Global/Intercultural course.

### Nursing, B.S.

#### Careers

**Careers**

A BSN degree prepares students to practice across all types of health care settings. A BSN provides the greatest opportunity for advancement in the nursing field. A BSN is also required for entry into most graduate nursing programs including nurse practitioner, certified nurse anesthetist, nursing educator, or nurse researcher.

Applicants who already have an RN and would like to receive a BSN please see the information for the RN-BSN program on our [website](#) or contact the nursing advisor at 801-863-6317.

### Related Careers

- Nursing Instructors and Teachers, Postsecondary
- Registered Nurses
Acceptance into the MSN program will be based on information from the following:

Admission Requirements

- Current licensure as an RN in Utah or eligible for RN licensure in Utah.
- Completion of an undergraduate course in statistics to include descriptive and inferential statistics.
- Application for admission to the MSN program.
- Overall undergraduate GPA of 3.2 or higher, or GPA of 3.2 or higher in last 60 semester hours of undergraduate coursework.
- Three professional letters of recommendation.

Accreditation

The Master of Science in Nursing program is accredited by the Accreditation Commission for Education in Nursing (ACEN), 3343 Peachtree Road NE, Suite 850, Atlanta, GA, 30326.

Program Description

The Master of Science in Nursing program prepares post-baccalaureate nursing students for advanced practice roles as nurse educators in academic settings and/or as clinical nurse educators in healthcare institutions. The program includes core courses essential to master-level nursing programs as well as courses designed to prepare nurses to assume roles as academic nurse educators and/or as clinical nurse educators. Program content focuses on: theoretical foundations of nursing education and leadership; tests and measurements of learning outcomes; curriculum development, implementation and evaluation; and academic and clinical teaching. Program courses provide skills and strategies for facilitation of learning in a variety of settings.

Admission Requirements

Acceptance into the MSN program will be based on information from the following:

- Baccalaureate degree in nursing from a program accredited by a recognized nursing accreditation agency.
- Current licensure as an RN in Utah or eligible for RN licensure in Utah.
- Completion of an undergraduate course in statistics to include descriptive and inferential statistics.
- Application for admission to the MSN program.
- Overall undergraduate GPA of 3.2 or higher, or GPA of 3.2 or higher in last 60 semester hours of undergraduate coursework.
- Three professional letters of recommendation.

**About Office of Teaching and Learning**

The mission of the OTL is to enable the enhancement of teaching and learning practice across the institution. This is achieved in four key ways:

- By providing meaningful faculty development opportunities, leading to certification and international recognition for teaching excellence
- By supporting the use and effective integration of learning technologies, including the University's learning management system (Canvas)
- By collaborating with faculty to design and redesign high quality learning experiences (courses, full programs, learning activities, and assessments)
- By providing tools and guidance for formative, constructive evaluation of teaching effectiveness

**Questions?**

Faculty with questions about online courses should contact 801-863-8255 or canvas_support@uvu.edu. Faculty with questions about Canvas can contact the OTL Lab at 801-863-6127, or email otllab@uvu.edu.

Organizational Leadership

Name: Organizational Leadership
Location: WB 134
Telephone: 801-863-8134
Email: Jeff.Peterson@uvu.edu
Web Address: uvu.edu/orgleadership
Chair: Jeff Peterson

Mission Statement

The Department of Organizational Leadership supports and drives forward the Vision of the Woodbury School of Business (WSB), which is (that) "...a community-engaged school of business that integrates teaching and scholarship, we aspire to be a school of choice and a leader in student development, entrepreneurship, global involvement, and innovative teaching."

We do this, as do all departments in the WSB, through...

- Quality instruction and student involvement
- Faculty and student scholarship
- Community outreach and engaged learning
- Integration and application of knowledge
- Social, ethical, cultural, and global literacy

Hospitality Management

Program Coordinator: Doug Miller

- Office: WB 203c
- Telephone: 801-863-8106
- Email: millerdo@uvu.edu

Career Opportunities

The Hospitality Management program prepares graduates for employment in one of the fastest growing segments of the nation’s economy. The additions of several new convention centers in the state have dramatically increased the need for hotel and restaurant facilities. Students are marketable in a wide range of hospitality and tourism areas such as: hotel, resort, and motel management; event planning; restaurant and institutional food service; and a number of other areas such as: cruise ship management, amusement park management, convention and visitor facilities, and gaming facilities.

The Hospitality Management program in the Woodbury School of Business offers a Bachelor of Science degree in Hospitality Management, as well as a Bachelor of Science degree in Business Management, with an Emphasis in Hospitality Management. Associate in Science and Associate in Applied Science degrees are also offered.

The Bachelor of Science in Hospitality Management degree offers the possibility for a student to choose one of four tracks: General Operations; Revenue Management, Sales, and Event Planning. The Hospitality program also offers a Minor in Event Planning.

Programs

Four degrees are available: Associate in Applied Science; Associate in Science Degree; a Bachelor of Science in Hospitality Management; and Bachelor of Science in Business Management with an Emphasis in Hospitality Management.

Human Resource Management

Program Coordinator: Bernd Kupka

- Office: WB 146n
- Telephone: 801-863-8125
- Email: Bernd.Kupka@uvu.edu

Career Opportunities

The Human Resource Management program prepares graduates for employment in one of the fastest growing fields in the nation’s economy. The State of Utah has designated what it characterizes as “Five Star” occupations—those that will have the highest growth in demand for new job openings over the next decade, one of which is Administrative Services Managers (of which HR managers are one group). Additionally, the US Department of Labor Statistics estimates that the job growth outlook for HR managers for the years from 2012 to 2022 is 13%.

In addition to the growth in HR employment, the quality of HR services is also a severe concern for many organizations. Currently, many HR departments lack crucial skills necessary for success. The Human Resource Management program will prepare students with a future-oriented, comprehensive HR education to be able to immediately contribute to the strategic goals of their prospective employers.

Programs

The Human Resource Management program in the Woodbury School of Business offers both a Bachelor of Science and Bachelor of Arts degree in Human Resource Management, as well as a Human Resource Management minor.
Course Catalog 2020-2021

Organizational Leadership

Hospitality Management, A.A.S.

Requirements

The Hospitality Management program in the Woodbury School of Business offers a Bachelor of Science degree in Hospitality Management (as well as supporting a Bachelor of Science degree in Business Management, with an Emphasis in Hospitality Management – listed elsewhere). Associate in Science and Associate in Applied Science degrees are also offered.

Event Planning, Minor

Requirements

The Minor in Event Planning will require eighteen credit hours of courses currently being offered. The minor provides undergraduate Woodbury Business students an official designation on their transcript, highlighting their specific qualifications in this area. The courses in the minor offer students the opportunity to learn event planning management techniques needed to successfully plan, manage, and execute events. Students who complete these classes will have a clear designation highlighting their preparation for this particular set of skills.

Human Resource Management, Minor

Requirements
The Department of Management in the Woodbury School of Business at Utah Valley University currently has a Bachelor of Science in Business Management with a track in HRM (within the General Business emphasis). The proposed BS/BA and Minor in Human Resource Management would strengthen the program offerings of the Woodbury School of Business. By structuring the degree requirements to enhance the curriculum, it would add rigor to the program and greater professional competence to graduates.

**Graduation Requirements:**

1. Completion of a minimum of 120 semester credits with at least 40 credit hours of upper-division classes.
2. Overall grade point average 2.0 or above with a minimum of 2.5 GPA in all Woodbury School of Business courses. No grade lower than a “C-“ in core and specialization courses.
3. Residency hours: minimum of 30 credit hours of business courses through course attendance at UVU, with at least 10 hours earned in the last 45 hours. At least 12 of the credit hours must be in Hospitality Management courses.
4. Completion of GE and specified departmental requirements. Students are responsible for completing all prerequisite courses.
5. Successful completion of at least one Global/Intercultural course.

**NOTE:** Students will be limited to 9 hours of upper-division credit until MATRICULATION is completed.

**Footnote**

* Students are required to complete My Educator, IM 2010, or IM 2600 with a grade of B- or higher.

**Hospitality Management, B.S.**

**Careers**

The Hospitality Management program prepares graduates for employment in one of the fastest growing segments of the nation’s economy. The additions of several new convention centers in the state have dramatically increased the need for hotel and restaurant facilities. Students are marketable in a wide range of hospitality and tourism areas such as: hotel, resort, and motel management; event planning; restaurant and institutional food service; and a number of other areas such as cruise ship management, amusement park management, convention and visitor facilities, and gaming facilities.

**Related Careers**

- Food Service Managers
- Lodging Managers

**Human Resource Management, B.A.**

**Requirements**

The HRM program will provide students with practical and applied skills, experience in applying those skills, and a variety of intellectual tools to prepare them for HRM careers in business, government, and non-profit organizations. The proposed classes, engaged pedagogy, and instructors will aim to prepare students for staffing organizations, setting and advising procedures for recruitment, interview, and placement. Additionally, students will be prepared for carrying out disciplinary action, tracking leave and absences, and ensuring the health, safety, and development of organizational employees. HR graduates will also be prepared to advise company management on labor law issues.

An Advanced Placement (AP) Mathematics Test with a score of 3 or higher

Complete one of the following: 3
- HIST 2700 US History to 1877 (3)
- and
- HIST 2710 US History since 1877 (3)
- HIST 1700 American Civilization (3)
- HIST 1740 US Economic History (3)
- POLS 1000 American Heritage (3)
- POLS 1100 American National Government (3)

Complete the following:
- PHIL 2050 Ethics and Values 3
- HLTH 1100 Personal Health and Wellness (2)
- or
- PES 1097 Fitness for Life 2

Distribution Courses:
- ECON 2020 Macroeconomics (fulfills Social/Behavioral Science credit) 3
- Biology 3
- Physical Science 3
- Additional Biology or Physical Science 3
- Humanities Distribution (any foreign language 202G/2020 class) 4
- Fine Arts Distribution 3

Elective Requirements:
- Complete 12 credits of any foreign language course 1010, 1020, 2010 sequence 12
- MGMT 481R Internship (1) 3
- Complete 1 credit numbered 1000 or higher 1

Graduation Requirements:
1. Completion of a minimum of 120 semester credits required in the BA degree; at least 40 credit hours must be upper-division courses.
2. Overall grade point average 2.0 or above with a minimum of 2.5 GPA in all Woodbury School of Business courses. No grade lower than a "C-" in core and specialization courses.
3. Residency hours: Minimum of 30 credit hours of business courses through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
4. Completion of GE and specified departmental requirements. Students are responsible for completing all prerequisite courses.
5. Successful completion of at least one Global/Intercultural course. 

NOTE: Students will be limited to 9 hours of upper-division credit until MATRICULATION is completed.

Human Resource Management, B.A.

Careers:
Human Resource (HR) professionals are in higher demand than ever in the USA and in Utah. As a trained Human Resource Management (HRM) specialist, you will have the opportunity to impact people’s and organizations’ lives very directly. You will give people/employees a chance to make a life for themselves, improve their careers, and build a future for their families. In companies, you will plan, direct, and coordinate human resources activities and staff of organizations, impact company bottom lines, help build communities, and improve the economic climate in the State of Utah and beyond. Typical jobs in HRM are generalists, total compensation specialists, training & development specialists, HR information systems specialists, staffing/recruiting specialists, and legal compliance officers. With a UVU degree as a Bachelor of Science or Bachelor of Arts in HRM, you will gain a competitive advantage in the
Organizational Leadership

job market through the practical acquisition of knowledge, skills, and professional connections in the HR field.

Philosophy and Humanities

Mission Statement

The UVU Department of Philosophy and Humanities is committed to the idea that logic and critical thinking are the core of all academic disciplines. The department engages in the critical study of the intellectual and creative underpinnings of the liberal arts curriculum. The humanities reflect on and interact with those creative enterprises that make us most human: art, architecture, music, and poetry. Philosophy engages theoretical and practical questions about reality and human experience in the life-long pursuit of truth and understanding.

In keeping with the democratic ideal of an educated citizenship, the department aims to provide the highest quality educational experience to prepare students for an increasingly complex and intellectually demanding society. The free exploration of ideas will expose students to a variety of perspectives on important issues; the critical examination of those ideas will impart the skills of reflection and decision-making.

The department seeks to develop in its students a set of skills and knowledge that is useful for all forms of reflection and investigation, relevant and transferable to myriad professions, and promoting of lifelong learning and intercultural awareness. The department focuses on the following: developing the practical skills of critical analysis and problem solving, and the reflection on one’s own ethics, values and beliefs; developing the skills of communication, through effective speech and clear, rigorous writing; imparting a wide variety of content, including knowledge of the history of philosophy and the humanities, an appreciation and understanding of human diversity, and a connection of these topics to practical life; imparting the basic skills of the liberal arts, including self-reflectiveness, intellectual curiosity, and creativity.

Degrees & Programs

Humanities, A.A.

Requirements

The discipline of humanities is the study of human intellectual and artistic creativity and what the resulting artistic forms reveal about the human experience. This field of study draws on other disciplines such as history, fine arts, literature, intellectual history, music, foreign languages, theology, and philosophy to see how the several artistic forms communicate and work together to give an in-depth record of the meaning of human life in the past and present. The discipline also emphasizes the relationship between the arts, culture, and society. A background in humanities is helpful in preparing for employment in education, business, government, civil and foreign service, tourism, and in preparation for graduate studies.

3. Residency hours—minimum of 20 credit hours through course attendance at UVU.
4. Completion of GE and specified departmental requirements.
5. For the AA degree, completion of 8 credit hours of course work from one language.

Humanities, A.A.

Careers:

Careers:

A background in humanities is helpful in preparing for employment in education, business, government, civil and foreign service, tourism, and in preparation for graduate studies. A list of career ideas might include: technical writing, education and outreach, public relations, internal communications, fund-raising, policy research and analysis, program planning, administration, information management, human resources, libraries, museums, and more.

Here are a few articles to help you think about your options, as well:

1) 11 Reasons to Major in the Humanities
2) The Value of the Humanities
3) Types of Jobs offered to those with Humanities Degrees

Related Careers

- Postsecondary Teachers, All Other

Humanities, A.S.

Requirements:

The discipline of humanities is the study of human intellectual and artistic creativity and what the resulting artistic forms reveal about the human experience. This field of study draws on other disciplines such as history, fine arts, literature, intellectual history, music, foreign languages, theology, and philosophy to see how the several artistic forms communicate and work together to give an in-depth record of the meaning of human life in the past and present. The discipline also emphasizes the relationship between the arts, culture, and society. A background in humanities is helpful in preparing for employment in education, business, government, civil and foreign service, tourism, and in preparation for graduate studies.

**Philosophy, A.A.**

**Requirements**

Interest in studying philosophy begins with the desire to engage life’s greatest questions: finding the meaning of human existence, making sense of reality and our place in the cosmos, giving systematic form to our ethical and political intuitions, explaining the history of human ideas, and other equally significant problems. Often students wonder how the study of philosophy can provide the foundation for successful and meaningful employment. Contrary to popular belief, a philosophy major is one of the best preparations possible for careers in a large number of different areas. An article in the London Times rightly called philosophy the “ultimate transferable work skill” insofar as it prepares students for a wide array of practical services. As a group, philosophy majors consistently score at or near the top on standardized tests, gain employment on graduation at higher than average rates, rank highly in median mid-career salary, and enjoy a well-earned reputation for rigorous thinking. In fact, the Association of American Colleges and Universities tells students, “Your specific choice of major matters far less than the knowledge and skills you gain through all your studies and experiences in college. In terms of jobs, employers don’t hire majors. They hire individuals with potential to succeed over the long term and add value to their companies or organizations.” The study of philosophy, one of the oldest and most rigorous disciplines, provides students with critical thinking, writing, and arguing skills necessary to succeed in today's competitive working environments.

*Students pursuing advanced degrees in Philosophy, including a PhD, will likely be looking for tenure-track teaching positions at colleges and universities. Most Philosophy students will go on to graduate school, but not just in Philosophy. Philosophy majors, for example, are the highest average scoring group on the LSAT, GMAT, and GRE. Studying Philosophy develops high-demand skills, like complex critical thinking and problem solving. Therefore, Philosophy graduates can also consider themselves well-prepared for a long list of careers and fields, such as:

- Law
- Advertising
- Higher Education
- Computer Sciences
- Human Resources
- Journalism
- Research Management
- Medicine
- Ethics Officers
- Public Policy
- Government
- Public Relations
- Publishing
- Religion & Ministry
- Non-profit/NGOs
- Grant Writing/Fundraising
- Finance

**Ethics, Certificate of Proficiency Requirements**

A student in the Ethics program is offered an innovative approach in correlating various disciplines with structured ethical research. The program offers students opportunities to enhance their capacity to enter their chosen professions, careers, and vocations as ethical leaders. Students will examine real world ethical issues in the context of various disciplines, a valuable credential for employment and further education.

UVU has had a vested interest in Interdisciplinary Ethics since the 1980s, offering prestigious programs such as Ethics Across the Curriculum and hosting the only Ethics Center in the USHE system. The undergraduate Ethics curriculum and the Center for the Study of Ethics have received repeated national recognitions for their innovative and influential programs, conferences, events, symposia, and lecture series that educate students and the community about contemporary ethical issues.

Environmental Studies, Minor

Requirements

Environmental Studies explores the complex links between human culture and the natural world. The program challenges students to critically examine both the ecological and social context of environmental issues and the numerous connections between natural and social systems, from local to global scales. It is undeniable that humans have a profound impact on the environment. To have the greatest positive influence, we must seek knowledge of the structure and function of natural systems, as well as an understanding of how culture affects the way we perceive nature.

**Environmental Studies, Minor**

**Careers:**

A minor in Environmental Studies is useful for students seeking academic or professional paths in public policy on the environment. Environmental professionals currently work for government agencies at local, state, and federal levels, and also in many careers in both the public and private sectors.

**Related Careers**

• Environmental Engineering Technicians

---

**Ethics, Minor**

**Requirements**

A student in the Ethics program is offered an innovative approach in correlating various disciplines with structured ethical research. The program offers students opportunities to enhance their capacity to enter their chosen professions, careers, and vocations as ethical leaders. Students will examine real world ethical issues in the context of various disciplines, a valuable credential for employment and further education.

UVU has had a vested interest in Interdisciplinary Ethics since the 1980s, offering prestigious programs such as Ethics Across the Curriculum and hosting the only Ethics Center in the USHE system. The undergraduate Ethics curriculum and the Center for the Study of Ethics have received repeated national recognitions for their innovative and influential programs, conferences, events, symposia, and lecture series that educate students and the community about contemporary ethical issues.

**Total Program Credits: 18**

**Matriculation Requirements:**

1. Admitted to a bachelor degree program at UVU.

**Discipline Core Requirements:** 6 Credits

| PHIL 3550 | Moral Philosophy | 3 |
| PHIL 481R | Internship | 3 |

**Elective Requirements:** 12 Credits

Complete 12 credits from the following:

| PHIL 130R | Ethics Forum (1.0)(Limited to a maximum of 3 credits) |
| PHIL 3010 | Media Ethics (3.0) |
| or COMM 3000 | Media Ethics (3.0) |
| PHIL 3450 | Philosophy of Childhood (3.0) |
| PHIL 3460 | The Ethics of Human/Animal Relationships (3.0) |

---

**Ethics, Minor**

**Careers**

The Ethics Minor and Certificate programs are designed to enhance and prepare students from all disciplines to deeply engage ethical questions. The courses are an ideal foundation for any student considering ongoing work or education in the fields of business, law, politics, education, public policy, medicine, clinical research, social work, security, criminal justice, and more.

**Related Careers**

• Philosophy and Religion Teachers, Postsecondary

---

**Gender Studies, Minor**

**Requirements**

The Gender Studies minor allows students to study the extent to which gender and gender relations are socially influenced. Students will examine the ways in which conceptions of masculinity and femininity directly impact social and political institutions and practices, cultural expressions (such as art, communication, media, literature, music and film), law, education, business, scientific inquiry, interpersonal relations, sexuality and family. The minor broadens students’ understanding of their chosen major and career path while facilitating the recognition of gender dynamics in their own lives.

**Total Program Credits: 18**

**Matriculation Requirements:**

1. Completion of 30 hours of credit.
2. Admitted to a bachelor degree program at UVU

**Discipline Core Requirements:** 6 Credits

Humanities, Minor

Requirements

The discipline of humanities is the study of human intellectual and artistic creativity and what the resulting artistic forms reveal about the human experience. This field of study draws on other disciplines such as history, fine arts, literature, intellectual history, music, foreign languages, theology, and philosophy to see how the several artistic forms communicate and work together to give an in-depth record of the meaning of human life in the past and present. The discipline also emphasizes the relationship between the arts, culture, and society. A background in humanities is helpful in preparing for employment in education, business, government, civil and foreign service, tourism, and in preparation for graduate studies.

Total Program Credits: 18

Matriculation Requirements:

1. Overall grade point average of a 2.0 (C) or better
2. Admitted to a bachelor degree program at UVU

Discipline Core Requirements: 3 Credits

Elective Requirements: 12 Credits

Humanities, Minor

Careers

Careers:

A background in humanities is helpful in preparing for employment in education, business, government, civil and foreign service, tourism, and in preparation for graduate studies. A list of career ideas might include: technical writing, education and outreach, public relations, internal communications, fund-raising, policy research and analysis, program planning, administration, information management, human resources, libraries, museums, and more.

Here are a few articles to help you think about your options, as well:

1) 11 Reasons to Major in the Humanities
2) The Value of the Humanities
3) Types of Jobs offered to those with Humanities Degrees

Related Careers

• Postsecondary Teachers, All Other

Philosophy, Minor

Requirements

Interest in studying philosophy begins with the desire to engage life’s greatest questions: finding the meaning of human existence, making sense of reality and our place in the cosmos, giving systematic form to our ethical and political intuitions, explaining the history of human ideas, and other equally significant problems. Often students wonder how the study of philosophy can provide the foundation for successful and meaningful employment. Contrary to popular belief, a philosophy major is one of the best preparations possible for careers in a large number of different areas.
An article in the London Times rightly called philosophy the "ultimate transferable work skill" as it prepares students for a wide array of practical services. As a group, philosophy majors consistently score at or near the top on standardized tests, gain employment on graduation at higher than average rates, rank highly in median mid-career salary, and enjoy a well-earned reputation for rigorous thinking. In fact, the Association of American Colleges and Universities tells students, "your specific choice of major matters far less than the knowledge and skills you gain through all your studies and experiences in college. In terms of jobs, employers don’t hire majors. They hire individuals with potential to succeed over the long term and add value to their companies or organizations." The study of philosophy, one of the oldest and most rigorous disciplines, provides students with critical thinking, writing, and arguing skills necessary to succeed in today’s competitive working environments.

Total Program Credits: 18

Matriculation Requirements:

1. Enrollment at Utah Valley University
2. Overall grade point average of a 2.0 (C) or better.
3. Admitted to a bachelor degree program at UVU.

Discipline Core Requirements: 18 Credits

Complete one of the following: 3

PHIL 2110 Ancient Greek Philosophy WE (3.0)

or

PHIL 2150 Early Modern Philosophy (3.0)

Complete 15 additional credit hours of philosophy courses (9 credit hours must be 3000 level or above; no more than 6 credit hours may be at the 1000 level; Philosophy 2050 does not count for this requirement.)

Philosophy, Minor

Careers

Students pursuing advanced degrees in Philosophy, including a PhD, will likely be looking for tenure-track teaching positions at colleges and universities. Most Philosophy students will go on to graduate school, but not just in Philosophy. Philosophy majors, for example, are the highest average scoring group on the LSAT, GMAT, and GRE. Studying Philosophy develops high-demand skills, like complex critical thinking and problem solving. Therefore, Philosophy graduates can also consider themselves well-prepared for a long list of careers and fields, such as:

- Law
- Advertising
- Higher Education
- Computer Sciences
- Human Resources
- Journalism
- Research Management
- Medicine
- Ethics Officers
- Public Policy
- Government
- Public Relations
- Publishing
- Religion & Ministry
- Non-profit/NGOs
- Grant Writing/Fundraising
- Finance

Religious Studies, Minor

Requirements

The Religious Studies minor fosters and facilitates an interdisciplinary approach to the academic study of religion. Due to its influential role at the local, national, and international levels, religion requires careful study utilizing academic methods employed in the examination of other cultural institutions. This includes the study of the history, theology, literature, folklore, etc., of various religions in an effort to study religion as a cultural phenomenon. The program is intended to serve our students and community by deepening our understanding of religious beliefs and practices in a spirit of open inquiry. Its aim is neither to endorse nor to undermine the claims of religion, but to create an environment in which various issues can be engaged from a variety of perspectives and methodologies.

Total Program Credits: 21

Matriculation Requirements:

1. Completion of 30 hours of credit
2. Admitted to a bachelor degree program at UVU.

Complete 12 additional credits of Philosophy course work, at least 9 of which must be upper-division (excluding those courses taken to fulfill categories listed above).

**Elective Requirements:** 47 Credits

- One Foreign Language
  - 16 Credits
- Any course 1000 or higher; 15 credits must be upper-division
  - 31 Credits
Graduation Requirements:

1. Completion of a minimum of 120 semester credits.
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. Residency hours—minimum of 30 credit hours through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
4. Completion of GE and specified departmental requirements.
5. Completion of 40 hours or upper-division credit.
6. For the BA degree, completion of 16 credit hours of course work from one language to include the 1010, 1020, 2010, and 202G/2020 levels or transferred equivalents.
7. Successful completion of at least one Global/Intercultural course.

Note: It is recommended that students planning on earning a Baccalaureate Degree in Philosophy take a foreign language, preferably French or German, in their Freshman and Sophomore academic years. PHIL 120R, PHIL 290R, PHIL 295R, PHIL 400R, PHIL 452R, PHIL 450R, and PHIL 451R can be repeated for credit.

Philosophy, B.A.

Careers

Students pursuing advanced degrees in Philosophy, including a PhD, will likely be looking for tenure-track teaching positions at colleges and universities. Most Philosophy students will go on to graduate school, but not just in Philosophy. Philosophy majors, for example, are the highest average scoring group on the LSAT, GMAT, and GRE. Studying Philosophy develops high-demand skills, like complex critical thinking and problem solving. Therefore, Philosophy graduates can also consider themselves well-prepared for a long list of careers and fields, such as:

- Law
- Advertising
- Higher Education
- Computer Sciences
- Human Resources
- Journalism
- Research Management
- Medicine
- Ethics Officers
- Public Policy
- Government
- Public Relations
- Publishing
- Religion & Ministry
- Non-profit/NGOs
- Grant Writing/Fundraising
- Finance

Related Careers

- Philosophy and Religion Teachers, Postsecondary

Philosophy, B.S.

Requirements

Interest in studying philosophy begins with the desire to engage life’s greatest questions: finding the meaning of human existence, making sense of reality and our place in the cosmos, giving systematic form to our ethical and political intuitions, explaining the history of human ideas, and other equally significant problems. Often students wonder how the study of philosophy can provide the foundation for successful and meaningful employment. Contrary to popular belief, a philosophy major is one of the best preparations possible for careers in a large number of different areas. An article in the London Times rightly called philosophy the “ultimate transferable work skill” insofar as it prepares students for a wide array of practical services. As a group, philosophy majors consistently score at or near the top on standardized tests, gain employment on graduation at higher than average rates, rank highly in median mid-career salary, and enjoy a well-earned reputation for rigorous thinking. In fact, the Association of American Colleges and Universities tells students, “[y]our specific choice of major matters far less than the knowledge and skills you gain through all

your studies and experiences in college. In terms of jobs, employers don’t hire majors. They hire individuals with potential to succeed over the long term and add value to their companies or organizations.” The study of philosophy, one of the oldest and most rigorous disciplines, provides students with critical thinking, writing, and arguing skills necessary to succeed in today’s competitive working environments.

Physics

Mission Statement

The whole universe is the topic for study in physics: no facet is too small or too big to be considered. Physics is the assembly and application of the rational rules by which nature operates. Every action is played out according to its rules. Physicists seek to discover and learn these rules and often apply them in solving problems in other scientific fields such as astronomy, chemistry, biology, geology, medicine, engineering, and in many areas of common human experience. Physicists have been extraordinarily successful in the development of modern industries, including electronics, optics, computer science, transportation, and energy. Physicists are valued for their ability to rationally approach complex problems and to construct practical solutions. They find fulfilling and satisfying employment not only in research and teaching, but in business, industry, consulting and government. Typically half of all BS Physics degree recipients enter the work force immediately in such occupations as those just listed, while the rest continue on to graduate school, not only in physics, but in astronomy, geology, engineering, electronics, optics, computer science, medicine and even law or business programs.

Our department also has exceptional astronomy faculty, all actively engaged contemporary problems of interest. They have been very successful in preparing students for graduate work in astronomy and astrophysics.

Physics at UVU is a very personal endeavor. The small size of our department means that a physics major will benefit by working closely with faculty and fellow students. The faculty will often act as personal tutors and mentors, providing opportunities in research and problem solving. Access to computing facilities and many types of research equipment is available to physics students at UVU. Our program seeks to match our students’ interests and meet the requirements of future employers.

In addition to a sound understanding of basic physics and problem solving, UVU Physics students gain skills in computational methods, numerical analysis and computer programming, instrumentation, data collection and analysis, electronics, writing, and presentation skills.

The Physics Department also serves the general student body, teaching critical thinking and quantitative reasoning skills, and the principles of physics, to those who will benefit from a knowledge of the workings of nature and the unique approach to problem solving physics provides, in their own particular fields of study and in their future careers.

Degrees & Programs

Physics, Minor

Requirements
Must be admitted to a bachelor degree program at UVU. A minor in physics represents a substantial investment in mastering the basics of physics and gaining suitable problem solving skills that may then be applied to other disciplines. The minor requires 20 credit hours of physics credit.

Total Program Credits: 20

Matriculation Requirements:
1. Admitted to a bachelor degree program at UVU.

Discipline Core Requirements: 20 Credits

Graduation Requirements:

1. A minimum grade of "C" must be earned in all minor courses.

Physics, Minor

Careers

A minor in physics can contribute to nearly any career, from scientist to teacher, from businessman to artist. A minor in physics establishes a foundation the principles by which nature functions and gives the student skills in rational problem solving in a manner not reproduced in other major programs.

Related Careers

- Natural Sciences Managers
- Physicists
- Physics Teachers, Postsecondary
- Secondary School Teachers, Except Special and Career/Technical Education

Physics Education, B.S.

Requirements

Prepares the student to teach high school physics and AP physics. The program allows for those interested to supplement their studies with extra courses in physics or other science through elective upper division credit. A seminar course provides the student with exposure to careers in physics.

Total Program Credits: 120

Matriculation Requirements:

1. Students are admitted directly to the Baccalaureate degree program in Physics Education upon acceptance to the Secondary Education Program.
2. Students must obtain the departmental Advisor's signature on an approved program plan prior to enrollment in their second semester of study.

Secondary Education Requirements:

1. ACT exam minimums: Composite 21, English 20, Math 19; or SAT exam minimums: Critical Read /Math 1000, with Math and Reading scores of 450; or

If student has a bachelor degree or higher, he/she does not need to meet this testing requirement.
2. GPA of 3.0 or higher with no grade lower than a C in content area courses.
3. Completion of all General Education requirements and the majority of content area courses.
4. Pass LiveScan Criminal Background Check.

Emphasis Requirements: 8 Credits

Complete 8 credits of upper division electives. 8

## Graduation Requirements:

1. Completion of a minimum of 120 semester credits with a minimum of 40 upper-division credits.
2. Overall Grade of 3.0 (B) or above with no grade lower than a C or better in major required content courses and no grade lower than a B- in Licensure and Methods courses.
3. Residency hours - minimum of 30 credit hours through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
4. Completion of GE and specified departmental requirements.
5. A minimum of 52 credit hours must be in the major with a minimum of 20 credits taken at UVU. A minimum of 24 chemistry and physics credits must be upper-division.
6. Successful completion of at least one Global/Intercultural course.

## Physics, B.S.

### Related Careers

- Physics Teachers, Postsecondary
- Education Teachers, Postsecondary
- Secondary School Teachers, Except Special and Career/Technical Education

### Requirements

A Bachelor's degree is physics provides the student with an understanding of the laws of nature and with the experimental and analytical techniques necessary to describe and solve problems in physical systems. The degree is most useful in preparing students for further graduate study in physics, astronomy, engineering or other science. However physics BS degree recipients have also entered graduate programs in law and medicine and other diverse programs. Those not intending to pursue advanced degrees find successful employment in a variety of careers, including education, computer science, electronics and related industries and more.

---

### Graduation Requirements:

1. Completion of a minimum of 120 semester credits.
2. Overall grade point average of 2.0 (C) or above with no grade lower than a "C" in core and elective requirement courses.
3. Residency hours—minimum of 30 credit hours through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
4. Completion of GE and specified departmental requirements.
5. Successful completion of at least one Global/Intercultural course.

---

### Footnotes:

1-Suggested elective option for the student intent on continuing physics studies in graduate school.

2-Strongly recommended for inclusion in any elective option.

---

### Physics, B.S.

#### Careers

Those pursuing advanced physics, or other advanced scientific degrees find employment in federally funded research labs, academic research institutions, industrial research laboratories, and in medical physics facilities such as hospitals and imaging centers. Those that terminate their education with a bachelor's degree find fulfilling careers in industry, engineering, education or government service. Frequently terminal-bachelor careers are focused in computer science, electronics or sciences involving precise measurements.

Program Description

The Master of Public Service (MPS) degree at UVU develops the next generation of public service administrators. The MPS offers students an applied and engaging public sector education with broad based knowledge, skills, and abilities in public service administration. The interdisciplinary curriculum focuses on managing, leading, and administrating vital public services and public safety functions with an emphasis on ethical considerations, communications, strategic planning, public policy issues, and research methods.

The MPS requires 36 semester hours of graduate course work; currently offered all online.

Admission Requirements

Bachelor degree holders with at least a 3.0 GPA cumulative or last 60 credit hours may apply. Potential students must apply for admission by completing the online MPS Graduation School Application. To be accepted, students must complete the following:

- Submit all official transcripts.
- Provide two letters of recommendation.
- Submit resume.
- Submit answer to essay questions.

Deadlines and current application requirements are posted on the MPS website; www.uvu.edu/mps.

Degrees & Programs

Public Service, M.P.S.

Requirements

The Master of Public Service at Utah Valley University is an applied inter-disciplinary professional master’s degree aimed at preparing public service administrators in emergency services and criminal justice. This graduate degree provides an in-depth education of the science and praxis of administering vital public services, public safety functions, ethical considerations, leadership, and strategic communications, along with issues in emergency management, civil security/resiliency, public works, transportation, critical infrastructure protection, post-disaster humanitarian response, pandemics, strategic planning, public health, and public policy issues.

Online Degree Plan

Total Program Credits: 36

Matriculation Requirements:

1. A 3.0 cumulative GPA from the institution where the undergraduate degree was awarded or a 3.0 GPA calculated on the last 60 semester hours (90 quarter hours) from the institution where the undergraduate degree was awarded.

2. A bachelor’s degree from a regionally-accredited college/university, a nationally accredited program, or an international college or university recognized by a Ministry of Education in one of the following or related fields:

- Emergency Services
- Criminal Justice/Law Enforcement, Forensic Science
- Political Science
- Public and Community Health
- Aviation Science
- Emergency Management/Homeland Security
- Emergency Medical Services
- Business Administration, Organizational Management
- Environmental Science
- Public Admin/Public Management
- Social Science
- Technology Management
3. Graduate School Application.
4. Official transcripts from all attended institutions of higher education.
5. Two letters of recommendation.
6. Admissions Essay

1. A minimum cumulative GPA of 3.0 or higher must be maintained within the program.
2. All course work must be completed with a "B" or higher.

Footnotes
* Applicants with a bachelor's degree in other fields may be admitted if they have at least two years of public services experience and completed undergraduate courses with a B grade or better. These applications are handled on a case-by-case basis.

Public Service, M.P.S.

Careers

A Master of Public Service (MPS) will prepare students from a variety of backgrounds (e.g., Criminal Justice, Emergency Services, Forensic Science, Aviation Science, Public and Community Health, Environmental Science, Public Works) for careers in the public sectors at the local, state, and/or national level. The core curriculum will educate the student in the functions/roles/responsibilities of government. Graduates

### Advisors:

Please visit [https://www.uvu.edu/publichealth/advising/index.php](https://www.uvu.edu/publichealth/advising/index.php) for advisor contact information.

Courses in the Public and Community Health area of study lead to possible careers in community health education and promotion, school health, health care management, and other community health and human service administration.

Students in the Department of Public and Community Health may receive an Associate in Science or Arts with an emphasis in Community Health; an Associate in Science in Health Sciences; an Integrated Studies Bachelor of Science or Arts with a Community Health Emphasis; a Bachelor of Science in Community Health in one of the following areas: Community Health Emphasis, School Health Education Emphasis, Health Services Administration; or a Health Minor with an emphasis in Community Health Education or School Health Education.

The Public and Community Health program at UVU provides support courses for General Education, the Elementary Education program, and the Integrated Studies program. The department is committed to provide course work that will enable students to complete an Associate in Science or Associate in Arts Degree with a pre-major in Community Health, and that can be transferred to other institutions.

Health Sciences, A.S.

Requirements
The Associate of Science (AS) in Health Sciences will provide students who are undecided on which health program they will pursue an opportunity to complete an AS degree that includes some of the prerequisites for the BS degrees in health profession programs offered by Utah Valley University (UVU), and many of the health degrees offered across the USHE system. This Associate of Science in Health Sciences will allow the student to continue their education at UVU and other USHE schools in the areas of biology, chemistry, exercise science, and other health and science BS degrees. The degree includes instruction in medical terminology, physiology, anatomy, and other areas that will give the students a realistic overview of the health sciences. The Associate of Science in Health Sciences is transferrable to other colleges and universities and can be used as the foundation for moving on to a variety of health related disciplines preparing students to become a health professional.

School Health Education, B.S.

Careers:
The Secondary Education School Health Education Bachelor of Science degree, endorses students to teach Health in the Jr. High and High School setting. Students earn a teaching License for the State of Utah.

Related Careers
- Education Teachers, Postsecondary
- Middle School Teachers, Except Special and Career/Technical Education
- Secondary School Teachers, Except Special and Career/Technical Education
Secondary Education

The UVU teacher education initial licensure program is accredited by the Association for Advancing Quality in Educator Preparation (AAQEP) and Northwest Commission on Colleges and Universities, and approved by the Utah State Board of Education.

**Autism Studies, Minor**

This minor can be earned in conjunction with any Bachelor degree major that UVU offers and consists of 19 credit hours. The Minor in Autism Studies provides a broad overview of the autism spectrum disorder. Courses cover the lifespan and the broad spectrum of autism. This minor includes intervention supports and behavior management techniques.

**Career Opportunities**

The Secondary Education program prepares teacher candidates to teach in grades 7-12. Students in this program will choose from a variety of subject areas where they can become content experts. Students will also have the opportunity to work with children in local school districts.

The UVU teacher education initial licensure program is accredited by the Association for Advancing Quality in Educator Preparation (AAQEP) and Northwest Commission on Colleges and Universities, and approved by the Utah State Board of Education.

**Special Education Program**

The Secondary Education program prepares teacher candidates to teach in grades 7-12. Students in this program will choose from a variety of subject areas where they can become content experts. Students will also have the opportunity to work with children in local school districts.

The UVU teacher education initial licensure program is accredited by the Association for Advancing Quality in Educator Preparation (AAQEP) and Northwest Commission on Colleges and Universities, and approved by the Utah State Board of Education.

**Autism Studies, Minor**

Career opportunities include working with, or interacting with, those who have an Autism Spectrum Disorder (ASD). This could include working in supervisory positions, overseeing ASD adults, educators who may have students with an ASD diagnosis in their classrooms, counselors and medical professionals, or emergency services personnel.

**License**

Students seeking secondary school licensure in approved content areas complete a major in that area and required coursework in Secondary Education to qualify for a Utah State Professional Educator License for grades 7-12. Post BS/BA students seeking a secondary teaching license complete education course requirements and content area methods courses to qualify for a Professional Educator License. Post BS/BA must be in a compatible major from a regionally accredited institution. Baccalaureate degrees (BS and BA) are granted through the content area department and not through the School of Education.

Students seeking Special Education licensure complete required coursework in Spanish Education to qualify for a Utah State Professional Education Licensure for grades K-12.

**Certificates/Degrees**

Mission Statement

The UVU School of Education prepares educators and clinicians to have a positive impact through meaningful innovation, engaged pedagogy, rigorous preparation, inclusion and diversity, and transformative communities.

Professional Teacher Education Program

The Secondary Education program prepares teacher candidates to teach in grades 7-12. Students in this program will choose from a variety of subject areas where they can become content experts. Students will also have the opportunity to work with children in local school districts.

The UVU teacher education initial licensure program is accredited by the Association for Advancing Quality in Educator Preparation (AAQEP) and Northwest Commission on Colleges and Universities, and approved by the Utah State Board of Education.

Special Education Program

The Professional Special Education Teacher Education Program at Utah Valley University is designed to prepare quality, entry-level candidates for teaching students with mild to moderate disabilities in special education programs grades K-12. Students successfully completing the Teacher Education Program graduation and licensure requirements will receive a BS in Special Education and a Level I Utah Professional Teaching License.

Through electives, students can choose to specialize in concentration areas such as Autism Studies or Secondary Special Education Mathematics. Additionally, students can choose to earn a dual license in Special Education and Elementary Education grades K-8 or Secondary Education.
Professional Special Education Teacher Education Program
A Baccalaureate of Science Degree (BS) may be earned in Special Education.

Autism Studies, Minor
A minor may be received in Autism Studies.

Admission & Retention

Professional Secondary Teacher Education Program
Admission to the Secondary Education Program is required for enrollment in professional studies level courses. Admission criteria:

1. ACT exam minimums: composite score of 21, English 20, Math 19; or SAT exam minimums: Critical Read/Math 1000, with Math and Reading scores of 450; or pass ENGL 2010 or MATH 1030 (35), MATH 1040 (45), or MATH 1050 (55) respectively with a C or better. If student has a bachelor degree or higher, he/she does not need to meet this testing requirement;
2. GPA of 3.00 or higher;
3. Completion of all General Education requirements and 70% of content area courses;
4. No grade lower than a C in content area courses; and
5. A LiveScan Criminal Background check. Applicants are accepted for fall and spring into the Secondary Teacher Education Program and for fall for the Special Teacher Education Program after meeting entrance requirements.

Professional Special Education Teacher Education Program
Admission to the Special Education Program is required for enrollment in professional studies level courses. Admission criteria:

1. ACT exam minimums: composite score of 21, English 20, Math 19; or SAT exam minimums: Critical Read/Math 1000, with Math and Reading scores of 450; or pass ENGL 2010 or MATH 1030 (35), MATH 1040 (45), or MATH 1050 (55) respectively with a C or better. If student has a bachelor degree or higher, he/she does not need to meet this testing requirement;
2. GPA of 3.00 or higher;
3. Completion of all General Education and pre program coursework;
4. A LiveScan Criminal Background check. Applicants are accepted for fall and spring into the Secondary Teacher Education Program and for fall for the Special Education Program after meeting entrance requirements.

*Please contact the Secondary / Special Education Advisor for the current admission requirements.

To continue in the program, students are expected to maintain all program standards. They must maintain expected levels of competence in all coursework, field work, and student teaching with all course grades at or above a B- and a program GPA of 3.00 or higher. Additionally, teacher candidates are expected to adhere to standards of personal integrity, responsibility, and citizenship commonly expected of professional educators.

Secondary Education, Licensure

**Requirements**

The Professional Teacher Education Program at Utah Valley University is designed to prepare quality, entry level candidates for teaching in secondary education programs grades 7-12.

All students who matriculate into the professional licensure program must have a major in an approved content area. Students seeking licensure in approved content areas complete a major in that area and required coursework in Secondary Education to qualify for a Level I Utah State Professional Educator License for grades 7-12.

Baccalaureate degrees (BS and BA) are granted through the content area department and not through the School of Education. Licensure is granted through the School of Education Program.

To continue in the teacher education program, students are expected to maintain all program standards. They must maintain expected levels of competence in all coursework, field work, and student teaching with all course grades at or above a B- or higher. Additionally, teacher candidates are expected to adhere to standards of personal integrity, responsibility, and citizenship commonly expected of professional educators.

**Total Program Credits: 32**

Program Description

The Master of Social Work (MSW) is designed to educate and prepare students for a career at an advanced level in the social work profession. The MSW program will prepare students to become a Licensed Clinical Social Worker (LCSW), qualifying them for a wider range of employment opportunities (mental health, medical social work, child welfare, etc.) working with various populations (children, adolescents, adults, elderly, disabled, etc.). The MSW program has three different specializations: Addictions, Mental Health, and Engaging with Diverse Populations, which will focus on the Latino, Polynesian, and Refugee communities. These areas of focus are projected to be significant areas of growth within the social work field over the next decade and beyond.

This dynamic, two-year full-time program offers required courses in the areas of social work practice, human behavior and social environment, social welfare policy and analysis, social work with Latino, Pacific Islanders, and other Communities of Color, social work research methods, addictions, and a capstone course. Upon graduation, students will have also completed approximately 1,000 hours of field practicum experience. The program offers electives in addictions, mental health, and engaging with diverse populations.

Admission Requirements

Potential students must apply for admission into the program. To be accepted, students must have completed a Bachelor's degree, preferably in Psychology, Social Work, or a related area. However, applicants who have a Bachelor's degree in another field may be admitted to the program if they can demonstrate significant work or volunteer experience in the Human Services field. All applicants are required to complete SW 1010, BESC 3010, and BESC 3020 or equivalent courses outside of UVU.

Strategic Management and Operations

Students graduating from the Department of Strategic Management and Operations have many opportunities in private industry, government, and entrepreneurship fields. The Woodbury School of Business offers Bachelor degrees, Associate degrees, an Associate in Applied Science degree and Certificates of Proficiency.

Faculty in the Department of Strategic Management and Operations Department have real-world expertise they bring to the classroom. Internships are an integral part of a student's education. Students are able to get hands-on experience which gives them the combination of theory and practice in a real-world setting. Graduates of the UVU Strategic Management and Operations program are well prepared to work in multiple aspects of business or to go on to graduate school for additional education.

Career Opportunities

Many opportunities exist for those trained in strategic management and operations in areas such as private industry, government, and entrepreneurship. Possible jobs in domestic and international businesses include business managers, business executives, operations managers, health service administrators, human resources managers, job benefits and analysis specialists, management analysts, office managers, and purchasing managers.

Job Outlook

Job demand is high, particularly in larger metropolitan areas; and the employment outlook is excellent.

Programs

**Graduation Requirements:**

1. Completion of a minimum of 16 credits.
2. Overall grade point average of 2.0 (C) or above.
3. Residency hours -- minimum of 6 credit hours through course attendance at UVU.

Note: The Certificate in Entrepreneurship provides students from all majors outside the Woodbury School of Business a program by which they can add the mindset and basic competencies provided in a formal entrepreneurship program without abandoning their chosen field of study. Coursework includes principles of small business development, financing, technology-based opportunity identification, law, and personal entrepreneurial development.
Entrepreneurship, Certificate of Proficiency

Careers

Many opportunities exist for those trained in business management (entrepreneurship) in private industry and through entrepreneurship. Possible jobs in developing other entrepreneurs’ businesses include agents, business managers, business executives, operations managers, health service administrators, human resource managers, job benefits and analysis specialists, management analysts, office managers, and purchasing managers. Possible jobs open as self-employed entrepreneurs are limited only by imagination and skills brought to the market.

Process Improvement and Operations CA, Certificate of Proficiency

Requirements

The Utah Leads CP in Process Improvement and Operations CA is aimed at producing career-enhanced graduates in operations management to meet the growing demand for employees with this skill set. Students can enhance their careers through a program of study consisting not only of a theoretical base in making good business operating decisions, but the program also takes a hands-on, practical approach to learning. Practical knowledge is gained by not only offering, but requiring, each graduate to sit for a professional industry certification exam in lean management, as well as other applicable, hands-on projects with industry partners applying skills and tools learned throughout their coursework. Further, students will benefit from UVU’s program connection with industry leaders who advise program directors regarding course offerings and course content that is most valuable on the job market. Students will also be provided multiple opportunities to interact and network with industry partners on in-class projects and in-class guest speakers. Students will gain knowledge in core topics such as analytics for business decisions, business decision optimization, supply chain management, process improvement tools and methodologies, and quality management tools and techniques (lean, six sigma, theory of constraints, etc.). Graduates will be prepared to enter the job market as operations professionals in a variety of industries such as technology, healthcare, supply chain, manufacturing, distribution, and logistics.

Business Management - General Business Emphasis, B.S.

Careers

Many opportunities exist for those trained in business management in private industry, government, and through entrepreneurship. US Dept of Labor reports estimate a 12% growth through 2022 in jobs requiring Bachelor’s degrees – such as those offered by the Management Department. Possible jobs in domestic and international businesses include agents, business managers, business executives, operations managers, health service administrators, human resources managers, job benefits and analysis specialists, management analysts, office managers, and purchasing managers. Job demand is high, particularly in larger metropolitan areas and the employment outlook is excellent. A current employer survey by the National Association of Colleges and Employers showed that 86% expected to hire graduates with BS degrees in business.

Graduation Requirements:

1. Completion of a minimum of 120 semester credits required in the BS degree; at least 40 credit hours must be upper-division courses.
2. Overall grade point average 2.0 or above with a minimum of 2.5 GPA in all Woodbury School of Business courses. No grade lower than a "C-" in core and specialization courses.
3. Residency hours: Minimum of 30 credit hours of business courses through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
4. Completion of GE and specified departmental requirements. Students are responsible for completing all prerequisite courses.
5. Successful completion of at least one Global/Intercultural course.

NOTE: Students will be limited to 9 hours of upper-division credit until Matriculation is completed.

Footnote

1- My Educator score of 80% or better; IM 2010 or IM 2600 with a grade of B- or higher.

Business Management - Hospitality Management Emphasis, B.S.

Careers:

Many opportunities exist for those trained in business management in the hospitality, tourism, and restaurant industries. US Dept of Labor reports estimate a 12% growth through 2022 in jobs requiring Bachelor’s degrees – such as those offered by the Business Management - Hospitality Management program. Possible jobs exist in domestic and international venues in these industries including business managers, business executives, operations managers, human resources managers, management analysts, office managers, and purchasing managers. Job demand is high, particularly in larger metropolitan areas and the employment outlook is excellent.

Business Management - International Business Emphasis, B.S.

Careers

Many opportunities exist for those trained in business management and an emphasis in international business in private industry and through entrepreneurship. US Dept of Labor reports estimate a 12% growth through 2022 in jobs requiring Bachelor's degrees – such as those offered by the Management Department. Possible jobs in international businesses include agents, business managers, business executives, operations managers, health service administrators, human resources managers, job benefits and analysis specialists, management analysts, office managers, and purchasing managers. Job demand is high, particularly in larger metropolitan areas and the employment outlook is excellent. A current employer survey by the National Association of Colleges and Employers showed that 86% expected to hire graduates with BS degrees in business.

Related Careers

The Department of Student Leadership & Success Studies promotes holistic student development and advances students to higher levels of student success, persistence and completion, leadership development, professional preparation, and lifelong learning.

Programs & Degrees

The Department of Student Leadership & Success Studies values student-centered learning and focuses on assisting students exploring the direction of their academic careers, seeking flexibility in degree choices, or undertaking an enhanced college experience.

Programs Offered

- AA in University Studies
- AS University Studies
- BA University Studies
- BS University Studies

Certificates Offered

- General Education
- Leadership for Personal & Social Impact

University College

University College serves a unique role and mission within Utah Valley University. Based on a national model, the name University College signifies opportunity for student success through curricular and co-curricular offerings, academic services, and innovative programs. University College welcomes students at present levels of academic achievement and challenges them with higher expectations. The programs and departments of Literacies and Composition, Student Leadership & Success Studies, Developmental Mathematics, English Language Learning, the University College Advisement Center, Academic Standards, Writing Center, Academic Tutoring, and the Math Lab promote interdisciplinary partnerships as students transition into university academics.

University Studies, A.A.

Careers

The AS/AA in University Studies is an Associate's degree that allows for customization and flexibility in a student's educational path. While not specifically focused on a particular major of focus, the AS/AA University Studies requires completion of General Education coursework along with 25 credits of electives. These electives allow students to customize their curriculum to their individual needs, explore various major and career opportunities, and utilize credits toward graduation that may span a broad variety of topics. This flexibility lends itself to multiple career opportunities or progression into a variety of BA/BS options.

General Education, Certificate of Completion

Requirements

The Certificate of Completion in General Education is comprised of the courses that are required for completion of the general education requirements at Utah Valley University. The purpose of general education at UVU is a shared academic experience that provides students with the opportunity to explore new subjects, intellectual traditions, and perspectives; expands their awareness of the wider world; and prepares them with foundational knowledge, skills, and abilities that are expanded on in their disciplines of study in order to be successful learners and professionals positioned to contribute to their broader communities. When a student completes the requirements for the Certificate of Completion in General Education at UVU, the certificate is accepted at other USHE institutions as completing their General Education requirements.

University Studies, B.A.

Requirements

The BA/BS is designed to meet the academic and professional objectives of learners whose needs are not addressed through existing degree programs. The degree assists learners in developing essential skills valued by employers and graduate schools (e.g., applied learning, critical thinking, written and oral communication, teamwork, ethical reasoning, and global understanding) within the framework of a larger discipline. Learners will complete a structured yet customized set of upper division courses under the guidance of an advisor and faculty mentor to ensure that standards for academic rigor at the Bachelor level are achieved. Candidates for the degree will focus on intellectual skills and integrative knowledge by enrolling in courses in a general disciplinary area with intentionally-selected, specialized knowledge courses that contribute to an integrated whole, and by completing a capstone experience that further prepares them for their chosen professions or graduate school admission. Under the direction of a faculty member, students will complete a capstone course or an internship which will involve reflection and a synthesis of learning to demonstrate achievement of the learning outcomes for the degree.

Total Program Credits: 120

Matriculation Requirements:

1. An approved Plan of Study that focuses on the achievement of clearly defined personal, career, or professional goals, as part of the application process for the major.
2. Minimum 2.0 grade point average.
3. Completed 60 or more semester credit hours.

University Studies, B.A.

Careers

The UVST BA/BS is a degree that does not prepare students for a specific career path; rather, it situates graduates for a range of future possibilities and may be less vulnerable to changes in market demand than more traditional degrees in that it focuses on intellectual and integrative learning outcomes that serve individuals well in a variety of careers. Graduates will have a disciplinary focus broader than a single major, but most courses will come from within one of the 8 specific Colleges found at Utah Valley University. This is often beneficial when student interests are varied across a College, or the need for a variety of disciplines would be beneficial to application to professional programs such as law or medicine.

As many employers do not require a specific degree, the skills that are established with the completion of a Bachelor's degree allow for potential employees to become capable and adept in skills such as critical thinking, communication, and problem solving. The UVST BA/BS is designed to provide development of these skill sets plus many others, thus increasing the likelihood of employability in a broad range of in-demand professions in today's fast-paced, ever-changing economy.

Also, many of the students seeking completion of the BA/BS UVST may be in a career path that they find satisfactory and rewarding. This degree provides the opportunity to complete a Bachelor's degree that may not have previously existed for non-traditional students who do not have the luxury of a traditional class schedule. The UVST BA/BS may facilitate advancement for these students who have progressed as far as possible in their chosen career path without a Bachelor's degree.

Technology Management

Mission Statement

The mission of the Technology Management department is to provide academic degrees in technical and operations management relevant to the global economy. Our courses provide appropriate knowledge and skills through engaged learning, hands-on activities, scholarship investigation, ethical responsibility, creativity, and lifelong learning. Students will be prepared for professional careers in management and entrepreneurship as well as provided with a strong foundation for advanced academic study. Our graduates will also be prepared to contribute to their employers and communities through leadership, service, and a concern for the environment.

Technology Management..............................................864

Degrees & Programs

Technology, A.A.S.

Requirements

The Associate in Applied Science (AAS) in Technology is designed for individuals seeking to work in a technical area or who have considerable work experience seeking better upward mobility in their professions. Students can receive up to 15 credit hours for extensive work experience, certifications, licenses, or apprenticeships. Additionally, students who earn certifications in many 900+ hour technical programs offered throughout the Utah Technical College system can transfer in their certificate and receive up to 30 hours of academic credit, or almost half the credit required to graduate from the AAS. Students in the AAS pathway will build on their technical education and experience by completing core and elective course options, including experiential portfolio, business computer proficiency, and supervision.

**Foreign Language Credits - Students may select up to 10 credits of a foreign language**

Sixteen (16) credits may be satisfied by R473 Matriculation Agreement.

**Graduation Requirements:**

1. Complete a minimum of 63 semester credits.
2. Overall grade point average of 2.0 (C) or above.
3. Residency hours - minimum of 20 credit hours through course attendance at UVU.
4. Completion of GE and specified departmental requirements
5. This degree MAY apply toward the BS in Technology Management, if the majority of course work is in a related technical area, and has been approved by the department to be used toward the BSTM.

---

**Advanced Manufacturing, Certificate of Proficiency**

**Careers**

- Industrial Engineering Technicians

**Requirements**

The Certificate of Proficiency in Advanced Manufacturing is designed to provide entry-level manufacturing technician skills that are needed in expanding the manufacturing industry in Utah Valley. Although the term “advanced” might be confusing for a program providing entry-level skills, nationally this is the term that is being used. The program focuses on the basic skills used in advanced manufacturing processes expanding across the nation. The components of the certificate will include basic manufacturing skills with hands-on activities on equipment used in local facilities. Graduates of this certificate will have a basic understanding of advanced manufacturing operations with an emphasis on solving problems in the organization. While this program offers an entry-level certification for individuals pursuing a career in manufacturing, it has been designed to enable individuals the opportunity to continually expand and upgrade their applied skills as well as to maintain a thorough mastery of evolving manufacturing technologies.

**Graduation Requirements:**

1. Completion of a minimum of 18 semester credits.
2. Minimum grade of C- required in all courses.
3. Overall grade point average of 2.0 (C) or above.
4. Residency hours: minimum of 5 credit hours through course attendance at UVU.

**Advanced Manufacturing, Certificate of Proficiency Careers**

Today's businesses and industries are demanding employees with strong business process improvement capabilities. Companies are operating in more dynamic and competitive work environments. A Six Sigma Green Belt Certificate prepares graduates for a multitude of professional careers, including the following: general management; quality control and assurance; production processing; research and development; advanced manufacturing; reliability and safety; and project management.

**Related Careers**

- Industrial Engineering Technicians

**Six Sigma Green Belt, Certificate of Proficiency Requirements**

The Six Sigma Green Belt Certificate at UVU demonstrates knowledge in quality improvement and elimination of waste or defects in production processes. It can be utilized in every aspect of business such as production, human resources, information technology, and customer service. This certificate is built into the curriculum of the Bachelor of Science in Technology Management program. Students who complete this credential have high-demand, industry-recognized skill sets.

**Technology Management, B.S. Requirements**

The Bachelor of Science in Technology Management has curriculum designed to prepare students who want to develop skills which will enable them to successfully: Manage complex technical projects, manage people within a technical environment, prepare to succeed in an ever changing environment which is reliant on technology, and be on the forefront of innovation and the future of work. Employers are regularly seeking technically savvy individuals who can speak clearly about technical innovations.
while having the skill set to manage a wide variety of projects and individuals. The BS in TM will prepare this much needed workforce for success. For this degree, students must complete 45 technical credits. Up to 45 technical credits may be transferable from an Associate of Applied Science (AAS), Associate of Science (AS), or individual courses from a regionally accredited institution of higher education in an approved technical area as agreed upon by the Technology Management advisor and department chair.

Graduation Requirements:

1. Completion of a minimum of 123 semester credits
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. No grade lower than a C- in any TECH course.
4. Residency hours—minimum of 30 credit hours through course attendance at UVU, with at least 10 hours earned in the last 45 hours.
5. Completion of GE and specified departmental requirements.
6. Successful completion of at least one Global/Intercultural course.

Note: No upper-division Technology Management (i.e., Technology Management or Business Management) course work older than six years can be counted toward graduation.

Theatrical Arts for Stage and Screen

Mission Statement
The Department of Theatrical Arts at Utah Valley University cultivates student success by challenging our BFA, BA, BS Ed, and AA theatre majors and non-majors to become professionally competent and artistically literate as they complete their academic degrees and courses. To deliver these outcomes, we practice interactive teaching, build critical skills, and create innovative productions that engage campus and off-campus communities.

Theatre Arts, A.S.

Careers
The AA and AS degrees in Theatre Arts provide students with skills needed for many professional entry level positions. Associate degrees in Theatre Arts develop interpersonal communication, the ability to work effectively in groups, the capability of solving problems, and the creative thinking that employers are demanding.

Related Careers
- Art, Drama, and Music Teachers, Postsecondary
- Actors
- Producers and Directors
- Entertainers and Performers, Sports and Related Workers, All Other

Theatre Arts, Minor

Requirements
The minor in Theatre Arts serves as a supplement to students from all other disciplines to pursue their interest and cultivate their talents in theatre while pursuing a major in a high-demand field. It also helps secondary education majors in other subject areas to qualify students for a teaching endorsement in theatre. English teaching majors frequently complete a minor in theatre to enrich their teaching of plays and to help prepare them to qualify for an additional subject endorsement in theatre.

Total Program Credits: 22

Matriculation Requirements:
1. Admitted to a bachelor degree program at UVU.

Discipline Core Requirements: 22 Credits

Complete the following courses:
- THEA 1013 Introduction to Theatre 3
- THEA 1033 Acting I 3
- THEA 1513 Stagecraft I 2
- THEA 1514 Stagecraft I Lab 1
- THEA 1713 Script and Text Analysis I 3
- THEA 2513 Introduction to Design for Stage and Screen 3
- THEA 2514 Introduction to Design for Stage and Screen Lab 1

Theatre Arts, Minor

Careers
Employers and graduate programs value minors in the arts including theatre. A minor in theatre suggests that the recipient is well-rounded in his or her training and has acquired skills in communications and human relations. It also allows majors in other fields to gain the necessary skills to pursue a serious avocation in theatre.

Related Careers
- Art, Drama, and Music Teachers, Postsecondary
- Actors

EDSC 4550 Secondary Curriculum Instruction and Assessment 3
EDSC 4850 Student Teaching—Secondary 8
EDSC 4990 Teacher Performance Assessment Project 2
EDSP 340G Exceptional Students 2

Graduation Requirements:

1. Completion of a minimum of 125 semester credits, 40 of which must be upper division.
2. Overall GPA of 3.0 (B) or above with no grade lower than a C in major required content courses and no grade lower than a B- in Licensure and Methods courses.
3. Residency hours - minimum of 30 credit hours through course attendance at UVU, with at least 10 hours in the last 45 hours.
4. Successful completion of at least one Global/Intercultural course.

Footnote

*For Theatre Arts Education students, the prerequisite of THEA 1113 Voice and Speech I will be waived.

Theatre Arts, B.A.

Requirements

The recently revised BA in Theatre focuses theatre majors’ work in a module (12 credits) in Performance, in Production, and a given specialty. The revised BA in Theatre Arts offers students a broader-based program that better reflects the liberal arts paradigm of BA degrees. It provides students with a higher level of choice than does a BFA program while ensuring that students graduate with three specific skill sets.

Total Program Credits: 120

#### AREA OF STUDY A: PERFORMANCE
Complete 12 approved credits from the following courses. At least 9 of the 12 credits must be at the 3000 level or above. To ensure a higher level of rigor and focus, students are strongly advised to complete their requirements in the Performance Area of Study in a single module: Directing, Musical Theatre, or Acting. See advisor for the specifics of each module.

**DIRECTING MODULE COURSES**
- THEA 2033 Acting II (3.0)*
- THEA 3612 Directing Actors for the Stage (3.0)
- THEA 3614 Directing Actors for the Screen (3.0)
- THEA 3725 Musical Theatre History (3.0)
- THEA 4993 Senior Project in Performance (3.0)

**MUSICAL THEATRE MODULE COURSES**
- THEA 2156 Group Voice for Theatre - BA (2.0)
- THEA 3116 BA Auditioning (3.0)
- THEA 3151 Acting for Musical Theatre I (3.0)*
- THEA 3154 Dance for Musical Theatre I (3.0)*
- THEA 319R Performance Practicum for Stage and Screen (3.0)
- THEA 3725 Musical Theatre History (3.0)
- THEA 4993 Senior Project in Performance (3.0)

**ACTING MODULE COURSES**
- THEA 1113 Voice and Speech I (3.0)
- THEA 2033 Acting II (3.0)*
- THEA 2131 Movement for the Actor I (3.0)
- THEA 3116 BA Auditioning (3.0)
- THEA 3123 Stage Dialects (3.0)
- THEA 3133 Stage Combat (3.0)
- THEA 319R Performance Practicum for Stage and Screen (3.0)
- THEA 4993 Senior Project in Performance (3.0)

#### AREA OF STUDY B: PRODUCTION
Complete 12 approved credits from the following courses. At least 9 of the 12 credits must be at the 3000 level or above. To ensure a higher level of rigor and focus, students are strongly advised to complete their requirements in the Production Area of Study in a single module: Design or Technical Production. See advisor for the specifics of each module.

**DESIGN MODULE COURSES**
- ART 1020 Basic Drawing for Non-Majors (3.0)
- THEA 1223 Makeup I (3.0)
- THEA 2531 Introduction to Lighting and Sound (3.0)
- THEA 2541 Costume History (3.0)
- THEA 3223 Makeup II (3.0)
- THEA 3514 Period Styles for Theatre Design (3.0)
- THEA 3531 Lighting Design I (3.0)
- THEA 3534 Lighting Design II (3.0)
- THEA 3535 Lighting Design I Lab (1.0)
- THEA 3541 Costume Design I (3.0)
- THEA 3543 Costume Design II (3.0)
- THEA 3545 Costume Design I Lab (1.0)
- THEA 3571 Scenic Design I (3.0)
- THEA 3572 Scenic Design II (3.0)
- THEA 3575 Scenic Design I Lab (1.0)
- THEA 454R Special Topics in Costume Construction (3.0)
- THEA 457R Practical Design (1.0)

**TECHNICAL PRODUCTION MODULE COURSES**
- DGM 2130 Digital Audio Essentials (3.0)*
- THEA 2203 Costume Construction I (3.0)
- THEA 2531 Introduction to Lighting and Sound (3.0)
- THEA 3511 Stagecraft II (3.0)
- THEA 3542 Costume Construction II (3.0)
- THEA 3565 Technical Direction for the Stage (3.0)*
- THEA 3573 Scenic Painting (3.0)
- THEA 3574 Drafting for Theatre Design (3.0)*
- THEA 4561 Stage Management II (3.0)
- THEA 481R Theatre Internship (1.0)*

**TECHNICAL PRODUCTION MODULE COURSES**
- DGM 2130 Digital Audio Essentials (3.0)*
- THEA 2203 Costume Construction I (3.0)
- THEA 2531 Introduction to Lighting and Sound (3.0)
- THEA 3511 Stagecraft II (3.0)
- THEA 3542 Costume Construction II (3.0)
- THEA 3565 Technical Direction for the Stage (3.0)*
- THEA 3573 Scenic Painting (3.0)
- THEA 3574 Drafting for Theatre Design (3.0)*
- THEA 4561 Stage Management II (3.0)
- THEA 481R Theatre Internship (1.0)*

#### AREA OF STUDY C: SPECIALTY
Complete 12 approved credits from the following courses. At least 9 of the 12 credits must be at the 3000 level or above. To ensure a higher level of rigor and focus, students are strongly advised to complete their requirements in the Specialty Area of Study in a single module: Theatre for Children and Youth, Scriptwriting, Dramaturgy, Film Studies, or Theatre Administration. See advisor for the specifics of each module.

**THEATRE FOR CHILDREN AND YOUTH MODULE COURSES**
- THEA 2100 Teaching Theatre For Children (3.0)
- THEA 222R Theater for Young Audiences Tour (3.0)
- THEA 2741 Scriptwriting for the Stage (3.0)
- THEA 3211 Applied Theatre (3.0)
- THEA 3231 Creative Drama (3.0)
- THEA 3241 Storytelling (3.0)
- THEA 3251 Puppetry (3.0)
- THEA 3731 Dramaturgy (3.0)
- THEA 374R New Script Workshop (3.0)
- THEA 4200 Theatre and Drama in the Secondary School (3.0)
- THEA 4994 Senior Project in Theatre (3.0)

**SCRIPTWRITING MODULE COURSES**
- THEA 2741 Scriptwriting I (3.0)
- THEA 2742 Scriptwriting for the Screen (3.0)
- THEA 3731 Dramaturgy (3.0)
- THEA 3741 Script Writing II (3.0)
Theatrical Arts for Stage and Screen

| THEA 374R | New Script Workshop (3.0) |
| THEA 474I | Scriptwriting III (3.0) |
| THEA 474R | New Play Practicum (1.0) |

| ACC 3000 | Financial Managerial and Cost Accounting Concepts (3.0) |
| THEA 3625 | Development and Fundraising for the Arts (3.0) |
| THEA 4621 | Theatre Administration I (3.0) |
| THEA 4622 | Theatre Administration II (3.0) |

**Elective Requirements:**

- 18 Credits
- One Foreign Language (Foreign Language 202G/2020* course fulfills Humanities Distribution) 12
- Any courses 1000 or higher 6

**Graduation Requirements:**

1. Completion of a minimum of 120 semester credits, 40 of which must be upper division.
2. Overall grade point average of 2.5 (C+) or above.
3. Residency hours - minimum of 30 credit hours through course attendance at UVU, with at least 10 hours in the last 45 hours.
4. Successful completion of at least one Global/Intercultural course.

**Footnotes**

* Requires additional pre-requisite courses not already included in the degree, but they could fill elective credits.

**Theatre Arts, B.A.**

**Careers**

The liberal arts BA degree in Theatre Arts is, in many cases, a better preparation for MA/PhD programs in theatre than a BFA degree. The BA cultivates an entrepreneurial ability that has prompted many of our graduates to found and run their own companies. A BA in Theatre or another art form is often regarded favorably by medical, law, and business graduate programs because it demonstrates that the graduate is well rounded and effective in communication and problem solving.

Transportation Technologies

Mission Statement
The mission of the UVU Department of Transportation Technologies is to conduct academic and applied teaching. The training programs provide qualified employees for entry-level positions in all categories of the Automotive, Power Sports, Collision / Refinish, and Diesel repair technology industries. These programs will afford students the opportunity to attain a one, two, and/or four-year degree at the completion of their training. The training provided will have an emphasis on basic skills and principles which will allow participants to adapt to new and ever changing technologies. Current and foreseeable technology will be utilized in presenting and practicing basic performance skills.

Automotive Technology
- Program Coordinator: Todd Low
  - Office: SA 326b
  - Telephone: 801-863-8349 or 801-863-8349
  - Email: lowtow@uvu.edu

Advisory Committee:
Dave Johnson, DJ Auto; Dustin Sweeten, Powerhouse Motorsports; Chet Milbum, Factory Motorparts; Ben Powell, Torque Shop; Tim Ury, LH Miller Ford, Mark Anderson, Utah County Health; Andrew Gibson, CarQuest; Phil Crocket, LH Miller Chevrolet; Mike McCoy, Gears Transmission; Nate Clarke, Toyota

Collision Repair Technology
- Program Coordinator: Terrance Orr
  - Office: SA 326d
  - Telephone: 801-863-8268 or 801-863-8349
  - Email: ortte@uvu.edu

Advisory Committee:
Steve Powell, State Farm; Ken Murdock, American Fork Collision; Kendal Klines, Lone Peak Collision; Jon Bauer, Harmon's Collision; Trace Coccimiglio, Valet Autobody; Don Edmunds, Bear River Mutual Insurance; Jason Proctor, ABRA Autobody & Glass; Travis Olson, Unique Autobody; Brian Nichols, Cascade Collision; Tyler Judd, UTA; Sam Christopherson, Cleggs Collision; Taylor Edwards, Cascade Collision; Ken King, Larry H. Miller Collision; Denay Weiss, Larry H. Miller Collision; Chad Crane, Snap On Tools;

The AAS in Automotive Power Sports is designed to train technicians in the field of maintenance and repair of personal transportation craft and multi person transportation vehicles that are currently outside the realm of automotive. The degree includes: on road alternative vehicles (aide by aide), personal watercraft, All Terrain Vehicle (ATV) and Utility Terrain Vehicle (UTV), snow machines, lawn and garden systems, and motorcycle technology. Graduates will gain an in-depth understanding of alternative transportation vehicles utilizing hands-on, performance based training.

A sales and service business skills course will also aid students to acclimate from school training to a live repair facility. Students will receive training in four-stroke and two-stroke engines, continuous variable transmissions (CVT), suspension and braking systems, composite repairs, and small engine electronic systems.

Graduation Requirements:

1. Completion of a minimum of 63 semester credits
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. Residency hours—minimum of 20 credit hours through course attendance at UVU
4. Completion of GE and specified departmental requirements

Footnote:

1 Cooperative Education courses may be used in place of some of the laboratory or shop classes for completion of AAS requirements. Approval of the program coordinator must be secured before class enrollment.

Automotive Power Sports, A.A.S.

Careers

Recognizing that a successful career in automotive technology involves much more than mechanical ability to replace parts, Utah Valley University has designed this curriculum for the individual who has ability and aptitude to become a skilled automotive technician. Opportunities are available in: general automotive repair, steering/suspension and alignment, tune-up, cooling system and air conditioning, computerized electronic ignition and fuel injection, and emission controls. Training for service advisors, shop foreman, and shop managers is also provided.

Related Careers

- Motorboat Mechanics and Service Technicians
- Outdoor Power Equipment and Other Small Engine Mechanics

Automotive Technology, A.A.S.

Requirements

Five options are available: a One-Year Certificate, a Two-Year Diploma, an Associate in applied Science Degree, an Associate in Science, and the Bachelor of Science in Technology Management degree.

#### Distribution Courses

- Biology: 3
- Physical Science: 3
- Additional Biology or Physical Science: 3
- Humanities Distribution: 3
- Fine Arts Distribution: 3
- Social/Behavioral Science: 3

#### Discipline Core Requirements: 16 Credits

Choose from AUT or related 1000 level or higher courses: 16

#### Elective Requirements: 9 Credits

Choose electives from 1000 level or higher courses: 9

### Graduation Requirements:

1. Completion of a minimum of 60 semester credits.
2. Overall grade point average of 2.0 (C) or above. (Departments may require higher GPA.)

### Careers

Recognizing that a successful career in automotive technology involves much more than mechanical ability to replace parts, Utah Valley University has designed this curriculum for the individual who has ability and aptitude to become a skilled automotive technician. Opportunities are available in: general automotive repair, steering/suspension and alignment, tune-up, cooling system and air conditioning brakes, engine rebuilding, automatic and manual transmissions, computerized electronic ignition and fuel injection, and emission controls. Training for service advisors, shop foreman, and shop managers is also provided.

### Related Careers

- Electrical and Electronics Installers and Repairers, Transportation Equipment
- Electronic Equipment Installers and Repairers, Motor Vehicles
- Automotive Service Technicians and Mechanics

---

Graduation Requirements:

1. Completion of a minimum of 64 semester credits
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. Residency hours—minimum of 20 credit hours through course attendance at UVU
4. Completion of GE and specified departmental requirements

Collision Repair Technology - Collision Repair Emphasis, A.A.S.

Careers

The collision repair industry offers a wide variety of career paths. The industry offers positions in auto body repair, PBE (paint, body, and equipment) sales and training, manufacturer representation, insurance businesses, jobber sales, and instructor training. Graduates may choose a career emphasis in: refinishing, surface preparation, estimating, management, quality control, production, structural repair, damage analysis, glass installation, panel fabrication, customization, nonstructural repair, sales, and instructor training.

Related Careers

### Diesel Mechanics Technology, A.A.S.

#### Careers

Diesel technology students may be hired as mechanics working on engines, automatic transmissions, drive trains, electrical systems, suspension and steering, hydraulics, and air systems. They work on heavy equipment, farm equipment, and on-highway trucks. Diesel mechanics diagnose, repair, weld, and fine-tune the working parts of buses, trucks, construction machinery, and generators. Students pursuing a Bachelor of Science degree in Technology management can expect opportunities as shop managers, service writers, equipment managers, fleet managers and product development.

#### Related Careers

- Bus and Truck Mechanics and Diesel Engine Specialists

**Graduation Requirements:**

1. Completion of a minimum of 56 semester hours.
2. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)
3. Completion of specified departmental requirements.

### Automotive Technology, Diploma Careers

Recognizing that a successful career in automotive technology involves much more than mechanical ability to replace parts, Utah Valley University has designed this curriculum for the individual who has ability and aptitude to become a skilled automotive technician. Opportunities are available in: general automotive repair, steering/suspension and alignment, tune-up, cooling system and air conditioning brakes, engine rebuilding, automatic and manual transmissions, computerized electronic ignition and fuel injection, and emission controls. Training for service advisors, shop foreman, and shop managers is also provided.

### Related Careers

- Electrical and Electronics Installers and Repairers, Transportation Equipment
- Electronic Equipment Installers and Repairers, Transportation Equipment
- Automotive Service Technicians and Mechanics
- Automotive Technicians and Mechanics

### Collision Repair Technology - Collision Repair Emphasis, Diploma

### Requirements

One-Year Certificate, a Diploma, the Associate in Applied Science Degree, and the Bachelor of Science in Technology Management Degree. See graduation requirements in the catalog for more information.

- CRT 121L Blending Tinting and Detailing Lab 1
- CRT 1230 Welding and Cutting 2
- CRT 123L Welding and Cutting Lab 1
- CRT 281R Cooperative Work Experience (1.0) 1
- CRT 285R Cooperative Correlated Class (1.0) 1
- CRT 299R Skills USA (1.0) (Optional)

Emphasis Requirements: 24 Credits

- CRT 2510 Custom Welding 2
- CRT 251L Custom Welding Lab 1
- CRT 2520 Customizing 2
- CRT 252L Customizing Lab 1
- CRT 2530 Panel Fabrication 2
- CRT 253L Panel Fabrication Lab 1
- CRT 2610 Top Chopping Sectioning and Channelling 2
- CRT 261L Top Chopping Sectioning and Channelling Lab 1
- CRT 2620 Frames 2
- CRT 262L Frames Lab 1
- CRT 2630 Detailing and Custom Painting 2
- CRT 263L Detailing and Custom Painting Lab 1
- CRT 2640 Panel Fabrication of Aluminum 2

Graduation Requirements:

1. Overall grade point average of 2.0 (C) or above. (Departments may require a higher GPA.)

1 NOTE: Cooperative Education courses may be used in place of some of the laboratory or shop classes for completion of diploma requirements. Approval of the program coordinator must be secured before class enrollment.

Collision Repair Technology - Street Rod Emphasis, Diploma

Careers

Careers:

The collision repair industry offers a wide variety of career paths. The industry offers positions in auto body repair, PBE (paint, body, and equipment) sales and training, manufacturer representation, insurance businesses, jobber sales, and instructor training. Graduates may choose a career emphasis in: refinishing, surface preparation, estimating, management, quality control, production, structural repair, damage analysis, glass installation, panel fabrication, customization, nonstructural repair, sales, and instructor training.

Related Careers

- Insurance Appraisers, Auto Damage
- Automotive Body and Related Repairers
- Automotive Glass Installers and Repairers
- Painters, Transportation Equipment

ACC 1150
Fundamentals of Business Math
3:3:0
Fall, Spring

Designed for the business student as a review of mathematical principles, techniques, computations, and their applications to business problems. Topics include: checking accounts and bank reconciliations, percents, solving for the "unknown," discounts, markups and markdowns, payroll, simple interest, discounting notes, present and future value, depreciation, inventory, taxes, insurance, stocks and bonds, annuities, sinking funds, and calculator procedures. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw applies.

ACC 1750
Applied Accounting
4:4:0
On Sufficient Demand
* Prerequisite(s): Enrolled in University of Utah at campus or online

Designed for non-accounting majors in Executive Assistant and Paralegal. Provides comprehensive coverage of the accounting cycle for services and merchandising organizations. Topics include: journalizing, posting, financial statements, closing, accounting systems, internal control, accounts receivable, accounts payable, inventory control, and payroll. Taught in a computer environment. Lab access fee of $30 for computers applies.

ACC 2010
Financial Accounting
3:3:0
Fall, Spring, Summer
* Prerequisite(s): ENGL 1010 or ENGL 1005 or higher with a minimum grade of C-, MAT 1000 or higher with a minimum grade of C-, or appropriate test scores
* Corequisite(s): ACC 1150 recommended if required for your degree

Teaches concepts and methods underlying preparation of financial statements utilizing generally accepted accounting principles (GAAP). Includes the accounting cycle; income determination for service and merchandising operations; and the reporting of assets, liabilities, and owner's equity for sole proprietorships and corporations. May be delivered online. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw applies.

ACC 2020
Managerial Accounting
3:3:0
Fall, Spring, Summer
* Prerequisite(s): ACC 2010

Focuses on the methods and tools used to generate information for decision making by managers within an organization and integrates decision-making throughout the course. Addresses five primary topics: determining the cost of products, services, and segments of the organization; short-term/long-term role of planning in management; the control function of management. May be delivered hybrid and/or online. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw applies.

ACC 2030
Principles of Accounting
6:6:0
Not Offered
* Prerequisite(s): ENGL 1010 or ENGL 1005 or higher with a minimum grade of C-, MAT 1000 or higher with a minimum grade of C-, or appropriate test scores

Focuses on the role of accounting in planning and controlling a business and reporting results to decision makers. An accounting information system is developed to analyze, record business transactions and generate financial statements for decision makers outside of the organization. Teaches how to interpret external financial reports, assess the viability and profitability of businesses. Also addresses how to use managerial accounting principles to general internal reports, establishes budgets, analyze variances, evaluate cost behavior, and control operations through a combination of responsibility accounting and internal controls. Integrates ACC 2010 (Financial Accounting) and ACC 2020 (Managerial Accounting,) for students who want to fulfill both requirements in a single semester and to understand how Financial and Managerial Accounting concepts work together to succinctly represent huge volumes of transactions that drive modern business. Lab access fee of $30 for computers applies.

ACC 2181R
Cooperative Work Experience
2 to 8:2 to 8:9
Fall, Spring, Summer
* Prerequisite(s): Approval of School of Business Career and Corporate Manager

Designed for accounting majors to provide on-the-job work experience that will utilize the student's skills and abilities in the field of accounting. Requires a portfolio of acquired work experience and enhanced skills. Includes student, employer, and coordinator evaluations; on-site coordinator visits; written assignments; and oral presentations. Provides experience in formulating and completing individualized work experience objectives. A maximum of 3 credits may apply toward graduation. May be graded credit/no credit.

ACC 3000
Financial Managerial and Cost Accounting Concepts
3:3:0
Fall, Spring, Summer
* Prerequisite(s): ENGL 2010 or ENGL 2005 recommended if required for your degree

Focuses on the cost and financial accounting techniques utilized by managers within an organization and integrates decision-making throughout the course. Addresses five primary topics: determining the cost of products, services, and segments of the organization; short-term/long-term role of planning in management; the control function of management. May be delivered hybrid and/or online. Lab access fee of $30 for computers applies.

ACC 3005
Introduction to the Accounting Profession
1:1:0
Fall, Spring, Summer
* Prerequisite(s): ACC 2010 and University Advanced Standing

Focuses on variety of topics covering the accounting profession, including career options in accounting, certifications in accounting (CPA, CMA, CIA, CFE, etc.), ethics in the profession, current issues in accounting, professional standards, professionalism skills, and the curriculum for the accounting undergraduate and graduate degrees. May be graded credit/no credit. May be delivered online.

ACC 3010
Intermediate Accounting I
3:3:0
Fall, Spring, Summer
* Prerequisite(s): ACC 3300

Addresses debt and equity financing, investments in debt and equity securities, leases, deferred income taxes, employee compensation (payroll and pensions), earnings per share, accounting changes, and error corrections. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw applies.

ACC 3020
Intermediate Accounting II
3:3:0
Fall, Spring, Summer
* Prerequisite(s): ACC 3010, MKTG 2200, and University Advanced Standing

* Prerequisite(s) or Corequisite(s): ACC 3300

Addresses debt and equity financing, investments in debt and equity securities, leases, deferred income taxes, employee compensation (payroll and pensions), earnings per share, accounting changes, and error corrections. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw applies.

ACC 3030
Intermediate Accounting for Non-Accounting Majors
3:3:0
On Sufficient Demand
* Prerequisite(s): ACC 3010 and University Advanced Standing

* Prerequisite(s) or Corequisite(s): ACC 3300

Addresses debt and equity financing, investments in debt and equity securities, leases, deferred income taxes, employee compensation (payroll and pensions), earnings per share, accounting changes, and error corrections. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw applies.

ACC 3050
Introduction to the Accounting Profession
1:1:0
Fall, Spring, Summer
* Prerequisite(s): ACC 2010 and University Advanced Standing

Focuses on variety of topics covering the accounting profession, including career options in accounting, certifications in accounting (CPA, CMA, CIA, CFE, etc.), ethics in the profession, current issues in accounting, professional standards, professionalism skills, and the curriculum for the accounting undergraduate and graduate degrees. May be graded credit/no credit. May be delivered online.

ACC 481R
Internship
2 to 8:2 to 8:0  Fall, Spring, Summer
* Prerequisite(s): ACC 3010, Matriculation into the Woodbury School of Business, Approval of Accounting Department Internship Coordinator and University Advanced Standing

Provides accounting majors a transition from school to work where learned theory is applied to actual practice through meaningful on-the-job paid experience commensurate with upper-division classroom instruction. Includes student, employer, and coordinator evaluations, on-site work visits, written assignments, and oral presentations. May be repeated for a maximum of 6 credits toward graduation. May be graded credit/no credit.

ACC 490R
Accounting Seminar
1 to 3:0 to 3:0  On Sufficient Demand
* Prerequisite(s): Matriculation into the BS Accounting degree program, Department Chair Approval, and University Advanced Standing

Designed to provide short courses, workshops, and special programs on accounting-related topics. May be repeated for a maximum of 3 credits toward graduation.

ACC 491R
Independent Study
1 to 4:0 to 4:0  On Sufficient Demand
* Prerequisite(s): Department Chair approval and University Advanced Standing

For bachelor's degree students and other interested persons. Offers independent study as directed in reading, individual projects, etc., at the discretion and approval of the department chairperson. Repeatable for a maximum of 3 credits toward graduation.

ACC 5020
Advanced Financial Accounting
3:3:0  Fall, Spring, Summer
* Prerequisite(s): ACC 3020, Matriculation into the BS Accounting degree program, and University Advanced Standing

ACC 5130
Case Studies in Internal Auditing
3:3:0  Spring
* Prerequisite(s): ACC 312G

Teaches student to design policies and procedures for internal audit operations by using risk based audit plans and developing audit plans. May be delivered hybrid.

ACC 5140
Fraud Examination
3:3:0  Fall, Spring
* Prerequisite(s): ACC 2010 or consent of instructor

Examines the seriousness of fraud and its impact on business and society. Includes forensic accounting and fraud prevention, detection, and resolution.

ACC 6020
Advanced Financial Accounting Applications
3:3:0  Fall, Spring, Summer
* Prerequisite(s): Admission to Master of Accountancy program

Presents accounting concepts, methods, and applications for business combinations, foreign currency transactions, foreign statement translation, and partnerships. Canvas Course Mats $78/McGraw applies.

ACC 6030
Financial Accounting and Reporting
3:3:0  Spring
* Prerequisite(s): Acceptance into the Master of Accountancy program

Focuses on understanding the nature and financial reporting aspects of complex business transactions such as corporate acquisitions, mergers, and other strategic alliances. Includes accounting for business combinations and the various reporting requirements leading to consolidated financial statements.

ACC 6060
Professionalism and Leadership
3:3:0  Fall, Summer
* Prerequisite(s): Admission to Master of Accountancy program

Enhances the ability to interact and communicate with others in the professional world. Builds skill development in oral and written communication, interviewing, networking, and leadership. Explores and enhances emotional intelligence.

ACC 6130
Case Studies in Auditing
3:3:0
* Prerequisite(s): Admission to Master of Accountancy or Master of Business Administration Program

Teaches policies and procedures for internal audit operations by creating risk based audit plans, developing audit objectives, and evaluating audit results.

ACC 6140
Fraud Examination and Forensic Accounting
3:3:0
* Prerequisite(s): Admission to Master of Accountancy or the Master of Business Administration Program

Evaluates the seriousness of fraud and its impact on individuals, businesses and society. Formulates fraud prevention, detection, and resolution methods using cases.

ACC 6150
Information Systems Auditing
3:3:0
* Prerequisite(s): Admission to Master of Accountancy or Master of Business Administration Program

Provides projects covering information systems audit and its impact on the financial statement audit. Covers information security, social engineering, and fraud data mining as they relate to accounting information systems and the associated data. Canvas Course Mats $78/McGraw applies.

ACC 6350
Management Control Systems
3:3:0  Spring
* Prerequisite(s): Admission to Master of Accountancy or Master of Business Administration Program

Evaluates the design of management control systems through case studies to enable the successful implementation of accounting strategies in a variety of for-profit entities. Emphasizes the development of the students' analytical and decision-making skills. Canvas Course Mats $134/ Pearson applies.

ACC 6410
Tax Research and Procedure
3:3:0  Fall
* Prerequisite(s): Admission to the Master of Accountancy or Master of Business Administration Program

Practices the necessary skills to thoroughly research and analyze a tax problem, as well as to report research analysis and conclusions accurately. Explores computerized tax research methods, and the organization of the I.R.S. with some of the procedural aspects of tax compliance and practice, tax related penalties, professional responsibility and tax ethics.

ACC 6420
Principles of Corporate Tax
3:3:0  Fall, Spring
* Prerequisite(s): Admission to Master of Accountancy program

Covers accounting theory and practices of the federal income taxation laws, rules and regulations relating to sales and exchanges of assets and the formation and operation of corporations and S corporations, and their effects upon the corporation's shareholders. Canvas Course Mats $78/McGraw applies.

ACC 6430
Advanced Corporate Tax
3:3:0
* Prerequisite(s): Admission to Master of Accountancy or Master of Business Administration Program

Assesses the appropriate federal income tax for a corporation based on relevant accounting and business data. Analyzes the tax implications related to the form of entity and the location of the entity.

ACC 6440
Partnership Tax
3:3:0
* Prerequisite(s): Admission to Master of Accountancy or Master of Business Administration Program

Examines accounting theory and practices of the federal income taxation laws, rules and regulations relating to the formation and operation of partnerships, and their effects upon partners.

ACC 6460
Estate and Gift Tax
3:3:0
* Prerequisite(s): Admission to Master of Accountancy or Master of Business Administration Program

Examines the law and theory of federal taxation of estates and gifts based on Federal code, I.R.S. regulations, and digest of official income tax decisions.
Aerospace Studies (AERO)

AERO 1000 Leadership Laboratory 1A
.5:0:2 Fall
Studies basic fundamentals of military leadership: drill, courtesy, planning, and organizing at various levels of responsibility.

AERO 1010 Leadership Laboratory 1B
.5:0:2 Spring
Studies basic fundamentals of military leadership: drill, courtesy, planning, and organizing at various levels of responsibility.

AERO 1100 The Air Force Today 1:1:0 Fall
* Corequisite(s): AERO 1000
Teaches development, organization, and doctrine of the U.S. Air Force. Emphasizes Strategic Force requirements.

AERO 1110 Aerospace Defense General Purpose and Support Forces 1:1:0 Spring
* Corequisite(s): AERO 1010

AERO 143R Air Force Physical Training .5:0:2 Fall, Spring
* Corequisite(s): AERO 1000
Prepares students for the physical demands placed upon them at Air Force Field Training encampment normally attended between their sophomore and junior years. Provides leadership opportunities and tests a cadet's physical fitness. Repeats are allowed. See advisor for details. May be repeated for a maximum of four credits.

AERO 2000 Leadership Laboratory 2A .5:0:2 Fall
Teaches fundamentals of military leadership: drill, courtesy, planning, and organizing at various levels of responsibility. Increased emphasis on performance level.

AERO 2110 The Development and Growth of Air Power B 1:1:0 Spring
* Corequisite(s): AERO 2000
Studies development of various concepts of air power employment. Emphasizes factors that have prompted research and technological change.

AERO 3100 Leadership Laboratory 3B .5:0:2 Spring
* Corequisite(s): University Advanced Standing
Teaches basic fundamentals of military leadership: drill, courtesy, planning, and organizing at various levels of responsibility. Students perform as cadet officers. Emphasizes leadership development.

AERO 3101 Leadership Laboratory Honor Guard 1:0:3 Fall, Spring
* Corequisite(s): University Advanced Standing
Teaches basic fundamentals of military leadership: drill, courtesy, planning, and organizing at various levels of responsibility. Emphasizes leadership development. Students perform as cadet officers. Repeats are allowed. See advisor for details. May be repeated for a maximum of 8 credits.

AERO 3110 Management and Leadership A 3:3:0 Fall
* Corequisite(s): University Advanced Standing
Introduces students to the United States Air Force (USAF) and the Reserve Officer Training Corps (ROTC). Includes conflict management, followership, leadership responsibility, officership, and process improvement.

AERO 3110 Management and Leadership B 3:3:0 Spring
* Corequisite(s): University Advanced Standing
Introduces students to the United States Air Force (USAF) and the Reserve Officer Training Corps (ROTC). Includes conflict management, followership, leadership responsibility, officership, and process improvement.

AERO 3200 Jet Pilot Introduction 2:2:0 On Sufficient Demand
* Corequisite(s): University Advanced Standing
Studies principles of flight and accompanying issues. Introduces meteorology. Presents FARs as they apply to the private pilot. Provides orientation, understanding, and preparation of the US Air Force Undergraduate Pilot Training (UPT).
AIST 327G Indians of Utah 3:3:0 Fall Even Year
* Prerequisite(s): (ENGL 1010 or ENGL 1005) and University Advanced Standing

Investigates the history of Utah's five principal cultural groups from the pre-Columbian period to the present. Considers how economic processes, cross-cultural influences, and changing Federal and State policies have shaped American Indian communities and individuals in and around Utah. Examines how identity and culture in Native communities have been defined and redefined through the processes of migration (both native and non-native), conquest, assimilation efforts, and cultural persistence.

AIST 3360 American Indian Education Policy 3:3:0 Spring Even Year
* Prerequisite(s): (ENGL 1010 or ENGL 1005) and University Advanced Standing

Explores the history, political economy, and epidemiology of American Indian health issues in the United States. Examines the effects of the Federal Indian Policies related to the use of boarding schools and the long-term effects the experience had on Native students.

AIST 358G American Indian Health Policy 3:3:0 On Sufficient Demand
* Prerequisite(s): ENGL 2010, University Advanced Standing

Examines the effects of the pandemics brought by the European conquest of the Americas on Native populations and cultures, and on global historical processes.

AIST 3600 American Indian Policy and Tribal Government 3:3:0 Fall
* Prerequisite(s): ENGL 2010 or instructor approval and University Advanced Standing

Examines American Indian law in treaties, statutes, case law, regulations, and executive orders. Analyzes various policy approaches to the federal trust relationship, tribal sovereignty over internal affairs, civil jurisdiction over tribal lands, management of natural resources of tribal lands, and cultural preservation. Studies the traditional and modern forms of various Indian tribal governments.

AIST 3810 Precolumbian America 3:3:0 On Sufficient Demand
* Prerequisite(s): (ENGL 1010 or ENGL 1005) and AIST 180G and University Advanced Standing

Examines the history of Utah's five principal cultural groups from the pre-Columbian period to the present. Considers how economic processes, cross-cultural influences, and changing Federal and State policies have shaped American Indian communities and individuals in and around Utah. Examines how identity and culture in Native communities have been defined and redefined through the processes of migration (both native and non-native), conquest, assimilation efforts, and cultural persistence.

AIST 384G Indians of the Southwest 3:3:0 Spring Even Year
* Prerequisite(s): (ENGL 1010 or ENGL 1005) and University Advanced Standing

Examines the history of Utah's five principal cultural groups from the pre-Columbian period to the present. Considers how economic processes, cross-cultural influences, and changing Federal and State policies have shaped American Indian communities and individuals in and around Utah. Examines how identity and culture in Native communities have been defined and redefined through the processes of migration (both native and non-native), conquest, assimilation efforts, and cultural persistence.

AIST 3850 The Struggle for Self-determination American Indians 1891 to present 3:3:0 Fall Even Year
* Prerequisite(s): (ENGL 1010 or ENGL 1005) and University Advanced Standing

Surveys American Indian history from the Wounded Knee Massacre of 1891 to the present. Examines how American Indians shifted from armed conflict to the employment of legal and political strategies for achieving self-determination.
Course Descriptions

AIST 4600
Contemporary American Indian Political and Social Issues
3:3:0  Spring Odd Year
* Prerequisite(s): (AIST 358G or AIST 3600) and University Advanced Standing

Surveys current research and perspectives on contemporary American Indian issues. Utilizes a seminar approach in which each student will prepare summaries of books and articles to be distributed to the other class members. Includes identity, political activism, historiography, health, political, and cultural issues.

AIST 490R
Special Topics in American Indian Studies
3:3:0  On Sufficient Demand
* Prerequisite(s): ENGL 1010 and [POL 1000 or POLS 1100 or HIST 1700 or HIST 1740 or (HIST 2700 and HIST 2710)] and University Advanced Standing

Explores special topics in American Indian Studies and related subjects. Examples of special topics may include health, specific tribal communities, education, political issues, the humanities in Native culture, economic and community development, comparative studies, social science perspectives, or other areas of student and faculty interest. May be repeated for a maximum of 6 credits.

American Studies (AMST)

AMST 2000
Introduction to American Studies
3:3:0  Spring
* Prerequisite(s): ENGL 2010

Introduces students to the interdisciplinary study of American culture. Explores the period from the American colonies to the present. Emphasis is on the cultural and intellectual contexts of American life.

AMST 300R
Topics in American Studies
3:3:0  Fall, Spring
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Uses an interdisciplinary approach to study various topics and themes in American Studies. Topics might include Western American Culture, Nature and Culture, Popular Culture in America, Mass Media in America, etc. May be repeated for up to 6 credits toward graduation.

Anthropology (ANTH)

ANTH 101G
Social Cultural Anthropology
3:3:0  Fall, Spring, Summer
* Prerequisite(s): ENGL 1010 or ENGH 1005 with a grade of C+ or higher

Introduces students to the variability of human behavior cross-culturally and provides an understanding of the holistic approach to human behavior. Explores interrelationships, in a variety of cultural contexts, between beliefs, economic structures, sexuality, eating habits, ecology, politics, living arrangements, psychology, symbolism, and kinship. May be delivered hybrid.

ANTH 1020 (Cross-listed with: BIOL 1500) Biological Anthropology
3:3:0  Fall
* Prerequisite(s): (ENGL 1010 or ENGH 1005) and (ANTH 101G or BIOL 1010)

For students with special interests in Anthropology or the Life Sciences. Studies fossils and living primates, primate biology and behavior. Surveys humanoid fossils. Investigates human evolution and variations of basic biology as it pertains to human development. Stresses the importance of the distribution and diversity of humankind.

ANTH 103G
World Prehistory
3:3:0  Fall, Spring

Introduces the archaeological record of human prehistory. Explores the earliest fossil remains, and follows the development of humans throughout prehistory. Examines techniques used by archaeologists to find, recover, date, and analyze prehistoric artifacts.

ANTH 180G (Cross-listed with: AIST 180G, HIST 180G)
Introduction to American Indian Studies
3:3:0  Fall

Provides an overview of modern and historical American Indian communities in the United States. Explores political and historical issues of major tribes and Indian communities by region. Provides students with information and perspectives on key social and cultural issues: spirituality, relations with the Federal government, notable individuals, art, literature, dance, media, health, education and activism.

ANTH 2030
Archeological Method and Theory
3:3:0  Spring

Explores the history, goals, theories, and methods of anthropological and archaeological research, especially as influenced by the natural sciences. Examines variations in prehistoric human behavior by analyzing the physical remains of ancient peoples throughout diverse time periods and geographical locations.

ANTH 2880
Introduction to Theory and Ethnography WE
3:3:0  Fall

Provides foundational skills for analytic reading and writing in anthropology. Explores how to apply theory to ethnographic data. Teaches how to write argumentative essays that engage with anthropological texts.

ANTH 3000 (Cross-listed with: LANG 3000) Language and Culture LH
3:3:0  Fall, Spring, Summer
* Prerequisite(s): ENGL 1010 or ENGH 1005, (ANTH 101G or any foreign language 2010 course), Sophomore status, and University Advanced Standing

Introduces cultural linguistics. Analyzes features of human languages that make possible semantic universality. Examines distinction between phonetic and phonemic units. Explores relationship between language and culture. Studies how language shapes culture and how culture shapes language.

ANTH 3050
Intro to Ethnomusicology
3:3:0  On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Introduces a comparative study of music traditions from a variety of cultural settings. Presents concepts and research methods of ethnomusicology. Provides opportunities to develop skills of listening, observation, analysis, and demonstration. Utilizes ethnography, archaeology, and personal observation.

ANTH 3150
Culture Ecology and Health
3:3:0  On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Examines reciprocal roles of culture, environment, and disease in human health. Covers nutrition, stress, and traditional non-Western treatments. Explores cultures' use of their own global medicine to sustain health and welfare.

ANTH 3200
Food and Culture
3:3:0  On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores the complex relationships between food, culture, and human action. Examines the cultural underpinning of human nutrition. Discusses the selected social, cultural, medical, political, and ideological uses of food. Examines the symbolism of food to better understand taboo, fasting and feasting, class and social stratification, sacrifice, hosting, cannibalism, and narrative grotesque.

ANTH 3210
Islam in the Modern World
3:3:0  Spring Odd Year
* Prerequisite(s): University Advanced Standing

Explores the different ways anthropologists have studied Muslim social life, including attempts to apply Muslim ethical frameworks to the domains of finance, politics, leisure, and the modern domestic sphere. Addresses the variety of ways Islam is practiced and interpreted. Covers Islam in Africa, the Middle East, Central and Southeast Asia, Europe and the United States. Explores issues in interfaith relations, such as the challenges Muslims face when living in a Christian-majority society.

ANTH 3300
Culture Development and International Aid
3:3:0  Fall Odd Year
* Prerequisite(s): University Advanced Standing

Provides an overview of the anthropological study of international development. Analyzes development practices and anthropological critiques of these practices. Explores the way anthropological approaches can increase the likelihood of development project success. Explores peasant studies and the many concerns of rural development. Discusses poverty and how it relates to economic, social, and political development. Appraises ways to ameliorate poverty and the role of governmental and non-governmental organizations in the process.
ANTH 3315
Great Basin Archaeology
3:3:0
* Prerequisite(s): (ANTH 1030 or ANTH 2030) and (ENGL 2010 with a minimum grade of C+) and University Advanced Standing

Investigates the prehistoric and ethnographic peoples of the Great Basin of North America through the study of their archaeological remains. Examines how the analysis of ancient technology, subsistence, skeletal material, rock art, settlement patterning, the environment, and archaeological theory shapes our understanding of cultures in the region. May include a field trip to an archaeological site.

ANTH 3340
Peoples and Cultures of Mexico
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores the people and cultures of Mexico. Discusses borders and immigration, indigenous cultures, rural/peasant societies, urban societies, and historical/political issues specific to Mexico. Emphasizes awareness of cultural relativity and global connectivity among the diverse peoples of Mexico.

ANTH 3350
Andean Prehistory
3:3:0
* Prerequisite(s): ANTH 101G and (ENGL 2010 with a minimum grade of C+) and (ANTH 103G or instructor approval) and University Advanced Standing

Offers an updated synthesis of the development, key achievements, material, organizational and ideological features of pre-Hispanic cultures of the Andean region of western South America. Spans around 12,000 years of pre-Hispanic cultural developments, from the earliest hunters-gatherers to the Spanish conquest of the Inca Empire. Focuses on the modern nation of Peru with an emphasis on the Pañam, Cupisnique, Chavin, Paracas, Nasca, Gallinazo Moche, Recuay, Tiwanaku, Wari, Cajamarca, Sicán, Chimí, and Inka.

ANTH 3360
Contemporary Issues in American Culture
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Examines key aspects of contemporary American culture. Discusses American values and popular culture, ethnicity, gender, childhood, food, reproduction, technology, crime, and globalization. Highlights aspects of American culture that may not be explored in other Behavioral Science curricula.

ANTH 3365
Gender and Sexuality
3:3:0 Spring Even Year
* Prerequisite(s): University Advanced Standing

Examines theories on the biological and cultural construction of sex and gender. Covers how different communities organize their lives around gender distinctions and sexual practices. Utilizes anthropological theories to analyze cultural practices and concepts pertaining to the following: differences between men and women, perceived sexual deviance and accepted sexual practices, non-binary people and third genders. Explores the way contradictory gender norms coexist and compete within the same culture.

ANTH 3370
History and Ethnography of Andean Societies
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores the social and cultural processes that characterize the societies that descend from the Inca Empire—Bolivia, Ecuador, and Peru—as they have developed since the Spanish invasion. Discusses contemporary political, economic, and social problems in these countries in the context of global society.

ANTH 3400
Myth Magic and Religion
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing

Explores the many aspects of religion, including its history, diversity, and how it relates to social science studies. Examines terms such as myth, magic, religion, ritual and shamanism, among others. Covers how these terms are used to discuss religious and spiritual practices around the world.

ANTH 3420
Andean Religion
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores religion prior to the Spanish conquest in the countries that were part of the Inca Empire—Bolivia, Ecuador, and Peru. Surveys the nature of Catholicism that was recreated after colonial conquest. Discusses the contemporary religious issues of Andean societies, such as secularity, and how Andean religious categories differ from categories that guide academic research on religion.

ANTH 3450
Shamanism and Indigenous Religion
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores the religious systems of indigenous peoples, particularly those which have been called shamanic. Focuses on the classical study of shamanism and the literature on indigenous shamanism. Locates the study of shamanism within a social context that includes social relational and political economic contexts of the groups within which shamanism is found. Poses questions of how shamanism is different from the expanding world religions and compares and contrasts shamanism with non-shamanic indigenous religions. Analyzes at the current marketing of shamanism in New Age contexts.

ANTH 3460
Anthropology of Mormonism
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores how an anthropological approach can enable a more in-depth comprehension of Mormonism as a religious tradition and cultural phenomena.

ANTH 3480
Global Christianity
3:3:0 Fall Even Year
* Prerequisite(s): University Advanced Standing

Explores the key issues that have arisen in the literature that explores Christianity from an anthropological perspective. Examines the development of Christianity from its historical origins to its current status as a "world religion." Discusses how Christianity becomes relevant to different cultural contexts in the modern world. Analyzes Pentecostal, Evangelical Protestant, Eastern Orthodox, and Catholic forms of Christianity.

ANTH 3500
Discourse Semiotics and Representation
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores classical theoretical positions on representation, meaning, discourse, and poetics. Examines performance of culture and the implications of performance theory for scientific epistemology and methodology. Surveys recent work by anthropologists who grapple with these theoretical concerns in empirical research in a range of global settings.

ANTH 3550
Memory and History
3:3:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Studies how societies remember and represent their past and present in various contexts. Examines how societies employ different senses of temporality in these processes. Explores the relationships with historiography and ethnohistory and how anthropologists and historians have dealt with these issues.

ANTH 3560
Peace Violence and Human Morality
3:3:0 Fall Even Year
* Prerequisite(s): University Advanced Standing

Explores the cultural patterning of violence and nonviolence. Draws on theories of human values and ethics to understand how people morally justify different types of violent action, such as riots, genocide, warfare, and ritual violence. Explores cultural processes of pacifism, self-sacrifice, and reconciliation.

ANTH 3660
Globalized Society
3:3:0 Fall Odd Year
* Prerequisite(s): University Advanced Standing

Explores the development and reactions to globalization. Traces the formation of community of nation-states and multilateral agencies called "global society." Explores the implications of global society for peoples far removed from this sphere of social organization. Provides an understanding of the world in which nation-states and their citizens are enmeshed.
ANTH 3700
Culture Psychology and Mental Health
3:3:0  Spring Even Year
* Prerequisite(s): University Advanced Standing
Explores interrelationships of individual personality to elements of Western and non-Western sociocultural systems. Examines relations of sociocultural contexts to self, motives, values, personal adjustment, stress and pathology using case histories and ethnography. Discusses the idea of self and personality, normality and deviance, and mental health and mental illness across social and cultural boundaries.

ANTH 3720
Applied Anthropology
3:3:0  On Sufficient Demand
* Prerequisite(s): ANTH 101G, ENGL 2010, and University Advanced Standing
Surveys the ethics and methods used by applied anthropologists. Surveys a range of areas where applied work is performed, including development anthropology, anthropology and health, industrial anthropology, and marketing, etc. Also explores the political, social, and theoretical implications of applied work.

ANTH 3750
Bioarchaeology
3:3:0
* Prerequisite(s): [(ANTH 1020 or BIOL 1500) and (ENGL 2010 with a minimum C+ grade) or Instructor approval] and University Advanced Standing
Focuses on the biological and contextual study of human remains recovered from archaeological sites. Presents an updated synthesis of bio-archaeological science dealing with the study of the human skeleton to reconstruct patterns of biological stress, infectious disease, lifestyle and physical activity, diet, violent death, and genetic relationships in the past. Temporal coverage principally falls on the last 10,000 years of history, and the spatial scope is global. Involves the dynamic nature of skeletal tissues and the influences of environment and culture on human variation. Acquired skills will be of value to any students interested in skeletal studies including archaeology, bioarchaeology, paleopathology, forensic science, vertebrate biology, biomedical sciences, and behavioral science.

ANTH 3830
Biology and Culture
3:3:0  On Sufficient Demand
* Prerequisite(s): (ANTH 101G or ANTH 1020) and (ENGL 2010 with a minimum grade of C+) and University Advanced Standing
Explores the interactions of nature and nurture as a complex whole, rather than as mutually exclusive possibilities or separate streams of influence. Includes a significant research project.

ANTH 3850
Ethnographic Methods WE
3:3:0  Fall
* Prerequisite(s): ANTH 101G and University Advanced Standing
Examines the utility of ethnographic research techniques for answering different research questions. Formulates research ethics protocols. Engages in participant observation research and teaches techniques for recording observations in field notes. Employs ethnographic writing genres to compose reports on original research. Develops skills in qualitative interview techniques and the analysis of qualitative data.

ANTH 3870
Political Anthropology
3:3:0  Spring Even Year
* Prerequisite(s): University Advanced Standing
Explores anthropological theories of politics and power in relation to human events and social institutions. Provides a critical history of anthropological approaches to understanding processes of regulating and controlling populations, of justifying and executing power, of coaxing populations into self-governance, and of disciplining deviance. Analyzes political processes in non-state societies and the workings of nation-states.

ANTH 4120
History of Anthropological Thought
3:3:0  Fall
* Prerequisite(s): ANTH 101G and (ENGL 2010 with a minimum C+ grade) and University Advanced Standing
Surveys anthropological thought, theory, and its philosophical roots from the nineteenth to the twentieth centuries. Focuses on the concepts and theoretical paradigms deployed in different social and intellectual conjunctures, as well as on the major debates that have formed the field and separated it from other social science disciplines.

ANTH 4130
Contemporary Theory and Debates
3:3:0  Spring
* Prerequisite(s): ANTH 101G, ANTH 4120, and University Advanced Standing
Examines social theory and other disciplines. Surveys current debate through exploration of the conceptual apparatuses that are deployed and the issues that motivate current research. Analyzes contemporary anthropological writings.

ANTH 4310
Kinship and the Family
3:3:0  Fall Even Year
* Prerequisite(s): University Advanced Standing
Explores anthropological thinking on familial relationships and uses theoretical concepts to analyze a variety of kinship practices. Covers the history of the anthropology of kinship. Evaluates the adequacy of different anthropological approaches to kinship for understanding the distinct ways humans organize themselves into family groups.

ANTH 475R
Current Topics in Anthropology
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Presents selected topics in Anthropology and will vary each semester. May be repeated for a maximum of 15 credits toward graduation.

ANTH 482R
Archaeological Field Methods Practicum
1 to 9:0 to 45
* Prerequisite(s): [ANTH 2120 and (ENGL 2010 with a minimum grade of C+)] or instructor approval] and University Advanced Standing
Introduces students to archaeological field technique and a critical approach to the methods by which archaeology is conducted. Provides involvement in all phases of field excavation, lab processing, curation and preservation of archaeological remains, and data analysis. Provides students with hands-on training in archaeological, historical, bio-archaeological, and environmental research. Explores how to conduct archaeological survey, large-scale site excavation, date cultural materials, excavate mortuary sites and human burials, and document patterns of social complexity, subsistence, and material culture. Students must be prepared for strenuous outdoor work, including hiking, digging, carrying heavy loads, and processing field collections in laboratory settings. Includes day activities such as survey and excavation. Evenings are dedicated to seminar-style discussion and laboratory work. Includes periodic field trips to nearby archaeological and historic sites. May be repeated for a maximum of 27 credits. May be graded Credit/No Credit.

ANTH 490R
Independent Studies
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): For Behavioral Science Bachelor Degree students only; Instructor approval and University Advanced Standing
For qualified students who wish to undertake a well-defined project or directed study related to an area of special interest. Requires individual initiative and responsibility. Includes limited formal instruction and faculty supervision. Projects may include writing a publishable paper, passing a competency exam, producing an annotated bibliography, an oral presentation, or other options as approved by instructor. May be repeated for a maximum of 6 credits.

APP 281R
Cooperative Work Experience
1 to 8:1 to 8:0  On Sufficient Demand
* Corequisite(s): APPR 285R
Designed for electrical construction apprentice majors. Provides paid, on-the-job work experience in the student's major. Work experience, the correlated class and enrollment are coordinated by the Cooperative Coordinator. Includes student, employer and coordinator evaluations, on-site work visits, written assignments and oral presentations. Provides experience in writing and completing individualized work objectives that improve present work performance. May be graded Credit/No Credit.
Course Descriptions

APP 285R
Cooperative Correlated Class
1:1:0 On Sufficient Demand
* Corequisite(s): APPR 281R
Designed for electrical construction apprentice majors. Identifies on-the-job problems and provides remediation of those problems through in-class discussion and study. Includes the study of identifying and maximizing service opportunities. Students register for this class with approval of the Cooperative Coordinator. Includes lecture, guest speakers, video tapes, role playing, case analysis, oral presentation and written assignments. Completers should be better able to perform in their field of work or study.

Architecture (ARC)

ARC 1010
Classical Architecture Workshop
3:3:0 Fall, Spring
Provides an understanding of the fundamental principles and language of architecture. Instructs in the design principles that inform classical architecture which are found in the order, proportion, archetypal geometry, and patterns found in nature and the cosmos. Creates a solid foundation for learning and applying architecture's vocabulary and syntax to compose poetic and meaningful buildings.

ARC 2110
Architecture Studio I
3:2:3 Fall, Spring, Summer
* Prerequisite(s): EGDT 1020 and ARC 1010 with a grade of C- or higher
Introduces the classical theories of architectural language, design, and craftsmanship in a hands on studio setting. Focuses on the classical vocabulary of the built environment. Investigates the forms, spaces, and ordering systems of design. Produces hand drawings in orthographic, perspective, and axonometric views. Illustrates light through shade and shadows. Applies understanding of classical building forms in the design of increasingly complex projects. Develops skills in traditional rendering and presentation techniques.

ARC 2210
Architecture Studio II
3:2:3 Spring
* Prerequisite(s): EGDT 1020, ARC 1010, and ARC 2110 with a grade of C- or higher
Exposes students to architectural site analysis and the process of evaluating a particular locations physical, historical, and cultural characteristics to inform design. Develops a building project of significant merit by measuring and documenting a selected site. Analyzes the complex elements of a site such as varying topography, watercourses, vegetation, habitats, weather patterns, and historical data to guide design decisions. Researches elements to determine the building placement, orientation, form and material selection.

ARC 2220
Construction Documents and Specifications
3:3:0 Fall, Spring
* Prerequisite(s): EGDT 1020 and EGDT 1100 with a grade of C- or higher
Prepares for the Construction Documents Technician (CDT) industry certification using standard software to complete working drawings for the architectural, civil, MEP, and structural industries. Develops a project manual and outline specifications, which coordinate with the working drawings of a commercial design.

ARC 3110
Architecture Studio III
6:3:9 Fall
* Prerequisite(s): Matriculation to the B-Arch Program and University Advanced Standing
Immerses students into the architecture studio culture and a design thinking environment. Emphasizes the fundamental design skills with attention on site and precedent. Requires research of a site and program necessary to develop cultural, theoretical, environmental, and historical contexts. Follows a Project based approach with a final presentation to a professional jury.

ARC 3120
Architectural Graphic Communication
3:3:0 Fall
* Prerequisite(s): Matriculation to the B-Arch Program and University Advanced Standing
Enables the student to confidently communicate design ideas to others. Includes involvement in producing complex 3D models and renderings of various project types. Combines traditional drawing techniques and contemporary software to complete assignments and projects.

ARC 3130
Codes and Construction Law
3:3:0 Fall
* Prerequisite(s): EGDT 2100, EGDT 2610 both with a grade of C- or higher and University Advanced Standing
Investigates HVAC systems, indoor air quality, lighting, communication, security, fire protection, acoustics, vertical transportation, electrical, and plumbing systems.

ARC 3210
Passive Environmental Systems
6:3:9
* Prerequisite(s): ARC 3210 with a grade of C- or higher and University Advanced Standing
Explores the history of architecture and urbanism from a global perspective, beginning with the first settlements to roughly 1700 AD. Analyzes buildings and their surroundings through different methods of interpreting history. Presents that architecture is the result of complex interrelationships dealing with aesthetic, cultural, contextual, symbolic, religious, social, economic, political, technological, behavioral, and ecological issues.

ARC 3220
Active Environmental Systems
3:3:0 Fall, Spring
* Prerequisite(s): ARC 3220 and University Advanced Standing
Investigates the principles of environmental systems design and the building envelope's affect on occupant comfort and life safety. Studies HVAC systems, indoor air quality, lighting, communication, security, fire protection, acoustics, vertical transportation, electrical, and plumbing systems.

ARC 3230
Global History of Architecture to 1700
3:3:0 Fall, Spring
* Prerequisite(s): Matriculation to the B-Arch degree program, University Advanced Standing
Explores the history of architecture and urbanism from a global perspective beginning with the first settlements since 1700 AD. Analyzes buildings and their surroundings through different methods of interpreting history. Explores architecture's complex interrelationships dealing with aesthetic, cultural, contextual, symbolic, religious, social, economic, political, technological, behavioral, and ecological issues.

ARC 4110
Architecture Studio V
6:3:9 Fall
* Prerequisite(s): ARC 3210 with a grade of C- or higher and University Advanced Standing
Explores the history of architecture and urbanism from a global perspective, beginning with the first settlements to roughly 1700 AD. Analyzes buildings and their surroundings through different methods of interpreting history. Presents that architecture is the result of complex interrelationships dealing with aesthetic, cultural, contextual, symbolic, religious, social, economic, political, technological, behavioral, and ecological issues.

ARC 4120
Global History of Architecture Since 1700
3:3:0 Fall
* Prerequisite(s): ARC 3230 with a grade of C- or higher. Matriculation to the B-Arch degree program, and University Advanced Standing
Explores the history of architecture and urbanism from a global perspective beginning with the first settlements since 1700 AD. Analyzes buildings and their surroundings through different methods of interpreting history. Explores architecture's complex interrelationships dealing with aesthetic, cultural, contextual, symbolic, religious, social, economic, political, technological, behavioral, and ecological issues.
ARC 4210  
Architecture Studio VI  
6:3:9  
Spring  
* Prerequisite(s): ARC 4110 with a grade of C- or higher and University Advanced Standing  
Immerses students in the design of an architectural work to fulfill a community need. Encourages networking with community leaders and citizens. Employs project components such as client interviews, research methods, and interdisciplinary study. Explores a complex architectural program and associated needs of the community.

ARC 4220  
Building Envelope and Science  
3:3:0  
Fall, Spring  
* Prerequisite(s): ARC 4210 with a grade of C- or higher and University Advanced Standing  
Introduces modern architectural materials, methods of construction, and building enclosures including steel, concrete, curtain walls, high-performance materials, and thermal and moisture barriers. Evaluates the inclusion of sustainable systems to save energy and reduce the carbon footprint in building construction.

ARC 4230  
Building Structure II  
3:3:0  
Spring  
* Prerequisite(s): ARC 4130 with a grade of C- or higher and University Advanced Standing  
Studies the differences in design for structural elements in wood, steel, masonry, and concrete. Explores environmental conditions including water, snow, wind, soil, and seismic loads. Analyzes multiple structural systems, building systems, diaphragms, and structural connections. Includes structural engineer and architect communications.

ARC 4510  
Architecture Studio-Comprehensive Capstone I  
5:4:3  
Fall  
* Prerequisite(s): ARC 4210 with a grade of C- or higher and University Advanced Standing  
* Corequisite(s): ARC 4520 and ARC 4530  
Applies design skills through an architectural work which integrates critical and abstract thinking. Researches building systems, life safety considerations, building envelope, financial, cultural & environmental balance, and construction documentation skills.

ARC 4520  
Architectural Theory  
3:3:0  
Fall  
* Prerequisite(s): SURV 455G and University Advanced Standing  
* Corequisite(s): ARC 4510 and ARC 4530  
Surveys contemporary architectural thought and theory. Focuses on key figures, movements, and texts. Provides an overview of the principal theories that have informed or undermined architecture of the past four decades. Considers the changing role of theory with respect to practice. Supplies students with a set of questions, techniques, and tools for criticism and self-reflection.

ARC 4530  
Cultural Considerations in Architecture  
3:3:0  
Fall  
* Prerequisite(s): SURV 455G and University Advanced Standing  
Corequisite(s): ARC 4510 and ARC 4520  
Examines the relationship between architecture, culture, history, economics, and humanity. Explores varying cultures and human behaviors and how they represent and manifest themselves in the built environment.

ARC 4610  
Architecture Studio-Comprehensive Capstone II  
5:4:3  
Spring  
* Prerequisite(s): ARC 4510 with a grade of C- or higher and University Advanced Standing  
Applies design skills through an architectural work which integrates critical and abstract thinking. Researches building systems, life safety considerations, building envelope, financial, cultural and environmental balance, and construction documentation skills.

Art (ART)  
ART 1010  
Introduction to Visual Arts  
3:3:0  
Fall, Spring, Summer  
Develops an appreciation of the visual arts by investigating the elements and principles of art, art criticism, art production, and the history of art. Includes written critiques and assignments. Requires students to identify works of art and describe their significance in writing. May be delivered hybrid.

ART 1020  
Basic Drawing for Non-Majors  
3:2:2  
Fall, Spring, Summer  
For non-majors. Introduces basic drawing techniques and stresses fundamentals of observation-based homework. Includes practice and skill building. Investigates basic black and white media such as graphite and charcoal. Requires sketchbook, in-class and home work assignments.

ART 1050  
Photography I  
3:2:3  
Fall, Spring, Summer  
Emphasizes the use of camera operation, including aperture and shutter speed adjustments to control exposure, depth of field, lenses, and camera format. Teaches how to see photographically, using elements of composition and lighting to make stronger images. May be delivered online. Software fee of $12 applies. Course fee of $11 for equipment applies. Lab access fee of $26 for computers applies.

ART 1110  
Drawing I  
3:2:4  
Fall, Spring, Summer  
* Prerequisite(s): Art and Design Major  
For Art and Design majors. Introduces fundamental drawing concepts and media. Emphasizes mastery of basic drawing principles and integration of these principles into a personal drawing style through exposure to a variety of structured drawing experiences. Requires sketchbook, in-class and home work assignments.

ART 1120  
2D Design  
3:2:4  
Fall, Spring, Summer  
Introduces skills, techniques, and materials associated with two-dimensional design fundamentals. Studies a variety of media, techniques, and subjects, exploring perceptual and descriptive possibilities regarding design both as a developmental process as well as an artistic end. Provides experience in a range of traditional and non-traditional design media. Projects and critiques examine integration of both visual elements and principles of design according to contemporary standards.

ART 1130  
3 D Design  
3:2:2  
Fall, Spring, Summer  
* Prerequisite(s): ART 1120  
Presents a survey of the history and main lines of development and influential factors in three dimensional design. Examines important designers, firms, and decisive turning points in the history of three dimensional design. Emphasizes planning, purpose, and function through project oriented assignments. Teaches proper use of tools and materials. Course fee of $25 for materials applies.

ART 1210  
Spatial Drawing  
3:2:4  
Fall, Spring, Summer  
* Prerequisite(s) or Corequisite(s): ART 1110  
Provides students with essential drawing skills necessary for the correct representation of space. Introduces multiple linear perspective drawing methods, visualization, tonal drawing, and rendering skills. Studies perspective and spatial representation in a historical context.

ART 1340  
Sculpture I  
3:2:2  
Fall, Spring  
* Corequisite(s): ARC 4510 and ARC 4520  
Introduces methods and techniques of figurative clay sculpture. Students will construct armatures and build clay head and anatomy studies from the model. Includes firing and finishing techniques. Course fee of $20 for materials applies.

ART 1350  
Ceramics I  
3:2:2  
Fall, Spring, Summer  
Introduces clay as an expressive medium. Emphasizes techniques of working with clay, including hand building, wheel throwing, glazing, and firing. Course fee of $30 for materials applies.

ART 1400  
Graphic Computer Applications  
3:2:2  
Fall, Spring, Summer  
Introduces concepts and software related to visual communication and the creation and reproduction of art. Teaches how to create and modify digital images using Adobe Photoshop. Also teaches basic design skills using Adobe Illustrator. Teaches basic page layout skills using InDesign. Covers basic software used in visual communications. May be delivered online. Software fee of $12 applies. Lab access fee of $26 for computers applies.
ART 1410
Typography I
3:2:4  Fall, Spring
* Prerequisite(s): ART 1120, ART 1400. For DGM majors: DGM 1110, DGM 2250.
Teaches the principles of typographic design and communication, type selection, and type terminology. Addresses typographic history and the use of typography in contemporary design including its relationship to layout and grid structure. Teaches skills to allow students to professionally set type using industry standard software. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 1420
Graphic Design I
3:2:4  Fall, Spring
* Prerequisite(s): (ART 1120 and ART 1400) or (DGM 1110 and DGM 2250)
Provides an understanding of basic principles needed for effective visual communication. Presents a survey of graphic design theory and practice. Introduces graphic design processes for creative problem solving, production and critique. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 1630
Introduction to Landscape Painting
3:2:2  On Sufficient Demand
Teaches landscape painting and drawing techniques through direct exposure to area sites. Explores interior and exterior landscapes. Studies color, shape, relationships, light, and space. Emphasizes individual interpretation of subject matter using a variety of media. Community members welcome.

ART 1650
Watermedia I
3:2:4  Fall, Spring
Studies materials, techniques, and compositional methods of watercolor painting at a beginning level. Teaches the application of basic techniques for the use of transparent watercolor materials. Includes lecture/demonstration and studio time for application and evaluation. For majors and non-majors.

ART 1750
Intro to Digital Imaging
3:2:3  Fall, Spring
* Prerequisite(s): Art & Design major
Emphasizes the use of camera operation, including lens, aperture, and shutter speed adjustments to control exposure and depth of field. Teaches how to see photographically, using elements of composition and lighting to make stronger images. Uses digital captures as the primary focus. Also covers how to light and photograph 2D and 3D artworks as well as create reference photos. Required DSLR or SLR cameras. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 1790
Dark Room Techniques
3:2:4  Fall, Spring
* Prerequisite(s): ART 1750
Introduces photography majors to traditional dark room processes, including development and printing methods. Teaches imagery through negative manipulation, diffusion, toning, and multiple exposure. Course fee of $19 for equipment applies.

ART 1810
Introduction to Interior Design
3:3:0  Fall, Spring
For individuals wishing to develop interior design skills, be employed in the interior design industry, or develop their own interior design business. Covers aesthetic and functional home design and space planning, “presentation” drafting and presentation techniques, “universal design,” quality furniture selection, and furniture arrangements. Includes kitchen design, architectural details, background materials, color fabric construction and selection. Includes lecture, guest speakers, videos, in-class labs and field trips. Completers have prepared floor plans, color and selection boards, and make client presentations.

ART 1820
Interior Space Design
3:3:0  Fall
For individuals wishing to develop interior design skills, be employed in the interior design industry, or develop their own interior design business. Covers aesthetic and functional home design and space planning, “presentation” drafting and presentation techniques, “universal design,” quality furniture selection, and furniture arrangements. Includes kitchen design, architectural details, background materials, color fabric construction and selection. Includes lecture, guest speakers, videos, in-class labs and field trips. Completers have prepared floor plans, color and selection boards, and make client presentations.

ART 1830
Residential Interior Design
3:3:0  Spring
For individuals wishing to develop interior design skills, be employed in the interior design industry, or develop their own interior design business. Covers aesthetic and functional home design and space planning, “presentation” drafting and presentation techniques, “universal design,” quality furniture selection, and furniture arrangements. Includes kitchen design, architectural details, background materials, color fabric construction and selection. Includes lecture, guest speakers, videos, in-class labs and field trips. Completers have prepared floor plans, color and selection boards, and make client presentations.

ART 200R
Art and Design Lecture Series
1:1:0  Fall, Spring
* Prerequisite(s): Declared Art and Design major
Offers weekly lectures exploring art and design. Addresses art education, art history, ceramics, drawing, graphic design, illustration, painting, photography, and sculpture. May be repeated for a maximum of 4 credits toward graduation. Course fee of $50 for support applies.

ART 2100
Teaching Art for Children FF
3:2:2  Fall, Spring
Introduces concepts and techniques to teach children art in the home, community, or schools based on state and national art teaching and learning standards. Includes community-based and multicultural engagement, materials management, and content appropriate for young learners. Assists students to become independent, creative, and productive learners as they acquire the knowledge, skills, and experience to teach children ages 5–12. Course Lab fee of $23 applies.

ART 2110
Drawing II
3:2:4  Fall, Spring
* Prerequisite(s): (ART 1110 or ART 1020) and ART 1120
Emphasizes continued mastery of drawing principles and further integration of these principles into a personal drawing style. Provides exposure to a variety of structured drawing experiences. Introduces color drawing media into vocabulary and application in works created.

ART 219R
Special Topics
1 to 3:1 to 3:0 to 6  On Sufficient Demand
Elective course for Art and Design students. Presents seminars and workshops from experts in industry. May range from a single weekend to a full semester. Repeatable for offerings of different content. A maximum of 3 credits may apply toward graduation. Lab access fee of $15 for computers applies.

ART 2200
Imagination and Visual Literacy
3:2:4  Fall, Spring
* Prerequisite(s) or Corequisite(s): ART 1210
Teaches visual problem solving skills that enable students to effectively find, interpret, evaluate, use, and create images that are original in concept. $25 course fee for support applies.

ART 2230
Illustrative Media and Techniques I
3:2:4  Fall, Spring
* Prerequisite(s): ART 1110, ART 1120
* Prerequisite(s) or Corequisite(s): ART 1210
Introduces the practice, study, and application of a variety of oil painting techniques used in the production of illustration art. Explores the development of mixed media processes and techniques using oil paint in combination with other materials and media will be explored.

ART 2240
Illustrative Media and Techniques II
3:2:4  Fall, Spring
* Prerequisite(s): ART 1210
Introduces the study, practice and application of aqueous painting media used in the production of illustration art. Focuses on acrylic, gouache, casein or watercolor painting techniques. In addition, develops mixed media processes and techniques in combination with aqueous painting media.

ART 2250
Gestural Drawing
3:2:4  Fall, Spring
* Prerequisite(s): ART 1110, ART 1210
Introduces the drawing of basic shapes and forms used to create solidly-constructed, animated characters. Emphasizes understanding and communicating movement of the human form as shapes and drawing imaginatively. Course fee of $100 applies for support.

ART 2260
Digital Painting for Illustration I
3:2:4  Fall, Spring
* Prerequisite(s): ART 1110, ART 1400
Introduces the digital illustrator/painter to the application of various animation software programs such as basic raster, vector, and 3D. Software fee of $12 applies. Lab access fee of $26 for computers applies.
Course Descriptions

ART 2270  
Figure Drawing I  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1110, ART 1120, ART 1210, Art and Design major or department approval.  
Studies the anatomy of the human figure; dynamics, posing and motion. Emphasizes figure-drawing skills such as extreme foreshortening, perspective and drawing the gestural motion of the human form. Uses live models (draped and/or undraped). Course Lab fee of $120 for support applies.

ART 2280  
3D Computer Modeling  
3:2:4  
Fall, Spring, Summer  
* Prerequisite(s): ART 1400 or DGM 1110  
Teaches basic techniques of computer software-based 3D modeling, focusing primarily on Polygon and Subdivision Surface workflows applicable to virtually all modern 3D software packages. Includes basic lighting, surfacing, and rendering techniques. Includes computer animation techniques. Software fee of $12 applies Lab access fee of $26 for computers applies.

ART 2340  
Sculpture II  
3:2:2  
Spring  
* Prerequisite(s): ART 1340 or Department Approval  
Teaches intermediate techniques of clay sculpture, including armature construction, base relief, figurative sculpture based on human and animal forms. Develops the skills to create a sculpture from clay model to finished piece.brCourse fee of $25 for materials applies.

ART 2350  
Ceramics II  
3:2:2  
Fall, Spring  
* Prerequisite(s): ART 1350 or Department Approval  
Teaches intermediate and advanced techniques of wheel throwing, hand-building, and glazing. Emphasizes clay as an artistic medium. Includes decoration of clay shapes with engobes, slip, glaze, overglazes, etc. Develops the skills to create a quality finished ceramic piece. Requires students to provide all materials and equipment except wheels. Course fee of $40 for materials applies.

ART 2400  
Production Design  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1110, ART 1120, ART 1400, ART 1410, ART 1420, formal acceptance to Associate of Applied Science in Graphic Design (AAS) Program by portfolio review, or department approval.  
Introduces production techniques used in the graphic design industry. Includes the practical application of learned technical skills through design projects. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 2430  
Branding I  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1110, ART 1120, ART 1400, ART 1410, ART 1420, formal acceptance to Associate of Applied Science in Graphic Design (AAS) Program by portfolio review, or department approval.  
Addresses concepts relating to branding campaigns. Teaches research skills and the influence they have on the creation of brand identities. Teaches brainstorming, conceptual skills, and the use of industry-standard software for the design and production of an identity system. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 2440  
Motion Graphics I  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1110, ART 1120, ART 1400, ART 1410, ART 1420, formal acceptance to Associate of Applied Science in Graphic Design (AAS) Program by portfolio review, or department approval  
Teaches basic principles and techniques of 2D animation with an emphasis on typographic. Includes discussion of creative problem solving in time-based media. Includes learning 2D industry software to render video and audio. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 2480  
UI/UX Design I  
3:2:4  
On Sufficient Demand  
* Prerequisite(s): ART 1410, ART 2400  
Teaches basic principles and techniques of interface design for the Web. Includes discussion of usability and information architecture to solve client needs. Includes learning HTML tags and CSS styling, image preparation for the Web, and using Adobe Dreamweaver to create and upload web-ready files. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 2490  
Portfolio I  
3:2:2  
Spring  
* Prerequisite(s): ART 1110, ART 1120, ART 1410, ART 1420  
* Prerequisite(s) or Corequisite(s): ART 400  
Teaches the preparation of a portfolio for the BFA portfolio review and job interviews. Provides opportunities to evaluate and develop a format for professional presentations. Presents job-seeking skills pertinent to the visual arts industry. Software fee of $20 applies. Lab access fee of $25 for computers applies.

ART 2620  
Color Theory  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1120  
Explores the principles of color theory as related to the visual arts. Introduces theories of color, color systems, and the psychology of color through a sequence of exercises and projects.

ART 2630  
Painting I  
3:2:4  
Fall, Spring  
Investigates the character and techniques of oil painting at a beginning level. Emphasizes several approaches (both traditional and modern) on a variety of surfaces.

ART 2640  
Painting II  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 2630, (ART 1120 and ART 2620 recommended)  
Presents advanced traditional and non-traditional oil painting techniques. Emphasizes the techniques for personal exploration. Encourages development of individual style and approach to the media.

ART 2650  
Watermedia II  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1650. ART 2620 recommended  
Emphasizes development of technical skills, composition at an intermediate level in a variety of watermedia. Includes lecture, demonstration, and studio time for application and evaluation. Encourages development of personal style in relation to the media.

ART 2680  
Printmaking I  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1110 or ART 1020  
Introduces fine art printmaking and focuses on beginning techniques, processes, and materials. Explores the role of traditional and contemporary printmaking as a fine art medium. Focuses on the development of personal and individual imagery, craftsmanship, the use of tools and materials, and printmaking terminology. Includes intaglio printing and relief printing. Course Lab fee of $32 applies.

ART 2700  
Photography II  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1790  
Extends skills and principles learned in Introduction to Photography. Continues the exploration of light and composition through personal expression to make stronger images. Emphasizes technical control of exposure, development, and aesthetic presentation in the context of the Zone System. Teaches processes of archival printing and presentation. Emphasizes use of large format cameras. Course fee of $19 for equipment applies.

ART 2710  
Documentary Photography  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1750  
Teaches the art of telling stories through lens based media. Studies how to take a story from concept to publication. Explores methods of publication of imagery in magazines, newspapers, web sites, social media, annual reports, etc. Uses historical documentary references to inform contemporary ways of telling a story. Includes the use of still and moving imagery. Course Lab fee of $19 for equipment applies.
ART 2720  
Color Photography  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1750

Introduces color photography and color theory using digital photography and Adobe Photoshop as well as inkjet printing and scanning. Explores cross processing and other development manipulations. Discusses development of color photography and color perception as applied to specific themes. Encourages creativity and personal expression. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 2730  
Photographic Lighting I  
3:2:4  
Fall, Spring  
* Prerequisite(s) or Corequisite(s): ART 2720

Teaches the basic skills needed to control and manipulate light as a tool for the photographer in communication of artistic vision. Explores different lighting sources and investigates the effects of direction, quality and quantity. Emphasizes flash photography, tungsten, and natural lighting. Studies photographic studio, location, and mixed lighting techniques. Covers processes and concepts through slide presentations, readings, critiques and class discussions. Course Lab fee of $19 for equipment applies.

ART 2815  
Historical Architecture and Interior Design  
3:3:0  
Fall Odd Year

Studies interior design and its development and change through historical styles from prehistoric civilizations through the Victorian Era. Identifies major historical period styles, major architects, and designers. Covers furniture, lighting, and surface materials.

ART 281R  
Art and Design Internship  
1 to 6:1 to 6:0  
Fall, Spring, Summer  
* Prerequisite(s): Departmental Approval

Combines classroom theory with related, practical job experience. Provides students work experience as employees of a business, agency, or institution while enrolled in classes related to their career/major. Allows for individualized course content with students setting objectives in concert with their internship advisor and their workplace supervisor. Requires pre-approval by the area coordinator and department internship advisor. Offers variable credit determined by the number of hours worked per week. May be repeated for a maximum of 6 credits towards graduation. May be graded credit/no credit.

ART 2825  
Modern Architecture Interiors and Furnishings  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): ART 1810

Studies interior design and its development through historical styles from the Arts and Crafts movement to Deconstructivism. Covers architects, designers, textiles, lighting and surface materials.

ART 281R  
Independent Study  
1 to 3:0 to 3:0 to 9  
On Sufficient Demand  
* Prerequisite(s): Sophomore and above students only

Provides an opportunity for second year and above students to do individual research and experimentation within the areas of the Art and Design Program. Limited to advanced work beyond that which can be completed in existing available classes. Requires that a proposal be submitted and approved by the department prior to enrollment. May be repeated for a maximum of three credits toward graduation.

ART 3005  
Ceramic History Trends and Practices  
3:2:4  
Fall Odd Year  
* Prerequisite(s): ART 1350, ART 2350, and University Advanced Standing; or department approval

Investigates important movements, approaches, cultures, and techniques in the history of ceramic production. Studies artists, trends, and issues in contemporary ceramics.

ART 300R  
Special Topics in Art  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, and department approval

Addresses emerging topics, issues, and developments related to the visual arts. Includes lectures, demonstrations, and studio time for application and evaluation. Encourages development of personal style in relation to the topic. May be repeated for a maximum of 9 credits toward graduation.

ART 311R  
Drawing III  
3:2:4  
On Sufficient Demand  
* Prerequisite(s): ART 2110 and University Advanced Standing; or department approval

Continues the exploration of the technical skills and conceptual development of drawing as a creative medium. Focuses on the mastery of drawing skills and includes demonstrations, lectures and active participation in the critical process. Emphasizes cultivating personal expression and independent serial work. May be repeated for a maximum of 6 credits toward graduation.

ART 320  
Narrative Illustration  
3:2:4  
Fall  
* Prerequisite(s): (Matriculated into the BFA in Art and Design: Illustration emphasis) and ART 3240

Introduces the processes and techniques used in the execution of children's book illustrations. Emphasizes storytelling, narrative, visual storytelling and continues the study of media and techniques relative to storybook illustration. May be repeated for a maximum of 6 credits toward graduation.

ART 3220  
Conceptual Illustration  
3:2:4  
Spring  
* Prerequisite(s): (Matriculated into the BFA in Art and Design: Illustration emphasis) and University Advanced Standing

Introduces conceptual illustration and problem solving through the use of visual symbols, metaphors and icons. Course fee of $20 for support applies.

ART 322R  
Advanced Rendering of Forms and Surfaces  
3:2:4  
Fall Odd Year  
* Prerequisite(s): ART 2240 and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Studies the accurate depiction of light, shadow, and reflectivity. Focuses on realistic rendering of various objects, textures, and surfaces. Develops advanced skills with a variety of media that may include traditional and/or digital drawing and painting media. May be repeated for a maximum of 6 credits toward graduation.

ART 324R  
Children's Book Illustration  
3:2:4  
Fall Even Year  
* Prerequisite(s): (Matriculated into the BFA in Art and Design: Illustration emphasis) and University Advanced Standing

Provides experiences in creating mood through visual elements and controlling the pictorial space. Emphasizes composition, creativity and technical ability. Addresses narrative illustration and visual storytelling. Course fee of $20 for support applies.

ART 324R  
Environment Design and Painting  
3:2:4  
Fall Odd Year  
* Prerequisite(s): ART 3210 and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Develops and improves skills in designing, rendering and painting environments and landscapes for use in illustration, animation, video games and film. May be repeated for a maximum of 6 credits toward graduation.
ART 325R  
2D Animation for Illustration  
3:2:4  
Spring Odd Year  
* Prerequisite(s): ART 1110 and ART 1400 or DGM 1620 and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Provides the student of illustration a firm foundation to create simple to moderately complex 2D animations. Develops skills using animation basics including tweening, squash and stretch, anticipation, staging and timing. May be repeated for a maximum of 6 credits toward graduation. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 3260  
Digital Painting for Illustration II  
3:2:4  
Spring  
* Prerequisite(s): ART 2260 and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Focuses on creating quality digital paintings/illustrations in a studio setting. Studies the more subtle features of the software applications. Practices advanced conceptual and problem-solving skills. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 3270  
Digital Illustration  
3:2:4  
Spring Even Year  
* Prerequisite(s): ART 1110, ART 1400, ART 2260 and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Develops advanced skills in producing pixel-based, computer-generated artwork for use as illustrations and other graphic communications. Emphasizes digitally painted images created from scratch rather than the creation of images produced through the digital manipulation of existing, found, or photographic resources. Develops conceptually based and communicative images that will be a vital aspect of each course project. Employs industry-standard software, and techniques including layers, compositing, channels, selection masks and color adjustments. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 327R  
Rendering the Human Head  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 1110, ART 1120, and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Develops proficiency in rendering the human head in a variety of approaches and techniques. Addresses geometric and planar construction, proportion, lighting, features, and expression. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $93 for support applies.

ART 3280  
3D Computer Rendering  
3:2:4  
Fall Odd Year  
* Prerequisite(s): (ART 1400 or DGM 1110) and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval; ART 2280 recommended

Teaches techniques in lighting, texturing, and rendering of 3D models and scenes with a special emphasis on aesthetics and composition. Includes HDRI lighting, UV mapping, and texture painting, in addition to the standard techniques. Designed as a companion class to the modeling class, ART 2280, but can be explored as a stand-alone experience. Provides models, as needed, or students may use their own models as approved. Software fee of $12 applies. Lab access fee of $26 applies for computers.

ART 328R  
Painting the Human Head  
3:2:4  
Fall  
* Prerequisite(s): ART 327R and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Continues the development of rendering skills acquired in ART 327R (Head Drawing). Emphasizes mixing flesh tones, managing values, and investigates a variety of approaches to painting the human head. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $93 for computers applies.

ART 330R  
Sculpture III  
3:2:2 to 4  
Spring  
* Prerequisite(s): ART 2340 and University Advanced Standing; or department approval

Investigates studio problems based on concepts applied to various three-dimensional materials. Places special emphasis on the development of individual expression in the students chosen medium. Encourages the development of individual style and exploration of alternative media. May be repeated for a maximum 6 credits toward graduation. Course fee of $25 for materials applies.

ART 3340  
Typography II  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 2280, ART 2440, University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval.

Develops advanced skills in the use of typography and layout. Examines editorial practices and executes designs that are appropriate for the intended audience. Teaches industry-standard page layout software. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 3350  
Motion Graphics II  
3:2:4  
Fall, Spring  
* Prerequisite(s): ART 2280, ART 2440, University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval.

Continues the development of rendering skills acquired in ART 328R (Video Rendering). Emphasizes mixing flesh tones, managing values, and investigates a variety of approaches to rendering video. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $93 for computers applies.

ART 3360  
UI/UX Design II  
3:2:4  
Fall, Spring  
* Prerequisite(s): DGM 2120, University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval.

Continues the development of rendering skills acquired in ART 328R (Video Rendering). Emphasizes mixing flesh tones, managing values, and investigates a variety of approaches to rendering video. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $93 for computers applies.

ART 3380  
Secondary Art Education Methods I  
3:2:2  
Fall  
* Prerequisite(s): ART 1110, ART 1120, University Advanced Standing and Matriculation into Art Education.  
* Corequisite(s): EDSC 4550

Introduces students to the materials, methods, and resources related to teaching middle school and high school visual arts. Emphasizes the characteristics and components of a quality art program. Designed for the art major pursuing teacher licensure for grades 7-12. Course Lab fee of $16 for materials applies.
ART 3510
Secondary Art Education Methods II
3:2:2 Spring
* Prerequisite(s): University Advanced Standing. Art Education Majors Only.

Investigates theories and models of curriculum development in the visual arts for middle school and high school students. Includes implementation of curriculum development, unit/lesson planning, and evaluation strategies in the visual arts. Prepares prospective art teachers to plan, organize, and promote quality art programs and curricula. Course Lab fee of $22 for materials applies.

ART 361R
Figure Drawing II
3:2:4 Fall
* Prerequisite(s): ART 2670 and University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Explores fundamental methods and techniques of oil painting from observation of live models (draped and undraped). Explores historical and contemporary imagery, including the importance of craftsmanship, the usage of new tools/materials, and an expanding printmaking vocabulary. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $150 for support applies.

ART 363R
Painting III
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 2640 and University Advanced Standing; or department approval

Introduces theoretical issues in contemporary painting and their application to personal approaches to painting. Emphasizes individual problem solving and independent growth within a conceptual setting. May be repeated for a maximum of 6 credits toward graduation.

ART 364R
Figure Painting
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 361R, matriculated into the BFA in Art and Design: Illustration emphasis program or area coordinator approval) and University Advanced Standing

Introduces theoretical issues in contemporary painting and their application to personal approaches to painting. Emphasizes individual problem solving and independent growth within a conceptual setting. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $150 for support applies.

ART 365R
Watermedia III
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 2650 and University Advanced Standing; or department approval

Explores fundamental methods and techniques of oil painting from the figure using live models (dramed and undraped). Explores historical and contemporary imagery, including the importance of craftsmanship, the usage of new tools/materials, and an expanding printmaking vocabulary. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $150 for support applies.

ART 366R
Life Drawing
3:2:4 Fall, Spring
* Prerequisite(s): ART 1110, ART 1120, or department approval and University Advanced Standing

Studies fundamental human anatomy, structure, value representation, proportion, shape, and gesture from a fine arts vantage point in a range of drawing media. Draws from observation of live models (clothed and unclothed). Serves as a foundation for advanced courses in drawing and painting the human form as found in traditional, modern, and contemporary fine arts movements. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $135 applies.

ART 367R
Printmaking II
3:2:4 Spring
* Prerequisite(s): ART 366R or ART 2270, ART 2630, University Advanced Standing; or department approval

Continues to develop, enhance, and create proficiency in printmaking skills through intermediate techniques, processes, and materials. Establishes the role of traditional and contemporary printmaking as a fine art medium. Includes challenging and complex projects with more advanced technical skills than Printmaking I. Strengthens the development of personal and individual imagery, including the importance of craftsmanship, the usage of additional tools/materials, and an expanding printmaking vocabulary. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $34 for materials applies.

ART 368R
Printmaking III
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 366R or ART 1020), ART 2680, University Advanced Standing, or department approval

Continues the exploration of fine art printmaking through advanced techniques, processes, and materials including the mixing/printing of color inks and multiple plate registration. Strengthens the development of personal and individual imagery, including the importance of craftsmanship, the usage of new tools/materials, and an expanding printmaking vocabulary. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $34 for materials, equipment applies.

ART 369R
Contemporary Figure Painting
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 366R or ART 2270), ART 2630, and University Advanced Standing; or department approval. ART 2620 recommended.

Studies the human form from a fine arts vantage point at an advanced level in various painting media (oil, acrylic, mixed, etc.). Explores historical and contemporary modes of expression/image use and interpretation in conceiving and expressing the human form in a range of stylistic contexts. Painting is done from observation of live models (draped and undraped). Course Lab fee of $135 applies.

ART 371R
Historical Photographic Processes
3:2:4 Fall
* Prerequisite(s): University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval

Teaches alternative photographic processes with an emphasis on early photographic printing techniques. Includes preparation and exposure of paper using various alternative techniques through a variety of hands-on projects. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $50 for equipment applies.

ART 3730
Photographic Lighting II
3:2:4 Spring
* Prerequisite(s): University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval

Focuses on product lighting and camera techniques. Develops artistic skill through the creation of images that can be used in commercial settings, specifically in advertising. Course Lab fee of $19 for equipment applies.

ART 3740
Fine Art Photography
3:2:3 Fall, Spring
* Prerequisite(s): ART 1750 and University Advanced Standing. For Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Integrates previously taught image-making skills, and encourages students to further develop their personal vision through a more developed project. Examines contemporary trends, styles, and critical issues through slide presentations, readings, critiques, and class discussions. Course Lab fee of $19 for equipment applies.

ART 3750
Advanced Digital Imaging
3:2:3 Fall, Spring
* Prerequisite(s): ART 2720 and University Advanced Standing. For Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

Integrates Photoshop as a development and manipulation tool for image making. Investigates technical concerns of digital workflow, capture, and output for commercial and fine art applications. Strong emphasis on using Photoshop as a creative tool in personal artistic expression. Discusses more advanced uses of selection tools, color correction, layer and channel manipulations. Teaches processes and concepts through slide presentations, readings, critiques and class discussions. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 3800
Low-Fire Ceramics
3:2:2 Spring
* Prerequisite(s): ART 1350, ART 2350, and University Advanced Standing; or department approval

Explores low-temperature clay and glazing techniques, as well as the practical and aesthetic considerations of their use. Addresses the operation and maintenance of electric kilns.
ART 3810
Ceramic Technologies
3:2:2
On Sufficient Demand
* Prerequisite(s): ART 1350, ART 2350, and University Advanced Standing; or department approval
Teaches proper practices in the ceramic studio. Includes kiln operation, maintenance and design, basic clay and glaze formulation, understanding ceramic materials, ceramic tool making, and studio practices and safety.

ART 382R
Sculpting the Human Form
3:2:2
Fall
* Prerequisite(s): (ART 1110 or ART 1020, ART 1130, ART 1340) and University Advanced Standing
Teaches sculpting principles and techniques related to the human form. Explores skeletal and muscular anatomy studies through the creation of an écorché sculpture. Sculpting will be done from live models (clothed and unclothed) to improve observation and rendering skills. Emphasizes armature design and creation. May be repeated for a maximum of 6 credits toward graduation. Course lab fee of $72 for illustration applies.

ART 411R
Drawing IV
3:2:4
On Sufficient Demand
* Prerequisite(s): (ART 311R or department approval) and University Advanced Standing
Emphasizes individual exploration in a variety of drawing media. Variably engages "process" as a creative methodology. Continues with conceptual development of drawing as a creative medium. Encourages active participation in the critical process and refinement of a personal approach to the medium. May be repeated for a maximum of 6 credits toward graduation.

ART 421R
Advanced Illustration
3:2:4
Spring
* Prerequisite(s): (Matriculated into the BFA in Art and Design: Illustration emphasis program) and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ART 3220
Provides advanced studies in producing a senior level portfolio. Encourages students to find a personal style and voice in communicating images. Requires advanced problem solving skills and advanced abilities in the creation of images. May be repeated for a maximum of 6 credits toward graduation. Course fee of $50 for support applies.

ART 426R
Concept Design
3:2:4
Fall Odd Year
* Prerequisite(s): ART 1210, ART 327R, ART 361R, matriculated into the BFA in Art and Design: Illustration emphasis program or area coordinator approval) and University Advanced Standing
Teaches how to create original and compelling concept designs and environments for use in film, video games, graphic novels, and children’s books. May be repeated for a maximum of 6 credits toward graduation. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 427R
Concept Design II
3:2:4
Spring
* Prerequisite(s): (ART 426R, matriculated into the BFA in Art and Design: Illustration emphasis program or area coordinator approval) and University Advanced Standing
Offers advanced training in the creation of original and compelling character designs for artistic use and as icons for private and corporate use. May be repeated for a maximum of 6 credits toward graduation.

ART 428R
Sequential Illustration
3:2:4
Spring
* Prerequisite(s): (ART 3210, matriculated into the BFA in Art and Design: Illustration emphasis program or area coordinator approval) and University Advanced Standing
Studies the practice and execution of drawings and lettering in pencil, ink or digital mediums to create visual narratives in sequence, commonly referred to in popular culture as comics or graphic novels. May be repeated for a maximum of 6 credits toward graduation. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 429R
3D Illustration
3:2:4
Fall Odd Year
* Prerequisite(s): (ART 3280, matriculated into the BFA in Art and Design: Illustration emphasis program or area coordinator approval) and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ART 427R
Teaches 3D digital sculpting techniques needed to create finished 3D illustrations and/or 3D assets to be used as reference for 2D illustration. Studies model detailing, texture mapping, lighting, and rendering of 3D computer reference or as standalone 3D illustration. May be repeated for a maximum of 6 credits toward graduation. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 4360
Mold Making and Casting
3:2:2
Spring
* Prerequisite(s): ART 1120, ART 1130, ART 2340, and University Advanced Standing; or department approval
Covers the basic process of casting and the construction of molds. Emphasizes the use of molds in the development of sculptural ideas. Course fee of $30 for materials applies.

ART 4370
Hand Building Ceramics
3:2:2
Fall
* Prerequisite(s): ART 1350 and University Advanced Standing; or department approval
Designed for students interested in three-dimensional art forms. Emphasizes hand building design and techniques in creating both sculptural and vessel projects in water-based clay. Teaches advanced methods of coil, slab, and pinch construction. Utilizes slump molding, rolled slab, cylinders, and molds in creation of finished clay products. Course fee of $30 for materials applies.

ART 443R
Design Studio
3:2:4
Fall, Spring
* Prerequisite(s): ART 3420, ART 3450, and University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval
Addresses emerging topics, issues, and technology relevant to graphic design. Addresses these issues through research and collaborative project development. May be repeated for a maximum of 6 credits toward graduation. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 4440
Motion Graphics Studio
3:2:4
Fall, Spring
* Prerequisite(s): ART 3440, and University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval
Addresses emerging topics, issues, and technology relevant to motion design. Addresses these issues through research and collaborative project development. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 4480
UI/UX Studio
3:2:4
Fall, Spring
* Prerequisite(s): ART 3480, and University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval
Addresses emerging topics, issues and technology relevant to UI/UX design. Addresses these issues through research and collaborative project development. Software fee of $12 applies. Lab access fee of $26 for computers applies.

ART 4490
Portfolio II
3:2:2
Spring
* Prerequisite(s): ART 341R, ART 343R, and University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval
Presents advanced instruction in the execution of a variety of graphic design projects (advertising, collateral, editorial, package and web design) aimed at building an exit portfolio. Assists students to improve and refine their portfolios in preparation for employment. Provides students the skills to develop a brand identity for themselves to further enhance their employability. Software fee of $20 applies. Lab access fee of $25 applies for computers.

ART 463R
Painting IV
3:2:4
On Sufficient Demand
* Prerequisite(s): ART 363R and University Advanced Standing; or department approval
Emphasizes independent and creative development as a painter. Provides an opportunity for students to solidify and expand their ideas while working within a class context. May be repeated for a maximum of 6 credits toward graduation.
ART 465R
Watermedia IV
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 365R and University Advanced Standing; or department approval

Emphasizes continued experimental approach to various types of watermedia. Provides opportunity for independent exploration and further development of personal style/voice coupled with refinement of technical skills. May be repeated for a maximum of 6 credits.

ART 466R
Advanced Life Drawing
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 366R or ART 2270, and University Advanced Standing; or department approval

Studies fundamental human anatomy, structure, value representation, shape and gesture from a fine arts vantage point at an advanced level. Explores historical and contemporary modes of media/image use and application in conceiving and expressing the human form in a range of stylistic contexts. Includes observational drawing of live models (clothed and unclothed). Serves as a platform for advanced development in drawing the human form in a range of drawing media as found in traditional, modern and contemporary fine arts movements. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $150 for illustration applies.

ART 468R
Printmaking IV
3:2:4 On Sufficient Demand
* Prerequisite(s): ART 1110 or ART 1020, ART 2680, University Advanced Standing, or departmental approval

Expands the exploration of fine art printmaking through advanced techniques, processes, and materials. Continues to view the role of traditional and contemporary printmaking as a fine art medium. Includes more challenging and complex projects with more advanced technical skills than in Printmaking I, II, & III. Encourages the ability to detect and diagnose printing errors and to collaborate with peers in the making and critiquing of artworks. Strengthens the development of personal and individual imagery, including the importance of craftsmanship, the usage of new tools/materials, and an expanding printmaking vocabulary. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $34 for materials applies.

ART 470R
Figure Drawing III
3:2:4 Spring
* Prerequisite(s): ART 361R, Art and Visual Communication BFA Students, or Instructor approval) and University Advanced Standing

Offers a senior-level drawing experience, emphasizing drawing from imagination. Continues skill development in proper character structure and scene layout. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $125 for support applies.

ART 471R
Photographic Illustration
3:2:3 Spring
* Prerequisite(s): University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval

Develops skills in illustrating concepts through photographic processes. Encourages students to work through assignments from their own personal emphasis of commercial or fine art image making styles. Explores contemporary trends, styles, and critical issues through slide presentations, readings, critiques and class discussions. Focuses on the development of interpretation and conceptual image making. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $19 for equipment applies.

ART 474R
Advanced Photo Studies
3:2:4 Fall
* Prerequisite(s): University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval

Integrates all previous image making skills acquired into the students’ visual vocabulary. Encourages students to further develop their own personal vision through more developed projects. Examines contemporary trends, styles, and critical issues through slide presentations, readings, critiques and class discussions. Investigates needed skills in running a business as a commercial and Fine Art photographer. Emphasizes conceptual image making. May be repeated for a maximum of 6 credits toward graduation. Course Lab fee of $19 for equipment applies.

ART 4750
Exploratory Photographic Processes
3:2:4 Spring
* Prerequisite(s): University Advanced Standing; formal acceptance to Bachelor of Fine Arts (BFA) Program by portfolio review, or department approval

Explores deconstruction of the image in both a formal and conceptual process. Analyzes liquid emulsions, mixed media, encaustic, and alternative surfaces and materials. Examines the possibilities of the image beyond two-dimensional traditional photography. Course Lab fee of $19 for equipment applies.

ART 481R
Art and Design Internship
1 to 6:1 to 6:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing; formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree and departmental approval

Combines classroom theory with related, practical job experience. Students works as employees of a business, agency, or institution while enrolled in classes related to their career/major. Course content is individualized with student setting objectives in concert with their internship advisor and their workplace supervisor. Internship enrollment must be pre-approved by the area coordinator and department internship advisor. Number of hours worked per week will determine number of credits granted. May apply a maximum of 6 credits toward graduation. May be graded credit/no credit.

ART 4820
Professional Practices for the Visual Arts I
1:1:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing; declared Art & Design major; junior or senior status or department approval

For Art and Design majors. Covers business topics related to visual arts professions, including standard policies and procedures, basic contracts and pricing methods, trade customs, ethical standards, and general business practices.

ART 4830
Professional Practices for the Visual Arts II
1:1:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing; declared Art & Design major; junior or senior status or department approval

For Art and Design majors. Introduces students to legal topics relevant to professions in the visual arts, including the principles of copyright, trademark, and contract law, as well as policies and laws that impact the production of creative work.

ART 4840
Professional Presentation for the Visual Arts
1:1:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing; declared Art & Design major; junior or senior status or department approval

For Art and Design majors. Prepares students for visual arts professions, including building a professional website, preparing a professional portfolio, getting work ready for exhibition, and advertising/marketing work.

ART 4850
Professional Writing for the Visual Arts
1:1:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing; declared Art & Design major; junior or senior status or department approval

For Art and Design majors. Focuses on the development of advanced writing skills for visual arts professionals, including writing artists statements, biographies, critiques, critical reviews, exhibition labels, and content for social media platforms. Also focuses on understanding and tailoring communication for specific audiences.

ART 4890
Senior Seminar
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing; Senior status and formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, or department approval

For Art and Design majors. Covers standard policies and procedures used in the creation and marketing of visual arts. Includes estimating, pricing, trade customs, ethical standards, contracts, and other legal rights and issues. Explores job opportunities and self-employment options for visual artists.
Course Descriptions

**ART 491R**
Independent Study
1 to 3:0 to 3:0 to 9
On Sufficient Demand
*Prerequisite(s): University Advanced Standing, formal acceptance to the Art and Design Bachelor of Arts (BA), Bachelor of Science (BS), or Bachelor of Fine Arts (BFA) degree, and department approval
Provides an opportunity for upper division students to do individual research and experimentation within the areas of the Art and Design Program. Study is limited to advanced work beyond that which can be completed in existing available classes. A proposal must be submitted and approved by the department prior to enrollment. May be repeated for a maximum of 3 credits toward graduation.

**ART 4990**
Senior Studio
3:2:2
On Sufficient Demand
*Prerequisite(s): University Advanced Standing, Senior status, formal acceptance to the Art and Design Bachelor of Arts (BA) or Bachelor of Science (BS), and department approval
For Art and Design majors with senior status. Combines and integrates concepts, methodologies and skills developed in previous Art and Design course work, through the completion of a comprehensive project. Requires students to develop their own project/portfolio in consultation with a faculty advisor. Finished projects will demonstrate individual student skills and interests.

**ART 499R**
BFA Project WE
3:2:4
Fall, Spring
*Prerequisite(s): University Advanced Standing; Senior status and formal acceptance to Bachelor of Fine Arts (BFA) program by portfolio review or department approval
Focuses on the development and execution of a gallery exhibition or professional portfolio. Includes collaborative work with a gallery/museum professional in preparation of the exhibition's public viewing. May be repeated for a maximum of 6 credits toward graduation. Software fee of $12 applies. Lab access fee of $26 for computers applies.

**ARTH History (ARTH)**

**ARTH 2720**
History of Art from the Renaissance
3:3:0
Fall, Spring, Summer
Covers major trends in Western art, from the Renaissance through the Modern era, including elements of political, religious, cultural, literary, and philosophical elements as they impacted the creation of art. Canvas Course Mats $54/Cengage applies

**ARTH 272H**
History of Art from the Renaissance
3:3:0
On Sufficient Demand
Covers major trends in Western art, from the Renaissance through the Modern era, including elements of political, religious, cultural, literary, and philosophical elements as they impacted the creation of art. Canvas Course Mats $54/Cengage applies

**ARTH 2710**
History of Art to the Renaissance
3:3:0
Fall, Spring, Summer
Covers major trends in Western art from the Paleolithic period to the Gothic era, including elements of political, religious, cultural, literary, and philosophical elements as they impacted the development of art.

**ARTH 3020**
Classical Art and Architecture History
3:3:0
Spring
*Prerequisite(s): ARTH 2710 (ARTH 2720 recommended), ENGL 1010 or ENGH 1005, and University Advanced Standing
Studies the art and architecture of Ancient Greece, Etruria, and Rome. Explores the influences on classical culture as well as the influences of Greco-Roman culture over the centuries. Includes lectures and class discussion about classical art within its broad cultural framework.

**ARTH 3030**
Medieval Art and Architecture History
3:3:0
Fall
*Prerequisite(s): ARTH 2710 (ARTH 2720 recommended), ENGL 1010 or ENGH 1005, and University Advanced Standing
Studies major styles, cultural influences, and developments in the arts of the middle ages. After an introduction to the aftermath of the fall of Rome and the rise of Christianity, the Romanesque and Gothic periods are investigated in detail. Includes lecture and class discussions

**ARTH 3040**
Renaissance Art History
3:3:0
Fall
*Prerequisite(s): ARTH 2710 (ARTH 2720 recommended), ENGL 1010 or ENGH 1005, and University Advanced Standing
Studies art and architecture in Italy between 1250 and 1550, and explores artistic style, patronage, historical influences, and broad cultural influences on art. Includes lectures and class discussion on the major art works and artists in Florence, Rome and Venice.

**ARTH 3050**
Baroque Art and Architecture History
3:3:0
Spring
*Prerequisite(s): ARTH 2710 (ARTH 2720 recommended), ENGL 1010 or ENGH 1005, and University Advanced Standing
Studies major art works and artists in Italy, Spain, and France during the 17th Century. Explores the artistic, historical, religious, and broad cultural influences on the art of this period.

**ARTH 3055**
Northern Baroque Art History
3:3:0
Fall
*Prerequisite(s): ARTH 2720, ENGL 1010 or ENGH 1005, and University Advanced Standing
Studies major artists and artworks of northern Europe during the 17th century. Explores the artistic, historical, religious, and broad cultural influences on the art of this period, primarily focusing on artists working in Flanders and the Dutch Republic, as well as those from surrounding northern regions.

616 Course Catalog 2020-2021 Utah Valley University
ARTH 3060
Nineteenth-Century Art History
3:3:0  Spring
* Prerequisite(s): ARTH 2720 (ARTH 2710 recommended), ENGL 1010 or ENGH 1005, and University Advanced Standing

Studies leading artists and movements of the 19th century, emphasizing artistic developments in Europe between 1750 and 1900, primarily in France. Explores the broad historical, social, cultural, and philosophical changes that took place and influenced the visual arts of the century. Includes lecture and class discussions.

ARTH 3070
Modern Art and Architecture History
3:3:0  Fall
* Prerequisite(s): ARTH 2720, ENGL 1010 or ENGH 1005, and University Advanced Standing

Studies leading artists, artworks, and movements. Explores the broad cultural, historical, and philosophical influences on modern art and architecture. Includes lectures and class discussions on modern art and architecture. May be delivered online.

ARTH 3080
History of Architecture
3:3:0  Fall
* Prerequisite(s): (ARTH 2710 or ARTH 2720 or B-ARCH degree student with department approval), (ENGL 1010 or ENGH 1005), and University Advanced Standing

Surveys developments in architecture over the centuries, focusing on a variety of periods and leading innovators. Includes the role of technology as well as the broad cultural background in which the architecture was created.

ARTH 309G
Introduction to Non Western Ancient Art
3:3:0  Spring
* Prerequisite(s): (ARTH 2710 or ARTH 2720), (ENGL 1010 or ENGH 1005), and University Advanced Standing

Introduces students to the art and architecture of the non-western cultures of East Asia, Southeast Asia, Sub-Saharan Africa, Islam, Oceania and the Americas from before the period of Western Colonialism and domination (the course may focus on all or only one of these areas depending on faculty expertise). Places Non-Western art into its native context and discusses the religious, cultural, political, and philosophical world views in which art and architecture were produced in contrast to Western stereotypes or biases of Non-Western cultures.

Canvas Course Mats $54/Cengage applies.

ARTH 3100
History of American Art and Architecture
3:3:0  Spring
* Prerequisite(s): (ARTH 2710 or ARTH 2720 or B-ARCH degree student with department approval), (ENGL 1010 or ENGH 1005), and University Advanced Standing

Studies leading artists, architects and movements in America from the colonial era to the 1950s. Explores the aesthetic, social, political, and technological changes that impacted the development of art and architecture in America, with an emphasis on the styles and movements of the nineteenth and twentieth centuries. Includes lecture and class discussions.

ARTH 3110
The History of Illustration
3:3:0  Fall, Spring
* Prerequisite(s): University Advanced Standing

Surveys the history of illustration as visual communication. Discusses major movements and the influence of technological advancements in printing and broadcast media on the field of illustration. Focuses primarily on the period from 1860 to the present.

ARTH 3120
History of Contemporary Art
3:3:0  Spring
* Prerequisite(s): (ARTH 2710 or ARTH 2720), (ENGL 1010 or ENGH 1005), and University Advanced Standing

Studies themes and trends related to contemporary art. Explores the diverse influences that impacted art from late modernism to the twenty-first century. Emphasis will be given to understanding the pluralism of international contemporary art from the last three decades. Includes lecture and class discussions.

ARTH 3200
The History of Photography
3:3:0  Fall, Spring
* Prerequisite(s): (ARTH 2710 or ARTH 2720) and University Advanced Standing

Traces the different directions photography has taken since its invention, using the social and cultural environment as a context. Investigates the ever-increasing use of photography by artists in the creative process from the first uses of the camera obscura to the present. Discusses the developments that set the stage for the "invention" of photography and how photography changed the role of artists in the 19th and 20th centuries. Covers documentary photography and the rise of fine art photography as separate art forms.

ARTH 3300
Introduction to Museum Studies
3:3:0  Fall
* Prerequisite(s): Students must be a declared Art and Design major (or admittance to class by instructor) and have taken either ARTH 2710 or ARTH 2720, University Advanced Standing.

Introduces students to theoretical knowledge and practical skills needed to work in the museum environment. Teaches the basic functions and operations of museums, as well as art historical connections to these nonprofit organizations.

ARTH 3310
Art Theory and Criticism
3:3:0  Fall Even Year
* Prerequisite(s): (ARTH 2710 or ARTH 2720 or (HUM 2010 and HUM 2020)] and University Advanced Standing

Examines art theories, explores ideas related to content and understanding the meaning in art by emphasizing interpretation and judgment. Integrates theories and concepts related to both historical and contemporary art history through critical writings and artist statements.

ARTH 3400
Arts Management
3:3:0  Fall
* Prerequisite(s): ARTH 2720 and University Advanced Standing

Studies trends, themes, and historical developments related to arts and cultural management. Analyzes the economic, political and social environments in which artists and art organizations operate, including the consideration of legal, ethical, and policy issues. Explores such topics as freedom of expression, arts accessibility, art dealership, corporate partnerships, arts leadership, and globalization of the arts. Investigates the relationships between institutions, businesses, and museums related both to art history and to the contemporary art market.

ARTH 350G
Latin American Art and Architectural History
3:3:0  Spring
* Prerequisite(s): (ARTH 2710 or ARTH 2720), (ENGL 1010 or ENGH 1005), and University Advanced Standing

Surveys visual culture of the arts and architecture of Latin America, specifically, Mexico, Central America and South America from its Pre-Columbian roots, through the Colonial Period, Independence, and to contemporary trends in Latin American Art in the 21st century. Concentrates on the complicated interactions between indigenous cultures and imported styles, particularly during the colonial and independence periods, documenting the emergence of a truly unique Latin American identity forged in the synthesis of these sometimes complimentary and often competing cultures.

ARTH 391R
Art History Seminar
3:3:0  On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Explores topics within Art and Architectural History. Topics will change each semester to reflect the research activities and interests of the instructor (e.g., The Life and Art of Michelangelo, "The Current State of Gender Studies in Art History"). May be repeated for a maximum of 12 credits toward graduation.

American Sign Language (ASL)

ASL 1000
Introduction to the Deaf World
3:3:0  On Sufficient Demand
* Prerequisite(s): University Advanced Standing

Focuses on the nature, make up, and significance of the Deaf-World as a linguistic and cultural minority group. Gives significant attention to the different ways that deaf people form a minority group thereby adding diversity to society at large. Also addresses the diversity within the group and the sociological factors that affect its makeup. Introduces American Sign Language (ASL) and teaches some basic conversational skills. Gives special attention to the differences between the ways hearing and Deaf people construct meanings associated with deaf people. Taught in (or interpreted into) English.
Course Descriptions

ASL 1010
Beginning American Sign Language I
4:4:1  Fall, Spring, Summer
Introduces American Sign Language (ASL) to students with no previous experience with ASL. Employs an immersion approach to language learning. Emphasizes basic expressive and receptive conversational skills. Includes introduction to American Deaf culture. Requires weekly lab. Lab access fee of $10 applies. Lab access fee of $10 applies.

ASL 1020
Beginning American Sign Language II
4:4:1  Fall, Spring, Summer
Prerequisite(s): Students should have equivalent knowledge of ASL 1010
Builds on the experiences in ASL 1010. Emphasizes basic expressive and receptive conversational skills through active student participation. Continues introduction to American Deaf culture. Employs an immersion approach to language learning. Requires a weekly lab. Lab access fee of $10 applies.

ASL 115R
ASL Conversation I
1:1:0  Fall
Offers novice ASL users opportunities to enhance their proficiency in the target language by focusing on production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, and sharpen comprehension for natural conversational flow. Contrasts with all other first-year courses which must strive to produce mastery of the whole range of language acquisition components. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of conversational opportunities. Increases mastery of lexical items through increased frequency of use. May be repeated for a maximum of 3 credits toward graduation. Taught in ASL.

ASL 202G
Intermediate American Sign Language II
4:4:0  Fall, Spring, Summer
Prerequisite(s): Students should have equivalent knowledge of ASL 2010
Continues applied conversation use of ASL through literature, narratives, poetry, and creative sign play. Analyzes ASL grammatical principles and Deaf cultural experiences to explore and understand various underlying metaphors found in ASL literature. Requires Deaf community exposure and involvement. Lab access fee of $10 applies.

ASL 2030
Advanced Fingerspelling
1:1:0  Fall, Spring
Prerequisite(s): ASL 1020 or equivalent knowledge
Focuses on the patterns of ASL fingerspelling, one of the hardest ASL skills to master. Increases ability to accurately produce and comprehend ASL fingerspelling. Gives attention to the nature and application of fingerspelling within the sociocultural context of the Deaf-World. Taught in ASL.

ASL 2040
ASL Numbers
1:1:0  Fall, Spring
Prerequisite(s): ASL 2010 or equivalent knowledge
Focuses on the complex rule systems governing ASL numbers as used in a wide range of settings. Increases ability to accurately produce and comprehend contextually situated ASL numbers. Taught in ASL.

ASL 2050
Advanced ASL Grammar
3:3:0  On Sufficient Demand
Prerequisite(s): Students should have equivalent knowledge of ASL 202G
Explores the grammar of ASL focusing on areas typically difficult for English speakers, particularly ASL classifiers. Provides extensive instruction and opportunity for students to improve both comprehension and production through regular interaction. Taught in ASL. Lab access fee of $10 applies.

ASL 2060
Using Space in ASL
3:3:1  On Sufficient Demand
Prerequisite(s): ASL 2050
Studies the use of space in ASL productions and how to visualize and describe spatial relationships using ASL. Emphasizes skills necessary to describe space from different angles and point of views, focusing on areas typically difficult for English speakers. Provides extensive instruction and opportunity for students to improve both comprehension and production. Taught in ASL.

ASL 202G
Intermediate American Sign Language II
4:4:0  Fall, Spring, Summer
Prerequisite(s): Students should have equivalent knowledge of ASL 2010
Continues applied conversation use of ASL through literature, narratives, poetry, and creative sign play. Analyzes ASL grammatical principles and Deaf cultural experiences to explore and understand various underlying metaphors found in ASL literature. Requires Deaf community exposure and involvement. Lab access fee of $10 applies.

ASL 2030
Advanced Fingerspelling
1:1:0  Fall, Spring
Prerequisite(s): ASL 1020 or equivalent knowledge
Focuses on the patterns of ASL fingerspelling, one of the hardest ASL skills to master. Increases ability to accurately produce and comprehend ASL fingerspelling. Gives attention to the nature and application of fingerspelling within the sociocultural context of the Deaf-World. Taught in ASL.

ASL 2040
ASL Numbers
1:1:0  Fall, Spring
Prerequisite(s): ASL 2010 or equivalent knowledge
Focuses on the complex rule systems governing ASL numbers as used in a wide range of settings. Increases ability to accurately produce and comprehend contextually situated ASL numbers. Taught in ASL.

ASL 3010
Foundations and Theory and Methods of Deaf Studies
3:3:0  On Sufficient Demand
Prerequisite(s): (ASL 202G or equivalent) and University Advanced Standing
Provides Deaf Studies students a foundation for further study. Covers three areas: (1) significant personal and events in the Deaf-World which are often referenced in later courses; (2) significant theoretical approaches in the field; and (3) fundamentals of conducting research. Lays the foundation for students to engage in meaningful inquiry in upper-division coursework. Taught in ASL.

ASL 3050
Advanced American Sign Language
3:3:0  Fall, Spring, Summer
Prerequisite(s): Students should have equivalent knowledge of ASL 202G
Offers lower division/novice ASL users opportunities to enhance their proficiency in the target language by focusing on production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, sharpen comprehension, and develop conversational strategies such as circumlocution and managing a conversation with useful expressions for starting a conversation, gaining time to think, helping interlocutors, seeking agreement, etc. Contrasts with all other first year courses which must strive to produce mastery of the whole range of language acquisition components. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of production opportunities and defusing concern about new vocabulary and grammar. Increases mastery of lexical items through increased frequency of use. May be repeated for a maximum of 3 credits toward graduation.

ASL 3000
Technology for Deaf Studies
3:3:1  Fall, Spring
Prerequisite(s): It is recommended that students complete ASL 202G or have equivalent skills acquired through classes elsewhere or other through life experiences.
Examines various forms of media that will help Deaf Studies students succeed in both the pursuit of their academic degrees and in real-world work environments. Draws on the theoretical approaches of the Visual Culture field to explore visual theory, museums, memorials, film and video. Gives in-depth instruction in the use of multiple digital technologies used in higher-level Deaf Studies classes and in work environments associated with Deaf people. Taught in ASL.

ASL 3050
Advanced American Sign Language
3:3:0  Fall, Spring, Summer
Prerequisite(s): Students should have equivalent knowledge of ASL 202G
Offers lower division/novice ASL users opportunities to enhance their proficiency in the target language by focusing on production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, sharpen comprehension, and develop conversational strategies such as circumlocution and managing a conversation with useful expressions for starting a conversation, gaining time to think, helping interlocutors, seeking agreement, etc. Contrasts with all other first year courses which must strive to produce mastery of the whole range of language acquisition components. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of production opportunities and defusing concern about new vocabulary and grammar. Increases mastery of lexical items through increased frequency of use. May be repeated for a maximum of 3 credits toward graduation.

ASL 3000
Technology for Deaf Studies
3:3:1  Fall, Spring
Prerequisite(s): It is recommended that students complete ASL 202G or have equivalent skills acquired through classes elsewhere or other through life experiences.
Examines various forms of media that will help Deaf Studies students succeed in both the pursuit of their academic degrees and in real-world work environments. Draws on the theoretical approaches of the Visual Culture field to explore visual theory, museums, memorials, film and video. Gives in-depth instruction in the use of multiple digital technologies used in higher-level Deaf Studies classes and in work environments associated with Deaf people. Taught in ASL.
Course Descriptions

ASL 315R
ASL Conversation III
1:1:0 Spring
* Prerequisite(s): ASL 202G or equivalent knowledge and University Advanced Standing

Offers intermediate ASL users opportunities to enhance their proficiency in the target language by focusing on production. Centers on discussions from a selected reading list in 'book club' form. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, and sharpen comprehension for natural conversational flow. Contrasts with all other third-year courses which are more content based. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of conversational opportunities. May be repeated for a maximum of 3 credits toward graduation.

ASL 3310
Foundations of Interpreting
3:3:0 Fall, Spring
* Prerequisite(s): ASL 3050 and University Advanced Standing

Introduces bidirectional (ASL-to-English and English-to-ASL) interpreting between Deaf and hearing people. Studies the profession and skills necessary to be an interpreter. Includes history, models, and professional certification procedures of interpreting; cognitive processes, physical and psychological factors, intercultural communication, ethics, and situational interpreting. Deaf students are encouraged to enroll. This course may be taught as a hybrid.

ASL 3320
Physiology of Interpreting
3:3:0 Spring
* Prerequisite(s): ASL 202G and University Advanced Standing

Introduces students to skills and processes required to maintain health and wellbeing in the physically demanding and high stress field of interpreting. Develops cognitive, ergonomic, and dual tasking abilities required to interpret without stress or physical injury. Helps students better understand how a healthy lifestyle and developing good habits can improve their skills and prevent injury. Lab access fee of $10 applies.

ASL 3330
Cross Cultural Communication and Interpreting
3:3:0 Fall
* Prerequisite(s): ASL 3310 and University Advanced Standing

Builds on ASL 3310. Focuses heavily on the practice of interpreting with special emphasis on the dimension of intercultural communication. Requires regular skill-building exercises in both consecutive and simultaneous interpretation, both English-to-ASL and ASL-to-English. Deaf students are encouraged to enroll. Taught in ASL. Lab access fee of $10 applies.

ASL 3340
Interpreting as a Profession
3:3:0 Fall
* Prerequisite(s): ASL 3310 and University Advanced Standing

Builds on the principles (ASL-to-English and English-to-ASL) for interpreting between Deaf and hearing people taught in Interpreting I. Studies the profession and skills necessary to be an interpreter in more specialized settings such as medical, legal, mental health, and theatre. Includes history, models, and professional certification procedures of interpreting; cognitive processes, physical and psychological factors, intercultural communication, ethics, and situational interpreting. Deaf students are encouraged to enroll. Lab access fee of $10 applies.

ASL 3350
Consecutive Interpreting
3:3:1 Fall, Summer
* Prerequisite(s): ASL 3310, matriculation into the Interpreting Emphasis, and University Advanced Standing

Introduces skills and processes required to produce consecutive interpretations. Focuses on developing basic cognitive, semantic, and dual tasking abilities required to interpret rehearsed and/or spontaneous texts. Teaches to incorporate semantic choice, register, and ethical behavioral decisions and understand how they impact interpretation. Develops sets of technical or field-specific signs and applies these to interpretative work. Includes one-hour per week lab. Taught in ASL. Lab access fee of $10 applies.

ASL 3360
Simultaneous Interpreting
3:3:0 Spring, Summer
* Prerequisite(s): ASL 3350 and University Advanced Standing

Introduces skills and processes required to produce simultaneous interpretations. Focuses on transitioning from consecutive interpreting to time-limited simultaneous interpreting. Develops cognitive, semantic, and dual tasking abilities required to interpret spontaneous texts. Teaches and incorporates more advanced semantic choices and negotiation techniques. Works with a variety of audience sizes and types. Teaches how ethics impact behavioral decisions and interpretations. Gives more consideration to developing sets of technical or field-specific signs and applying these to interpretative work. Includes one-hour per week lab. Lab access fee of $10 applies.

ASL 3365
Deaf Interpreting in the Community
3:3:1 On Sufficient Demand
* Prerequisite(s): ASL 3310 and University Advanced Standing

Examines the roles, responsibilities and benefits of Certified Deaf Interpreters. Prepares Deaf interpreters for certification as Certified Deaf Interpreters (as recognized by the Registry of Interpreters for the Deaf). Prepares hearing interpreters to work in teams with Deaf interpreters. Examines settings, ethics, roles, theory and hands-on exercises.

ASL 3370
Sign to Voice Interpreting
3:3:1 Fall
* Prerequisite(s): ASL 3360 and matriculation into the Interpreting Emphasis and University Advanced Standing

Introduces skills and processes required to produce conceptually accurate and linguistically appropriate voice interpretations of ASL texts. Develops cognitive, semantic, and dual tasking abilities required to interpret spontaneous texts. Teaches and incorporates more advanced semantic choices and negotiation techniques. Works with a variety of audience sizes and types. Teaches how ethics impact behavioral decisions and interpretations. Gives more consideration to developing sets of technical or field-specific signs and applying these to interpretative work. Includes one-hour per week lab. Lab access fee of $10 applies.

ASL 3380
Transliteration
3:3:1 Spring
* Prerequisite(s): ASL 3360, matriculation into the Interpreting Emphasis and University Advanced Standing

Introduces skills and processes required to produce conceptually accurate and linguistically appropriate messages using ASL signs in an English word order. Develops cognitive, semantic, and dual tasking abilities required to interpret spontaneous texts. Teaches and incorporates more advanced semantic choices and negotiation techniques. Works with a variety of audience sizes and types. Teaches how ethics impact behavioral decisions and interpretations. Gives more consideration to developing sets of technical or field-specific signs and applying these to interpretative work. Includes one-hour per week lab. Lab access fee of $10 applies.

ASL 3390
Professional Issues in Interpreting
3:3:0 Spring
* Prerequisite(s): ASL 3310 and University Advanced Standing

Provides students advanced study and skills development in the business and profession of interpreting, decision making while interpreting between Deaf (including Deaf-blind) and hearing populations, and negotiation of the complex and growing field of interpreting. Students develop the understanding of the day to day demands of the work needed become truly professional interpreters. Provides extensive individual feedback. Lab access fee of $10 applies.

ASL 3510
History of Deaf People to 1817
3:3:0 Fall, Spring
* Prerequisite(s): ASL 202G or equivalent knowledge and University Advanced Standing

Examines chronologically to 1817 the formation and treatment of the Deaf community and culture. Emphasizes the rise of deaf education in a European setting and on the links to American Deaf education. Examines perceptions of deaf people and language across this period. Taught in ASL.
ASL 3750
Deaf Cinema
3:3:0 Spring
* Prerequisite(s): ASL 3050 and University Advanced Standing

Explores the critical role film plays in Deaf culture and the Deaf community. Uses film as a background to critically think about and address key issues that Deaf people encounter in society. Studies various lenses of Deaf themes and Deaf characters in movies, as well as how Deaf people have been involved with creating movies throughout history and contrasts this with the ways films have been a mold for the ideology and identity of Deaf people. Introduces concepts of film composition and critiquing tools. Taught in ASL. May be delivered hybrid.

ASL 385G
Audism/Linguicism/Oppression
3:3:0 Fall, Spring
* Prerequisite(s): [ASL 3050 and (ASL 3510 or ASL 3520 or ASL 3530) or department approval] and University Advanced Standing

Examines oppression in various forms through a comparative study spanning across cultures and communities. Examines the parallels between widely-understood forms of oppression and those specific to the Deaf-World. Fulfills Global/Intercultural graduation requirement.

ASL 415R
ASL Conversation IV
1:1:0 Fall
* Prerequisite(s): ASL 3050 and University Advanced Standing

For students interested in ASL courses which are more content based. Facilitates concentration and analysis of visual linguistic and non-manual markers. Teaches focusing on production. Centers on discussions from a selected reading list in 'book club' form. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, and sharpen comprehension for natural conversational flow. Contrasts with all other upper division ASL courses which are more content based. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of conversational opportunities. May be repeated for a maximum of 3 credits toward graduation.

ASL 4330
Visual Linguistic Analysis for Interpreters
3:3:1 Spring
* Prerequisite(s): ASL 3350, matriculation into the Interpreting Emphasis and University Advanced Standing

Teaches necessary processing skills related to interpreting from Sign to spoken languages including ability to concentrate and analyze visual linguistic and non-manual markers. Analyzes discourse focusing on context, linguistics and culture. Lab required. Lab access fee of $10 applies.

ASL 4360
Legal Interpreting
3:3:0 Fall
* Prerequisite(s): ASL 3350 and matriculation into the Interpreting Emphasis and University Advanced Standing

Provides a conceptual understanding of the American legal system, and the unique cultural challenges related to interpreting for parties within the system. Examines both the law and Deafness and the areas of language and cultural mediation required to effectively facilitate communication between people who are Deaf and people who are hearing in legal settings. Lab access fee of $10 applies.

ASL 4370
Ethics for Interpreters
3:3:0 Fall, Spring
* Prerequisite(s): ASL 3310 and University Advanced Standing

Provides students advanced study and skills development in ethical decision making while interpreting between Deaf (including Deaf-blind) and hearing populations, including interpreting in Educational, Higher Ed, Legal, Mental Health and Medical situations. Helps students develop the ethical understanding needed to become truly professional interpreters. Provides extensive individual feedback to rapidly improve students' interpreting skills and understanding of the complex nature of interpreting ethics. This course may be taught as a hybrid. Lab access fee of $10 applies.

ASL 4381
Applying Interpreting Skills to Coursework--Medical
3:3:0 Fall
* Prerequisite(s): ASL 3350; ASL 3360, matriculation into the Interpreting Emphasis, and University Advanced Standing.

Guides interpreters through skill sets applied to real life classroom lectures, specifically medical and psychology courses offered online through accredited universities. Requires practical application of specific interpreting skills and techniques as well as course preparation and acquisition of course specific knowledge to develop balanced interpreting practices, including both specific applicable skills in interpretation and a broad based liberal arts knowledge to which the skills are applied.
ASL 4382  
Applying Interpreting Skills to Coursework--Education  
3:3:0  Fall  
* Prerequisite(s): ASL 3350, ASL 3360, matriculation into the Interpreting Emphasis, and University Advanced Standing.  
Guides interpreters through skill sets applied to real life classroom lectures, specifically education and other courses offered online through accredited universities. Requires practical application of specific interpreting skills and techniques as well as course preparation and acquisition of course specific knowledge to develop balanced interpreting practices, including both specific applicable skills in interpretation and a broad based liberal arts knowledge to which the skills are applied.

ASL 4383  
Applying Interpreting Skills to Coursework--Community  
3:3:0  Spring  
* Prerequisite(s): ASL 3350, ASL 3360, matriculation into the Interpreting Emphasis, and University Advanced Standing.  
Guides interpreters through skill sets applied to real life classroom lectures and instruction including business, manufacturing and organizational courses offered online through accredited universities. Requires practical application of specific interpreting skills and techniques as well as course preparation and acquisition of course specific knowledge to develop balanced interpreting practices, including both specific applicable skills in interpretation and a broad based liberal arts knowledge to which the skills are applied.

ASL 439R  
Special Topics in Interpreting  
3:3:1  On Sufficient Demand  
* Prerequisite(s): ASL 3310 and University Advanced Standing  
Provides students advanced study and skills development in interpreting between deaf (including deaf-blind) and hearing populations. Focuses on different topics as deemed appropriate (e.g., variety of academic, business, or social contexts). Provides extensive individual feedback to rapidly improve students’ interpreting skills and understanding of the complex nature of the interpreting process. Repeatable for a maximum of 9 credits toward graduation. Lab access fee of $10 applies.

ASL 4410  
ASL Linguistics  
3:3:0  Fall, Spring, Summer  
* Prerequisite(s): ASL 3050 and University Advanced Standing  
Introduces the linguistic study of ASL, including phonology, morphology, syntax, semantics, and discourse structure. Emphasizes grammatical structures of ASL, including sign formation, pronominalization, identification and analysis of subjects and objects, classifiers, depicting verbs, pluralization, time concepts, and social interaction of language and culture within Deaf communities. Taught in ASL.

ASL 4450  
Deaf World Discourse  
3:3:0  Fall  
* Prerequisite(s): ASL 3050 and University Advanced Standing  
Examines the discourse practices of the Deaf-World. Studies the ways that Deaf people use discursive forms to accomplish specific social aims. Explores the semiotic connections between discursive forms and various Deaf-World identities. Adopts an anthropological bias toward real-world discourse as primary data, and prepares students to do ethnographic fieldwork in the Deaf-World. Taught in ASL.

ASL 4520  
Deaf People and Disability Studies  
3:3:1  Spring  
* Prerequisite(s): ASL 3050 and University Advanced Standing  
Introduces the field of disability studies and shows where Deaf people fit within this field. Explores the historical, social, political, religious, philosophical, and cultural influences that construct and influence the categories of “disability” and “deafness.” Examines the complex relation between Deaf and disability rights groups as well as how Deaf persons and persons with disabilities construct their own meanings and identities. Taught in ASL.

ASL 4530  
Deaf Peoples of the World  
3:3:0  Spring  
* Prerequisite(s): ASL 3530 and University Advanced Standing  
Explores the lives of Deaf people in various places around the world. Considers the extent to which the deaf experience is cross-cultural and to what extent it is unique to specific locations. Explores the lifestyles, educational opportunities, political climate and level of community development of deaf people across the globe. Seeks to illuminate areas of overlap and of difference among the worldviews of various communities.

ASL 4550  
Multicultural Deaf Lives  
3:3:0  Fall, Spring  
* Prerequisite(s): ASL 3050 and University Advanced Standing  
Focuses on cultural issues, values, behaviors, identities and language of Deaf people from diverse backgrounds. Examines autobiographies, documentaries, films, videos, and academic literature to help understand the contributions and historical development of the emerging majority of the Deaf community that is underrepresented in the United States and the world. Taught in ASL. May be delivered online.

ASL 4560  
Deaf People and the Law  
3:3:0  Spring  
* Prerequisite(s): ASL 3050 and University Advanced Standing  
Focuses on the impact of laws and the legal system in the lives of people who are Deaf and the role such laws and the legal system play in the general understanding of Deafness in the United States. Explores in detail the rights of persons who are Deaf in a hearing world. Taught in ASL.

ASL 4610  
ASL Literature II  
3:3:0  Spring, Summer  
* Prerequisite(s): ASL 3610 and University Advanced Standing  
Explores the dynamics of ASL literature and its traditions by studying various genres and ASL storytellers/poets. Covers stories with handshake constraints, poetry, and songs. Taught in ASL. May be delivered hybrid and/or online.

ASL 4800  
Deaf Culture Studies WE  
3:3:0  Fall, Spring  
* Prerequisite(s): (ASL 3510 or 3520 or 3530) and University Advanced Standing  
Examines the various ways in which hearing people oppress Deaf people. Explores different avenues through which society has built a system of privilege based on an audiocentric center. Also examines how certain members of the Deaf community internalize audist constructions of deafness.

ASL 4850  
Advanced Understanding of Oppression and Audism  
3:3:0  On Sufficient Demand  
* Prerequisite(s): ASL 385G and University Advanced Standing  
Examines the various ways in which hearing people oppress Deaf people. Explores different avenues through which society has built a system of privilege based on an audiocentric center. Also examines how certain members of the Deaf community internalize audist constructions of deafness.

ASL 4890  
Deaf Studies Senior Capstone  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Senior status and University Advanced Standing  
* Prerequisite(s) or Corequisite(s): ASL 4800  
Engages students in a synthesis and critical review of what they have learned through coursework. Produces a project or thesis reflecting students’ knowledge and passionate interests developed in the course of their study as a Deaf Studies major. Taught in ASL.

ASL 490R  
Special Topics in Deaf Studies  
1 to 3:1 to 3:0 to 1  
* Prerequisite(s): ASL 3050 and University Advanced Standing  
Presents selected topics in Deaf Studies. Varies each semester. Topics will reflect the interdisciplinary nature of the Deaf Studies field. Projects and evaluation will vary according to the topic. May be repeated for a maximum of 9 credits with different topics.
Astronomy (ASTR)

ASTR 1040 Elementary Astronomy 3:3:0 Fall, Spring, Summer
Introduces astronomy and cosmology. Provides a physics-based overview of the solar system, the lives and deaths of stars, galaxies, and the evolution of the Universe. Explores the basic principles of physics and light, the tools of astronomy, and interesting concepts such as the Big Bang and black holes. Canvas Course Mats $67/Pearson applies

ASTR 104H Elementary Astronomy PP 3:3:0 Spring
* Prerequisite(s): MATH 1050 or MATH 1055
As an honors section, this course requires a greater level of engagement and greater level of proficiency on the part of the student. Introduces astronomy and cosmology. Provides a physics-based overview of the solar system, the lives and deaths of stars, galaxies, and the evolution of the Universe. Explores the basic principles of physics and light, the tools of astronomy, and interesting concepts such as the Big Bang and black holes.

ASTR 1050 Investigations of the Solar System 3:3:0 On Sufficient Demand
* Prerequisite(s): MAT 1030 or any higher mathematics
Offers a descriptive and conceptual survey of the solar system. Describes the probable origin and evolution of the sun and planets, and the workings of the sun. Covers light, optics and spectroscopy, and the mechanics of orbital motion. Compares planets by their origins, structures and atmospheres. While the presentation is primarily qualitative, assumes rudimentary math skills on the part of the student to facilitate comparative studies of solar system objects.

ASTR 1060 Investigations of Stars and Galaxies 3:3:0 On Sufficient Demand
* Prerequisite(s): MAT 1030 or any higher mathematics
Describes the origins and evolutions of stars, and collections of stars, galaxies and clusters of galaxies. Includes introduction to cosmology. Teaches the law of gravity and those laws of physics connected with optics and spectroscopy. Emphasizes conceptual learning, and assumes rudimentary mathematical skills on the part of students to facilitate comparative studies.

ASTR 1070 Cultural Astronomy in Our Lives 3:3:0 Spring
Explores the visible sky as seen with the naked eye. Presents examples of cultural interpretations of the sun, moon, planets and stars, methods of keeping calendars, and changes that occur through the seasons. Studies the motions of the planets, including the earth, and changes in the sky from different latitudes. Investigates how astronomy has impacted the lives of people throughout the ages and around the world. Includes extensive use of the UVU planetarium, nighttime observation, illustrated lectures, and class demonstrations. Canvas Course Mats $67/Pearson applies

ASTR 107H Cultural Astronomy in Our Lives 3:3:0 On Sufficient Demand
Explores the visible sky as seen with the naked eye. Presents examples of cultural interpretations of the sun, moon, planets and stars, methods of keeping calendars, and changes that occur through the seasons. Studies the motions of the planets, including the earth, and changes in the sky from different latitudes. Investigates how astronomy has impacted the lives of people throughout the ages and around the world. Includes extensive use of the UVU planetarium, nighttime observation, illustrated lectures, and class discussion.

ASTR 1080 Life in the Universe 3:3:0 Fall
Presents a general introduction to the scientific method of understanding life, its origins, and its place in the universe. Discusses the philosophy governing the scientific view of learning about life. Treats in detail what life is, the adaptability of life and how it evolves, why Earthlike conditions resulted in life as we know it, what other environmental conditions might sustain life, and where life may be found beyond Earth.

ASTR 2040 Intermediate Astronomy 3:3:0 Fall, Spring
* Prerequisite(s): PHYS 2210
Introduces astronomy and cosmology with an emphasis on the physical principles underlying astronomical phenomena. Provides a physical and mathematical overview of the solar system, the nature and evolution of stars, galaxies, dark matter and dark energy, the large scale structure of the Universe, the Big Bang, and Inflation.

ASTR 290R Independent Study 1 to 5:0 to 15 On Sufficient Demand
For students interested in advanced topics in astronomy and cosmology. Students may choose their own course of study under the guidance of an assigned faculty member.

ASTR 3050 Astrophysics I 3:3:0 Fall
* Prerequisite(s): PHYS 2220, MATH 1220, and University Advanced Standing
Covers the physics of stars, stellar structure and evolution, and the solar system. Treats in detail the current methods of astronomical data collection and analysis. Discusses the mathematics of the laws of stellar structure and their implications for the birth, life, and death of stars.

ASTR 3060 Astrophysics II 3:3:0 Spring
* Prerequisite(s): PHYS 2220, MATH 1220, ASTR 3050, and University Advanced Standing
Covers the physics of galaxies and cosmology. Treats in detail the current methods of astronomical data collection and analysis as it relates to these topics. Discusses the mathematics of the Theories of Relativity and its implications for the origin and structure of the Universe.

ASTR 4100 Brown Dwarfs and Exoplanets 3:3:0 Fall
* Prerequisite(s): PHYS 2220, MATH 1220, and University Advanced Standing
* Prerequisite(s) or Corequisite(s): PHYS 3100
Provides an advanced, calculus-based introduction to the rapidly evolving field of brown dwarfs and extrasolar planets (exoplanets). Includes topics related to the theory of substellar objects, planetary formation, planetary interiors, planetary atmospheres, planetary orbits, and observational methods for detecting and characterizing brown dwarfs and exoplanets.

ASTR 4350 Research Methods in Astronomy 3:1 to 2:2 to 4 On Sufficient Demand
* Prerequisite(s): ASTR 3050, University Advanced Standing, and Department and Instructor Approval
Presents directed topics in research methods in astronomy. Prepares students to conduct astronomy research projects. Emphasizes practical methodologies in measurement, software, error analysis, and statistical analysis. Requires a class project. May require use of specialized astronomical image processing software (e.g., IRAF and PyRAF) and other programming languages. Includes practice producing oral presentations, posters and journal articles using contemporary software and LaTeX.

Auto Mechanics (AUT)

AUT 1000 Survey of Automotive Technology 2:2:0 Fall, Spring
An introductory course for those interested in Automotive Technology. Presents basic automotive repair lessons on ignition and fuel systems, brakes, CV joints, and emissions for state inspections. Discusses electrical accessories, computerized engine controls, and chassis components.

AUT 100L Survey of Automotive Lab 1:0:3 Fall, Spring
* Corequisite(s): AUT 1000
Introductory course for those interested in Automotive Technology. Offers basic automotive repair lab experiences on proper and safe equipment usage, vehicle construction, engine operation, steering and suspension components, brakes, measuring and diagnostic tools. Tool room fee of $19 for equipent applies.
AUT 1010
Maintenance and Light Repair
2:2:0  Fall, Spring, Summer
Teaches skills in shop safety and basic skills to prepare students for future automotive technology-related courses and placement in high skill, high paying employment. Includes service information systems, precision measurement, tire and wheel service, bearings, headlamp adjustment, lubricants and fluids, cleaning methods, gaskets and sealants, belts and hoses, cooling systems, and other systems.

AUT 101L
Maintenance and Light Repair Lab
2:0:6  Fall, Spring, Summer
* Prerequisite(s) or Corequisite(s): AUT 1010
Develops necessary skills in shop safety and basic maintenance skills. Presents basic maintenance and light repair of vehicle systems. Prepares students for future automotive technology related courses and placement in high skill, high paying employment areas. Examines vehicle system operations such as: service information, precision measurement, tires and wheels, bearings, headlamp adjustment, lubricants and fluids, cleaning methods, gaskets and sealants, belts and hoses and cooling systems.

AUT 1110
Brake Systems
2:2:0  Fall, Spring
* Corequisite(s): AUT 111L Recommended
For automotive majors and other interested community members. Covers the principles of automotive braking including hydraulic theory, diagnosis, and service of brake systems. Studies drum, disc, and power units. Includes wheel bearing adjustments, packing, and troubleshooting. Discusses tire construction including both lateral and radial run out and wheel balancing techniques. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 111L
Brake Systems Lab
1:0:3  Fall, Spring
* Prerequisite(s) or Corequisite(s): AUT 1110
Provides hands on brake systems instruction, including drum, disc, and power units. Includes wheel bearing adjustments, packing, and troubleshooting. Labs include tire construction, both lateral and radial run out and wheel balancing techniques. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for computers applies.

AUT 1120
Manual Power Trains
2:2:0  Fall, Spring
* Corequisite(s): AUT 112L Recommended
For automotive majors and other interested community members. Designed to develop skills and knowledge in the area of manual transmission/transaxles and driveline components. Covers the function, construction, operation, inspection, troubleshooting and servicing of front, rear, and four-wheel drive power transmission devices used in passenger cars and light trucks. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 112L
Manual Power Trains Lab
1:0:3  Fall, Spring
* Prerequisite(s) or Corequisite(s): AUT 1120
Define diagnosis and repair of manual transmissions including transaxles, differentials, drive shafts, and four wheel drive components. Operation of clutches with torque and gear application. Tool room fee of $19 for equipment applies. Course Lab fee of $16 for materials applies.

AUT 1130
Engine Repair
2:2:0  Fall, Spring
* Corequisite(s): AUT 113L Recommended
Offers an in-depth study of design, operation, troubleshooting, and service procedures for modern gasoline and diesel engines. Presents procedures for disassembly and reassembly of engine units, service, and technical data. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 113A
Engine Repair Lab
2:1:3  Fall, Spring
For automotive majors and other interested community members. Studies construction, operation, and performance of various types of engines. Covers the theory of combustion, and characteristics of fuels, lubrication systems, cooling systems, timing valves, and wear problems with all other parts of the engine. Includes lab experience. Tool room fee of $10 for equipment applies.

AUT 113B
Engine Repair
2:1:3  Fall, Spring
Designed for anyone interested in small-engine repair. Includes hands-on application with shop time. Offers practical information about small engines, theory, operations, and maintenance. Provides information, troubleshooting and service techniques for snowmobiles, 4-wheelers, personal watercraft, mowers, tillers, and other small engine applications.

AUT 113L
Engine Repair Lab
1:0:3  Fall, Spring
* Prerequisite(s): AUT 1110, AUT 1120, AUT 1130, and AUT 1160  
* Corequisite(s): AUT 117L Recommended
Provides hands on engine repair instruction, including engine repair and diagnosis. Includes engine repair and diagnosis and used on current model automobiles and trucks. Topics of study are: electricity, Ohm's Law, magnetism, inductance, capacitance, electronic devices, schematic user's information, test procedures, test equipment, and batteries. Lab exercises are correlated with the Automotive Service Excellence (ASE) P1 task list. Lab work will include activities on lab circuitry and live vehicles. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

AUT 116L
Automotive Electrical Systems Lab
1:0:3  Fall, Spring, Summer
* Prerequisite(s) or Corequisite(s): AUT 1160
Studies electrical and electronic fundamentals found and used on current model automobiles and trucks. Topics of study are: electricity, Ohm's Law, magnetism, inductance, capacitance, electronic devices, schematic user's information, test procedures, test equipment, and batteries.

AUT 117L
Engine Electrical Systems Lab
1:0:3  Fall, Spring, Summer
* Prerequisite(s): AUT 1110, AUT 1120, AUT 1130, and AUT 1160  
* Corequisite(s): AUT 117L Recommended
Studies the function, construction, operation, testing, diagnosis and servicing of automotive ignition systems, starting, charging/generator systems and battery testing using a variety of diagnostic test equipment.

AUT 117L
Engine Electrical Systems Lab
1:0:3  Fall, Spring, Summer
* Prerequisite(s): AUT 1110, AUT 1120, AUT 1130, and AUT 1160  
* Corequisite(s): AUT 117L Recommended
Studies the function, construction, operation, testing, diagnosis and servicing of automotive ignition systems, starting, charging systems and battery testing using a variety of diagnostic test equipment. Proper use of diagnostic test equipment in the lab and on vehicle systems will stressed. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

AUT 1210
Suspension and Steering Systems
2:2:0  Fall, Spring
* Corequisite(s): AUT 121L Recommended
Discusses nomenclature, theory of operation, and service procedures for passenger car and light-truck suspensions and computer controlled power steering systems. Includes instruction in two-wheel and four-wheel electronic systems. Presents methods of alignment including computerized alignment and service tools. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 121L
Suspension and Steering Systems Lab
1:0:3  Fall, Spring
* Prerequisite(s) or Corequisite(s): AUT 1210
Provides a laboratory experience enhanced by following the Engine Repair ASE task list. Emphasizes demonstrations, observations and hands-on participation. Utilizes actual vehicle systems of major manufactures to supplement training. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.
AUT 1220
Automatic Powertrain Systems
2:2:0 Fall, Spring
* Prerequisite(s): AUT 1110, AUT 1120, AUT 1130, and AUT 1160
* Corequisite(s): AUT 122L
Includes the operation, diagnosis, repair, and adjustment of automatic transmissions and transaxles. Covers planetary gearing, strategies for operation, and service procedures of passenger car, SUVs and light-trucks. Software fee of $10 for lab applies. Lab access fee of $15 for computers applies.

AUT 122L
Automatic Transmissions and Transaxles Lab
1:0:3 Fall, Spring
* Prerequisite(s) or Corequisite(s): AUT 1220
Provides a laboratory experience enhanced by following the Automatic Transmissions and Transaxles ASE task list. Emphasizes demonstrations, observations and hands-on participation. Utilizes actual vehicle systems of major manufactures to supplement training. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

AUT 1230
Engine Performance
2:2:0 Fall, Spring
* Prerequisite(s): AUT 1110, AUT 1120, AUT 1130, and AUT 1160
* Corequisite(s): AUT 123L Recommended
Studies electrical and fuel systems fundamentals found on passenger cars, light-trucks, and marine applications of theory, operation, and construction. Includes solid state electronic ignition systems. Teaches tune-up including diagnosis and troubleshooting. Computerized fuel injection found on gasoline and diesel engines will also be studied. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 123A
Engine Performance
2:1:3 Fall
For automotive majors and other interested community members. Studies electrical and fuel system fundamentals including theory, construction and principles of operation. Covers batteries, lighting, starting, and charging. Includes all solid state electronic and ignition systems. Teaches tune-up including diagnosis and troubleshooting. Studies computerized ignition and fuel injection. Includes lab experience.

AUT 123B
Engine Performance 2nd Half
2:1:3 Spring
Includes advanced instruction in engine performance, starting systems, charging systems, and indicator circuits. Discusses all mechanical and electronic parts of the vehicle relative to quality engine tune-up and diagnostic instruction. Includes lab experience.

AUT 123L
Engine Performance Lab
1:0:3 Fall, Spring
* Prerequisite(s) or Corequisite(s): AUT 1230
Provides a laboratory experience enhanced by following the Engine Performance ASE task list. Emphasizes demonstrations, observations and hands-on participation. Utilizes actual vehicle systems of major manufactures to supplement training. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

AUT 1260
Tech Math for Mechanics
3:3:0 Fall, Spring
For students in Automotive, Collision Repair, and Diesel Mechanics technology majors. Covers principles of math as required by the industry. Studies pressures, measuring engine and horsepower output, hydraulics, torque, and electrical flow. Includes solving equations in percent, proportion, variation, formula rearrangement, function and graphs with right and oblique triangles. Successful completers should be able to solve problems on the job using technical and mathematical data.

AUT 201L
Automotive Service Practicum Engine Performance and Steering Suspension
2:0:6 Fall
* Prerequisite(s): AUT 1210, AUT 1230 with a grade of C- or better
Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Engine Performance and Heating, Ventilation and Air Conditioning Systems. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

AUT 202L
Automotive Service Practicum Emission Controls and Chassis Electronics
2:0:6 Fall
* Prerequisite(s): AUT 1160, AUT 1230 with a grade of C- or better
Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Emission Control Systems and Chassis Electrical. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

AUT 203L
Automotive Service Practicum Brake Systems and Transmission Controls
2:0:6 Spring
* Prerequisite(s): AUT 1110, AUT 1160, AUT 1220 with a grade of C- or better
Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Automatic Transmissions and Brake Systems including Anti-Lock and Traction Control. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

AUT 2110
Advanced Steering Suspension and Alignment
2:2:0 Fall
* Prerequisite(s): AUT 1210, AUT 1160 with a grade of C- or better
* Corequisite(s): AUT 210L Recommended
Discusses advanced theory of two-wheel and four-wheel alignment. Studies nomenclature, theory of operation and service procedures for mechanical, electronic, and electrical parts of automotive steering and suspension systems. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 211L
Automotive Service Practicum Steering/Suspension/Alignment Lab
1:0:3 Fall
* Prerequisite(s): AUT 1210
* Corequisite(s): AUT 2110
Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Steering/Suspension.
AUT 2120
Advanced Engine Performance
2:2:0 Fall
* Prerequisite(s): AUT 1130, AUT 1230, AUT 1160 with a grade of C- or better
* Corequisite(s): AUT 202L Recommended

Includes advanced instruction in engine performance, indicator circuits and On-Board Diagnostics II (OBD-II). Discusses mechanical and electronic parts of the vehicle relative to quality engine tune-up and diagnostic instruction. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 212L
Automotive Service Practicum Engine Performance Lab
1:0:3 Fall
* Prerequisite(s): AUT 1230
* Corequisite(s): AUT 2120

Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Covers tasks related to engine performance.

AUT 2130
Advanced Emission Control Systems
2:2:0 Fall
* Prerequisite(s): AUT 1130, AUT 1230, AUT 1160 with a grade of C- or better
* Corequisite(s): AUT 202L Recommended

Studies emissions control systems on vehicles. Reviews county emissions certification requirements. Emphasizes the pre and post testing of the different emission systems and the control of the systems as they apply to different types of fuel systems. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 213L
Automotive Service Practicum Emission Controls Lab
1:0:3 Fall
* Prerequisite(s): AUT 1230
* Corequisite(s): AUT 2130

Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Emission Control Systems.

AUT 2140
Chassis Electrical and Electronics Systems
2:2:0 Fall
* Prerequisite(s): AUT 1160, AUT 1170 with a grade of C- or better
* Corequisite(s): AUT 202L Recommended

Studies theory, diagnosis, and repair of chassis electrical and electronic systems. Includes the study of lighting systems, electronic dash circuits, inflatable restraint systems, electronic cruise control systems and other accessories found on vehicles.

AUT 214L
Automotive Service Practicum Chassis Electrical and Electronics Lab
1:0:3 Fall
* Prerequisite(s): AUT 1160
* Corequisite(s): AUT 2140

Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Chassis Electrical.

AUT 2210
Advanced Braking and Control Systems
2:2:0 Spring
* Prerequisite(s): AUT 1110, AUT 1160 with a grade of C- or better
* Corequisite(s): AUT 221L Recommended

Covers diagnosis and repair of electronic controlled braking systems; including anti-lock brakes, traction control systems, stability control systems and other control systems found on modern vehicles. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 2211
Automotive Service Practicum Brake Systems Lab
1:0:3 Spring
* Prerequisite(s): AUT 1110
* Corequisite(s): AUT 2210

Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Brake, Anti-Lock and Traction Control Systems.

AUT 2220
Automatic Transmissions and Electronic Controls
2:2:0 Spring
* Prerequisite(s): AUT 1160 with a grade of C- or better
* Corequisite(s): AUT 203L Recommended

AUT 222L
Automotive Service Practicum Transmission Controls Lab
1:0:3 Spring
* Prerequisite(s): AUT 1220
* Corequisite(s): AUT 2220

Includes field type service work in an instructional setting. Emphasizes vehicle service needs which are most frequently required in modern commercial service centers. Requires the diagnosis and repair of computerized vehicle systems. Includes standards for quality and quantity of work produced. Studies parts procurement, estimates, repair orders, and customer relations. Follows ASE P2 Performance Tasks for Transmission Controls.

AUT 2240
Heating Ventilation Air Conditioning and Refrigeration Theory
2:2:0 Spring
* Prerequisite(s): AUT 1160 with a grade of C- or better
* Corequisite(s): AUT 204L Recommended

Offers an in-depth study of automotive heating, ventilation, air conditioning (A/C), and refrigeration systems. Includes theory of operation, diagnosis and repair of HVACR systems. Environmental safety issues are stressed including laws and regulations, CFC recovery and recycling, ozone depletion, and new, environmentally friendly, systems. Computerized automatic temperature controlled systems are also covered. Stresses service, diagnosis and troubleshooting using electronic test equipment. Software fee of $10 applies. Lab access fee of $15 for computers applies.

AUT 224L
Automotive HVAC Lab
1:0:3 Spring
* Corequisite(s): AUT 2240

This course provides a laboratory experience for Heating, Ventilation, and Air Conditioning lecture (AUT 2240). Studies and provides experience with R12 and 134a refrigerants, environmental issues, retrofit assemblies, evacuation and charging AC systems, and problem solving of AC systems. Course Lab fee of $17 for materials applies.

AUT 2250
Electronic Fuel Management Systems
2:2:0 Spring
* Prerequisite(s): AUT 1230, AUT 1160 with a grade of C- or better
* Corequisite(s): AUT 204L Recommended

Studies automotive fuel controls with particular emphasis placed on micro-processor control systems. Studies electronic and mechanical sensors of fuel and ignition systems. Also covers alternative fuel systems. Stresses service, diagnosis and troubleshooting using electronic test equipment.
Autism Studies (AUTS)

AUTS 250G Understanding the Autism Spectrum 3:3:0 Fall, Spring
* Prerequisite(s): ENGL 1010 or ENGH 1005 (with C or higher) or instructor approval.
Discusses autism beginning with the history of the diagnostic category and moving through contemporary issues of etiology, neurobiology, prevalence, assessment, treatment, education, policy, and community impact and inclusion. Emphasizes principles of interdisciplinary care, cultural competence, family centered approaches, and life course perspective.

AUTS 3810 Autism Across the Lifespan I Infants and Children 3:3:0
* Prerequisite(s): University Advanced Standing
Examines key issues related to infants and children who are diagnosed with an autism spectrum disorder and the impact on family and communities. Emphasizes principles of interdisciplinary care, cultural competence, family centered approaches, and life course perspective. Requires a 20-hour service learning component.

AUTS 382G Autism across the Lifespan II Teens and Adults 3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and AUTS 250G
Examines key issues related to teens and adults diagnosed with an Autism Spectrum Disorder and the impact on family and communities. Emphasizes principles of interdisciplinary care, cultural competence, family centered approaches, and life course perspective. Requires a 20-hour service learning component.
AATS 485R
Board Certified Assistant Behavior Analyst Individual Supervision
1:1:0
* Prerequisite(s): Acceptance into Autism Studies program and University Advanced Standing
* Corequisite(s): AATS 481R and AATS 482R
Meets the individual supervision requirements designated by the Behavior Analyst Certification Board as part of the Intensive Practicum. Covers all required elements of individual supervision based on the BACB Fourth Edition Task List. May be graded credit/no credit. May be repeated for a maximum of 9 credits toward graduation.

Aviation Science (AVSC)

AVSC 1010
Survey of Aviation Science
3:3:0  Fall, Spring, Summer
Designed for all students interested in aviation careers. Includes a general knowledge of aviation, historical events, and aerospace studies' development opportunities. Covers aviation and aerospace terminology, how aircraft and spacecraft fly, research and development of future systems, government and industry roles in the growth of aviation. Provides entering students with a first year experience covering critical thinking, time and financial management and collaboration as well as aviation career prospects.

AVSC 1050
Introduction to Aviation Management
3:3:0  Fall, Spring, Summer
Discusses aviation industry structure, practices, and administrative career opportunities; emphasizes strategic decision making in aviation transportation, manufacturing, airport, and government administration, and provides an overview of various administrative methods, tools, and responsibilities. Provides a general knowledge of aviation administration career options and the role of administrators within the aviation industry. May be delivered online.

AVSC 1100
Ground I - Private
3:3:0  Fall, Spring, Summer
* Prerequisite(s): Departmental Approval
Introduces the entry-level student to the airplane as they prepare for flight training. Stresses airport systems, air traffic control procedures, aviation weather, air navigation, radio communication procedures, and Federal Aviation Regulations. Prepares students for the required FAA Private Pilot Airplane Knowledge Test. Course fee of $160 applies.

AVSC 1110
Flight I - Private
3:2:3  Fall, Spring, Summer
* Prerequisite(s): Department Approval
* Prerequisite(s) or Corequisite(s): AVSC 1100
Covers airplane ground and flight operations, take-off and landing, basic flight maneuvers, cross country methods and emergency procedures. Prepares students for the required FAA Private Pilot Airplane Practical Test. May be delivered online. Course fee of $18,240 for flight applies.

AVSC 1120
Basic Aircraft Systems
1:1:0  Not Offered
* Prerequisite(s): AVSC 1100
Designed to provide a more in-depth knowledge of the basic systems used in piston-powered aircraft. Includes an examination of propeller systems, constant speed propellers, retractable landing gear, electrical systems, cooling, flight control systems, and basic hydraulics. Will help students with oral examinations for the commercial and other flight certificates.

AVSC 1130
Glider Rating
1:1:1  Not Offered
* Prerequisite(s): AVSC 1100
Prepares student to transition from powered to unpowdered glider flight in preparation for the FAA Private Pilot Glider Rating. Includes ground and flight lessons covering glider towing, launching, powered gliders, thermals, weather, landing, mountain waves, regulations, and emergency procedures. Teaches aerodynamic theory associated with more efficient flight and aircraft control.

AVSC 1150
Mountain and Desert Flying
1:1:0  Fall
* Prerequisite(s): AVSC 1100 and AVSC 1110
Introduces common flying conditions in mountain and desert areas. Emphasizes flight accident statistics and causes, effects of altitude on aircraft and pilot, mountain associated wake turbulence, techniques for low-altitude search and rescue or photography over mountainous areas, maneuvers, and abnormal or emergency procedures. Includes survival techniques for emergency landings in mountainous or desert terrain.

AVSC 1160
Seaplane Rating
1:1:1  Not Offered
* Prerequisite(s): AVSC 1100, AVSC 1110
Provides training to aid in the transition from single-engine land to single-engine sea. Stresses the differences between operating on land and over bodies of water. Introduces regulations for seaplane pilots. Provides training in seaplane aircraft with the capability to land and takeoff from water. Prepares the student for the FAA seaplane rating flight test.

AVSC 1230
Flight II - Instrument I
2:1:3  Fall, Spring, Summer
* Prerequisite(s): AVSC 1100, AVSC 1110 and Department Approval
Prepares students to meet FAA Instrument Airplane and Commercial Airplane Pilot cross-country requirements. Introduces extended cross-country flights in both day and night environments with consideration for passenger safety. Includes operational flight performance using all available navigational weather and airplane performance data. Requires proof of completion of cross country airplane pilot in command time. May be delivered online.

AVSC 1240
Ground II - Instrument
3:2:2  Fall, Spring, Summer
* Prerequisite(s): AVSC 1100, AVSC 1110 and Department Approval
Examines FAA regulations, meteorology, navigation, radio procedures, instrument departures, en route and approach procedures, the instrument airway, and airspace systems as well as aircraft systems operation. Introduces glass cockpit instrumentation. Covers basic flight instrument construction and operation. Prepares pilots for the required FAA Instrument Pilot Airplane Knowledge Test. Course fee of $160 applies.

AVSC 1260
Flight II - Instrument II
2:2:2  Fall, Spring, Summer
* Prerequisite(s): AVSC 1230 and Department Approval
Stresses attitude instrument flying techniques. Covers instrument departure and approach procedures and instrument en route and cross-country navigation techniques in actual or simulated weather conditions with reference solely to the flight instruments. Prepares students for the required FAA Instrument Airplane Practical Test. Course fee of $18,550 for flight applies.

AVSC 1310
21st Century Avionics and Instrumentation
1:1:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 1100
Provides pilots with the knowledge and practical experience using new generation glass cockpit electronic instrumentation and radio navigation devices. Includes glass cockpit system knowledge, functions, safety, flight planning, crew concepts, and the use of GPS technology. Requires flight, flight training device, or computer based instruction and experience to meet FAA standards for transition to this technology. May be delivered online.

AVSC 1320
AMT Procedures and Practices A
5:5:0  Not Offered
* Prerequisite(s): Department Approval
For Aviation Maintenance Technician Apprentice students. Introduces students to the aviation maintenance environment. Studies common procedures and practices in the industry, the use of tools and measurement devices, and Federal Aviation Regulation related to technician certification and inspections. Includes maintenance forms and record keeping, and weight and balance publications.

AVSC 1330
AMT General Knowledge A
5:5:0  Not Offered
* Prerequisite(s): Department Approval
For Aviation Maintenance Technician Apprentice students. Introduces general processes used by the Aviation maintenance Technician. Introduces aircraft electrical principles including the devices and procedures used in analyzing aircraft electrical systems. Covers materials and processes used in aircraft maintenance. Develops basic science application skills for aircraft maintenance.
AVSC 1330  
AMT Airframe Phase I B  
5:5:0  
Not Offered  
* Prerequisite(s): AVSC 1310, AVSC 1320, Must complete all (a) level AMT apprentice courses with grade of C- or better  

For Aviation Maintenance Technician Apprentice students. Introduces students to the basic maintenance and procedures involving the airframes of a variety of aircraft. Discusses composite technology, aircraft finishes, sheet metal, basic structures, welding, and other fasteners.

AVSC 1340  
AMT Powerplant Phase I B  
5:5:0  
Not Offered  
* Prerequisite(s): AVSC 1310, AVSC 1320, Must complete all (a) level AMT apprentice courses with grade of C- or better  

For Aviation Maintenance Technician Apprentice Students. Introduces students to the basics of power plant installation, repair, and servicing. Focuses on the reciprocating engine used on certified aircraft. Covers radial engines, basic two- and four-stroke reciprocating engines, engine overhaul, starter and ignition systems, and troubleshooting procedures.

AVSC 2070  
Communications for Aviation Professionals  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): ENGL 1010 or ENGH 1005  

Teaches the skills necessary to effectively communicate with a variety of aviation stakeholders and professionals. Examines principles of written and verbal communication. Covers the planning, organizing and delivery of positive and negative messages. Teaches effective interpersonal and listening skills as well as techniques for adapting the message to the audience. Includes the effective development and delivery of computer-aided presentations. Explores the hazards and impacts of miscommunication on aviation safety.

AVSC 2090  
Air Transport Economics  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): MAT 1030 or 1035, STAT 1040 or 1045, MATH 1050 or 1055, AVSC 2150  

Teaches basic economic concepts as applicable to air transportation. Introduces foundational principles of free enterprise, supply and demand, private and social implications of profit maximization, market structure, resources markets, inflation, economic and industry cycles, inflation and economic growth. Introduces competitive advantage, air transport demand, modeling, pricing, revenue management and supply and route architecture.

AVSC 2110  
Aviation Weather  
3:3:0  
Fall, Spring, Summer  

Enables the aviation administrator to understand and appreciate the operational and strategic impacts of weather on the aviation industry. Teaches atmospheric composition and structure, climate and synoptic weather, aviation weather reports, forecasts and weather data sources. Requires students to apply these principles in a decision making capacity through weather tracking, planning and decision making activities.

AVSC 2120  
Personal Finance for Aviation Professionals  
3:3:0  
Fall, Spring  
* Prerequisite(s): AVSC 1050, AVSC 1100  

Covers financial decision making with a view of financial choices/alternatives and the impact or consequences of these choices during a student's collegiate and professional career. Includes real life scenarios designed around common challenges and issues. Requires students to create a proposed budget and reconcile expenditures monthly as the course progresses. Explores net worth statements, budgets, taxes, insurance alternatives, and life decisions applicable to finance. May be delivered online.

AVSC 2130  
Aviation Safety  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): AVSC 1100  

Presents an introduction to aviation safety. Covers agencies overseeing safety at the commercial and general aviation levels as well as the applicable regulations they develop and enforce. Explores general aviation and commercial aviation accident statistics and accident causation models. Discusses airline, airport, aircraft, and air traffic control safety issues. Explores the role of the aviation administrator as a safety advocate and responsible party in a variety of settings.

AVSC 2150  
Air Transportation Management  
3:3:0  
Fall, Spring, Summer  

Presents the management skills necessary to be a fixed based operator and entry-level manager for scheduled airlines in the national aviation system. Teaches management functions, marketing, financing, organization and administration, flight operations, maintenance, safety, and liability. Provides hands-on experience of management styles through evaluations and critiques of local airlines and airport facilities.

AVSC 2180  
Managing Technology in Aviation  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): AVSC 2150  

Introduces airline computer applications. Explores information management in areas of reservations, planning and scheduling, dispatch, maintenance control and crew management. Explores revenue, customer loyalty and cargo management. Discusses training programs, solution implementation and maintenance costs, as well as managing consulting services for aviation applications.

AVSC 2190  
Introduction to Dispatch and Scheduling  
3:3:0  
Not Offered  
* Prerequisite(s): AVSC 1010  

Introduces airline and corporate flight department operations and flight dispatch procedures. Teaches effects of weather, air traffic control and maintenance on fleet logistics. Introduces responsibilities of dispatchers, routers, maintenance controllers, and general system operations. Covers pertinent crew and operational federal aviation regulations. Examines tools and practices of airline system control and corporate flight departments. Explores responsibilities and authority of dispatchers and schedulers.

AVSC 2200  
Aviation Marketing  
3:3:0  
Not Offered  
* Prerequisite(s): ENGL 1010 or ENGH 1005  

Teaches principles of aviation marketing and promotional concepts. Covers planning and coordination, advertising and media as well as sales presentations. Explores aviation tradeshows, trade events, and networking as industry marketing tools. Teachers marketing research, financial planning, and transportation methods.

AVSC 2210  
AMT Airframe Phase II C  
5:5:0  
Not Offered  
* Prerequisite(s): AVSC 1330, AVSC 1340, Must complete all (b) level AMT apprentice courses with grade of C- or better  

For Aviation Maintenance Technician Apprentice Students. Prepares students for intermediate level understanding of major airframe components and accompanying devices. Includes lessons on structure alignments, aircraft rigging, flight control balance, communications and navigation equipment, brake systems, anti-skid systems, and landing gear position indication.

AVSC 2220  
AMT Airframe Phase III D  
5:5:0  
Not Offered  
* Prerequisite(s): AVSC 2210, AVSC 2230, Must complete all (c) level AMT apprentice courses with grade of C- or better  

For Aviation Maintenance Technician Apprentice Students. Final airframe class prepares students to take FAA AMT Airframe Examination. Discusses landing gear systems, hydraulics, fuel systems, pneumatics, fuel dumping, pressurization, environmental controls, and indicator systems. Includes examinations of example aircraft systems in operation.

AVSC 2230  
AMT Powerplant Phase II C  
5:5:0  
Not Offered  
* Prerequisite(s): AVSC 1330, AVSC 1340, Must complete all (b) level AMT apprentice courses with grade of C- or better  

For Aviation Maintenance Technician Apprentice Students. Provides students with information and understanding of turbine engines, designs, systems and components. Covers engine installation, accessory devices, lubrication systems, fuel metering, and airworthiness inspections.

AVSC 2240  
AMT Powerplant Phase III D  
5:5:0  
Not Offered  
* Prerequisite(s): AVSC 2210, AVSC 2230, Must complete all (c) level AMT apprentice courses with grade of C- or better  

For Aviation Maintenance Technician Apprentice Students. Provides intermediate level understanding of engine components, accessories, and their operating principles. Prepares students for the FAA AMT Powerplant Knowledge Examination.
AVSC 2250
Aviation Business Statistics
3:3:0  
Fall, Spring, Summer
* Prerequisite(s): MAT 1030 or 1035, MATH 1050 or 1055, or STAT 1040 or 1045

Presents an application of statistics in business and economics within the context of an aviation-related business and operational setting involving the manufacturing, sustainment, safety, marketing, sales, and aftermarket services of aerospace products. Topics include methods of collecting, analyzing, and presenting data, descriptive statistics, populations and samples, measures of central tendency and dispersion, elementary probability, binomial and normal distributions and their interrelationship, frequency distributions, averages, index numbers, probability, sampling, estimation, analysis of variance, time series, regression and correlation, and chi-square.

AVSC 2300
Ground IV - Commercial
3:3:0  
Fall, Spring, Summer
* Prerequisite(s): AVSC 1250 and Department Approval

Covers privileges, responsibilities and the operational environment of a commercial pilot. Explores application of aeronautical knowledge and skills in simulated commercial operation situations. Develops judgment and decision-making skills. Studies aerodynamics, performance and limitations, weight and balance, aircraft systems, airworthiness, aeromedical factors, night and high altitude operations, weather hazards and reports, airport operations, flight planning, and decision making.
Prepares students for the required FAA Commercial Pilot Airplane Knowledge Test. Course fee of $160 applies.

AVSC 2310
Flight IV - Commercial
3:2:3  
Fall, Spring, Summer
* Prerequisite(s): AVSC 1250 and Department Approval

Includes maneuvers such as steep power turns, steep spirals, slow flight, lazy eights, pylons eights, and chandelles. Includes commercial cross-country, instrument flying skills, and emergency procedures.
Prepares students for the required FAA Commercial Pilot Airplane Practical Test. Graded credit / no-credit. Course fee of $18,050 for flight applies.

AVSC 235R
Unusual Attitude Safety Training
1:1:1  
On Sufficient Demand
* Prerequisite(s): AVSC 1250

Teaches pilots how to assess various flight situations and take the appropriate action to avoid or recover from any in-flight unusual attitude scenario, includes training not covered by commercial flight courses such as situations involving wake turbulence, wind shear, mountain waves and other wind flow patterns, as well as instrument or control system failure and pilot error may produce unusual attitudes beyond those experienced in normal flight. Presented in three phases: 1) formation of a Flight Student, 2) Instrument Pilot Student, 3) Commercial Pilot Student and for the Certified Flight Instructor Student. Course enhances overall pilot skill and increases confidence in all flight conditions. May be repeated for a maximum of 2 credits toward graduation.

AVSC 2400
Ground Certified Flight Instructor
4:4:0  
Fall, Spring
* Prerequisite(s): Department Approval

Provides the foundational knowledge and teaching skills necessary to become an authorized FAA airplane flight instructor. Teaches certification and training requirements for which the student will have instructional privileges. Develops organization and presentation skills required for instructional activity including the application of human behavior and learning principles during instructional activity. Emphasizes training of aviation students to specific standards of competence regardless of the specific instructional privileges carried by the flight instructor. Focuses on the teaching of critical emphasis areas as identified by the FAA. Prepares students for the required FAA Flight Instructor Airplane Knowledge Test and Fundamentals of Instruction Knowledge Test. May be delivered online.

AVSC 2410
Flight Certified Flight Instructor
1:1:1  
Fall, Spring, Summer
* Prerequisite(s): Department Approval

Designed for advanced pilots preparing for the Flight Instructor rating. Trains students to discuss and teach while precisely performing maneuvers and maintaining proper operational control. Emphasizes the identification of common student errors and proper correction.
Prepares students for the required FAA Flight Instructor Airplane Practical Test. May be delivered online.

AVSC 2420
Ground CFI Instrument
1:1:0  
Fall, Spring
* Prerequisite(s): AVSC 2300, AVSC 2310
* Corequisite(s): AVSC 2430

Stresses in-depth study of gyroscopic and pressure instruments, attitude instrument flying techniques, IFR departure, en route, arrival and approach procedures, and the teaching of this to other pilots. Discusses Federal Aviation Regulations that apply to instrument flight instruction, flight logbook endorsements and entries, and other directives and publications that apply to airplane instrument flight. Studies the correct procedures for teaching and the analyzing of student errors while performing the required instrument flight maneuvers.
Prepares students for the required FAA Flight Instructor Instrument Airplane Knowledge Test. May be delivered online.

AVSC 2430
Flight CFI Instrument
1:1:1  
Fall, Spring, Summer
* Prerequisite(s): AVSC 2300, AVSC 2310
* Corequisite(s): AVSC 2420

Designed for instructor pilots seeking the CFI Airplane Instrument rating. Covers all required instrument flying maneuvers from the right seat of the instrument training airplane such as instrument departures, en route navigation, and instrument approach to landings.
Prepares students for the required FAA Flight Instructor Instrument Airplane Practical Test. May be delivered online.

AVSC 2440
Ground III - Multi Engine
1:1:0  
Fall, Spring, Summer
* Prerequisite(s): AVSC 1110 and Department Approval

Prepares students for the oral exam portion of the FAA Multi-Engine Airplane Practical Test and Airplane Pilot Knowledge Test.

AVSC 2450
Flight III - Multi Engine
1:1:1  
Fall, Spring, Summer
* Prerequisite(s): AVSC 1110 and Department Approval

Prepares students for flight in complex multi-engine airplanes. Stresses normal and emergency flight procedures and skills demonstrated and practiced for all phases of flight. Includes single-engine operation of a multi-engine airplane in varying flight environments and situations. Discusses complex systems operation as well as instrument flight procedures. Prepares the student for the required FAA Multi-engine Airplane Practical Test. Course fee of $11,300 for flight applies.

AVSC 2500
Ground Multi Engine Instructor
1:1:0  
On Sufficient Demand
* Prerequisite(s): AVSC 2300, AVSC 2310
* Corequisite(s): AVSC 2510

Prepares specific teaching techniques and skills necessary to certify as a flight instructor with a multi-engine airplane rating. Includes a review of the multi-engine airplane pilot certification requirements. Stresses the unique instructional and safety responsibilities with students in multi-engine airplanes.
Prepares students for the oral exam portion of the FAA Multi-Engine Airplane Instructor Practical Test. May be delivered online.

AVSC 2510
Flight Multi Engine Instructor
1:1:0  
Fall, Spring, Summer
* Prerequisite(s): AVSC 2300, AVSC 2310
* Corequisite(s): AVSC 2500

Prepares students for various maneuvers and operations necessary to instruct pilots for the FAA Multi-engine Airplane Practical Test. Teaches normal and emergency flight operations and procedures in all the various flight environments and regimes. Teaches the knowledge and skill necessary to operate a multi-engine airplane safely, while instructing multi-engine airplane pilots.
Prepares students for the required FAA Multi-engine Airplane Instructor Practical Test. May be delivered online.
Course Descriptions

AVSC 2710
Aviation Marketing
1:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 2150

Teaches principles of aviation marketing, market research and promotional concepts. Covers planning and coordination, advertising, and media as well as sales presentations. Explores aviation trade shows trade events, and networking as industry marketing tools. Covers the history of customer service in the aviation industry. Introduces customer service principles applicable to both general and commercial aviation. Analyzes customer rights and carrier responsibilities and explores diffusion of confrontational customers. Analyzes airline and corporate cultures and resulting effects on employees and customers.

AVSC 2750
Unmanned Aircraft Systems
3:3:0  Spring
* Prerequisite(s): AVSC 2150

Introduces unmanned aircraft systems and applications. Examines the history and development of unmanned aircraft, their systems, technology, training methods, and implementation. Examines the current and future roles these aircraft will take in society and the implications surrounding their increased usage. Explores security, privacy and safety as they relate to the utilization of unmanned aircraft systems in military, law enforcement and civilian applications. Examines challenges and opportunities related to civilian utilization. May be delivered online.

AVSC 276R
Current Topics in Aviation
1 to 3:1 to 3:0  On Sufficient Demand

Selected topics in Aviation Science that will vary from semester to semester. May be repeated with different topic areas for a maximum of six credit hours toward graduation.

AVSC 281R
Cooperative Work Experience
1 to 8:1 to 8:0  Not Offered

Designed for Aviation majors. A current job in an aviation related field required prior to registering for this course. Course content is individualized, with students setting objectives in consultation with their faculty coordinator and their on-the-job supervisor. Credit is determined by the number of hours a student works during the semester. (One credit for each five hours of work per week.) May be repeated for a maximum of 8 credits toward graduation. Graded credit/no credit.

AVSC 285R
Cooperative Correlated Class
1:1:0  Not Offered
* Corequisite(s): AVSC 281R

Designed to enable students with career aspirations in aviation related fields to begin career planning. Enhances a student's knowledge, personal development, professional development and professional preparation by integrating academic study with practical experience and resume preparation. May be repeated for a maximum of 2 credits toward graduation.

AVSC 2860
SkillsUSA
1:1:0  Not Offered

SkillsUSA includes leadership training, parliamentary procedure, job interview skills, prepared speaking, extemporaneous speaking, and organizational skills. Upon completion, the student should understand the SkillsUSA organization and how it helps to build leadership skills.

AVSC 3010
Flight Environment
3:3:0  Fall
* Prerequisite(s): AVSC 1240 and University Advanced Standing

Teaches interpretation, selection, and compilation of appropriate weather data. Examines METAR, TAF, PIREPS, AIRMET's, SIGMET's and other sources of applicable weather information. Uses sample reports, data, and charts. Includes class and group discussion, lecture, practical example, and case studies. May be delivered online.

AVSC 3020
Aviation Insurance and Risk Management
3:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 2130 and University Advanced Standing

Explores the complexity of aviation risk management from flight operations and aircraft maintenance perspectives. Examines industry insurance practices and standards, including the development of risk management procedures to meet both government and insurance requirements. Analyzes basic underwriting procedures and requirements. Presents basic principles of hazardous materials handling in aviation.

AVSC 3030
Air Traffic Control I
3:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 1100 and University Advanced Standing

Teaches tower, approach, and center techniques and terminology. Covers radar and non-radar control environments and the pilot's responsibility in each. Explains effective use of the Air Traffic Control System.

AVSC 3040
Air Traffic Control II
3:3:0  Spring
* Prerequisite(s): AVSC 3030 and University Advanced Standing

Covers advanced air traffic management concepts, weather problems, communications procedures, and technical control skills. Provides simulated air traffic control situations and crisis management skills. Discusses terminal en route procedures and Federal Aviation Regulations. May be delivered online.

AVSC 3060
Airline Management
3:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 2150 and University Advanced Standing

Prepares student for management level duties at air carriers. Examines airline operational considerations, regulation, financing, accounting methods, marketing, customer service, profitability, and labor relations. Discusses how some airlines succeed and others fail.

AVSC 3070
Aviation Cargo Operations
3:3:0  On Sufficient Demand
* Prerequisite(s): AVSC 2150 and University Advanced Standing

Studies air cargo history and industry development. Teaches air cargo scheduling and supply chain administration. Explores aircraft options and conversions and airport and logistical considerations. Discusses shipping and air cargo regulations including hazard material (hazmat) and security issues. Explores domestic and international air cargo considerations.

AVSC 3090
Airline and Dispatch Operations
3:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 2150, AVSC 2110 and University Advanced Standing

Introduces airline and corporate flight department operations and flight dispatch procedures. Teaches effects of weather, air traffic control and maintenance on fleet logistics. Introduces responsibilities of dispatchers, routers, maintenance controllers, and general system operations. Covers pertinent crew and operational federal aviation regulations. Examines tools and practices of airline system control and corporate flight departments. Explores responsibilities and authority of dispatchers and schedulers.

AVSC 3100
Corporate Aviation Management
3:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 2150 and University Advanced Standing

Introduces basic principles of corporate flight department management. Discusses regulatory requirements in corporate aviation, acquisition procedures, insurance requirements, and pilot certification programs. Explores fractional ownership programs and management.

AVSC 3110
Aviation Security
3:3:0  Spring
* Prerequisite(s): AVSC 2150, and University Advanced Standing

Presents advanced security issues related to aviation including passenger screening, profiling, hijacking, bomb threats and passenger disruptions. Covers historical incidents and studies a variety of responses to threats from various countries. Discusses the role of the Department of Homeland Security and the Transportation Security Administration. Covers the role of pilots and other flight crew in security, including the Federal Flight Deck Officers Program. Includes a discussion of regulatory issues and laws established since the 9/11 attacks. May be delivered online.

AVSC 3120
Airport Management
3:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 2150 and University Advanced Standing

Explores airport management at both small and large airports. Emphasizes basic requirements and attributes of successful airport managers. Course includes discussion of local and state airport finance and regulatory issues. Discusses pertinent Federal Aviation Regulations and security issues.
AVSC 3140 Fixed Base Operations Management 3:3:0 On Sufficient Demand * Prerequisite(s): AVSC 2150 and University Advanced Standing
Prepares students for employment and management at a fixed base operation and general aviation management. Covers the organization, profit, maintenance, and safety systems concerning fixed base operators. Presents pertinent Federal Aviation Regulations, facility management, and advertising issues.

AVSC 3150 Principles of Aviation Management 3:3:0 Fall, Spring, Summer * Prerequisite(s): AVSC 2070, AVSC 2150 and University Advanced Standing
Teaches principles of aviation management including the management process, decision-making, and organizational structure. Covers leadership skills including communication, fostering team work, conflict resolution, and human resource management. Analyzes the importance of ethics and social responsibility as well as developing and crafting executive strategies. Studies organizational culture and effective management of innovation and change. May be delivered online.

AVSC 3200 Flight Physiology 3:3:0 Fall * Prerequisite(s): AVSC 1240 and University Advanced Standing
For pilots with a career goal in commercial Aviation. Teaches physiological and psychological factors that affect pilot performance. Studies issues such as human error, fatigue, fitness, attitudes, training devices, controls, cabin space, and human payload. Includes lecture, demonstration, experiments, group projects, class discussion, and possible guest lecturers.

AVSC 3210 Aircraft Incident and Emergency Management 3:3:0 On Sufficient Demand * Prerequisite(s): AVSC 2130 and University Advanced Standing
Teaches how to develop a pre-accident plan addressing the issues of chain and command responsibility, initial response to safety and security issues, and the coordination of human and material resources for public safety. Emphasizes post crash/aircraft incident preservation of forensic evidence. May be delivered online.

AVSC 3220 Aircraft Accident Investigation 3:3:0 On Sufficient Demand * Prerequisite(s): AVSC 2130 and University Advanced Standing
Explores the fundamental requirements of aircraft mishap and accident investigation. Covers the initial gathering and preservation of evidence at the crash site, including photographic and videographic documentation, assessing environmental factors, human factor considerations, aircraft maintenance status, and air traffic control considerations.

AVSC 3230 Accident Witness Interviewing 3:3:0 On Sufficient Demand * Prerequisite(s): (AVSC 3210 or AVSC 3220) and University Advanced Standing
Teaches the currently recommended techniques for conducting an accident witness interview and common mistakes. Presents methods of evaluating and analysis of interview information. Case studies and role playing will be used in classroom exercises.

AVSC 3240 Aviation Accident Reporting 3:3:0 On Sufficient Demand * Prerequisite(s): (AVSC 3210 or AVSC 3220), (ENGL 1010 or ENGH 1005), and University Advanced Standing
Teaches the student a working knowledge of preparing a complete aircraft mishap/accident report that includes the factual information, analysis, and conclusions, including probable causes, and aviation safety recommendations. Involves turning accident investigation data into an accident report.

AVSC 3300 Jet Transport Systems 3:3:0 Spring * Prerequisite(s): AVSC 1240 and University Advanced Standing
Provides training on turbine driven engines, thrust vectoring, pneumatics, electrical, hydraulic, and auxiliary systems. Includes subjects such as pressurization, device and anti-ice, environmental, and warning systems. Utilizes schematic drawings, computer based trainers, and various jet operating manuals. Includes lecture, class discussion, demonstrations, group practice, and possible guest lecturers.

AVSC 3310 Aviation Logistics Management 3:3:0 On Sufficient Demand * Prerequisite(s): AVSC 2150, AVSC 3150, and University Advanced Standing
Examines functional areas of supply, maintenance, transportation and services at operational, strategic and tactical levels. Covers facilities, manpower, labor relations, financial and system management, contract administration, analytical techniques and decision making. Uses a variety of case studies and examples of various transportation companies, airlines, and support groups. May be delivered online.

AVSC 3320 Aviation Managerial Accounting 3:3:0 Fall, Spring, Summer * Prerequisite(s): AVSC 2150 and University Advanced Standing
Provides aviation administration students with knowledge of financial, managerial, and basic cost accounting concepts and applications. Introduces basic accounting methods, accounting information systems and the utilization of accounting information in the decision making process. Uses aviation industry case studies and examples. May be delivered online.

AVSC 3350 Aviation Labor and Human Resource 3:3:0 On Sufficient Demand * Prerequisite(s): AVSC 2150, AVSC 3150, and University Advanced Standing
Focuses on effective management of human resources in the unique environment of the aviation industry. Teaches planning, recruitment, selection, training, development, labor relations, employee benefits and compensation, employee legal issues, termination and unemployment, and applicable state and federal regulations. May be delivered online.

AVSC 3400 International Flight Operations 3:3:0 Fall, Spring, Summer * Prerequisite(s): AVSC 1240 and University Advanced Standing
Provides an overview of international flight operations including advanced air navigation systems. Explores navigation equipment and aids utilized in international flight operations. Teaches the operation of the "Glass Cockpit" flight data center. Utilizes simulation for operation of a glass cockpit equipped aircraft.

AVSC 3530 Flight Aerodynamics 3:3:0 Fall, Spring, Summer * Prerequisite(s): AVSC 1240 and University Advanced Standing
Teaches the aerodynamics involved in commercial aircraft. Includes aircraft turning and accelerated climb performance, take off velocity, load factors, hypersonic flight, and laminar flow airfoils. Includes demonstration, examples, experiments, and class discussion. May be delivered online.

AVSC 3600 Multi-piloted Operations 3:3:0 Fall, Spring, Summer * Prerequisite(s): AVSC 1100, AVSC 2070 and University Advanced Standing
Explores concepts of Crew Resource Management (CRM), Threat and Error Management (TEM), and Advanced Qualification Program (AQP) concepts. Covers crew coordination, communication, flight discipline, pilot flying and pilot monitoring protocols in multi-piloted environments.

AVSC 3740 Advanced Methods in Aviation Investigation 3:3:0 On Sufficient Demand * Prerequisite(s): AVSC 3220 and University Advanced Standing
Teaches current scientific techniques for the analysis of aircraft materials, components, performance and design. Considers aircraft crashworthiness. Discusses the process of establishing facts from analysis and of the findings of an aircraft investigation and probable vs. proximate cause.
AVSC 4020  
Applied Aviation Finance  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): AVSC 3320 and University Advanced Standing  

Examines financial management in the aviation corporate and public sectors and the role of financial markets and institutions. Introduces finance terminology and techniques. Discusses time value of money, fundamentals of security valuation, capital asset pricing model and capital budgeting. Introduces weighted average cost of capital and contrasts debt policy and governance in the public and private aviation sectors.

AVSC 410G  
Flight Airline Transport Pilot  
1:0:3  
On Sufficient Demand  
* Prerequisite(s): AVSC 2300, AVSC 2310, and University Advanced Standing  

Focuses on the areas necessary to pass an Airline Transport Pilot Airplane Practical Test. Covers pre-flight, takeoff and departure, in flight maneuvers, instrument procedures, approaches and landings, normal and abnormal procedures, emergency procedures and postflight procedures. Prepares students for the required FAA Airline Transport Pilot Airplane Practical Test.

AVSC 4500  
Aerospace Aftermarket Support Services  
3:3:0  
Spring, Summer  
* Prerequisite(s): University Advanced Standing  

Explores organizational structures, geographical location selection, staffing, service delivery, and infrastructure requirements of an effective aftermarket product support program associated with aerospace vehicles. Explores existing support concepts to enable the student to design and plan an integrated and deployable product support organization. Emphasizes key elements of customer relationship management. Includes studies for both Original Equipment Manufacturer (OEM) and third-party service providers.

AVSC 4610  
Aerospace Law  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): AVSC 2150, Senior Standing and University Advanced Standing  

Introduces the student to the United States Constitution plus derivation and application of international, federal, state and local laws as applied to aviation. Covers administrative, civil and criminal law including torts, principles of liability, contracts, sales, commercial transactions, the environment, labor law and Federal Aviation regulations.

AVSC 4800  
Flight Airline Transport Pilot Aircraft Dispatcher  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): AVSC 2110 and University Advanced Standing  

Discusses aircraft aerodynamics, airspace and airports, air traffic control, aviation weather, and aero-medical factors and applicable NTSB and FAA regulations. Analyzes the aspects of decision making and professionalism in aviation. Prepares students for the required FAA Airline Transport Pilot Airplane 121 (ATP); FAA Airline Transport Pilot Airplane (135); or Aircraft Dispatcher (ADX) Knowledge Tests.

AVSC 4805  
Canadair Regional Jet Orientation  
1:0:3  
* Prerequisite(s): AVSC 4800  

Introduces Canadair Regional Jet aircraft (CRJ) procedures through hands on application in the CRJ flight simulation training device. Provides simulated experience as a pilot in normal, abnormal, and emergency operations. Includes scenario based training in the CRJ200 flight management system (FMS) and other essential systems. Emphasizes crew resource management (CRM) skills in transport category aircraft.

AVSC 481R  
Current Topics in Aviation  
1 to 3:1 to 3:0  
Fall, Spring, Summer  
* Prerequisite(s): AVSC 1010 and University Advanced Standing  

Presents selected topics in Aviation Sciences and will vary each semester. Requires a special project related to the area of study. May be repeated with different topic areas for a maximum of 6 credits toward graduation.

AVSC 485R  
Professional Pilot Capstone  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): AVSC 3300, 3600 and University Advanced Standing  

Teaches systems, operations and performance limitations of the CRJ. Emphasizes operating practices, along with systems indoctrination, and procedures training. Includes systems and operations common to most turbine and transport category aircraft. Provides insight into the rigors of studying for ground school systems class. Utilizes lecture, demonstration, and cockpit procedure trainers. Student who complete the course should be prepared to pass the applicable written exam. May be delivered online. Software fee of $100 applies.

AVSC 488R  
Cooperative Work Experience  
1 to 8:1 to 8:0  
Fall, Spring, Summer  
* Corequisite(s): AVSC 485R  

For upper division Aviation majors. A current job in an aviation related field required prior to registering for this course. Course content is individualized, with students setting objectives in consultation with their faculty coordinator and their on-the-job supervisor. Credit is determined by the number of hours a student works during the semester. (One credit for each five hours of work per week.) May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.

AVSC 489R  
Cooperative Related Class  
1:1:0  
* Not Offered  

* Prerequisite(s): Current job in an aviation related field and University Advanced Standing  

For upper division Aviation Science majors. Designed to enable students with career aspirations in aviation related fields to begin career planning. Enhances a student's knowledge, personal development, professional development and professional preparation by integrating academic study with practical experience and resume preparation. May be repeated for a maximum of 2 credits toward graduation.
AVSC 4900
Strategic Aviation Management Capstone
3:3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 3150, Senior standing, and University Advanced Standing
* Prerequisite(s) or Corequisite(s): AVSC 4020

Provides aviation administration students with the opportunity to practice and apply their cumulative knowledge acquired over the entire course of study. Teaches the components of formulating a strategic plan, implementing and controlling its execution, and evaluating its success. Applies principles of accounting, finance, economics, labor, logistics, operations, research and strategy development through simulation and aviation case studies.

AVSC 491R
Undergraduate Research Project
3 to 6:2:3 to 12  Not Offered
* Prerequisite(s): AVSC 3200, AVSC 3600, ENGL 2010, Matriculation into Bachelor's Degree, and University Advanced Standing

Combines and integrates concepts, methodologies, and skills developed in previous AVSC course work through the completion of a comprehensive project. Students will develop their own project and portfolio in consultation with a faculty advisor. A list of detailed guidelines for the project is available from the Aviation Science Department. May be repeated three times for a maximum of 6 credits.

AVSC 4950
Aerospace Technology Management Capstone Project
3:0  Fall, Spring, Summer
* Prerequisite(s): AVSC 4500, AVSC 4550, and University Advanced Standing

Assesses significant evidence of learning within the discipline studied through a culminating project. Documents evidence of achievement, experience and competencies for current and prospective employers to aid in job placement or promotion.

Behavioral Science (BESC)

BESC 1000
Behavioral Science Forum
2:2:0  On Sufficient Demand

For students interested in exploring a Behavioral Science major. Offers an overview of curriculum, major requirements, faculty and their specialties, study and writing helps and guidelines, campus resources and career possibilities. Utilizes lectures, guest speakers, field trips, and application-oriented activities.

BESC 107G
Multicultural Societies
3:3:0  Fall

Examines societies and cultures within the kinships, beliefs, values and political backgrounds related to differing ethnic groups. Provides a forum for constructive interaction among people of differing economic, social, racial, ethnic and religious backgrounds.

BESC 295R
Beginning Research Experience
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): Instructor approval; BESC department major

Provides a mentored experience to assist on a faculty member's research project. Begin to explore academic literature to investigate topics of interest. Requires individual initiative and responsibility. Includes limited formal instruction and faculty supervision. Includes literature searches, materials creation, data collection, or other options as approved by the instructor. May be repeated for a maximum of six credits toward graduation. May be graded Credit/No Credit.

BESC 3010
Statistics for the Behavioral Sciences
4:4:0  Fall, Spring, Summer
* Prerequisite(s): MAT 1000 or higher and University Advanced Standing

Introduces use of statistics for research purposes. Teaches descriptive and inferential statistics. Includes central tendency, variability, correlation and regression, probability (particularly probability distributions), and various inferential techniques such as t-test for independent and dependent samples, one-way and two-way analysis of variance, post-hoc tests, and non-parametric statistics. May be delivered hybrid and/or online.

BESC 3020
Research Methods for the Behavioral Sciences
3:3:0  Fall, Spring, Summer
* Prerequisite(s): BESC 3010 or declared major in Family Science and (admission into BSW program or declared major in Behavioral Science, Family Science, or Psychology) and (ANTH 101G, FAMS 101G, PSY 1010, SOC 1010, or SW 1010) and (ENGL 2010 with a grade of C+ or higher) and University Advanced Standing

Assesses significant evidence of learning within the discipline studied through a culminating project. Documents evidence of achievement, experience and competencies for current and prospective employers to aid in job placement or promotion.

BESC 3820
Women/War/Peacebuilding
1:1:0  On Sufficient Demand
* Prerequisite(s): (PSY 1010 or SOC 1010 or ANTH 101G) and (ENGL 2010 with a C+ grade or higher) and University Advanced Standing

Studies contemporary theories of conflict and communication. Analyzes the roles of culture, gender, personal, and organizational ethics in conflicts and disputes. Covers the nature of conflict and teaches methods of negotiation, mediation, and conflict resolution with an emphasis on collaborative problem-solving. Canvas Course Mats $66/McGraw applies.

BESC 3850
Communication and Conflict
3:3:0  Fall, Spring, Summer
* Prerequisite(s): (PSY 1010 or SOC 1010 or ANTH 101G) and (ENGL 2010 with a C+ or better and University Advanced Standing; PSY 3400 with a C-grade or higher recommended

Combines and integrates concepts, methodologies, and skills developed in previous AVSC course work through the completion of a comprehensive project. Students will develop their own project and portfolio in consultation with a faculty advisor. A list of detailed guidelines for the project is available from the Aviation Science Department. May be repeated three times for a maximum of 6 credits.

BESC 4030
Introduction to Practice Evaluation and Grant Writing
3:3:0  On Sufficient Demand
* Prerequisite(s): (PSY 1010 or SOC 1010 or ANTH 101G) and (ENGL 2010 with a C+ grade or higher) and University Advanced Standing

Provides practical guidance for conducting an evaluation study from its inception, through the planning stage, to research design, data collection, data analysis and the reporting, dissemination, and application of conclusions.

BESC 4040
Applied Behavioral Science Research
3:3:0  Fall, Spring, Summer
* Prerequisite(s): (PSY 1010 with a C+ grade or better), BESC 3010, BESC 3020, and University Advanced Standing

Introduces psychological theory, methods, and knowledge to actively analyze and engage problems facing a variety of clients. Discusses a variety of organizations including businesses, government, religion, social science, health care, criminal justice, and others. Utilizes psychological tools to identify, investigate, and actively seek viable solutions to issues that can be applied by organizations to achieve greater success. Requires students to develop, carry out, and professionally present an original research project. May be delivered hybrid. Lab access fee of $13 applies.
Course Descriptions

BESC 4050
Clinical Research
3:3:0  Fall, Spring, Summer
* Prerequisite(s): ENGL 2010 with a C+ grade or higher, BESC 3010, BESC 3020, and University Advanced Standing

Introduces students to the field of clinical research. Integrates traditional psychological research methods and the area of clinical practice. Uses the scientist-practitioner model to demonstrate common research methodologies and examine clinical outcomes. Applies quantitative and qualitative methods in a clinical setting. Focuses on determining the effectiveness of therapeutic process and outcome using research.

BESC 4510
Academic and Career Advising
3:3:0  * Prerequisite(s): (ENGL 2010 with a C+ or higher) and University Advanced Standing

Provides students with an understanding of the field of academic/career advising and what it means to be a scholar and practitioner within the field. Engages in scholarly study of academic advising literature, discussion of advising theory and practice, observation of academic advising sessions, and interviews with advisors. Provides knowledge of advising theory and practice, an understanding of student development theory, and an increase in the knowledge and skills needed to advise students effectively.

BESC 481R
Senior Internship
1 to 8:1 to 8:0  Fall, Spring
* Prerequisite(s): BESC 3010, BESC 3020, (ENGL 2010 with a C+ grade or higher) and University Advanced Standing
* Corequisite(s): BESC 485R

Allows Behavioral Science students with non-clinical orientation to receive behavioral science credits for internships in a governmental, corporate, or private agency apart from their regular employment. Provides practical and research experience over the course of the 15 week semester. Supervised by agency representative. Internships approved by faculty and written contracts must be signed. May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.

BESC 485R
Internship Seminar
1:1:0  On Sufficient Demand
* Prerequisite(s): (ENGL 2010 with a C+ grade or higher), BESC 3010, BESC 3020, and University Advanced Standing
* Corequisite(s): BESC 481R

Provides integration of classroom learning with learning that takes place in an on-site internship. To be taken concurrently with BESC 481R, Senior Internship. Repeatable for a maximum of 6 credits toward graduation.

BESC 495R
Advanced Research Experience
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): ANTH 101G or FAMS 1010 or PSY 1010 or SOC 1010 or SW 1010) with a C grade or higher; ENGL 2010 with C+ grade or higher; Instructor approval; BESC department major; University Advanced Standing

Provides a mentored experience to significantly assist on a faculty member's research project or carry out an independent research project of the student's design under faculty mentorship. Requires individual initiative and responsibility. Includes limited formal instruction. Includes literature searches, completion of the IRB application process, materials creation, data collection, data analysis, writing a publishable paper, preparing a poster, preparing an oral presentation, or other options as approved by the instructor. May be repeated for a maximum of nine credits toward graduation. May be graded credit/no credit.

Biology (BIOL)

BIOL 1010
BB
General Biology
3:3:0  Fall, Spring, Summer

Introduces major themes and concepts of biology including cell and molecular biology, genetics, diversity, evolution, and ecology. Provides students with necessary information and skills to critically evaluate what they hear, read, and see in the living world; communicate clearly; and apply methods to interpret data for making informed decisions concerning the role of biology in a world of which they are a part. May be delivered online.

BIOL 1015
General Biology Laboratory
1:0:2  Fall, Spring, Summer
* Prerequisite(s) or Corequisite(s): BIOL 1010

Covers introductory topics in general biology. Complements the student's experience in the General Biology 1010 course with emphasis on the application of the scientific method. Includes actual student experiences with living organisms, use of the microscope, and an introduction to techniques used in the study of life. Course lab fee of $13 for supplies applies.

BIOL 101H
BB
General Biology
3:3:0  On Sufficient Demand
* Corequisite(s): BIOL 1015

Introduces major themes and concepts of biology including cell and molecular biology, genetics, diversity, evolution, and ecology. Provides students with necessary information and skills to critically evaluate what they hear, read, and see in the living world; communicate clearly; and apply methods to interpret data for making informed decisions concerning the role of biology in a world of which they are a part. Requires a term paper, project, or presentation.

BIOL 1070
BB
Heredity
3:3:0  On Sufficient Demand

* Prerequisite(s): BIOL 1010 is strongly recommended

Introduces genetics for non-majors. Addresses patterns of inheritance from generation to generation (with an emphasis on human heredity), DNA structure and function as well as other aspects of molecular genetics and reproductive technologies. Canvas Course Mats $78/ McGraw applies.

BIOL 1200 (Cross-listed with: GEO 1020)
BB
Prehistoric Life
3:3:0  Spring
* Prerequisite(s): BIOL 1010 or GEO 1010 recommended

Studies prehistoric life. Uses the concepts of biology and physical science. Studies major groups of ancient animals and plants as found in the rock record. Includes aspects and fundamental concepts of biology, ecology, and geology.

BIOL 1500 (Cross-listed with: ANTH 1020)
BB
Biological Anthropology
3:3:0  Fall

* Prerequisite(s): (ENGL 1010 or ENGL 1005) and (ANTH 101G or BIOL 1010)

For students with special interests in Anthropology or the Life Sciences. Studies fossils and living primates, primate biology and behavior. Surveys humanoid fossils. Investigates human evolution and variations of basic biology as it pertains to human development. Stress the importance of the distribution and diversity of humankind.

BIOL 1610
BB
College Biology I
4:4:0  Fall, Spring, Summer
* Prerequisite(s): ACT (or equivalent) composite score of 21+, or completion of ENGL 1010 (or higher) with a minimum grade of C-

Gives a broad exposure to many aspects of the life sciences. Covers topics of biochemistry, energetics, cell structure and function, genetics, and evolution. BIOL 1615 must be taken concurrently by Biology Department majors. BIOL 1615 is not required for pre-allied health majors.

BIOL 1615
College Biology I Laboratory
1:0:3  Fall, Spring, Summer
* Corequisite(s): BIOL 1610

Laboratory course to accompany BIOL 1610. Topics covered include scientific method, biomolecules, cell structure and function, cellular reproduction, Mendelian and molecular genetics, DNA technology, and evolution. Course Lab fee of $30 applies.

BIOL 1620
BB
College Biology II
3:3:0  Fall, Spring, Summer
* Prerequisite(s): BIOL 1610 and BIOL 1615 with a C- or higher in each.
* Corequisite(s): BIOL 1625

Provides the second semester material in the two semester introductory course designed for biology majors. Covers origin and early evolution of life, plant structure and function, plant diversity, animal structure and function, animal diversity, and animal behavior.
BIOL 1625  
College Biology II Laboratory  
1:0:2  
Fall, Spring, Summer  
* Corequisite(s): BIOL 1620  
Laboratory course to accompany BIOL 1620. Topics covered include animal biology and diversity and plant biology and diversity. Course Lab fee of $24 for lab, transportation applies.

BIOL 202R  
(Cross-listed with: GEO 202R)  
Science Excursion  
1:0:2  
Fall, Spring, Summer  
For students interested in the natural world. Explores a wide variety of topics in science, including geology, botany, astronomy, zoology, ecology, and archeology. Consists of a minimum of a four-day field trip. Participants should gain an increased understanding of several fields of scientific study. May be repeated as many times as desired for interest, however a maximum of 3 credits may count toward graduation.

BIOL 204R  
(Cross-listed with: GEO 204R)  
BB  
Natural History Excursion  
3:1:6  
On Sufficient Demand  
For students interested in the natural world. Promotes an in-depth look at a wide variety of topics in science, including geology, botany, astronomy, zoology, ecology, and archeology. Consists of 15 hours of lecture plus an appropriate field trip. Participants should gain an interdisciplinary understanding of science and nature. May be repeated for up to six credits toward graduation.

BIOL 2070  
Natural History of the Colorado Plateau  
3:1:4  
Not Offered  
* Corequisite(s): GEO 2070  
Addresses the biological component of the Natural History Course taught in conjunction with GEO 2070 at the Capitol Reef Field Station during the summer months. Requires students to sign up for BIOL 2070 and GEO 2070 in order to participate. Teaches students about the ecology of this unique ecosystem, the plants and animals that occupy the landscapes and the interactions of the organisms with man and the environment. Provides an intense, hands-on field course where faculty and students participate together in daily activities and experimental design in a natural setting. Is held part of the time on the UVU main campus and part of the time at the Capitol Reef Field Station. Requires students to live and learn at the field station for approximately 1/3 of the course.

BIOL 2500  
Environmental Biology  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): BIOL 1010 or BIOL 1610 is recommended  
Acquaints students with the principles of environmental systems, including biogeochemical cycles, energy transformations, biotic and abiotic interactions, natural resources and their management. Discusses the interactions of ecological principles and humanity's technology relative to the world today and factors that influence the quality of life.

BIOL 290R  
Special Topics In Biology  
1 to 4:0 to 4:0 to 12  
On Sufficient Demand  
* Prerequisite(s): BIOL 1010 or higher or Instructor Approval  
Explores and examines special topics relating to the field of Biology. Emphasizes areas of rapid growth in Biology or current importance to society. May be repeated for a total of six credits toward graduation.

BIOL 295R  
Independent Studies in Life Sciences  
1 to 4:0 to 4:0 to 12  
Fall, Spring, Summer  
* Prerequisite(s): At least 3 credit hours of college level biology, approval of a faculty mentor, and approval of the department chair  
Provides individual studies in biology under the direction of a faculty mentor. May include literature reviews, original research, and participation in ongoing departmental projects. Introduces students to the methodology of life science research. Requires written and oral communication of scientific information. May be repeated for up to 4 credits toward graduation.

BIOL 3070  
(Cross-listed with: GEO 3070)  
Advanced Desert Natural History  
3:1:4  
On Sufficient Demand  
* Prerequisite(s): University Advanced Standing  
Integrates the geological and biological systems of the southwestern deserts. Includes discussion of the ecology and geology of unique desert ecosystems; the rocks and strata providing the foundation of the landscape; the evolutionary and geological processes that mold the landscape and the species within it over time; and, the relationships between the physical and biological aspects of the ecosystem, including humans. Provides an intense, hands-on field course where faculty and students participate together in daily activities and experimental design in a natural setting. Is held part of the time on the UVU main campus and part of the time at the Capitol Reef Field Station. Requires students to live and learn at the field station for approximately 1/3 of the course.

BIOL 3100  
Introduction to Data Analysis for Biologists  
3:3:0  
Spring  
* Prerequisite(s): University Advanced Standing  
Introduces computational methods for analyzing and visualizing common biological data types, focusing on developing computational skills and best practices for working with biological data. Provides instruction in command-line computing and appropriate software environments to enable robust and reproducible analyses of varied data sets.

BIOL 3300  
Developmental Biology  
3:3:0  
Fall, Spring  
* Prerequisite(s): BIOL 1610 with a minimum grade of C- and University Advanced Standing  
Examines the principles of Developmental Biology with emphasis on the specialization of cells and their organization into body plans. Is recommended for Biology Majors interested in developmental processes. May be delivered online.

BIOL 3400  
Cell Biology  
3:3:0  
Fall, Spring  
* Prerequisite(s): BIOL 1610 and CHEM 1220 with a C- or higher in each and University Advanced Standing  
For Biology majors or those desiring more knowledge of this subject. Studies the cell as an organism emphasizing molecular basis of cell structure and functions.

BIOL 3405  
Cell Biology Laboratory  
1:0:3  
On Sufficient Demand  
* Prerequisite(s): BIOL 1610 and CHEM 1220 or higher with minimum grade of C- in each and University Advanced Standing  
* Corequisite(s): BIOL 3400  
Uses laboratory exercises to demonstrate topics covered in BIOL 3400. Includes experimental methods for studying cell processes, enzymes, tissue specific proteins, organelles, and experimental design. Course Lab fee of $100 applies.

BIOL 3500  
Genetics  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): BIOL 1610 with minimum grade of C- and University Advanced Standing  
For Biology majors. Studies the genetic basis of life and the mechanisms by which information to make life is stored in the DNA. Presents classical, molecular, and population genetics in the background of current techniques and understanding of genetic processes. Provides an understanding of the basic principles of genetics and preparation for more advanced courses in other aspects of biology. Canvas CourseMat $72/Macmillan applies.

BIOL 3515  
Advanced Genetics Laboratory  
1:0:4  
* Prerequisite(s): University Advanced Standing  
* Prerequisite(s) or Corequisite(s): BIOL 3500  
Examines advanced aspects of classical and molecular genetic transmission and analysis. Provides hands-on experience with the methods of classical and molecular genetics.

BIOL 3550  
Molecular Biology  
3:3:0  
Fall  
* Prerequisite(s): BIOL 1610, CHEM 1215, and University Advanced Standing  
Examines structure, organization, replication, and expression of genomes. Explores the methods used for study of genome structure and function, including nucleotide and protein extractions, separations, and characterizations. Compares sequence data of genomes, transcriptomes, and proteomes. Examines primary literature in the field.
BIOL 3555
Experiments in Molecular Biology
1:0:3  Fall, Spring
* Prerequisite(s): University Advanced Standing
* BIOL 3550
Performs experiments in molecular biology including cDNA synthesis, gene cloning, DNA sequencing, polymerase chain reaction (PCR), computer analysis of nucleic acid and protein sequences, protein expression-screening and protein separation and characterization. Course Lab fee of $150 applies.

BIOL 3600 (Cross-listed with: CHEM 3600)
Biological Chemistry
3:3:0  Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): CHEM 2320

BIOL 3605 (Cross-listed with: CHEM 3605)
Biological Chemistry Lab
1:0:4  On Sufficient Demand
* Prerequisite(s): University Advanced Standing
* Corequisite(s): BIOL 3600
Introduces laboratory techniques in biochemistry. Studies methods and theory behind purification of proteins and nucleic acids including chromatography and electrophoresis. Uses methods in assessing enzyme activity and kinetics and protein structure analysis. Includes analysis and manipulation of DNA and RNA. Course Lab fee of $145 applies.

BIOL 3620 (Cross-listed with: CHEM 3620)
Biological Chemistry II
3:3:0  Spring
* Prerequisite(s): (CHEM 3600 or BIOL 3600) and University Advanced Standing
Is a continuation of CHEM 3600. Teaches in-depth the biochemistry of molecular and cell biology processes. Explores the topics of molecular information flow and signaling. Examines current understanding in biochemical methods and ideas beyond those discussed in Biochem I.

BIOL 369R
Introduction to Undergraduate Research
1:1:0  Fall, Spring
* Prerequisite(s): BIOL 1610; (MATH 1050 or STAT 2040 highly recommended) and University Advanced Standing
Introduces fundamentals of research in biology, including how to identify a research problem, form testable hypotheses, select appropriate experimental methods, collect data, determine appropriate sample size, establish appropriate controls, conduct experiments, document experiment details and data, tabulate, analyze and interpret data and how to write a research report. Emphasizes research ethics, institutional research guidelines, personal protection, and proper disposal of hazardous chemicals and biologicals. Introduces research opportunities available within and beyond the university community. May be repeated for a maximum of 2 credits toward graduation.

BIOL 3700
General Ecology
3:3:0  Fall, Spring
* Prerequisite(s): BIOL 1620 (or equivalent with instructor consent) with a C- or higher, and University Advanced Standing
Introduces the relationships between organisms and their environment, including population, community and ecosystem processes. Specific topics include adaptation to abiotic factors and the influence of these factors on distribution and abundance; survivorship, age structure, and growth of populations; life history patterns, species interactions, community structure and diversity, biome structure and distribution, and energy flow and nutrient cycles in ecosystems. Also presents the impact of humans on ecological processes.

BIOL 3705
General Ecology Laboratory
1:0:2  Not Offered
* Prerequisite(s): University Advanced Standing
* Corequisite(s): BIOL 3700
Laboratory component to General Ecology in which students may acquire skills in the collection, analysis, and presentation of ecological data. Activities include field sampling of plant and animal populations, laboratory experiments and observations, and computer simulations. Emphasizes techniques in data storage and statistical analysis, graphical representation of data, and scientific writing. Course Lab fee of $18 for lab, transportation applies.

BIOL 3800
Conservation Biology
3:3:0  Spring
* Prerequisite(s): (BIOL 1010 or BIOL 1620 with a minimum of C-) and University Advanced Standing; BIOL 3700 strongly recommended
Presents scientific principles of conservation biology and associated cultural and ethical issues. Explores the diversity of life on this planet and how that diversity is organized and distributed. Investigates the challenges facing management of our natural resources in order to maintain healthy and productive populations and ecosystems. Course fee of $13 for materials, transportation applies.

BIOL 4000
Freshwater Ecology
4:3:2  On Sufficient Demand
* Prerequisite(s): BIOL 1620 and (BIOL 2500 or BIOL 3700) with a C- or higher in each, and University Advanced Standing
Explores physical, chemical, and biological characteristics of freshwater systems, including lakes, rivers, and streams. Emphasizes freshwater habitats as ecosystems. Studies human impacts on freshwater, with particular reference to Utah and the West. Emphasizes field experience in collecting and measuring the physicochemical characteristics and different groups of organisms found in freshwater habitats. Includes weekly laboratory. Course Lab fee of $17 for lab, transportation applies.

BIOL 4200 (Cross-listed with: CHEM 4200, GEO 4200, PHYS 4200)
Teaching Methods in Science
3:2:2  Fall, Spring
* Prerequisite(s): Acceptance into secondary education program, senior-level standing, instructor approval, and University Advanced Standing
Examines objectives, instructional methods and curriculum for teaching science in the secondary school. Includes developing, adapting, evaluating, and using strategies and materials for teaching biological and physical sciences, appropriate both to the special needs of the learners and the special characteristics of science discipline.

BIOL 4260
Ethical Issues in Biology
2:1:2  On Sufficient Demand
* Prerequisite(s): (BIOL 1610, BIOL 1620, and PHIL 2050 with a C- or higher in each) and University Advanced Standing
Offer an in-depth analysis of current ethical issues in biology. Requires extensive reading and an analytical term paper. Presents subjects in lecture, and in lab sessions, concentrates on readings and on analyses of issues and their effects on people. Explores and discusses individual participant paradigms.

BIOL 429R
Professional Development
1:1:0  Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): BIOL 4500
Focuses on professional skills required for students to move forward in their chosen career. Emphasizes writing an effective cover letter, resume and personal statement and communicating effectively in an interview setting. Addresses social media branding for professional settings. Requires students to complete the biology major field test and other department assessments.

BIOL 4300
Bioinformatics and Genome Analysis
4:3:2  On Sufficient Demand
* Prerequisite(s): BIOL 3500 with a minimum grade C- and University Advanced Standing
Studies analysis of genomic sequences, comparison of genomes of different species to gather information about protein function. Includes hands on learning in bioinformatics and genomics. Uses a combination of computer work and discussions that will allow the student to perform basic gene and protein analysis using web tools.
BIOL 4450 (Cross-listed with: MICR 4450)
**Immunology**
3:3:0  On Sufficient Demand
* Prerequisite(s): (MICR 2060 or MICR 3450 or ZOOL 2420) and University Advanced Standing
* Corequisite(s): BIOL 4455
Explores the macromolecules, cells and organs involved in innate and adaptive immunity. Examines the development of lymphocyte repertoire, positive and negative selection of lymphocytes and the production of effector lymphocytes. Studies properties of antigens, vaccines, antigen presenting cells and the mechanisms of antigen presentation. Reviews major immunological methods for medical diagnostics and other applications. Examines causes and consequences of autoimmune and lymphoproliferative diseases and immunodeficiencies. Probes how immune response could be manipulated for cancer therapy and transplantation medicine.

BIOL 4455
**Immunology Laboratory**
1:0:2  On Sufficient Demand
* Prerequisite(s): University Advanced Standing
* Corequisite(s): BIOL 4450
Addresses federal, local and institutional regulations on using vertebrate animals for biomedical research. Teaches and regularly practices aseptic techniques required in handling biohazardous materials including vertebrate tissues. Studies how to collect tissues and blood from vertebrate animals and process the samples for harvesting various types of cells and macromolecules. Presents common immunological techniques such as western blot analysis and ELISA. Covers how to immunize animals using appropriate adjuvant and harvest plasma from immunized animals to isolate immunoglobulin. Examines tissue typing methodologies including PCR techniques. Course Lab fee of $150 applies.

BIOL 4500
**Principles of Evolution WE**
3:3:0  Fall, Spring
* Prerequisite(s): BIOL 1620 and BIOL 3500 with a C- or higher in each, senior status, and University Advanced Standing
* Prerequisite(s) or Corequisite(s): BIOL 3700
Focuses on the concepts of evolution as a fundamental principle of biology. Emphasizes the mechanisms and explanations of the tremendous diversity of life. Studies classical, molecular and current explanations of evolution in the background of current techniques and understanding of the genetic processes. Examines the principles of evolution and the various aspects of natural selection and speciation.

BIOL 4550
**Molecular Evolution and Bioinformatics WE**
3:3:0  Fall, Spring
* Prerequisite(s): BIOL 3500 with minimum grade of C-, and minimum of 6 additional credits upper division biology (BIOL, BOT, MICR, ZOOL, BTEC) courses, and University Advanced Standing
Focuses on the concepts of evolution as a fundamental principle of biology with emphasis on change at the molecular level. Teaches how natural selection shapes the evolution of genes, gene systems, macromolecules, and organisms. Explores the roles of mutation, natural selection, population size and subdivision, and genetic recombination. Introduces different approaches for testing hypotheses about how molecules evolve by using phylogenetic analysis.

BIOL 481R
**Biology Internship**
1 to 5:1 to 5:0  Fall, Spring, Summer
* Prerequisite(s): BIOL 1620 with a C- or higher and Instructor Approval
Allows biology majors to earn credit while obtaining practical and research experience as an intern in a government, nonprofit, private agency, or with an approved employer. Must be supervised by agency representative and faculty advisor. Department chairperson approval required and written contracts must be completed and signed. May be repeated with a maximum of 5 credits counting toward graduation. May be graded credit/no credit.

BIOL 489R
**Student Research**
1 to 4:0 to 12  Fall, Spring, Summer
* Prerequisite(s): BIOL 1620, CHEM 1210, Junior or Senior Standing, instructor permission, and University Advanced Standing
Provides guided research studies in biology under the direction of a Biology Department faculty mentor. Includes any combination of literature reviews, original research, and/or participation in ongoing departmental projects. Involves students in the methodology of original biology research. Requires preparation and presentation of oral and/or written reports. May culminate in results that will form the basis of the senior thesis in the major, if thesis option is chosen. May be repeated for 4 credits toward graduation.

BIOL 490R
**Special Topics in Biology**
1 to 4:0 to 4:0 to 8  On Sufficient Demand
* Prerequisite(s): BIOL 1620 and University Advanced Standing
Explores and examines special topics relating to the field of biology. Emphasizes areas of rapid growth in biology or current importance to society. May be repeated for a total of 9 credits toward graduation.

BIOL 492R
**Professional Development**
1:1:0  Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): BIOL 4500
Focuses on professional skills required for students to move forward in their chosen career. Emphasizes writing an effective cover letter, resume and personal statement and communicating effectively in an interview setting. Addresses social media branding for professional settings. Requires students to complete the biology major field test and other department assessments.

BIOL 494R
**Student Seminar WE**
2:2:0  Fall, Spring
* Prerequisite(s): BIOL 1620 with a C- or higher, junior or senior standing, and University Advanced Standing
Requires students to research scientific literature, give oral presentations, write a research paper, and lead discussions on assigned biology topics in specific areas of current research in biology. May be repeated for up to 4 credits toward graduation.

BIOL 497R
**Biology Colloquium**
.5:0:0  Fall, Spring
* Prerequisite(s): University Advanced Standing
Requires students to attend lectures presented every other week by department faculty and/or invited speakers. Features lectures that are usually a summary of the speaker's recent research results, presented at a level appropriate for junior and senior biological science majors. May be repeated for a maximum of 2 credits toward graduation.

BIOL 499R
**Senior Thesis**
1 to 2:0 to 6  Fall, Spring, Summer
* Prerequisite(s): ENGL 2010, junior standing, instructor permission, and University Advanced Standing
Teaches students to write a thesis based on library research or work performed during laboratory/field research under BIOL 498R. Provides experience in critically analyzing published literature and, if laboratory/field research was performed, comparing research results with the scientific literature. Requires a technically accurate report on one's findings. Includes the opportunity to present the research results to students, faculty and the community at a Department of Biology seminar. May be repeated once for a total of 2 credits toward graduation.

BIOL 5000
**Regulatory Affairs for Life Sciences**
4:4:0
* Prerequisite(s): Acceptance into the Certificate of Proficiency in Regulatory Affairs for Life Sciences or Instructor Approval
Introduces regulatory affairs as practiced by medical device and biopharma companies in the US. Focuses on United States Federal Drug Administration and International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use guidances and best practices.

BIOL 5010
**Quality Management Systems for the Life Sciences**
2:2:0
* Prerequisite(s): BIOL 5000
Introduces FDA and International Conference on Harmonisation (ICH) requirements for the QSR (Quality System Regulation). Focuses on ISO 13485 and related guidances. Specifically covers the regulations and standards which are the basis of the regulated life science industry.

BIOL 5020
**Design Control and Risk Management for the Life Sciences**
3:3:0
* Prerequisite(s): BIOL 5000
Introduces design control and risk management requirements for medical device and BioPharma companies.
Course Descriptions

BIOL 525R
Advanced Topics for Biology Teachers
1 to 5:1 to 5:0 to 10 Not Offered
* Prerequisite(s): Departmental Approval
For licensed teachers or teachers seeking to re-certify their biology endorsement from the Utah State Office of Education. Teaches principles of biology and pedagogy of teaching biology for teachers in public or private schools. Emphasizes correlation with the Utah Core Curriculum, the National Science Education Standards, and the Benchmarks of Project 2061. Topics will vary.

BIOL 579R
Special Topics
2:2:0 Spring
Focuses on issues that are current and often changing in regulatory affairs, such as international regulations. Engages students in discussion and lectures with industry experts on cutting-edge issues that impact how medical devices and pharmaceuticals are regulated for compliance and safety. May be repeated for a maximum of 8 credits toward graduation. May be delivered online.

BIOL 580R
Capstone Project
1:1:0
* Prerequisite(s): BIOL 5020
Applies knowledge learned in the Regulatory Affairs sequence of courses to the real world. Allows students to work with faculty members and industry experts to design and complete a project that incorporates various concepts that have been presented in previous Regulatory Affairs courses. May be repeated for a maximum of 3 credits toward graduation.

BIOL 581R
Biology Internship
1 to 5:1 to 5:0
* Prerequisite(s): Instructor Approval and Internship Orientation
Allows students to earn credit while obtaining practical and research experience as an intern in a government, nonprofit, private agency, or with an approved employer. Must be supervised by agency representative and faculty advisor. Department chairperson approval required and written contracts must be completed and signed. May be repeated with a maximum of 5 credits counting toward graduation. May be graded credit/no credit.

Building Inspection Technology (BIT)

BIT 1010
Building Codes
3:3:0 Fall
Teaches the nonstructural standards of the Uniform Building Code. Includes occupancy classifications, building area, height and location limits, exit requirements, and fire-resistive standards.

BIT 1020
Residential Codes
3:3:0 Spring
Teaches the nonstructural standards of the International Residential Code. Includes foundations, walls, floors, roofs, finishes, heating, cooling, plumbing and electrical codes as they apply to residential construction.

BIT 1170
Field Lab Building Codes
1:0:3 Fall, Spring
For students, building inspectors, architects, and builders. Provides practical on-the-job experience in inspecting footings, foundation walls, reinforcement steel, the building structure, and interior and exterior coverings.

BIT 1230
Plan Review
3:3:0 Spring
* Prerequisite(s): BIT 1010 or instructor's approval.
Designed to introduce students to the techniques of nonstructural plans examination through familiarization of the plan and construction documents, specifications, and the application of code requirements.

BIT 1240
Plumbing Codes
3:3:0 Spring
A comprehensive study of plumbing code requirements relating to the principles of plumbing design, materials, installation standards, water and gas distribution systems, storm and sanitary sewer systems, water heaters, and mobile home connections.

BIT 1330
Mechanical Codes
3:3:0 Fall
This is a comprehensive course which covers the entire Uniform Mechanical Code. Students will gain a working knowledge of requirements for mechanical systems, including heating, cooling, ducts, ventilation, refrigeration, kitchen hood and ducts, fuel-gas piping, appliance venting, combustion air, and related requirements.

BIT 1340
Electrical Codes
3:3:0 Fall, Spring
Studies the National Electrical Code in its entirety. Covers electrical wiring systems, methods, electrical equipment, special occupancies, special equipment, special conditions, and communication systems.

BIT 1380
Ride Along Lab
1:0:3 Fall, Spring, Summer
For students, building inspectors, architects, and builders. Students will accompany a building inspector as he or she conducts on-the-job inspections. There will be a rotation system established to give students experience in a variety of jurisdictions. This class is for fourth-semester students only.

BIT 281R
Cooperative Work Experience
1 to 8:1 to 8:0 Not Offered
* Corequisite(s): BIT 285R the first time only
For Building Inspection Technology majors. Provides paid, on-the-job work experience in the student's major. Work experience, the correlated class, and enrollment are coordinated by the Cooperative Coordinator. Includes student, employer, and coordinator evaluations, on-site work visits, written assignments, and oral presentations. Provides experience in writing and completing individualized work objectives that improve present work performance. Up to 16 credits total between BIT 281R and BIT 285R may be taken toward graduation. May be graded credit/no credit.

BIT 285R
Cooperative Correlated Class
1:1:0 Not Offered
* Corequisite(s): BIT 281R the first time only
For Building Inspection Technology Majors. Identifies on-the-job problems and provides remediation of those problems through in-class discussion and study. Includes the study of identifying and maximizing service opportunities. Students register for this class with approval of the Cooperative Coordinator. Includes lecture, guest speakers, video tapes, role playing, case analysis, oral presentations, and written assignments. Completers should be better able to perform in their field of work or study. Take up to 16 credits total between BIT 281R and BIT 285R.

Business/Marketing Education (BMED)

BMED 4200
Methods of Teaching Business/Marketing/ Digital Technology
3:3:0 Spring
* Prerequisite(s): (IM 2600 or IM 3700 or Instructor Approval), EDSC 3000, and University Advanced Standing
Provides foundation knowledge of business education. Includes methods of teaching business, marketing, digital media, emerging technologies, and keyboarding. Includes philosophical foundations of business education, curriculum trends impacting business and technology classrooms, classroom management, curriculum planning, and assessment. Includes curriculum standards, competency-based instruction, career and technical education, and professionalism. Requires field observation. May be delivered hybrid. Lab access fee of $45 applies.

BMED 4250
Methods of Teaching Business and Marketing
3:3:0 On Sufficient Demand
* Prerequisite(s): EDSC 3000, LEGL 3000, MKTG 2200, ECON 2020, MKTG 3600, or instructor approval, and University Advanced Standing
Provides an opportunity for prospective teachers to become facilitators of learning specifically by planning, developing, delivering, and evaluating basic business and marketing curriculum. Provides the background and foundation of business/marketing teacher education for students seeking a secondary education degree. Includes textbook selection, student organizations, professional associations, and advisory committees. Addresses issues and trends in business and marketing education. May be delivered hybrid. Lab access fee of $45 applies.
Methods of Teaching Computer Science
3:3:0 On Sufficient Demand
* Prerequisite(s): (INFO 1120 or CS 1030) and (INFO 1200 or CS 1500) or Instructor Approval; and University Advanced Standing
Methodology course designed for secondary education students and current educators to gain the pedagogical knowledge and learn best practices necessary for teaching secondary computer science (CS) concepts. Combines pedagogical principles with computer science knowledge to create an effective learning environment. Includes reading, discussing, reflection, evaluation, micro-teaching, and field observations. Addresses the standards set by the International Society for Technology in Education (ISTE) for students and for teachers, and utilizes in the design, implementation, and assessment of learning materials. Lab access fee of $45 applies.

Botany (BOT)

BOT 2050 Field Botany
3:2:3 Fall
* Prerequisite(s): BIOL 1010 or BOT 2400 recommended
For biology majors and non-majors. Covers the classification, identification, and ecology of woody plants with an emphasis on native trees and shrubs. Includes field trips and laboratory work. Student plant collection required. Course Lab fee of $30 for transportation applies.

BOT 2100 Flora of Utah
3:2:3 Summer
* Prerequisite(s): None, BIOL 1010 is recommended
A vascular plant taxonomy course for intended botany and biology majors or anyone interested in learning about plants native to Utah. Covers the principles of plant classification, nomenclature, and identification with an emphasis on Utah flowering plants. Includes field trips and weekly laboratory. Student plant collection required. Course Lab fee of $30 for transportation applies.

BOT 2400 Plant Kingdom
4:3:2 Spring
* Prerequisite(s): BIOL 1010 or BIOL 1610 with a minimum grade of C-
Surveys of the Divisions (Phyla) traditionally studied by botanists, emphasizing structure, reproduction, systematics, and evolution. Completers should be familiar with the morphological features of the major prokaryotic, fungal, algal, and plant groups. Includes a weekly laboratory. Course Lab fee of $50 for supplies applies.

BOT 295R Independent Studies in Botany
1 to 4:0:3 to 12 Fall, Spring, Summer
* Prerequisite(s): At least 3 credit hours of college level biology, approval of a faculty mentor, and approval of the department chair
Provides individual studies in botany under the direction of a faculty mentor. May include literature reviews, original research, and participation in ongoing departmental projects. Introduces students to the methodology of botany research. Requires written and oral communication of scientific information. May be repeated for up to 4 credits toward graduation.

BOT 3340 Plant Biology
4:3:2 Fall
* Prerequisite(s): BIOL 1620 and (CHEM 1120 or CHEM 1220 or higher) with a minimum grade of C- in each, and University Advanced Standing
Designed for Biology Education majors and others wishing a one semester upper division combined plant anatomy/plant physiology course. Covers structure-function interrelationships from the cellular to whole plant level, including aspects of plant anatomy, physiology, reproduction, growth and development with emphasis on the angiosperms (flowering plants). Includes weekly laboratory. Students may not receive credit for both BOT 3340 and BOT 4100 and/or BOT 4600. Course lab fee of $30 for supplies applies.

BOT 3800 Ethnobotany
4:3:2
* Prerequisite(s): BIOL 1620 with a C- or higher and University Advanced Standing
Analyzes and evaluates interactions between people and plants. Discusses how plants are used in medicine, industry, food, and culture. Covers basic concepts, including literature and field research techniques, phytochemical analysis, and ethical issues such as bioprospecting and conservation. Includes class discussions, student-led activities, oral presentations, and a final project. Course lab fee of $15 applies.

BOT 4050 Plant Anatomy
3:3:0 Fall
* Prerequisite(s): (BOT 2050 or BOT 2100), (BIOL 1010 or BIOL 1620), and University Advanced Standing
* Prerequisite(s): (BOT 2050 or BOT 2100), (BIOL 1010 or BIOL 1620), and University Advanced Standing
Covers the structure and development of cells, tissues and tissue systems in stems, roots, leaves, and reproductive structures in vascular plants, with emphasis on the angiosperms. Discusses primary and secondary plant body, including wood anatomy. Includes weekly laboratory. Students cannot receive credit toward graduation for both BOT 3340 and BOT 4100. Course lab fee of $25 for supplies applies.

BOT 4055 Plant Ecology Laboratory
1:0:2 Fall
* Prerequisite(s): University Advanced Standing
* Corequisite(s): BOT 4050
Laboratory component of Plant Ecology in which students acquire skills in the collection, analysis, and presentation of ecological data. Includes field sampling of plant populations, laboratory and greenhouse experiments, and scientific writing. Field trips, including one weekend field trip, are required. Course Lab fee of $87 for lab, transportation applies.

BOT 4100 Plant Pathology
4:3:2 Not Offered
* Prerequisite(s): BIOL 1620 and BIOL 1625 with a minimum grade of C- in each, and University Advanced Standing
Covers the structure and development of cells, tissues and tissue systems in stems, roots, leaves, and reproductive structures in vascular plants, with emphasis on the angiosperms. Discusses primary and secondary plant body, including wood anatomy. Includes weekly laboratory. Students cannot receive credit toward graduation for both BOT 3340 and BOT 4100. Course lab fee of $25 for supplies applies.

BOT 4200 Plant Systematics
3:2:2 Spring
* Prerequisite(s): (BOT 2050 or BOT 2100), (BIOL 1010 or BIOL 1620), and University Advanced Standing
Covers the principles of plant classification and the techniques employed in gathering and analyzing taxonomic data. Focuses on the essentials of phylogenetic analysis in plants and on the evolutionary relationships between the major groups of vascular plants. Includes a weekly laboratory.

BOT 4300 Native Trees and Shrubs of Utah
3:2:2 Fall
* Prerequisite(s): BIOL 1620 with a C- or higher and University Advanced Standing; BOT 2400 suggested
Explores the diversity of woody plants of Utah, the plant communities they inhabit, and the ecological roles they play. Requires field trips; may include overnight trips as well as scheduled labs. Course Lab fee of $70 for transportation applies.

BOT 4430 Plant Pathology
3:2:3
* Prerequisite(s): BIOL 1610 with a minimum grade of C- and University Advanced Standing
Teaches the fundamental concepts of plant pathology. Describes plant disease symptoms and organisms that cause those diseases and methods of control and diagnosis of diseases. Includes required laboratory. Course fee of $20 applies.

BOT 4500 Introduction to Grasses
3:2:2 Fall, Summer
* Prerequisite(s): BIOL 1620 with a minimum grade of C- and University Advanced Standing
Discusses grasses and their relatives, grass anatomy, taxonomy, and ecology. Emphasizes identification techniques. Includes heavy lab component and required field trips. Requires student plant collection.
Course Descriptions

BOT 4600
Plant Physiology
3:3:0 Spring
* Prerequisite(s): BIOL 1620 and CHEM 1220 both with a minimum grade of C-, and University Advanced Standing
* Corequisite(s): BOT 4605
Covers the physiological processes occurring in plants. Includes experimental techniques used in the investigation of processes such as photosynthesis, water and solute transport, tissue culture, growth regulation and responses and plant hormones. Involves problem solving and critical thinking skills. Students can not receive credit for both BOT 4600 and BOT 3340.

BOT 4605
Plant Physiology Laboratory
1:0:3 Spring
* Prerequisite(s): BIOL 1610, BIOL 1615, and University Advanced Standing
* Corequisite(s): BOT 4600
Focuses on laboratory aspects of topics in BOT 4600. Covers experimental methods for studying plant physiological processes such as respiration, photosynthesis, mineral nutrition, transpiration and tissue-water relations. Course Lab fee of $35 applies.

BOT 4700
Plant Tissue Culture
4:2:4 Spring
* Prerequisite(s): BIOL 1620 with a minimum grade of C- and University Advanced Standing
Teaches principles of plant micropropagation techniques. Prepares the student to design and carry out their own micropropagation systems for the cultivation of a particular plant species. Course lab fee of $60 applies.

BOT 4800
Plant-Herbivore Interactions
3:3:0 Not Offered
* Prerequisite(s): BIOL 1620 with a C- or higher, and University Advanced Standing
Studies the diversity of interactions between plants and herbivores, and how these interactions can affect population, community, and ecosystem-level dynamics. Topics include plant defenses, tritrophic interactions, plant succession, and co-evolution. Implications of plant - herbivore interactions to natural resource management are considered.

BOT 481R
Botany Internship
1 to 5:1 to 5:0 On Sufficient Demand
* Prerequisite(s): BIOL 1620 with a C- or higher, Instructor Approval, and University Advanced Standing
Allows biology majors to earn credit while obtaining practical and research experience as an intern in a government, nonprofit, private agency, or with an approved employer. Must be supervised by agency representative and faculty advisor. Department chairperson approval required and written contracts must be completed and signed. May be repeated for a maximum of 5 credits toward graduation. May be graded credit/no credit.

BOT 489R
Student Research
1 to 4:0:3 to 12 On Sufficient Demand
* Prerequisite(s): BIOL 1620, CHEM 1210, Junior or Senior Standing, Instructor Approval, and University Advanced Standing
Provides guided research studies in botany under the direction of a Biology Department faculty mentor. Includes any combination of literature reviews, original research, and/or participation in ongoing departmental projects. Involves students in the methodology of original botanical research. Requires preparation and presentation of oral and/or written reports. May culminate in results that will form the basis of the senior thesis in the major, if thesis option is chosen. May be repeated for 4 credits toward graduation.

BOT 490R
Special Topics in Botany
1 to 4:0 to 4:0 to 12 On Sufficient Demand
* Prerequisite(s): BIOL 1620 with a C- or higher, and University Advanced Standing
Explores and examines special topics relating to botany. May emphasize areas of rapid growth in botanical science or areas not covered in other courses. May be repeated for a total of 8 credits toward graduation.

BOT 499R
Senior Thesis
1 to 2:1 to 2:0 On Sufficient Demand
* Prerequisite(s): ENGL 2010, Junior standing, Instructor Approval, and University Advanced Standing
Is for students who are nearing completion of a baccalaureate degree in Botany with the thesis option. Assists students who are writing a thesis based only on library research, or those who have performed laboratory/field research under BIOL 489R or BOT 489R. Provides experience in critically analyzing published literature and, if laboratory/field research was performed, comparing research results with the scientific literature. Is supervised by an appointed faculty member of the Department of Biology. Requires a technically accurate report on one's findings. Includes the opportunity to present the research results to students, faculty and the community at a Department of Biology seminar. May be repeated once for a total of 2 credits toward graduation.

BTEC 2020
Protein Purification and Analysis
3:2:3 Fall, Spring
* Prerequisite(s): BTEC 2010 with minimum grade of C
Teaches current techniques with protein production, purification, and analysis. Includes instruction and practice with polyacrylamide gel electrophoresis (PAGE), chromatography, western blot, and FPLC analysis. Course fee of $107 for lab applies.

BTEC 2030
Cell Culture Techniques
2:0:6 Fall, Spring
* Prerequisite(s): BIOL 1615 with a minimum grade of a "C"
Teaches basics of eukaryote cell culture. Includes handling, storage, and maintenance of mammalian stocks. Emphasizes media preparation and sterile techniques. Includes in vitro labeling and transfection. Course fee of $195 for lab applies.

BTEC 2040
Advanced Nucleic Acid Laboratory
3:0:6 Fall, Spring
* Prerequisite(s): BTEC 2010 with minimum grade of C
Teaches advanced nucleic acid modification and analysis methods. Includes site-directed mutagenesis, DNA sequencing, and RNA analysis methods, high-resolution DNA melting for genotyping and real-time PCR to quantitate DNA in samples. Incorporates methods to mutate 2 genes using CRISPR gene editing technology followed by RT-PCR to analyze gene expression (RNA isolation, creating cDNA, followed by real-time PCR).

BTEC 3300 (Cross-listed with: CHEM 3300)
Biomolecular Modeling and Simulations
4:4:0 Spring
* Prerequisite(s): CHEM 3600 or BIOL 3600, and University Advanced Standing
Introduces students to the field of molecular modeling and simulations and to the wide range of problems that can be tackled using computational methods. Focuses on biomolecular simulations and computer-aided drug discovery. Emphasizes the connection between structure, dynamics, and function. Teaches application of algorithmic thinking to solving complex problems. Develops practical skills needed to perform simulations and analyze the results. Develops understanding of the inherent approximations and limitations of the methods for adequate assessment of modeling results. Covers topics such as molecular visualization and rendering, molecular dynamics simulations, and computer-aided drug discovery through virtual screening and small molecule docking.

BTEC 481R
Biotechnology Internship
1 to 10:1 to 10:0 Fall, Spring, Summer
* Prerequisite(s): BIOL 1610 with a minimum grade of C-, junior standing in Biotechnology B.S. program, and instructor approval
Allows biotechnology majors to earn credit while obtaining practical and research experience as an intern in a government, nonprofit, private agency, or with an approved employer. Must be supervised by agency representative and faculty advisor. Department chairperson approval required and written contracts must be completed and signed. May be repeated for a maximum of 10 credits. May be graded credit/no credit.
BTEC 489R
Student Research
1 to 4:0:3 to 12 Fall, Spring, Summer
* Prerequisite(s): BIOL 1610, CHEM 1210, BTEC 2010, Junior or Senior Standing, instructor permission, and University Advanced Standing

Provides guided research studies in biotechnology under the direction of a Biology Department mentor. Includes any combination of literature reviews, original research, and/or participation in ongoing departmental projects. Involves students in the methodology of original biology research. Requires preparation and presentation of oral and/or written reports. May culminate in results that will form the basis of the senior thesis in the major, if thesis option is chosen. May be repeated for 8 credits toward graduation.

BTEC 490R
Special Topics in Biotechnology
1 to 4:0 to 4:0 to 8 Fall, Spring
* Prerequisite(s): BIOL 1610 with minimum grade of C-, and University Advanced Standing

Explores and examines special topics relating to the field of biotechnology. Emphasizes areas of rapid growth in biotechnology or current importance to society. May be repeated for a maximum of 18 credits toward graduation.

BTEC 499R
Senior Thesis
1 to 2:0:3 to 6 Fall, Spring
* Prerequisite(s): ENGL 2010, junior standing, instructor permission, and University Advanced Standing

Is for students who are nearing completion of a baccalaureate degree in Biotechnology with the thesis option. Assists students who are writing a thesis based only on library research, or those who have performed laboratory/field research under BTEC 499R. Provides experience in critically analyzing published literature and, if laboratory/field research was performed, comparing research results with the scientific literature. Is supervised by an appointed faculty member of the Department of Biology. Requires a technically accurate report on one's findings. Includes the opportunity to present the research results to students, faculty and the community at a Department of Biology seminar and/or other appropriate venues (e.g., conferences). May be repeated for a maximum of 2 credits toward graduation.

Culinary Arts (CA)

CA 1000
Culinary Basics
3:3:0 Fall, Spring

Designed for hospitality management majors and as elective credit for other business majors. Explains the techniques and procedures of quality and quantity food production. Studies the selection and preparation of major food products. Provides an extensive set of basic and complex recipes for practice. Includes lectures, lab, visits of guest chefs, and field trips. Completers should be prepared to enter the working field as a prep cook. Lab access fee of $32 for computers applies. Course fee of $150 for materials applies.

CA 1120
Cooking Skills Development
4.5:2:7.5 Fall, Spring
* Prerequisite(s): Matriculation and acceptance into the Culinary Arts Institute
* Corequisite(s): CA 1170, CA 1310

Teaches basic food service skills in a commercial kitchen environment. Stresses the use of standardized recipes and procedures. Provides daily end product critiquing. Includes rotation between stock and sauce station, soup station, center of plate items along with appropriate starch and vegetable items, and breakfast station. Emphasizes sanitary food handling practices and professional work habits. Course fee of $750 for materials, equipment applies.

CA 1140
Professional Dining Room Services
1:5:1.5 Fall, Spring, Summer
* Prerequisite(s): Matriculation and Acceptance into the Culinary Arts Institute

Covers the key aspects and responsibilities of table servers in different styles of operations. Covers taking reservations, greeting guests, basic table settings, formal and specialized settings, food and beverage service, selling menu specials, dealing with closing checks, dealing with customer complaints, emergency procedures, and the use of a Point of Sale system.

CA 1150
Nutrition and Food Service
3:3:0 Fall, Spring

Provides an understanding of how and why the relationship between food and health has moved into sharp focus. This course will trace the change in dietary patterns that have been noted by the food service industry. This course has been designed to help meet the need of developing adequate healthful food programs. You will learn about the changes in eating attitudes and be able to define the various responsibilities of the food service industry. You will learn how to identify whether a market exists for a healthful food program and how to plan and manage such a program. The course will also explore nutrients and their food sources; physiological and metabolic aspects of nutrient functions; individual requirements; food choices and selection; prevention and treatment of common nutritional-related disease; along with contemporary and controversial issues.

CA 1160
Culinary Math
1:1:0 Fall, Spring, Summer
* Prerequisite(s): Matriculation and Acceptance into the Culinary Arts Institute

Allows culinary professionals to utilize all the tools necessary to manage daily food service operations for maximum efficiency and profitability. Reviews basic math functions then expands into recipe conversion, yields, recipe costing, and menu costing.

CA 1170
Pastry and Baking Skills
4.5:2:7.5 Fall, Spring
* Prerequisite(s): Matriculation and acceptance into the Culinary Arts Institute
* Corequisite(s): CA 1120 and CA 1310

Teaches basic baking and pastry skills in a commercial kitchen environment. Stresses the use of standardized recipes and procedures. Provides daily end product critiquing. Includes simple yeast-raised products, quick breads, pies, and custards, cakes and tortes, cookies and frozen desserts. Emphasizes sanitary food handling practices and professional work habits. Course fee of $750 for materials, equipment applies.

CA 1180
Professional Kitchen Garde Manger
4.5:2:7.5 Fall, Spring
* Prerequisite(s): CA 1120 and CA 1170
* Corequisite(s): CA 1230

Emphasizes proper preparation of cold food items. Includes preparation of tossed, compound and composed salads, cold sandwiches, dressings, salad bar items, display platters, assorted forcemeat, smoked and cured items, along with marinaded and assorted cold first course items. Course fee of $750 for materials, equipment applies.

CA 1210
Nutrition
3:3:0 Fall, Spring

* Prerequisite(s): BIOL 1610, CHEM 1210, BIOL 1610, and University Advanced Standing

A study of normal and abnormal human nutrition. Emphasizes the treatment of common nutritional-related disease; along with contemporary and controversial issues.

CA 1230
Professional Kitchen I Cooking
4.5:2:7.5 Fall, Spring
* Prerequisite(s): CA 1120 and CA 1170
* Corequisite(s): CA 1230

Emphasizes proper preparation of center of plate foods, starch, vegetable, and small sauce cookery. Studies and utilizes contemporary methods of plating and flavor profiles. Emphasizes fabrication of beef, veal, lamb, fish, poultry and fowl. Provides daily end product for evaluation and resale. Course fee of $750 for materials, equipment applies.

CA 1260
Culinary Spanish
1:1:0 Fall, Spring
* Prerequisite(s): Matriculation and Acceptance into the Culinary Arts Institute

Designed to assist food service employers, managers, and workers to effectively communicate to an increasingly Spanish-speaking work force. Introduces short phrasing to assist in basic communication.

CA 1310
Purchasing and Storeroom Management
3:3:0 Fall, Spring
* Corequisite(s): CA 1120 and CA 1170

Teaches principles and practices concerning purchasing of foods, supplies, and materials for a modern full-service food service operation. Emphasizes buying, writing specifications, determining needs, and controlling quality.

CA 1320
Culinary Management
3:3:0 Fall, Spring
* Prerequisite(s): Matriculation and Acceptance into the Culinary Arts Institute

Focuses on employee management and supervision concepts used in the food service field. Includes instruction on writing a professional resume.
CA 1480
Sanitation and Table Service
3:3:0  On Sufficient Demand
Teaches effective food and beverage service management in
outlets ranging from cafeterias and coffee shops
to room service, banquet areas, and high-check-
average dining rooms. Presents basic service principles
while emphasizing the special needs of guests.
Explains effective sanitation management to achieve high
standards that will keep customers coming back. Includes
lecture, film, and tapes. Develops an entry-level working
knowledge of serving food and beverage.

CA 1490
Food Service Sanitation
1:1:0  Fall, Spring, Summer
* Prerequisite(s): Matriculation and Acceptance into the
Culinary Arts Institute
Explains effective sanitation measures that will keep
customers and employees safe. Using the ServSafe
Program from the National Restaurant Association this
course meets the state wide requirements for food service
employee's sanitation and safety training.

CA 2120
Professional Kitchen II Restaurant
5.5:2:10.5  Fall, Spring
* Prerequisite(s): CA 1230
Focuses on practical applications of previous courses
by running Restaurant Forte. Enhances knowledge of
cooking methods, mise en place, flavor building, soups,
salads, entrees and desserts. Course fee of $750 for
materials, equipment applies.

CA 2130
Advanced Pastry Baking
4.5:2:7.5  Fall, Spring
* Prerequisite(s): CA 1170
* Corequisite(s): CA 2120
Emphasizes proper preparation of plated desserts, cakes
and torts, petit fours, and laminated dough. Studies the
use and role of value added dessert items, and banquet
and catering dessert requirements. Course fee of $750 for
materials, equipment applies.

CA 2430
Menu Facilities Design and Beverage
Management
3:3:0  On Sufficient Demand
* Prerequisite(s): CA 1310
Introduces menu design. Explores the relationship
between menus and restaurant design for both production
and service areas. Explains fundamental principles and
techniques for planning menus for different operation
styles. Provides practical experience and approaches
in beverage management and service. Emphasizes
legal and moral responsibilities of serving alcoholic
beverages. Teaches understanding, service, and storage
of beverages in full service restaurants.

CA 2450
Menu Design
2:2:0  Fall, Spring
* Prerequisite(s): CA 1310
Introduces menu design. Explores the relationship
between menus and restaurant design for both production
and service areas. Explains fundamental principles and
techniques for planning menus for different operation
styles.

CA 2750
Baking
3:2:4  On Sufficient Demand
* Prerequisite(s): Instructor Approval
Teaches intermediate baking skills. Includes lectures,
demonstrations, and daily hands-on activities.
Emphasizes quality products, methods/techniques and
formula development.

CA 2760
Pastry
5:3:6  On Sufficient Demand
* Prerequisite(s): Instructor approval
Combines patisserie skills learned in other culinary arts
classes to develop advanced skills in the production of
fine baked products. Stresses the use of standardized
recipes and procedures. Includes cakes, tortas, pastries,
chocolate, and desserts. Provides daily end-product
critiquing. Course fee of $250 for materials applies.

CA 282R
Culinary Arts Internship
1 to 8:1 to 8:0  Fall, Spring, Summer
* Prerequisite(s): Culinary Arts Institute Director Approval
Provides a transition from school to work where learned
theory is applied to actual practice through a meaningful
on-the-job experience commensurate with classroom
instruction. May be repeated for up to eight hours toward
graduation in the Culinary Arts degree. May be graded
credit/no credit.

CA 296R
Culinary Arts Seminar
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): Instructor Approval
Provides short courses, workshops, and special programs
in Culinary Arts topics. Repeatable for up to three credits
toward graduation.

CA 298R
ACF
1:5:2  Fall, Spring, Summer
* Prerequisite(s): Approval of School of Business Career
Standing
For Culinary Arts students who are interested in
participating with a national professional association
(American Culinary Federation). Prepares students to
participate in local, state, and national competitions. May
require payment of membership dues. A maximum of four
credits may be applied toward graduation.

CA 299R
VICA
1:5:2  Fall, Spring
For Culinary Arts students who are interested in
participating with a national vocational student
organization (Vocational Industrial Clubs of America)
that develops social awareness, civic responsibility,
vocational and leadership skills through participation in
educational, vocational, civic, recreational, and social
activities. Prepares students to participate in local, state,
and national competitions. May require payment of
membership dues. A maximum of four credits may be
applied toward graduation.

CA 481R
Cooperative Work Experience
2 to 9:2 to 9:0  Fall, Spring, Summer
* Prerequisite(s): Approval of School of Business Career
and Corporate Manager and University Advanced
Standing
For upper division students working towards a Bachelor of
Science Degree in Hospitality Management with an
emphasis in Food and Beverage. Provides opportunities
to apply classroom theory on the job. Students work in a
restaurant kitchen while enrolled at the college. Credit is
determined by the number of hours a student works during
the semester. Completes meet individually set goals. May
apply 6 credits toward a Bachelor of Science Degree in
Hospitality Management. May be graded credit/no credit.

Cabinetry and Archit Woodwork (CAW)

CAW 100R
Survey of Working with Wood
2:0:5  Fall, Spring
An introductory course for those interested in working with
wood. Students will experience the satisfaction of making
a piece of furniture with individualized help from the
instructor. Includes “hands on” practice with woodworking
equipment and instruction in methods to design, build,
and finish a wood project. May be repeated up to four times
for credit. Course fee of $15 for materials, equipment applies.

CAW 1100
Artistic Wood Design
2:1:4  On Sufficient Demand
Explores form, functions, and utility of wood products
through students’ design and creation of projects in the
wood lab. Provides opportunities to design and create a
unique piece of woodworking.

CAW 1130
Residential Cabinetry
4:1:9  Spring
Studies cabinetmaking methods including joinery,
construction, gluing, and clamping. Includes building a
set of residential cabinets. Introduces hand and portable
electric and air tools. Covers tool care and minor repairs.
Stresses functions, selection, maintenance, and safety.
Course fee of $15 for materials, equipment applies.

CAW 1140
Millworking and Safety Shop I
5:0:15  Fall
A lab for CAW students. Teaches fundamentals of
woodworking machines and standard millwork operations.
Studies correct construction techniques. Safety is taught
the first 15 hours and stressed throughout the course.
Course fee of $25 for materials, equipment applies.

CAW 114A
Millworking and Safety Shop I
2.5:0:7.5  Fall
Laboratory for Cabinetry students. Covers half of
CAW 1140. Teaches fundamentals of woodworking
machines and standard millwork operations. Studies
correct construction techniques. Teaches safety the first
15 hours and stressed throughout the course. Course fee of
$15 for materials, equipment applies.
CAW 114B  
**Millworking and Safety Shop I**  
2.5:0:7.5  
Spring  
Laboratory for Cabinetry students. Covers half of CAW 1140. Teaches fundamentals of woodworking machines and standard millwork operations. Studies correct construction techniques. Teaches safety the first 15 hours and stressed throughout the course. Course fee of $15 for materials, equipment applies.

CAW 1150  
**Design Drafting and Billing**  
3:3:0  
Fall  
For CAW majors and other interested community members. Teaches detailed drawing concepts, writing bills of materials, and material cost estimates. Uses all elements of good design.

CAW 1170  
**Finish Technology**  
2:2:1  
Fall  
For CAW majors and other interested community members. Studies types of stains, fillers and finishes, and techniques to properly prepare wood. Teaches hand and spray painting. Includes lab experience. Course fee of $15 for materials applies.

CAW 1210  
**Cabinetmaking Materials and Hardware**  
1:1:0  
Fall  
Emphasizes characteristics of wood, plastic laminates, plywoods, and particle boards. Discusses proper use and residential hardware. Covers specifications, types, selection, and installation.

CAW 1240  
**Millworking Shop II**  
5:0:15  
Spring  
A second semester shop course for CAW students and interested community members. Teaches the design and construction of more difficult millworking projects. Studies advanced joints, finishing techniques, and fastening devices. Stresses safety. Course fee of $25 for materials, equipment applies.

CAW 124B  
**Millworking Shop II**  
2:0:6  
On Sufficient Demand  
A second semester shop course for CAW students and interested community members. Covers half of CAW 1240. Teaches the design and construction of more difficult Millworking projects. Studies advanced joints, finishing techniques, and fastening devices. Stresses safety. Course fee of $15 for materials, equipment applies.

CAW 1250  
**Drafting and Computer Applications for Cabinetmakers**  
4:4:0  
Spring  
Emphasizes design, purpose, function, appearance, materials, and construction for quality cabinetmaking. Covers efficient timesaving methods. Teaches material cost estimating. Teaches basic CNC software. Uses computer software Cabinet Vision & Master CAM. Course fee of $15 for materials, software applies. Lab access fee of $15 for computers applies.

CAW 140R  
**Millwork Technology**  
4:0:12  
Spring  
Teaches the techniques and skills necessary to construct quality furniture using current technology and processes. Stresses safety, machine and tool usage, joinery, and operations. Each semester the joinery and operations will differ and increase in difficulty depending on the required project. May be repeated for a maximum of 16 credits toward graduation.

CAW 2250  
**Computer Aided Manufacturing for Woodworking**  
4:3:3  
Spring  
Teaches how to use computer numerical controlled “CNC” machines to aid in the manufacturing of wood products. Includes machine setup, tooling, software usage, and parts production. Uses CAM software.

CAW 2300  
**Counter Top Technology**  
3:3:0  
Spring  
Explores methods used to produce different types of counter-tops. Studies high pressure laminates, solid wood, solid surface, tile, and stone. Includes field trips to counter-top shops. Course fee of $25 for materials, equipment applies.

CAW 2310  
**Cabinetry Math**  
2:2:0  
Fall  
Covers math used in cabinetmaking. Includes fractions, decimals, percents, interest, volume, and metrics. Studies special trade formulas. Students receive instruction through structured situations to cope with the special problems required in the woodworking industry.

CAW 2340  
**Millworking Shop III**  
5:0:15  
Fall  
Custom cabinetmaking shop. Practice in making and setting up custom shaper knives, doing custom flat and curved veneer and lamination work. Includes lathe work on the duplicator attachments. Completers should be able to enter the field as a cabinet and architectural woodwork trainee. Course fee of $25 for materials, equipment applies.

CAW 234B  
**Millworking Shop III**  
2:5:0:7.5  
Spring  
Custom cabinetmaking shop. Covers half of CAW 2340. Practice in making and setting up custom shaper knives, doing custom flat and curved veneer and lamination work. Includes lathe work on the duplicator attachments. Completers should be able to enter the field as a cabinet and architectural woodwork trainee. Course fee of $15 for materials, equipment applies.

CAW 2430  
**Commercial Cabinetry Technology**  
4:1:9  
Fall  
Studies zoning, shop flow, and production set. Includes field trip to commercial cabinet shop. Teaches set up of machines used in the industry. Course fee of $25 for materials, equipment applies.

CAW 2440  
**Millworking Shop IV**  
5:0:15  
Spring  
A culminating architectural woodworking shop. Students build projects demonstrating advanced skills learned in previous shop courses. Course fee of $25 for materials, equipment applies.

CAW 244B  
**Millworking Shop IV**  
2:0:6  
On Sufficient Demand  
Culminates previous architectural woodworking courses. Covers half of CAW 2440. Requires advanced skills, learned previously, to complete projects. Course fee of $15 for materials, equipment applies.

CAW 2450  
**Machine Maintenance and Upkeep**  
2:2:0  
Spring  
Studies the maintenance and upkeep of machines and tools used in the woodworking industry. Focuses on sharpening, routine maintenance, machine set-up, adjustments, and diagnosing problems.

CAW 281R  
**Cooperative Work Experience**  
1 to 8:1 to 8:0  
Fall, Spring  
* Corequisite(s): CAW 285R the first time only  
For CAW majors. Provides paid, on-the-job work experience in the student’s major. Work experience, the related class, and enrollment are coordinated by the Cooperative Coordinator. Includes student, employer, and coordinator evaluations, on-site work visits, written assignments, and oral presentations. Provides experience in writing and completing individualized work objectives that improve present work performance. May be repeated twice for credit. May be graded credit/no credit.
Course Descriptions

CWA 285R
Cooperative Correlate Class
1:1:0 Fall, Spring
* Corequisite(s): CWA 281R the first time only

For CWA majors. Identifies on-the-job problems and provides remediation of those problems through in-class discussion and study. Includes the study of identifying and maximizing service opportunities. Students register for this class with approval of the Cooperative Coordinator. Includes lectures, guest speakers, video tapes, role playing, case analysis, oral presentations, and written assignments. Completers should be better able to perform in their field of work or study. May be repeated twice for credit.

CWA 299R
Skills USA
1:1:0 Spring

Supports and facilitates the goals and objectives of Skills USA pre-professional student organization that develops social awareness, civic, recreational, and social activities. Students may participate in local, state, and national contests. May be repeated for a maximum of 2 credits toward graduation.

Chemistry (CHEM)

CHEM 1010
Introduction to Chemistry
3:3:0 Fall, Spring, Summer
* Prerequisite(s): MAT 1000 or MAT 1010 or MAT 1030 or MAT 1035 or MATH 1050 or MATH 1055 passed with a C- or better, or a placement score equivalent to MATH 1050 or QL 1900
* Corequisite(s): CHEM 1015 (optional)

Assumes no previous knowledge of chemistry. Presents the foundations of chemistry to students who need preparation for further study in chemistry as well as to students who only want to take an introductory course. Covers chemical measurements, atomic structure, formulas, chemical reactions and equations, chemical nomenclature, stoichiometry, molecules and chemical bonding, gas laws, liquids, solids, solutions, acids and bases.

CHEM 1015
Introduction to Chemistry Lab
1:0:2 Spring
* Corequisite(s): CHEM 1010

A lab designed to accompany CHEM 1010. Provides practical experience to support chemistry foundational learning. Emphasizes chemical measurements, atomic structure, formulas, chemical reactions and equations, chemical nomenclature, stoichiometry, molecules and chemical bonding, gas laws, liquids, solids, solutions, acids and bases. Course lab fee of $31 applies.

CHEM 1110
Elementary Chemistry for the Health Sciences
4:4:0 Fall, Spring, Summer
* Prerequisite(s): MAT 1000 or higher with a C- or better, or STAT 1040 with a C- or better, or placement score into MATH 1050 or higher

Introduces the fundamentals of chemistry to students in the health sciences. Covers chemical measurements and calculations, atomic structure, chemical bonding, chemical reactions, states of matter, solutions, chemical equilibrium, acid-base systems, and introduces organic chemistry.

CHEM 1115
Elementary Chemistry Laboratory
1:0:2 Fall, Spring, Summer
* Prerequisite(s) or Corequisite(s): CHEM 1100 or CHEM 1110

Introduces inorganic laboratory experiments including density, precipitation, determination of empirical formulas, gas laws and acid-base reactions. Course Lab fee of $27 applies.

CHEM 1120
Elementary Organic Bio-Chemistry
4:4:0 Spring
* Prerequisite(s): CHEM 1110

Introduces organic and biochemistry for non-chemistry majors entering nursing and other allied health fields such as medical technology, physical therapy, nutrition, and environmental technology. Studies the nomenclature of organic compounds, organic functional groups and their reactivities, stereochemistry, major biomolecules and their metabolism, enzymes, chemical communications, and chemistry of heredity. May also be used to prepare for organic chemistry (CHEM 2310 and 2320).

CHEM 1125
Elementary Organic Bio-Chemistry Laboratory
1:0:3 Spring
* Prerequisite(s): CHEM 1110 and CHEM 1115
* Corequisite(s): CHEM 1120

An introductory organic bio-chemistry laboratory class for non-chemistry majors who need a laboratory to accompany Elementary Organic Bio-Chemistry (CHEM 1120). Explores identifications and reactions of organic functional groups and conducts experiments with biomolecules. Course Lab fee of $80 applies.

CHEM 1210
Principles of Chemistry I
4:4:0 Fall, Spring, Summer
* Prerequisite(s): MATH 1050 or MATH 1055 or any higher MATH course with a C- or better, or appropriate placement scores for MATH 1060 or higher or QL 1900. Also, it is highly recommended to have prior chemistry experience in high school or in CHEM 1010
* Corequisite(s): CHEM 1215

First semester of a full-year course primarily for students in the physical and biological sciences and engineering. Covers fundamentals of chemistry including atoms, molecules, reactions, stoichiometry, chemical bonding, thermochemistry, and gas laws.

CHEM 1215
Principles of Chemistry I Laboratory
1:0:3 Fall, Spring, Summer
* Corequisite(s): CHEM 1210

Primarily for students in the physical and biological sciences and engineering. Introduces laboratory safety and chemical waste disposal practices. Teaches techniques of using standard laboratory equipment. Shows how to record laboratory data and prepare laboratory reports. Experiments follow topics in CHEM 1210. Course Lab fee of $26 applies.

CHEM 1220
Principles of Chemistry II
4:4:0 Fall, Spring, Summer
* Prerequisite(s): CHEM 1210 with a grade of C- or higher
* Corequisite(s): CHEM 1225

Continuation of Chemistry 1210. Primarily for students in the physical and biological sciences and engineering. Covers intermolecular interactions, properties of solutions, kinetics, equilibria, thermodynamics, and electrochemistry.

CHEM 1225
Principles of Chemistry II Laboratory
1:0:3 Fall, Spring, Summer
* Prerequisite(s): CHEM 1215 with a C- or better
* Corequisite(s): CHEM 1220

Is designed for the physical and biological sciences and engineering. Teaches intermolecular interactions, properties of solutions, kinetics, equilibria, thermodynamics, and electrochemistry. Follows CHEM 1215 and emphasizes topics from CHEM 1220. Course Lab fee of $42 applies.

CHEM 1250
Chemistry Cornerstone- Research and Careers
1:1:0 Fall

Explores scientific literature, culture and careers. Teaches college success strategies for STEM fields to support students interested in a STEM major.

CHEM 1260
Chemistry Cornerstone- Ethics
1:1:0 Spring

Explores scientific ethics. Teaches college success strategies for STEM fields to support students interested in a STEM major.

CHEM 2310
Organic Chemistry I
4:4:0 Fall, Spring, Summer
* Prerequisite(s): CHEM 1220 with a grade of C- or higher
* Corequisite(s): CHEM 2315

The first in a series of two organic chemistry classes for students majoring in science and for those interested in careers in medicine, dentistry, veterinary science, and pharmacy, who must complete two semesters of organic chemistry. Teaches bonding and structures of organic molecules. Explores the relationship between structure and reactivity of organic functional groups. Introduces the concepts of nomenclature, stereochemistry, and reaction mechanism.
CHEM 2315
Organic Chemistry I Laboratory
1:0:4  Fall, Spring, Summer
* Prerequisite(s): CHEM 1220, CHEM 1225
* Corequisite(s): CHEM 2310

The first of a series of two laboratory courses to accompany CHEM 2310 and 2320. For students majoring in science and those interested in careers in medicine, dentistry, veterinary science, and pharmacy. Introduces safety in organic chemistry lab and chemical waste disposal. Teaches basic separatory, purification, and analytical techniques in organic chemistry such as crystallization, melting points, distillation and chromatography. Introduces organic synthesis using simple organic reactions. Introduces natural product isolation. Course Lab fee of $88 applies.

CHEM 2320
Organic Chemistry II
4:4:0  Fall, Spring, Summer
* Prerequisite(s): CHEM 2310 & CHEM 2315 with a C- or higher
* Corequisite(s): CHEM 2325

Introduces spectroscopic techniques used in identification of organic compounds. Teaches carbon-carbon bond formation strategies. Introduces the concept of aromaticity. Teaches free radicals and their effects on environment and life. Surveys biologically important organic molecules such as carbohydrates, proteins, lipids, and nucleic acids.

CHEM 2325
Organic Chemistry II Laboratory
1:0:4  Fall, Spring, Summer
* Prerequisite(s): CHEM 2315
* Corequisite(s): CHEM 2320

The second of a series of two laboratory courses to accompany CHEM 2310 and 2320. For students majoring in science and those interested in careers in medicine, dentistry, veterinary science, and pharmacy. Provides hands-on experience in organic synthesis using a series of single and multistep transformations. Teaches identification of products of reactions using spectroscopic techniques. Explores biologically important organic molecules. Course Lab fee of $88 applies.

CHEM 3000
Analytical Chemistry
2:2:0  Fall, Spring
* Prerequisite(s): CHEM 1220, CHEM 1225 and Advanced University Standing
* Corequisite(s): CHEM 3005

For Chemistry majors and others interested in the basic principles of chemical measurement. Studies principles of quantitative analysis, stoichiometry, equilibrium theory, and volumetric analysis. Introduces error analysis and instrumental methods, especially electrochemistry, spectrophotometry, chromatography, and mass spectrometry.

CHEM 3005
Analytical Chemistry Laboratory
2:0:0  Fall, Spring
* Prerequisite(s): CHEM 1220, CHEM 1225, and University Advanced Standing
* Corequisite(s): CHEM 3000

For Chemistry majors and others interested in the basic principles of chemical measurement. Laboratory companion to CHEM 3000. Involves conducting experiments in quantitative and qualitative analysis, including volumetric and gravimetric analysis. Also, students will conduct experiments in introductory instrumental methods, including experiments in spectrophotometry, electrochemistry, and chromatography. Course Lab fee of $146 applies.

CHEM 3020
Environmental Chemistry
3:3:0  Fall Odd Year
* Prerequisite(s): CHEM 1225 and University Advanced Standing

Studies the chemistry of soil, ground water, hazardous waste, and the atmosphere. Explores current environmental concerns and issues.

CHEM 3025
Environmental Chemistry Laboratory
1:0:3  On Sufficient Demand
* Prerequisite(s): CHEM 1225 and University Advanced Standing

Laboratory course which supports CHEM 3020, Environmental Chemistry. Introduces laboratory, sampling, and data analyses techniques used in environmental laboratories. Covers air sampling, and soil and water analysis using a variety of instruments and techniques.

CHEM 3060
Physical Chemistry I
4:4:0  Fall
* Prerequisite(s): CHEM 1250, CHEM 1260, PHYS 2220, and University Advanced Standing
* Corequisite(s): CHEM 3065

Offers an advanced discussion of the laws of thermodynamics and chemical thermodynamics. Applies the laws to chemical reactions and equilibrium. Covers changes of state, including phase diagrams. Discusses real gases and real solutions. Introduces electrochemistry and chemical kinetics.

CHEM 3065
Physical Chemistry I Lab
1:0:4  Fall
* Prerequisite(s): University Advanced Standing
* Corequisite(s): CHEM 3060

Demonstrates physical chemistry experiments exploring principles and concepts introduced in CHEM 3060. Teaches design and execution of physical chemistry experiments and interpretation of the observations, as well as application of physical chemistry to solving physical chemistry problems. Course Lab fee of $75 applies.

CHEM 3070
Physical Chemistry II
4:4:0  Spring
* Prerequisite(s): CHEM 3060, MATH 2210 and University Advanced Standing
* Corequisite(s): CHEM 3075

Provides an advanced discussion of quantum mechanics, including solutions to the Schrodinger wave equation. Connects quantum mechanics with observables, including spectroscopy.

CHEM 3075
Physical Chemistry II Lab
1:0:4  Spring
* Prerequisite(s): CHEM 3060, CHEM 3065, and University Advanced Standing
* Corequisite(s): CHEM 3070

Demonstrates physical chemistry experiments exploring principles and concepts. Provides opportunity to design and execute physical chemistry experiments and interpretation of the observations. Applies physical chemistry to solving physical chemistry problems.

CHEM 3080
Physical Chemistry III
3:3:0  On Sufficient Demand
* Prerequisite(s): CHEM 3070 and University Advanced Standing

Teaches the fundamentals of statistical mechanics and chemical kinetics, as well as the fundamentals of the specialized topics of the physical chemistry of chemical symmetry, computational chemistry, NMR spectroscopy, and electrochemistry.

CHEM 3100
Advanced Inorganic Chemistry
4:4:0  Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): CHEM 3000

Reviews major trends across the periodic table. Surveys basic structure, bonding, and oxidation states of the elements. Introduces inorganic stereochemistry including coordination compounds.

CHEM 3115
Advanced Inorganic Chemistry Lab
1:0:4  Fall, Spring
* Prerequisite(s): CHEM 3005 and University Advanced Standing
* Corequisite(s): CHEM 3100

Explores principles and concepts introduced in CHEM 3100. Teaches design and execution of inorganic chemistry experiments and interpretation of the observations. Uses application of inorganic chemistry to solving inorganic chemistry problems. Course Lab fee of $130 applies.
Course Descriptions

CHEM 3300 (Cross-listed with: BTEC 3300) Biomolecular Modeling and Simulations
4:4:0 Spring
* Prerequisite(s): CHEM 3600 or BIOL 3600, and University Advanced Standing
Introduces students to the field of molecular modeling and simulations and to the wide range of problems that can be tackled using computational methods. Focuses on biomolecular simulations and computer-aided drug discovery. Emphasizes the connection between structure, dynamics, and function. Teaches application of algorithmic thinking to solving complex problems. Develops practical skills needed to perform simulations and analyze the results. Develops understanding of the inherent approximations and limitations of the methods for adequate assessment of modeling results. Covers topics such as molecular visualization and rendering, molecular dynamics simulations, and computer-aided drug discovery through virtual screening and small molecule docking.

CHEM 3600 (Cross-listed with: BIOL 3600) Biochemistry
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
* Corequisite(s): CHEM 2320

CHEM 3605 (Cross-listed with: BIOL 3605) Biological Chemistry Lab
1:0:4 On Sufficient Demand
* Prerequisite(s): University Advanced Standing
* Corequisite(s): BIOL 3600
Introduces laboratory techniques in biochemistry. Studies methods and theory behind purification of proteins and nucleic acids including chromatography and electrophoresis. Uses methods in assessing enzyme activity and kinetics and protein structure analysis. Includes analysis and manipulation of DNA and RNA. Course Lab fee of $145 applies.

CHEM 3620 (Cross-listed with: BIOL 3620) Biological Chemistry II
3:3:0 Spring
* Prerequisite(s): (CHEM 3600 or BIOL 3600) and University Advanced Standing
Is a continuation of CHEM 3600. Teaches in-depth the biochemistry of molecular and cell biology processes. Explores the topics of molecular information flow and signaling. Examines current understanding in biochemical methods and ideas beyond those discussed in Biochem I.

CHEM 3800 (Cross-listed with: ENVT 3800, PHYS 3800) Energy Use on Earth
3:3:0 Fall
* Prerequisite(s): (PHYS 1010 or PHSC 1000 or CHEM 1010 or GEO 1010 or GEO 2040 or METO 1010) and (MATH 1050 or MATH 1055) and University Advanced Standing
Covers the science of energy production and consumption. Quantitatively analyzes various methods of energy production, distribution, and end use in all sectors of our society, including transportation, residential living, and industry. Examines the impacts of our energy consumption on the environment and prospects for alternative energy sources. Intended for science majors interested in energy use in society or in an energy related career, and for students in other majors who feel that a technical understanding of energy use will help them to understand and mitigate its impact in our society.

CHEM 4000 Instrumental Analysis WE
2:2:0 Spring
* Prerequisite(s): CHEM 3000, and University Advanced Standing
* Corequisite(s): CHEM 4005
Covers modern instrumental methods and basic principles of instrumentation. Includes spectroscopic and chromatographic analysis.

CHEM 4005 Instrumental Analysis Laboratory
2:0:6 Spring
* Prerequisite(s): CHEM 3000, CHEM 2325, and University Advanced Standing
* Corequisite(s): CHEM 4000
Experiments in selected areas of instrumental methods of analysis. Covers both quantitative and qualitative methods of analysis. Includes introductory laboratory exercises and laboratories using advanced sample preparation and instrumental analysis techniques. Involves the independent creation and implementation of an advanced laboratory exercise. Course Lab fee of $333 applies.

CHEM 4030 Radiochemistry
3:3:0 Fall Even Year
* Prerequisite(s): CHEM 1220, MATH 1210, and University Advanced Standing
Introduces nuclear and radiochemistry, stressing the fundamentals of nuclear structure, systematics of nuclear decay, the detection and measurement of radiation, radiation protection, and the role of nuclear chemistry in medical, environmental and scientific applications. Discusses nuclear fuel cycles and nuclear waste problems.

CHEM 4200 (Cross-listed with: BIOL 4200, GEO 4200, PHYS 4200) Teaching Methods in Science
3:2:2 Fall, Spring
* Prerequisite(s): Acceptance into secondary education program, senior-level standing, instructor approval, and University Advanced Standing
Examines objectives, instructional methods and curriculum for teaching science in the secondary school. Includes developing, adapting, evaluating, and using strategies and materials for teaching biological and physical sciences, appropriate both to the special needs of the learners and the special characteristics of science discipline.

CHEM 4600 Structure Determination
3:3:0 Fall
* Prerequisite(s): CHEM 2320, and University Advanced Standing
* Corequisite(s): CHEM 4605
* Prerequisite(s) or Corequisite(s): CHEM 3060
Explores integrated topics in organic, inorganic, physical, solid-state, and biochemistry using advanced theory. Enables hands-on use and manipulation of state-of-the-art instrumentation. Examines primary chemistry literature, and involves substantial problem solving using spectroscopic and spectrometric data.

CHEM 4605 Structure Determination Laboratory
1:0:4 Fall
* Prerequisite(s): CHEM 2320 and University Advanced Standing
* Corequisite(s): CHEM 4600
Explores students to integrated topics in organic, inorganic, physical, solid-state, and biochemistry using advanced theory. Enables hands-on use and manipulation of state-of-the-art instrumentation. Examines primary chemistry literature, and involves substantial problem solving using spectroscopic and spectrometric data. Taken as a corequisite with CHEM 4600. Course lab fee of $204 applies.

CHEM 4800 Pharmacology
3:3:0 Fall
* Prerequisite(s): (CHEM 3600 or BIOL 3600) and University Advanced Standing
Explores the science behind pharmacological therapeutics. Examines general considerations such as pharmacokinetics, drug metabolism, and toxicology. Surveys focused topics including drugs and drug targets for a wide variety of diseases.

CHEM 482R Chemistry Internship
1 to 4:1 to 4:0 Fall, Spring, Summer
* Prerequisite(s): CHEM 2320, a minimum GPA of 3.0, Departmental approval of the internship proposal, and University Advanced Standing
Provides supervised, practical, and research experience for students preparing for careers in chemistry. May be repeated for a maximum of 6 credit hours as per school standards. May be graded credit/no credit.
CHEM 489R
Undergraduate Research in Chemistry
1 to 4:0:3 to 9
Fall, Spring, Summer
Prerequisite(s): Departmental approval and University Advanced Standing
Conducts research on a project determined by the student jointly with a chemistry faculty and approved by the Chemistry Department Chair. Emphasizes experimental technique, data collection and analysis, and preparation of research for presentation to an audience of peers. May be repeated for a maximum of 6 credits toward graduation.

CHEM 491R
Advanced Topics in Inorganic Chemistry
3:3:0
On Sufficient Demand
Prerequisite(s): CHEM 1220, instructor’s permission, and University Advanced Standing; CHEM 3100 or CHEM 3600 or BIOL 3600 recommended
Examines advanced and current topics of inorganic chemistry including bioinorganic chemistry, symmetry and molecular orbital theory, and the descriptive chemistry of main-group compounds. Varies from semester to semester. Offered on demand. May be repeated for a maximum of 9 credits.

CHEM 4920
Chemistry Capstone- Literature/Seminar
1:1:0
On Sufficient Demand
Prerequisite(s): CHEM 2320 with a C- or higher and University Advanced Standing; ENGL 2100 highly recommended
Engages in current chemistry topics. Enables familiarity with chemistry literature resources, teaches chemistry research and design, and facilitates preparation for further education and employment in chemistry-related fields. Focuses on current topics in chemistry and on chemistry literature.

CHEM 4930
Chemistry Capstone- Ethics/Seminar
1:1:0
On Sufficient Demand
Prerequisite(s): CHEM 2320 with a C- or higher and University Advanced Standing
Teaches chemistry research and design for further education and employment in chemistry-related fields. Focuses on scientific ethics, current topics in chemistry, chemistry literature and formal report writing based on American Chemical Society guidelines.

CHEM 495R
Advanced Topics in Organic Chemistry
3:3:0
On Sufficient Demand
Prerequisite(s): CHEM 2310, CHEM 2320, Instructor approval, and University Advanced Standing
For students majoring in Chemistry. Varies from semester to semester. May be repeated for a maximum of 9 credits. Topics include organic synthesis, reaction mechanisms, and identification of organic compounds.

CHEM 496R
Special Topics in Chemistry
1 to 4:1 to 4:0 to 9
On Sufficient Demand
Prerequisite(s): CHEM 2320, Junior or Senior standing, instructor approval, and University Advanced Standing
Explores special topics in chemistry. Topics vary depending on student demand and current topics of significance in chemistry. May be repeated for a maximum of 8 credits toward graduation.

CHEM 499R
Independent Study and Research
1 to 4:0:3 to 12
Fall, Spring, Summer
Prerequisite(s): Instructor approval and University Advanced Standing
Uses independent study on selected topics and conducting experiments in the same topic. Provides guidance by a faculty member. May be taken for a maximum of 4 credits.

CHEM 525R
Advanced Topics for Chemistry Teachers
1 to 5:1 to 5:0 to 10
Summer
Prerequisite(s): Departmental Approval
For licensed teachers or teachers seeking to recertify their chemistry endorsement from the Utah State Office of Education. Teaches principles of chemistry and pedagogy of teaching chemistry for teachers in public or private schools. Emphasizes correlation with the Utah Core Curriculum, the National Science Education Standards, and the Benchmarks of Project 2061. Topics will vary.

CHIN 1010
Beginning Chinese I
4:4:1
Fall, Spring, Summer
Prerequisite(s): Students need equivalent knowledge of CHIN 1020
Studies Mandarin. Emphasizes oral proficiency in pronunciation and basic conversation as well as traditional grammar concepts. Focuses on receptive language learning, then verbally-expressive language learning. Lab access fee of $10 applies.

CHIN 1020
Beginning Chinese II
4:4:1
Fall, Spring, Summer
Prerequisite(s): Students need equivalent knowledge of CHIN 1010
Continues the same mode of learning as CHIN 1010 with renewed emphasis on conversational skills. Introduces characters and elementary calligraphy, reading and writing. Lab access fee of $10 applies.

CHIN 115R
Chinese Conversation I
1:1:0
Fall, Spring
Prerequisite(s): Students should have equivalent knowledge of CHIN 1020
Offers lower division / novice Chinese speakers opportunities to enhance their speaking proficiency in the target language by focusing on oral verbal production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, sharpen listening comprehension, and develop conversational strategies such as circumlocution and managing a conversation with useful expressions for starting a conversation, gaining time to think, helping the other speaker, seeking agreement, etc. Contrast with all other first year courses which must strive to produce mastery of the whole range of language acquisition components, including writing, grammar, etc. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of speech opportunities and defusing concern for such matters as spelling, etc. Increases mastery of lexical items through increased frequency of oral usage. May be repeated for a maximum of 3 credits toward graduation.

CHIN 202G
Intermediate Chinese II
4:4:0
Fall, Spring
Prerequisite(s): Students need equivalent knowledge of CHIN 2010
Emphasizes increased communicative ability as well as grammatical accuracy; adds more complex, literary grammatical structures, as well as discussion of contemporary cultural and political themes. Includes reading of basic 1000 characters and writing of basic 450-600 characters. Uses digitewave (mixture of English and Chinese) and character-romanization mix to ease learning of characters. Lab access fee of $10 applies.

Chinese (CHIN)

CHIN 215R
Chinese Conversation II
1:1:0
Fall, Spring
Prerequisite(s): Students should have equivalent knowledge of CHIN 2010
Offers lower division / novice Chinese speakers opportunities to enhance their speaking proficiency in the target language by focusing on oral verbal production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, sharpen listening comprehension, and develop conversational strategies such as circumlocution and managing a conversation with useful expressions for starting a conversation, gaining time to think, helping the other speaker, seeking agreement, etc. Contrast with all other first year courses which must strive to produce mastery of the whole range of language acquisition components, including writing, grammar, etc. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of speech opportunities and defusing concern for such matters as spelling, etc. Increases mastery of lexical items through increased frequency of oral usage. May be repeated for a maximum of 3 credits toward graduation.
CHIN 3030
Chinese Composition and Conversation
3:3:0  Fall Odd Year
* Prerequisite(s): CHIN 202G or equivalent experience or instructor approval and University Advanced Standing

Advances mastery of Chinese grammar while emphasizing production skills of speaking and writing. Expands reading and listening skills to a lesser degree. Reviews and extends lexical depth. Allows students without experience living in a Chinese immersion setting to advance in their communication skills to where they may participate more comfortably in future upper division courses with other students who do have immersion experience. Offers a variety of topics presented in a variety of media as content basis for real communicative practice in Chinese. Conducts all course work primarily in Chinese. Chinese character learning prepares students advanced reading in Chinese.

CHIN 3050
Advanced Chinese
3:3:1  Fall, Spring, Summer
* Prerequisite(s): It is recommended that students have passed CHIN 202G, have had one year residency in a Chinese-speaking region, or instructor approval.
* Prerequisite(s) or Corequisite: CHIN 2000

Designed for non-native Mandarin speakers who, as a result of foreign residency or similar exposure to the language, have attained a good mastery of basic Mandarin Chinese. Sharpens students’ speech-making, reading, and writing skills through advanced Chinese readings about culture, civilization and society, with an emphasis on vocabulary, grammar and syntax. Enhances students’ cultural knowledge and awareness through a variety of carefully designed practices and activities. Taught predominantly in Chinese.

CHIN 3116
Exploring China-Past/Present and You
3:3:0  Fall
* Prerequisite(s): High school students have to pass the AP Chinese Language or AP Chinese Literature & Culture test with a 3 or higher

This course is part of the State of Utah Chinese Bridge Program and it will be taught only in high schools and for high school students. Not to be taught on college campus for university students. Explores the role that current film, media, and entertainment play in the Chinese-speaking world and exposes students to the historical and cultural perspectives presented through these media. This course is instructed in Chinese.

CHIN 3118
Chinese Popular Culture
3:3:0  Fall
* Prerequisite(s): High school students have to pass the AP Chinese Language test with a score of 3 or above.

This course is part of the State of Utah Chinese Bridge Program, and it will be taught only in high schools for high school students. Not to be taught on college campus for university students. Explores the role that current film, media, and entertainment play in the Chinese-speaking world and exposes students to the historical and cultural perspectives presented through these media. This course is instructed in Chinese.

CHIN 3200
Business Chinese I
3:3:0  Fall
* Prerequisite(s): CHIN 3050 and University Advanced Standing

Prepares students to take the Business Chinese Test (BCT), a state-level standardized test designed to assess the Chinese proficiency of non-native speakers engaged in business activities. Explores how students can effectively and respectfully pursue business activities with Chinese companies within the framework of Chinese culture, sponsored by Office of Chinese Language Council International. Taught predominantly in Chinese.

CHIN 351G
Chinese Culture and Civilization
3:3:0  Fall
* Prerequisite(s): CHIN 3050 or equivalent) and University Advanced Standing

Explores chronologically the evolution and development of Chinese culture and civilization, and a multitude of aspects that construct Chinese national identity and civilization. Examines modern and contemporary issues, cultural, ethnic, historic, social and economic development of China, as well as historical prosperity and decline, and independence from and interdependence with other nations. Conducted entirely in Mandarin Chinese, including presentations and class instructions.

CHIN 4050
Chinese Language and Culture
3:3:0  Fall, Spring
* Prerequisite(s): CHIN 3050, over one year residency in a Mandarin Chinese-speaking country, or instructor approval, and University Advanced Standing

Designed for non-native Mandarin speakers who, as a result of foreign residency or similar exposure to the language, have attained a fairly good mastery of basic Mandarin Chinese. Sharpens students’ speech making, reading and writing skills through advanced Chinese readings on culture, civilization and society, with an emphasis on vocabulary, grammar and syntax. Enhances students’ cultural knowledge and awareness through a variety of carefully designed practices and activities. Taught predominantly in Chinese.

CHIN 4100
Translation and Interpretation
3:3:0  Spring
* Prerequisite(s): CHIN 4050 and University Advanced Standing

Introduces translation as a discipline. Discusses basic theory, principles and tools of translation. Employs the tools of translation: dictionaries, glossaries, grammars and computerized resources. Extensive practice of translation and interpretation from English to Chinese and from Chinese to English.

CHIN 4200
Business Chinese II
3:3:0  Spring
* Prerequisite(s): CHIN 3200 and University Advanced Standing

Builds on the content of CHIN 3200. Teaches students business Chinese with more complicated grammatical and rhetorical structures. Studies business Chinese terms and expressions, subtle business Chinese culture and customs practiced in Chinese business society, and the more advanced Chinese business language and culture in Chinese societal settings. Prepares students to effectively and respectfully pursue business activities with Chinese companies within the framework of Chinese culture through a better understanding of the language, culture and society. Strengthens and prepares students to take the Business Chinese Test (BCT), a state-level standardized test designed to assess the Chinese proficiency of non-native speakers engaged in business activities. Taught predominately in Chinese.

CHIN 4500
Advanced Writing in Chinese
3:2:3  Spring Even Year
* Prerequisite(s): (CHIN 3050 or CHIN 4050) and University Advanced Standing

Designed to improve students’ accuracy, clarity and use of appropriate styles, forms and vocabularies when writing in Chinese. Informs students of the significant roles played by styles, content and intentionally of discourse in their writing, and focuses on improving their skills in addressing the requirements of those various roles in different contexts.

CHIN 490R
Special Topics in Chinese Language and Literacy
3:3:0  Fall Even Year
* Prerequisite(s): CHIN 3050, University Advanced Standing

Presents selected topics in Chinese language and literacy (grammar, literacy, and culture). Covers topics such as “Practical Modern Chinese Grammar” or “Modern Chinese Literacy and Sentence Structure” and “Perspectives on Modern Chinese Language, Literacy and their relations to Chinese society, history and culture. Projects and evaluation will vary according to the topic. May be repeated for a maximum of 9 credits toward graduation.
Chinese Studies (CHST)

CHST 200G
Introduction to Chinese Studies
3:3:0  Spring Odd Year
* Prerequisite(s): ENGL 1010 or ENGH 1005
Taught in English. Introduces Chinese Language and Culture to interested students and gives them an overview about the minor study program. Includes an introduction into the characteristics of Chinese script by memorizing a few everyday expressions in Chinese. Introduces Chinese history, economy, society, politics, culture and popular culture, and ethics including philosophy, religions, beliefs, film, literature, contemporary discourses.

CHST 362G
Traditional Chinese History
3:3:0  Summer Odd Year
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Introduces the student to the broad outlines of the cultural history of traditional China from some of the earliest historical records (about 1200 BCE) up through the late imperial period (about 1900 CE). Taught in English.

CHST 363G
Modern Chinese History
3:3:0  Summer Even Year
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Introduces the student to the broad outlines of Chinese Civilization from the last Imperial Dynasty until the present day. Taught in English.

CHST 373G
Classical Chinese Literature
3:3:0  Summer Odd Year
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Studies classical Chinese literature within the historical, cultural, thematic, and aesthetic context. Taught in English.

CHST 375G
Modern Chinese Literature
3:3:0  Summer Even Year
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Studies modern Chinese literature within the historical, cultural, thematic, and aesthetic context. Taught in English.

CHST 416G
Chinese Culture and Film
3:3:0  Fall Odd Year
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Examines a selection of films from internationally acclaimed Chinese film directors.

CHST 481R
Internship
1 to 8:1: to 8:0  On Sufficient Demand
* Prerequisite(s): Departmental Approval, and University Advanced Standing
For upper-division students working toward a Minor in Chinese Studies or Chinese Commerce. On approval also counts for a Bachelor of Science Degree in Business Management. Provides a transition from school to work where learned theory is applied to actual practice through meaningful on-the-job experience. No more than three credit hours of internship work experience will apply toward graduation in Chinese Studies or in any Business Management Specialization; may be repeated for a maximum of 16 credits. May be graded credit/no credit.

CHST 490R
Special Topics in Chinese Studies or Commerce
3:3:0  Spring Even Year
* Prerequisite(s): University Advanced Standing
Taught in English. Covers topics of social change, history, political science, culture including literature, art, cinema, economy including commerce, and business culture. Offers insights into Chinese life in the past and today. Defines terminology involved, studies evolution and/or specific texts or contexts, and considers theoretical discourse. Provides additional materials in Chinese for students who want more language practice, e.g., in the Chinese Language minor. May be repeated for a maximum of 9 credits toward graduation.

Cinema Studies (CINE)

CINE 2150 (Cross-listed with: ENGL 2150)  HH
Critical Introduction to Cinema Studies
3:3:0  Spring
* Prerequisite(s): ENGL 2010
Studies film as an aesthetic and cultural medium. Teaches the fundamentals of film, including narrative form, mise en scene, cinematography, editing, sound, and non-narrative forms. Teaches film analysis, including ideological approaches, and considers film as a cultural institution. May be delivered hybrid.

CINE 217G (Cross-listed with: COMM 217G, ENGL 217G)  HH
Race Class and Gender in U S Cinema I
3:3:0  Fall
* Prerequisite(s): ENGL 1010 or ENGH 1005
Examines cultural awareness through aesthetic, critical, and interdisciplinary examination of the evolution of the representation of race, class, and gender in American cinema. Focuses on both Hollywood and independent minority filmmakers. Some films screened may carry an "R" rating.

CINE 2311 (Cross-listed with: THEA 2311)
Film History I
3:3:0  Spring
Explores the development of the feature film, both in America and abroad from 1895 to 1945. Covers the evolution of motion pictures from conception as an entertainment novelty (c. 1895) to the mass-audience, commercial art form of the 1940's. Examines film as a serious historical study of a form of mass communication, which has had ethical, social, and political consequences on society. Includes lecture, screenings, and demonstrations with critical discussions of assigned readings and films.

CINE 2312 (Cross-listed with: THEA 2312)
Film History II
3:3:0  Fall
Explores the development of the feature film, both in America and abroad from 1940 to the Present. Emphasizes the continuing evolution of motion pictures from the height of the Studio System 1930s through to its status as one "form" of digital entertainment in 2010. Examines film as a serious historical study of a form of mass communication, which has had ethical, social, and political consequences on society. Includes lecture, screenings, and demonstrations with critical discussions of assigned readings and films. (Note: Some films screened may be considered controversial and carry an "R" rating.)

CINE 234R (Cross-listed with: THEA 234R)
Special Topics in Cinema Studies
3:2:2  On Sufficient Demand
* Prerequisite(s) or Corequisite(s): THEA1023 or CINE2150
Focuses upon a particular genre, director, or film movement. May be repeated once for a total of 6 credits toward graduation.

CINE 312R (Cross-listed with: LANG 312R)
National Cinema History
3:3:0  Fall, Spring
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Covers a single national cinema tradition from the early days of film to the present. Explores representative films from a nation’s cinematic chronology, considering major themes, movements, controversies, and artists. Considers social and political contexts as related to the national film output. May be repeated for a maximum of 9 credits toward graduation.

CINE 3150 (Cross-listed with: COMM 3150, ENGL 3150)
Cinema and Television Theory
3:3:0  Spring
* Prerequisite(s): (CINE 2150 or ENGL 2150) and University Advanced Standing
Examines major theoretical approaches to the screen arts. Explores how cinema and television reflect and are created by historical and contemporary cultural contexts. Includes the study of various approaches such as fan studies, spectatorship, stars, authorship, genre, long-form narrative and production. Includes lecture, film and media screenings, and critical discussions of assigned readings.
CINE 416R (Cross-listed with: ENGL 416R, THEA 416R)
Special Topics in Film Studies
3:3:0  On Suficient Demand
* Prerequisite(s): (ENGL 2150 or CINE 2150 or THEA 1023) and University Advanced Standing
Covers cinema directors, genre, theory, and social change on a rotating basis. Explains course focus, defines terminology involved, then studies evolution and/or specific texts or contexts, and considers theoretical discourse. May be repeated for a maximum of 9 credits toward graduation. Some films screened may carry an “R” rating. Course fee of $40 for support applies.

CINE 418R
Sundance Documentary Film
3:3:0  Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 2150 or CINE 2150
Covers history of documentary film, studies current modes and models of documentary film, includes attending Sundance film festival documentaries. May be repeated for a maximum of 6 credits toward graduation. Some films screened may carry an “R” rating, or may not be rated but would carry an “R” rating. Course fee of $50 for support applies.

Civil Engineering (CIVE)

CIVE 3010
Introduction to Transportation Engineering
3:3:0  Fall
* Prerequisite(s): EGDT 1040, University Advanced Standing and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
* Prerequisite(s) or Corequisite(s): ENGR 2140
Covers analysis and design of transportation systems and their components. Introduces technological, economic, and social aspects of transportation. Covers economic considerations, role of public policy, system planning, design, management, traffic flow models, intersection control, network analysis, and environmental impact. Lab access fee of $45 applies.

CIVE 3130
Structural Analysis
3:3:0  Fall
* Prerequisite(s): ENGR 2140, University Advanced Standing, and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
Focuses on analysis of determinate and indeterminate structural systems. Covers flexibility and moment distribution methods. Introduces design load distribution and load guidelines. Lab access fee of $45 applies. Canvas Course Mats $105/Pearson applies.

CIVE 3140
Structural Steel Design
3:3:0  Spring
* Prerequisite(s): CIVE 3130, University Advanced Standing, and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
Focuses on design of structural steel components of a building. Covers tension members, compression members, beams, and connections using Load and Resistance Factor Design (LRFD). Includes a design component. Lab access fee of $45 applies.

CIVE 3150
Reinforced Concrete Design
3:3:0  Spring
* Prerequisite(s): CIVE 3130, University Advanced Standing, and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
Focuses on design of reinforced concrete components of a structure. Covers beams, columns, slabs, and foundations according to the American Concrete Institute (ACI) 318 building code requirements. Includes a design component. Lab access fee of $45 applies.

CIVE 3210
Geotechnical Engineering
3:3:0  Spring
* Prerequisite(s): ENGR 2140, University Advanced Standing, and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
Focuses on the study of soil properties, classifications, and behavior. Applies principles of mechanics to soil as an engineering material. Introduces consolidation and compaction theories, effective stresses, shear strength, and earth pressure and slope stability. Includes a design component. Lab access fee of $45 applies.

CIVE 3320
Hydraulics and Hydrology
3:3:0  Spring
* Prerequisite(s): ENGR 2450, ME 3310, University Advanced Standing, and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
Focuses on concepts of hydraulics such as pipe and open channel flows. Covers weather patterns, precipitation measurement, distribution, and runoff. Introduces storm hydrograph and peak flow analysis, flood design, reservoir and channel routing. Includes a design component. Lab access fee of $45 applies.

CIVE 3335
Civil Engineering Experimentation I
2:0:6  Spring
* Prerequisite(s): ME 3310, University Advanced Standing, and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
Focuses on experiments to investigate various phenomena in fluid flow, hydraulics, and hydrology. Investigates the performance of pumps. Includes a writing component. Lab access fee of $45 applies.

CIVE 3610
Environmental Engineering
3:3:0  Fall
* Prerequisite(s): CHEM 1210, MATH 2250, University Advanced Standing, and (Formal Acceptance into the Civil Engineering Program or Departmental Approval)
Introduces the fundamentals of environmental engineering. Focuses on chemical, biological, and physical principles dealing with water, waste water, and solid waste management. Covers analyses of air, surface, and ground water quality. Includes a design component. Lab access fee of $45 applies.

CIVE 4010
Traffic Engineering
3:3:0  Fall
* Prerequisite(s): CIVE 3010 and University Advanced Standing
Introduces elements of traffic engineering including: road use, traffic flow theories, traffic control devices, traffic data collection. Covers freeways and rural highways and principles of intersecting signalization, service level and capacity. Includes a design component. Lab access fee of $45 applies.

CIVE 4020
Highway Planning and Design
3:3:0  Spring
* Prerequisite(s): CIVE 3010 and University Advanced Standing
Covers classification of highways. Focuses on the process involved in design of highways and their elements. Introduces design of highway cross sections, intersections, and interchanges. Covers design of vertical and horizontal alignment and establishment of sight distances. Includes a design component. Lab access fee of $45 applies.

CIVE 4135
Civil Engineering Experimentation II
2:0:6  Fall
* Prerequisite(s): CIVE 3210 and University Advanced Standing
Focuses on testing of civil engineering materials such as soil, asphalt, concrete, and metals related to geotechnical, pavement, and structural aspects of civil engineering. This is a laboratory course with a writing component. Course Lab fee of $25 applies. Lab access fee of $45 applies.

CIVE 4210
Foundation Design
3:3:0  Fall
* Prerequisite(s): CIVE 3210 and University Advanced Standing
Covers foundation classifications. Applies fundamentals of soil mechanics to analysis and design of soil structure systems. Covers shallow and deep foundations, piles and caissons, and retaining structures. Includes a design component. Lab access fee of $45 applies.

CIVE 4310
Storm Water Management
3:3:0  Spring
* Prerequisite(s): ME 3310 and University Advanced Standing
Applies fluid mechanics and hydrology principles to the analysis and design of storm water management facilities. Covers environmental issues related to storm water management. Includes a design component. Lab access fee of $45 applies.

CIVE 4320
Open Channel Flow
3:3:0  Fall
* Prerequisite(s): CIVE 3320 and University Advanced Standing
Covers analysis of open channel flow systems. Introduces natural and designed channels, steady and unsteady flows, uniform and non-uniform flows and flow transitions. Includes lectures and design projects. Lab access fee of $45 applies.
CIVE 4510
Civil Engineering Seminar
1:1:0 Fall
* Prerequisite(s): University Advanced Standing

Introduces various civil engineering careers and related industries. Emphasizes the importance of life-long learning and active participation in professional societies and communities through lectures given by practicing engineers using their own experiences. Introduces various engineering codes of ethics. Intended as a culminating seminar for graduating seniors to prepare for their engineering careers. Lab access fee of $45 applies.

CIVE 4610
Water and Wastewater
3:3:0 Spring
* Prerequisite(s): CIVE 3320 and University Advanced Standing

Introduces municipal water and wastewater treatment and distribution practices. Applies physical, chemical, and biological principles to design and operation of water and wastewater distribution systems. Lab access fee of $45 applies.

CIVE 4810
Civil Engineering Capstone I
3:3:0 Fall
* Prerequisite(s): University Advanced Standing, Formal Acceptance into Civil Engineering Program, and Department Approval

Serves as a comprehensive two-semester civil engineering design experience with practical constraints. Focuses on applying civil engineering principles and the design process along with economic analysis and project management methods to a real-world project, and present the findings to other engineers and the public. Capstone I and II must be taken in consecutive semesters. Lab access fee of $45 applies.

CIVE 4810R
Advanced Current Topics in Civil Engineering
1 to 3:1 to 3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and Formal Acceptance into the Civil Engineering Program or Department Approval

Provides exposure to emerging topics and technologies of current interest in civil engineering. Varies each semester depending upon the state of technology. May be repeated for a maximum of 6 credits toward graduation without prior written department approval. Lab access fee of $45 applies.

Criminal Justice (CJ)

CJ 1010
Introduction to Criminal Justice
SS Fall, Spring, Summer

Presents the processes, institution, and administration of criminal justice in the United States. Examines the crime problem, criminal law, law enforcement, criminal prosecution, criminal defense, bail, the jury system, and sentencing among adult and juvenile offenders. Explores the correctional system; namely, probation, prisons, inmates’ rights, and parole.

CJ 1300
Introduction to Corrections Process
3:3:0 Fall, Spring, Summer

Introduces the corrections system. Includes origin and evolution, philosophies of corrections, perspectives on sentencing, and alternatives to incarceration. Includes community corrections; probation and parole; offender rights and legal issues; adult, juvenile, and special needs offenders; corrections specialists, staff, and administration as a profession; and special challenges for the future.

CJ 1330
Criminal Law
3:3:0 Fall, Spring, Summer
* Prerequisite(s): CJ 1010

Provides an overview of criminal law. Covers history and terminology of the criminal justice system, the elements of specific offenses, and the role of the criminal justice profession in the fact-gathering process.

CJ 1340
Criminal Investigations
3:3:0 Fall, Spring, Summer
* Prerequisite(s): CJ 1010, CJ 1390 is also strongly recommended as a pre- or co-requisite for Criminal Justice majors

Introduces the fundamentals of criminal investigations. Examines the techniques commonly utilized by investigative personnel for crimes against property and persons to include case management and documentation, interacting with victims, witnesses and suspects, and crime scene analysis. May be delivered online.

CJ 1350
Introduction to Forensic Science
3:3:0 Fall, Spring, Summer

Studies Forensic Science and multiple forensic disciplines as they correlate with criminal investigations. Teaches the identification and importance of multiple types of physical evidence typically found at a crime scene and how that evidence is used to provide a link between the victim, suspect, and crime scene. Explains the proper techniques needed to document a crime scene and physical evidence. Provides the process of taking the evidence from the scene and the scientific analysis of the evidence, which is completed at the crime laboratory.

CJ 1390
Introduction to Policing
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Departmental approval required

Evaluates police organizations, administration, and duties within federal, state, and local law enforcement agencies. Includes history and philosophy of law enforcement, evaluation of administrative practices, recruitment and hiring of new personnel, patrol and criminal investigative assignments, issues confronting American law enforcement agencies, emerging concepts, professionalism, and community crime prevention.

CJ 1800
POST Module I
7:7:0 Fall, Spring, Summer
* Prerequisite(s): Departmental approval required. Passing score on National Peace Officer Selection Test.

Completes all training required by Utah Peace Officer Standards and Training (POST) to become certified as a Special Function Officer. Certification may become active when hired by an agency with Peace Officer authority.

CJ 1810
POST Module II
11:11:0 Fall, Spring, Summer
* Prerequisite(s): CJ 1800, Departmental Approval Required

Completes all training required by Utah Peace Officer Standards and Training (POST) to become certified as a Law Enforcement Officer. That certification may become active when hired by an agency with Peace Officer authority.

CJ 2110
Security Management and Loss Prevention
3:3:0 On Sufficient Demand
* Prerequisite(s): CJ 1010

Examines external and internal security measures, confidential personnel investigations, and interview procedures. Studies principle and major concepts in prevention, protection, loss control, and crime prevention in the commercial sector.
Course Descriptions

CJ 2200
Writing for Criminal Justice Professionals
3:3:0
Fall, Spring, Summer

* Prerequisite(s): CJ 1010 and (ENGL 1010 or ENGH 1005)
Teaches written communication across the criminal justice spectrum. Emphasizes basic formats and language used to present accurate, understandable and factual information. Requires written reports, affidavits, warrants, probable cause statements and other legal documents. Applies proper communication principles to legal writing situations. Allows students to author a variety of formal legal documents. Canvas Course Mats of $49/ Pearson applies.

CJ 2330
Juvenile Justice
3:3:0
Fall, Spring, Summer

* Prerequisite(s): CJ 1010
Provides an overview of the juvenile justice system from its origin through present-day trends and development. Examines the origin and development of the juvenile court as well as its changing social and political philosophy. Discusses the role and relationship of municipal law enforcement toward the juvenile offender. Examines closed juvenile institutions, juvenile probation, parole, and alternative placement such as group homes.

CJ 2350
Laws of Evidence
3:3:0
Fall, Spring, Summer

* Prerequisite(s): CJ 1330

CJ 281R
Internship
1 to 8:1 to 8:0
On Sufficient Demand

* Prerequisite(s): Department Approval
Provides actual, on-the-job work experience on a paid basis in a criminal justice profession or other approved related situation. Emphasizes successful work experience, with emphasis on identifying and solving problems. Completers should be qualified to work at entry-level jobs in the criminal justice profession. May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.

CJ 290R
Law Society
1:1:0
Fall, Spring

Elective Credit for students interested in law or law-related professions. Provides a program of activity relating to current legal issues, encouraging social awareness and developing law and civic consciousness. Students arrange for guest speakers from the legal and criminal justice professions to present information concerning their professions. Teaches leadership skills by serving on committees. Pass/Fail grade issued. Criminal Justice majors and Paralegal majors may repeat this course for a total of three elective credits towards graduation. Each student must participate in the service project and fundraiser for a passing grade.

CJ 2920
Short Course Workshop
1 to 3:1 to 3:3 to 9
On Sufficient Demand

The specific title with the credit authorized for the particular offering will appear in the semester schedule and on the student transcript.

CJ 3020
Police Administration
3:3:0
Spring, Summer

* Prerequisite(s): ENGL 2010, CJ 1010 and University Advanced Standing
Discusses the issues facing contemporary law enforcement administrators. Focuses on the complexities associated with law enforcement organization leadership and strategic planning, training, and stress management; evaluation, promotion, and discipline; legal issues and police department liability; budgeting; politics; and media relations.

CJ 3040
Community Policing
3:3:0
Fall

* Prerequisite(s): ENGL 2010 (recommended), CJ 1010, and University Advanced Standing
Presents the fundamentals of the community-oriented policing philosophy. Includes the comparison of traditional and community policing philosophies; law enforcement and community relationships. Analyzes the importance of political and public support and involvement; attitudinal changes involving the roles of police management, supervisors, and line personnel; creation of partnership with community organizations and police problem-solving methodologies.

CJ 3060
Corrections in the Community
3:3:0
Fall

* Prerequisite(s): CJ 1300 and University Advanced Standing
Studies the Criminal Justice Community Corrections component. Presents historical origin, development, and current practices in probation, parole, the halfway house, work and educational release, as well as furlough programs. Requires the design of an ideal corrections facility and a pre-sentence investigation report and recommendation.

CJ 3100
Criminal Profiling
3:3:0
Fall

* Prerequisite(s): CJ 1010 and University Advanced Standing
Introduces process of reviewing and assessing the behavioral facts of a violent criminal act from a law enforcement and/or investigative perspective.

CJ 3140
Corrections Law
3:3:0
Spring

* Prerequisite(s): CJ 1300 and University Advanced Standing
Teaches the law as it pertains to the corrections field. Examines civil liability and pertinent constitutional amendments as they relate to corrections covering the areas of probation, incarceration, and parole.

CJ 3270
Criminology
3:3:0
Fall, Spring

* Prerequisite(s): CJ 1010 and University Advanced Standing
Introduces the field of criminology, providing an overview of the issues involved in defining, measuring, and explaining crime. Examines the nature, extent, and general characteristics of criminal behavior and the potential causes of criminal offenses and offenders. Reviews early and contemporary theories which attempt to explain criminal behavior from a sociological, psychological, and biological perspective; the effectiveness of theories in explaining crime; theory integration and application of theory to selected issues as they relate to the modern world.

CJ 3300
Victimology
3:3:0
Fall, Spring, Summer

* Prerequisite(s): CJ 1010 and University Advanced Standing
Provides an overview of the juvenile justice system from its origin through present-day trends and development. Examines the origin and development of the juvenile court as well as its changing social and political philosophy. Discusses the role and relationship of municipal law enforcement toward the juvenile offender. Examines closed juvenile institutions, juvenile probation, parole, and alternative placement such as group homes.

CJ 3310
White Collar Crime
3:3:0
On Sufficient Demand

* Prerequisite(s): CJ 3270 and University Advanced Standing
Presents historic treatment and emerging roles of the crime victim in the criminal justice process. Investigates problems and dilemmas faced by crime victims and victimization risk factors. Studies systemic and societal creation of victims, relationships between victims and offenders, crime victim compensation, and reparations.

CJ 3320
Crime and Gender
3:3:0
On Sufficient Demand

* Prerequisite(s): CJ 1010 and University Advanced Standing
Discusses the implications of white-collar crime for criminal justice professionals and researchers. Examines various forms of white-collar crime using case studies and estimates the extent as well as the costs of these crimes. Focuses on victim and offender profiles and legal issues, including questions of corporate liability. Examines theoretical explanations for white-collar crime committed by individual offenders and corporations.

CJ 3330
Financial Crimes Investigations
3:3:0
Fall, Spring

* Prerequisite(s): CJ 1340 or ACC 2010 and University Advanced Standing
Examines the complex world of financial crimes, money laundering, and the national and international standards for financial institutional compliance.
CJ 3340
Terrorism and the Criminal Justice System
3:3:0
On Sufficient Demand
* Prerequisite(s): University Advanced Standing and CJ 1010 or ACC 2010.
Examines the phenomena of radicalization and terrorism as they relate to the criminal justice system in America. Evaluates the various radical movements that have led to acts of terrorism, including jihadist extremists, animal rights and environmental extremist, as well as the white supremacist and domestic far-right extremist movement in America. Examines the role of law enforcement in counterterrorism efforts in the United States and law enforcement responses to terrorism. Assesses the challenges of prosecuting, sentencing, and incarcerating terrorists, both domestic and international. Evaluates the movement of Countering Violent Extremism as a means to impede the pathway to terrorism.

CJ 3360
Prisons Contemporary Issues and Dilemmas
3:3:0
Spring
* Prerequisite(s): CJ 1010, ENGL 2010, and University Advanced Standing
Studies the history of the American prison system, targeting current issues and trends. Explores options for resolving current issues and attempts to understand and diagnose future trends and issues.

CJ 3400
Drugs and Crime
3:3:0
Fall, Spring
* Prerequisite(s): CJ 1010, ENGL 2010, and University Advanced Standing
Presents historical, economic, social, and political roles of legal and illegal drugs. Explains the drug contribution to crime and the impact that drugs have on the criminal justice system. Compares drug production and distribution systems. Illustrates efforts to combat the drug epidemic including decriminalization, prevention, and treatment.

CJ 3600 (Cross-listed with: ESMG 3600)
Psychology of Emergency Services
3:3:0
On Sufficient Demand
* Prerequisite(s): ENGL 2010 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Examines the general psychological aspects of police, fire, and emergency medical services responders including dimensions of personality, family, organizational, cultural and diversity issues. Examines models of emergency and crisis decision making. Analyzes stress, anxiety, and trauma theories and clinical issues and examines current interventions being used for related disorders and building resilience.

CJ 4060
Special Problems in Criminal Justice
3:3:0
Fall, Spring
* Prerequisite(s): CJ 1010 and University Advanced Standing
Examines selected current issues and problems in criminal justice. Researches external factors related to the professions of police, courts, and corrections. Demonstrates functions of the criminal justice system through realistic situations and events.

CJ 4160
Constitutional Criminal Rights
3:3:0
Fall, Spring, Summer
* Prerequisite(s): CJ 1330, ENGL 2010, and University Advanced Standing
Studies decisions in leading U.S. Supreme Court criminal cases. Presents an overview of criminal procedure relating to constitutional amendment laws with a criminal justice emphasis. Discusses leading cases concerning constitutional rights and responsibilities.

CJ 4200
Ethical Issues in Criminal Justice
3:3:0
Fall, Spring, Summer
* Prerequisite(s): CJ 1010 and University Advanced Standing
Examines selected current issues and problems in criminal justice. Compares drug production and distribution to crime and the impact that drugs have on the criminal justice system. Presents major ethical problems within the criminal justice system. Studies differences between moral decay and the ideal justice system. Uses an issue-based approach to solve individual, group and departmental ethical dilemmas.

CJ 4250
Criminal Justice Career Strategies
2:2:0
Fall, Spring
* Prerequisite(s): University Advanced Standing
Emphasizes the development of effective techniques for successfully locating, applying for and securing employment as well as advancing in a Criminal Justice related career path. Includes industry and job research, demonstration, role play, and application exercises. Should be taken during second semester junior year. Provides preparation for coop/internship experience.

CJ 445G (Cross-listed with: ESMG 445G)
Human Factors in Emergency Management
3:3:0
On Sufficient Demand
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 2010
Introduces students to an emergency response approach to understanding hazards and disasters grounded in social vulnerability analysis. Examines historical, geographical, social, and cultural factors and conditions that put people differentially at risk before, during, and after disasters. Utilizes a multi-disciplinary approach. Focuses on global, national, regional, and local patterns of development. Explores how vulnerable social groups are affected by and cope with hazardous conditions and events, and strategies for community-based mitigation engaging those most at risk.

CJ 470G
Comparative Criminal Justice Systems
3:3:0
Fall, Spring
* Prerequisite(s): CJ 2350 and University Advanced Standing
Examines the influences of the history, religion, ethnicity, traditions on the political and social cultures between and among six model nations of obvious historical interest to the USA. Examines the respective similar influences and distinctions between other countries and compares them with the political practices and legal systems of the USA as viewed from the international and multicultural vantage point.

CJ 475R
Current Topics in Criminal Justice
3:3:0
On Sufficient Demand
* Prerequisite(s): CJ 1010, University Advanced Standing, and Instructor Approval
Presents selected topics in Criminal Justice, Law Enforcement, and/or National Security and will vary each semester. Requires a special project related to the area of study. May be repeated with different topic areas for a maximum of 9 credits toward graduation.

CJ 481R
Internship
1 to 8:1 to 8:0
Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
Provides actual, on-the-job work experience on a paying or non-paying (volunteer) basis in a criminal justice profession or other approved related situation. Emphasizes successful work experience, with emphasis on identifying and solving problems. Completers should be qualified to work in the Criminal Justice profession. May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.

CJ 487R
Criminal Justice Field Experience
1 to 6:1 to 6:0
On Sufficient Demand
* Prerequisite(s): Junior or Senior status and University Advanced Standing
Provides students access to law enforcement agencies, prisons, detention centers, courts and institutions dealing with criminals and delinquents. Includes 2-3 weeks of intense classroom instruction, interviews, and lectures by practitioners in the field and several on-site visits of varying duration. Course may be repeated five times for a total of 6 hours of credit.

CJ 4880
Qualitative Research Methods in Criminal Justice
3:3:0
Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
Explores the methods of research used by criminal justice educators and practitioners. Introduces the application of basic research practices to law enforcement and corrections problems. Includes the use of American Psychological Association (APA) style.

CJ 491R
Directed Reading and Special Projects
1 to 3:0 to 3:0 to 9
Summer
* Prerequisite(s): Junior or Senior status and University Advanced Standing
Offers independent study as directed in reading, individual projects, etc., at the discretion and approval of the department chair. May be repeated for a maximum of 9 credits.

CJ 4990
Criminal Justice Capstone Seminar
3:3:0
Fall, Spring, Summer
* Prerequisite(s): CJ 4880 and University Advanced Standing
Applies qualitative, quantitative, and/or mixed research methods to selected issues and dilemmas in criminal justice. Requires the student to develop and present an undergraduate research project both orally and in writing.
Course Descriptions

CJ 6200  
Advanced Topics in Criminal Justice  
3:3:0  
* Prerequisite(s): Acceptance into Master's of Public Services program.

Evaluates contemporary issues in criminal justice, including current and historical concepts of criminal justice, interrelationships among different components of the system, and the role and function of the justice system in society. Develops philosophies of punishment, contemporary policing issues, courtroom decision making, and modern trends in corrections.

CJ 6210  
Information-based Decision Making for Criminal Justice Administrators  
3:3:0  
* Prerequisite(s): Acceptance into Master's of Public Services program.

Describes contemporary criminal justice models and how data and information are critical to their success (Intelligence-led Policing, CompStat, Problem Oriented Policing, Community Policing, etc.). Builds crime analysis, crime maps, hot spots, intelligence models, and other data analysis from an administrative perspective in order to compile the tools, resources, and practices used around the world to assist in data-based decision making.

CJ 6220  
Contemporary Issues in Criminal Justice  
3:3:0  
* Prerequisite(s): Acceptance into the Masters of Public Services Program

Evaluates developments and changes in the practice of criminal justice brought about by current issues such as terrorism, rapid technological change, police misconduct, active shooter response, police, and the media. Formulates effective policies and procedures using strategic planning to manage organizational change with the use of current management strategies and philosophies.

CJ 6230  
Criminal Justice Policy  
3:3:0  
* Prerequisite(s): Acceptance into Master's of Public Services program.

Evaluates a conceptual approach to the creation, implementation, and evaluation of criminal justice policies. Constructs a framework for planning and formulating policy context now and in the future. Summarizes court decisions instrumental in criminal justice policies for police, courts, corrections, and juvenile justice.

Classical Studies (CLST)

CLST 290R  
Themes in Classical Civilizations  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): ENGL 1010 or ENGH 1005

Explores topics in Classical thought, literature, art, history and philosophy at an introductory level. Emphasizes understanding literature, history and archeological topics through translated primary and secondary sources. Focuses on the basic interpretive skills necessary to relate historical, cultural, and sociological data to classical societies. May be repeated for 6 credits toward graduation.

CLST 490R  
Special Topics in Classical Civilizations  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): ENGL 1010 and University Advanced Standing

Focuses on the basic interpretive skills necessary to understand literature, history and archeological topics and cultural texts and art work from Classical societies. Emphasizes understanding of the social, cultural and political forces which operate on a culture’s writers, artists and major contributors. May be repeated with different topics for 6 credits toward graduation.

Construction Management (CMGT)

CMGT 1010  
Introduction to Construction Management  
3:2:2  
Fall, Spring, Summer

Introduces OSHA safety practices and its role in the construction industry. Reviews related safety theories, procedures, and practices used in the construction industry. Software fee of $5 applies. Lab access fee of $45 applies.

CMGT 1150  
Construction Safety  
2:1:2  
Fall, Spring, Summer

Provides a basic knowledge of the materials and methods used in heavy civil, commercial, and residential construction projects. Includes lectures, site visits and laboratory work. Curriculum covers CSI Divisions 01-05. Lab access fee of $45 applies.

CMGT 1190  
Concrete and Framing Lab  
3:0:9  
Fall

Offers applied learning experience in concrete and framing methods on a construction project. Course Lab Supply fee of $10 for materials applies.

CMGT 2010  
Construction Materials and Methods II  
3:2:2  
Fall, Spring

Provides basic knowledge of the materials and methods used in heavy civil, commercial, and residential construction projects. Includes lectures, site visits and laboratory work. Curriculum covers CSI Divisions 06-39. Software fee of $5 applies. Lab access fee of $45 applies.

CMGT 2025  
Heavy Civil Plans and Specifications  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): CMGT 1010, CMGT 1020

Designed for students interested in heavy/civil construction and design. Studies plans, standards and specifications for infrastructure construction. Emphasizes roadway systems, highway and bridge construction utilized in the heavy civil construction industry. Utilizes current project plans. May include site visits and guest lecturers as appropriate.

CMGT 2035  
Construction Computer Applications  
3:3:0  
Fall, Spring

* Prerequisite(s) or Corequisite(s): CMGT 1010, and (CMGT 1020 or CMGT 1010), or department approval.

Emphasizes construction industry-specific, project management software use. Covers spreadsheets, scheduling, document manipulation, storage, dissemination and collaboration. Lab access fee of $45 applies.

CMGT 2060  
Construction Job Site Management  
3:3:0  
Fall, Spring

* Prerequisite(s) or Corequisite(s): CMGT 2010 or CMGT 1020

Covers the role and duties of job site managers of heavy civil and commercial construction projects. Includes documentation, time and cost control, jobsite layout and control, labor relations, conflict resolution, OSHA safety practices. Emphasizes the design and implementation of project safety plans. Focuses on project quality, productivity, cost control and safety management. Lab access fee of $45 applies.

CMGT 2080  
Principles of Construction Scheduling  
3:2:2  
Fall, Spring

* Prerequisite(s): CMGT 1010, CMGT 2010, and (CMGT 2035 or IM 2010)

Provides fundamental skills required to plan and schedule civil and commercial construction projects. Familiarizes students with computer scheduling software packages used to monitor and control construction projects. Defines the sequencing, phasing, and critical path management of construction activities. Software fee of $5 applies. Lab access fee of $45 applies.

654  
Course Catalog 2020-2021  
Utah Valley University
CMGT 281R
Internship
1 to 6:1 to 6:0  Fall, Spring, Summer
* Prerequisite(s): Department approval

Provides on-the-job construction work experience. Includes student, employer, and coordinator evaluations, on-site work visits, written assignments, and presentations. Provides experience in writing and completing individualized work objectives that improve present work performance. May be repeated for a maximum of 6 credits toward graduation. May be graded Credit/No Credit.

CMGT 289R
Construction Industry Seminar
3:2:2  Fall, Spring

Provides the opportunity to hear professionals teach about unique aspects of the industry. Must be repeated twice for one credit for graduation, but may be repeated for a maximum of two credits.

CMGT 299R
Skills USA
1:1:0  Fall, Spring

* Prerequisite(s): Requires adviser or department approval.

Supports and facilitates the goals and objectives of Skills USA pre-professional student organization that develops social awareness, civic, recreational, and social activities. Students may participate in local, state, and national contests. May be repeated for a maximum of 2 credits toward graduation.

CMGT 3010
Construction Materials Testing
3:2:3  Fall, Spring

* Prerequisite(s): CMGT 1020 and (MAT 1010 or higher or EGDT 1600) and University Advanced Standing

Introduces basic principles of testing of construction materials and their quality control/assurance tests conducted in the construction industry. Analyzes results of these tests and how they affect construction design. Emphasizes the performance of field and lab testing procedures used in heavy civil construction. Course Lab Supplies fee of $17 for materials applies.

CMGT 3020
Building Envelopes and Mechanical Systems
3:2:2  Fall, Spring

* Prerequisite(s): CMGT 1010, IM 1010 or computer proficiency exam, and University Advanced Standing

Covers mechanical, electrical and plumbing (MEP) principles. Provides problem solving experience in the analysis and design of building envelopes and MEP systems used in construction applications. Software fee of $5 applies. Course fee of $10 for materials, transportation applies. Lab access fee of $45 applies.

CMGT 3030
Principles of Construction Estimating
3:2:3  Fall, Spring

* Prerequisite(s): CMGT 2035, MAT 1010 or higher or EGDT 1600, and University Advanced Standing, or CMGT Instructor/Program approval for non-CMGT majors

Introduces the preparation of detailed cost estimates based on contract models and documents. Includes the use of software for performing reliable quantity take-offs. Covers labor, material, and equipment pricing. Includes lectures and laboratory work. Software fee of $5 applies. Lab access fee of $45 applies.

CMGT 3050
Construction Equipment/Planning and Logistics
3:2:2  Spring

* Prerequisite(s): CMGT 2808, CMGT 3030, ACC 3000 (recommended) or (ACC 2010 and ACC 2020), and University Advanced Standing, or CMGT Instructor/Program approval for non-CMGT majors

Introduces productivity, logistics and associated costs of heavy equipment required on a typical construction project. Emphasizes equipment used in heavy civil construction. Software fee of $5 applies. Lab access fee of $45 applies.

CMGT 3060
Applied Statics and Strength of Materials
3:2:3  Fall, Spring

* Prerequisite(s): (MATH 1060 or EGDT 1610) and University Advanced Standing

Introduces basic principles of statics, coplanar force systems, coplanar-nonconcurrent force systems, stresses and strains, properties of materials, shear and bending diagrams, and beam design. Explores materials used in construction projects.

CMGT 3080
Construction Financial Management
3:3:0  Fall, Spring

* Prerequisite(s): ACC 3000 (Recommended) or (ACC 2010 and ACC 2020), and University Advanced Standing

* Prerequisite(s) or Corequisite(s): CMGT 3030

Introduces the preparation of detailed cost estimates based on contract models and documents. Includes the use of software for performing reliable quantity take-offs. Covers labor, material, and equipment pricing. Includes lectures and laboratory work. Software fee of $5 applies. Lab access fee of $45 applies.

CMGT 3090
Principles of Hydrology in Construction Management
3:2:3  Fall

* Prerequisite(s): (MATH 1060 or EGDT 1610) and University Advanced Standing

Introduces basic principles of hydrology as utilized in the construction industry. Focuses on the nature of real property, property as it relates to new construction and existing improvements. Discusses the nature of real property, estates in land, transfer, encumbrances, restrictions, and contracts. Discusses ownership, settlement, taxation, finance, valuation and appraisal.

CMGT 3160
Building Information Modeling
3:3:0  Fall, Spring

* Prerequisite(s): EGDT 1020 or CMGT Instructor/Program approval for non-CMGT majors and University Advanced Standing

Introduces 3D architectural models for cost estimating, clash detection, collaboration between multiple disciplines and documenting and quantifying project data. Covers modeling design theory, parametric modeling methods, generation of residential and commercial construction plans and details sufficient for cost estimating, building components and systems, and manipulation of model information. Software fee of $5 applies. Lab access fee of $45 applies.

CMGT 4010
Construction Contracts
3:3:0  Fall, Spring

* Prerequisite(s): ENGL 2010, CMGT 1010, Junior Standing, and University Advanced Standing, or CMGT Instructor/Program approval for non-CMGT majors

Introduces basic principles of statics, coplanar force systems, coplanar-nonconcurrent force systems, stresses and strains, properties of materials, shear and bending diagrams, and beam design. Explores materials used in construction projects.

CMGT 4020
Construction Project Management
3:3:0  Spring

* Prerequisite(s): CMGT 2080 or CMGT Instructor/Program approval for non-CMGT majors and University Advanced Standing

Introduces best management practices in the construction industry pertaining to resource optimization. Utilizes construction planning and problem solving tools on real world construction issues. Identifies and quantifies waste in the industry and determines appropriate methods to eliminate such. Discusses lean philosophy and its impact on construction projects and the industry. Lab access fee of $45 applies.

CMGT 405G
Global Sustainability and the Built Environment
3:2:2  Fall, Spring

* Prerequisite(s): Minimum junior status or CMGT Instructor/Program approval for non-CMGT majors; University Advanced Standing

Introduces basic principles of sustainability as utilized in the construction industry. Focuses on the nature of real property, property as it relates to new construction and existing improvements. Discusses the nature of real property, estates in land, transfer, encumbrances, restrictions, and contracts. Discusses ownership, settlement, taxation, finance, valuation and appraisal.
Course Descriptions

CMGT 4500
Senior Capstone Project
3:1:4 Fall
* Prerequisite(s): Junior Standing, Program Advisor Approval, and University Advanced Standing

Designed for senior Construction Management and related majors. Involves execution of a construction project case simulation covering all aspects of construction management for either heavy civil, commercial or residential projects. Engages students with local representatives from the construction industry. Requires a written project report and oral presentations. Software fee of $5 applies. Lab access fee of $45 applies.

CMGT 459R
Current Topics in Construction
1 to 3:0:3 to 9
* Prerequisite(s): Program Advisor Approval and University Advanced Standing

*Prerequisite(s): Program Advisor Approval and University Advanced Standing

Provides exposure to emerging technologies and topics of current interest in Construction. Varies each semester depending upon the state of technology. May be repeated for a maximum of 6 credits toward graduation.

CMGT 481R
Internship
1 to 4:1 to 4:0 Fall, Spring, Summer
* Prerequisite(s): Department approval and University Advanced Standing

Provides application of classroom theory while working as an employee in the construction industry. Requires communication of personal goals, tracking performance and work hours with the employer. Credit is determined by the number of hours a student works during the semester and completion of individually set goals. May be repeated for a maximum of 4 credits toward graduation. May be graded credit/no credit.

CMGT 489R
Undergraduate Research in Construction
1 to 3:1:4 On Sufficient Demand
* Prerequisite(s): Department approval and University Advanced Standing

*Prerequisite(s): Department approval and University Advanced Standing

Provides the opportunity to conduct research under the mentorship of a faculty member. Practices the theoretical knowledge gained in prior major courses. Creates a significant intellectual or creative product that is characteristic of the construction discipline and worthy of communication to a broader audience. May be repeated for a maximum of 3 credits toward graduation.

CMGT 497R
Independent Study
1 to 3:0:3 to 9 On Sufficient Demand
* Prerequisite(s): Approval of Construction Technologies Department Chair and University Advanced Standing

Offers independent study as directed in reading or individual projects at the discretion and approval of the department chair. May be repeated for a maximum of 6 credits toward graduation.

Communications (COMM)

COMM 1020
Public Speaking
3:0 Fall, Spring, Summer
HH

Provides an introduction to basic concepts, theories, principles of oral communication as applied to a variety of speaking situations. Develops competence in oral communication through performance, the development of critical thinking skills, arrangement of ideas, and use of evidence and reasoning to support claims. Explains how culture influences what is considered effective public speaking. May be delivered online. Canvas Course Mats $69/McGraw applies
COMM 1050  Introduction to Speech Communication  SS
3:3:0  Fall, Spring, Summer
Surveys the questions, methods, and current status of knowledge in the discipline of speech communication.  Examines communication theory and practice across a variety of contexts and forms, including verbal, non-verbal, interpersonal, group, organization, and mass communication. Canvas Course Mats $55/Sage applies.

COMM 1130  Writing for the Mass Media
3:3:0  Fall, Spring, Summer
Teaches Associated Press-style writing for the mass media. Focuses on organizing and presenting information to a mass audience. Emphasizes news writing.

COMM 1500  Introduction to Mass Communication
3:3:0  Fall, Spring, Summer
Provides a survey of the structure, operation, diversity, and effects of mass media. Discusses the different forms of media and the impact of media. Explores opportunities in communication work. Also covers consumer impacts.

COMM 1610  Reporting for the Mass Media
3:3:0  *Prerequisite(s): COMM 1130  Fall, Spring
Provides an opportunity to learn about a career in journalism. Focuses on gathering and organizing information in the field. Includes interviewing, covering a beat, investigative reporting, reviews, and opinions. Simulates a journalist's working experience. Offers experience covering current events in the field. Lab access fee of $20 applies.

COMM 202R  Communication Field Experience
1 to 3:0:3 to 9  *Prerequisite(s): Instructor Approval  Fall, Spring
Explores a wide variety of topics in public relations, mass media, journalism and speech communication. May be repeated for a maximum of 12 credits toward graduation.

COMM 207G  Introduction to Gender and Communication
3:3:0  *Prerequisite(s): Instructor Approval  Fall, Spring, Summer
Introduces students to the study of gender differences and similarities in communication. Provides practical understanding and skills useful for more effective communication within and across gender boundaries. Addresses gender and communication issues across multiple cultural contexts, including issues beyond mainstream groups and United States culture.

COMM 2100  The News Editing Process
3:3:0  *Prerequisite(s): COMM 1130  Fall, Spring, Summer
Introduces news judgment, content, and forms. Prepares and edits copy for publication, including rewriting faulty stories, copy editing, proof-reading, headlines, newspaper design, and picture editing. Lab access fee of $20 applies.

COMM 2110 (Cross-listed with: MGMT 2110)  Interpersonal Communication
3:3:0  Fall, Spring, Summer
Examines the role of communication in interpersonal relationships. Includes the history of interpersonal communication research and theory and applications such as negotiation, conflict management, listening, and assertiveness. Canvas Course Mats $78/McGraw applies.

COMM 2115  Introduction to Health Communication
3:3:0  *Prerequisite(s): Instructor Approval  Fall, Spring, Summer
Provides an introduction to and a foundation for the important area of health communication. Covers persuasion theories as applied to health communication research. Examines the history of medicine and healthcare. Describes patient to caregiver interaction.

COMM 2120  Small Group Communication and Decision Making
3:3:0  Fall, Spring, Summer
Provides an overview of the communication processes involved in small group interactions. Covers theories of leadership, decision-making, and problem-solving through group activities. Canvas Course Mats $86/McGraw applies.

COMM 217G (Cross-listed with: CINE 217G, ENGL 217G)  Race Class and Gender in U S Cinema
3:3:0  *Prerequisite(s): ENGL 1010 or ENGL 1005  Fall
Examines films covering current events in the field. Does not count toward a major or minor in Communication. Some films screened may carry an “R” rating.

COMM 2250  Principles of Advertising
3:3:0  *Prerequisite(s): COMM 1500  Fall, Spring, Summer
Introduction to advertising. Introduces students to the study of advertising. Emphasizes understanding the role of advertising in business and consumer behavior. Topics include the advertising process, advertising media, and the role of advertising in business and consumer behavior. Canvas Course Mats $114/Sage applies.

COMM 2270  Argumentation
3:3:0  Fall, Spring
Examines the study of argument. Emphasizes reasoning, evidence, analysis, evaluation, audience analysis, and practice.

COMM 2300  Public Relations
3:3:0  *Prerequisite(s) or Corequisite(s): COMM 1050 or COMM 1130  Fall, Spring, Summer
Introduces the basics of writing for the media, designing corporate literature, and working with the public in behalf of a business or individual. Canvas Course Mats $41/Sage applies.

COMM 2400  Organizational Communication
3:3:0  Fall, Spring, Summer
Teaches how communication processes affect organizations. Applies theory to organizational analysis. Utilizes dialogue and network analysis to improve organizational values and performance. May be delivered online.

COMM 2510  Visual Strategies for Communication Majors
3:3:0  Fall, Spring, Summer
Teaches strategies to visually align public relation campaigns with an organization's brand using contemporary digital software. Provides understanding of visual strategies and effective design practices. Creates a literacy of visual communication tools and strategies for articulating a vision to audiences using well-established web design techniques. Lab access fee of $20 applies.

COMM 2560 (Cross-listed with: DGM 2460)  Radio Production
3:3:0  Fall
Provides an overview of the communication processes involved in small group interactions. Covers theories of leadership, decision-making, and problem-solving through group activities. Canvas Course Mats $86/McGraw applies.

COMM 2790  Magazine Writing
3:3:0  *Prerequisite(s): COMM 1610  Fall
For students interested in pursuing careers in journalism. Focuses on non-fiction writing for magazine consumption. Includes lectures on the history of radio, and the structure of typical radio stations, from management to programming, sales, production, and promotion. Covers methods of producing radio promos, radio shows, commercials and news segments, as well as features and interviews. Uses Digital Audio Workstations to produce several radio segments of the student's choosing. Includes lectures, demonstrations, and guest lectures from radio stations in the community. Software fee of $20 applies. Lab access fee of $45 for computers applies.

COMM 281R  Internship
1 to 8:1 to 8:0  *Prerequisite(s): Department Approval  Fall, Spring, Summer
Provides an opportunity for students to get college credit by working in communication-related fields. Applies academic concepts to actual work experiences. Requires instructor approval and final report. May be graded credit/ No credit. May be repeated for a total of 8 credit hours toward graduation.

Utah Valley University  Course Catalog 2020-2021  657
COMM 290A  
Independent Study  
1:1:0  
On Sufficient Demand  
* Prerequisite(s): COMM 1610, Approval of instructor and department chair.

For qualified students who wish to undertake a well-defined project or directed study related to an area of special interest. Requires individual initiative and responsibility. Includes limited formal instruction and faculty supervision. Projects may include writing a publishable paper, creating a portfolio of published news articles, producing an annotated bibliography, oral or multimedia presentation, or other options as approved by the instructor.

COMM 290B  
Independent Study  
2:2:0  
On Sufficient Demand  
* Prerequisite(s): COMM 1610, Approval of instructor and department chair.

For qualified students who wish to undertake a well-defined project or directed study related to an area of special interest. Requires individual initiative and responsibility. Includes limited formal instruction and faculty supervision. Projects may include writing a publishable paper, creating a portfolio of published news articles, producing an annotated bibliography, oral or multimedia presentation, or other options as approved by the instructor.

COMM 290C  
Independent Study  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): Approval of instructor and department chair.

For qualified students who wish to undertake a well-defined project or directed study related to an area of special interest. Requires individual initiative and responsibility. Includes limited formal instruction and faculty supervision. Projects may include writing a publishable paper, creating a portfolio of published news articles, producing an annotated bibliography, oral or multimedia presentation, or other options as approved by the instructor.

COMM 290D  
Independent Study  
4:4:0  
On Sufficient Demand  
* Prerequisite(s): COMM 1610, Approval of instructor and department chair.

For qualified students who wish to undertake a well-defined project or directed study related to an area of special interest. Requires individual initiative and responsibility. Includes limited formal instruction and faculty supervision. Projects may include writing a publishable paper, creating a portfolio of published news articles, producing an annotated bibliography, oral or multimedia presentation, or other options as approved by the instructor.

COMM 3000  
(Cross-listed with: PHIL 3010)  
Media Ethics  
3:3:0  
Spring  
Prerequisite(s): ENGL 2010 and University Advanced Standing  
Covers ethical issues in media communication. Includes discussions of ethnicity, gender, nationalism, and conflict. Demands development of moral agency. Examines tensions between individual freedoms and social responsibilities. Addresses ethical questions in the context of current struggles within and over corporate and public media.

COMM 3020  
Communication Research Methods  
3:3:0  
Fall, Spring  
* Prerequisite(s): STAT 1040 or STAT 1045 (or equivalent) and University Advanced Standing

Covers basic communication research methods in both quantitative and qualitative research. Focuses on the research process and discusses the methodological tools for understanding and conducting basic communication research. Includes examples based on research and promotes awareness of the importance of quantitative and qualitative research perspectives as well as of data collection and analytical procedures. Canvas Course Mats $66/McGraw applies.

COMM 3030  
Media Literacy  
3:3:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing

Explores the concept of media literacy and how individuals can become more knowledgeable citizens when analyzing and evaluating messages disseminated from a wide variety of media outlets.

COMM 3050  
Theories of Communication and Culture  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): (ENGL 1010 or ENGH 1005) and COMM 1500 with a 'C-' or better and University Advanced Standing

Covers main theoretical approaches to communication and culture. Includes transmission, ritual, symbolic interactionist, structuralist, post-structuralist, postmodern, and critical theories. Canvas Course Mats $66/McGraw applies.

COMM 3100  
Propaganda and Persuasion  
3:3:0  
Fall  
* Prerequisite(s): COMM 1500 with a C- or higher required and University Advanced Standing; COMM 3020 and COMM 3050 recommended

Examines various propaganda techniques inherent in advertising, public relations, and the mainstream news media in the United States. Prepares students to apply critical thinking skills to determine if or when propaganda techniques are used in order to understand the role of propaganda in their own mediated environment.

COMM 3110  
(Cross-listed with: ENGL 3110, THEA 3110)  
Non Fiction Cinema History  
3:2:3  
On Sufficient Demand  
* Prerequisite(s): ENGL 2150 and University Advanced Standing

Surveys the history of non-fiction/documentary film from 1896 to the present. Includes study of early pioneers from Flaherty's NANOOK OF THE NORTH to the current trend of reality television and popular documentaries. Some films screened may carry an "R" rating.

COMM 3115  
Communicating in Environments  
3:3:0  
Summer  
* Prerequisite(s): University Advanced Standing

Explores how people use communication to navigate both social and natural environments. Investigates social and small group communication; specifically, how small groups are created, what role(s) they play in life. Considers how our culture communicates about the natural world; how do we define nature, who communicates for nature, and how does nature behave as a stakeholder in environmental conflicts. Occurs at the Capitol Reef Field Station, which allows for an experiential application of the theories of small-group and environmental communication. Focuses on the experience and application of the literature of the discipline to create an integrated-learning opportunity.

COMM 3120  
Fundamentals of New and Social Media  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): University Advanced Standing

Examines contemporary issues related to social media, including the impact of such media on journalism and society, social media effects, and new media campaigns. Investigates the relationship between government policy and social media in relation to issues such as the digital divide, net neutrality, and the use of social media to sustain protests and revolutions. Software fee of $20 applies.

COMM 3130  
The Culture of Nature and Technology  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): ENGL 2150 and University Advanced Standing

Analyzes the cultural construction of nature and technology from historical, interpretive, and critical perspectives. Deconstructs the nature/culture dichotomy. Critiques the neutrality of technology thesis. Explores the political and social implications of representations of, and relations to, nature and technology.

COMM 3140  
Social Media Content Creation  
3:3:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing

Develops multimedia content creation skills for a myriad of social media platforms. Focuses both on the theoretical and practical foundation for persuasive/informative social media campaigns from a public relations, journalism, and communication-studies perspective. Covers multimedia content creation for platforms such as Facebook, Twitter, Instagram, and Pinterest, among others. Software fee of $20 applies.
COMM 314G (Cross-listed with: ENGL 314G, THEA 314G)
Global Cinema History
3:2:3
* Prerequisite(s): (ENGL 2150 or THEA 1023) and University Advanced Standing
Studies the evolution of global film styles, movements, stars, and genres with a focus on international cinema chronologies outside the United States. Some films screened may be considered controversial and carry an "R" rating.

COMM 3150 (Cross-listed with: CINE 3150, ENGL 3150)
Cinema and Television Theory
3:3:0
Spring
* Prerequisite(s): (CINE 2150 or ENGL 2150) and University Advanced Standing
Examines major theoretical approaches to the screen arts. Explores how cinema and television reflect and are created by historical and contemporary cultural contexts. Includes the study of various approaches such as fan studies, spectatorship, stars, authorship, genre, long-form narrative and production. Includes lecture, film and media screenings, and critical discussions of assigned readings.

COMM 3160
Social Media Analytics
3:3:0
On Sufficient Demand
* Prerequisite(s): COMM 3140 and University Advanced Standing
Provides methods in which social media activity data is obtained and subsequently measured. Examines common metrics that are used to evaluate the effectiveness of social media campaigns. Explores how social media, as a medium, can be properly evaluated in terms of valuation and return on investment. Critiques and analyzes current and past social media campaigns in order to better understand how metrics can help to modify social media strategy and tactics. Applies the associated theoretical concepts via hands-on activities using contemporary social media content management tools and analytic software. Software fee of $20 applies.

COMM 317G
GI Ethnographic Methods for Communication Research
3:3:0
Fall, Spring
* Prerequisite(s): University Advanced Standing
Provides an examination of concepts and methodologies used to conduct ethnographic research. Discusses the critical study of cultural processes; the approaches to ethnographic research; and the relationship among ethnographic evidence (fieldwork), interpretation, and representation.

COMM 319G
Intercultural Communication Encounters
3:3:0
Fall, Spring
* Prerequisite(s): University Advanced Standing
Promotes awareness of the role of competent communication in intercultural awareness and sensitivity. Reviews classical and current definitions of culture and describes their general characteristics, with specific focus on the issue of cultural diversity. Describes the components and process of intercultural communication including perception and motivation. Provides an overview of differences and similarities in verbal and nonverbal intercultural communication. Identifies guidelines for achieving intercultural communication competence.

COMM 3290
Photojournalism
3:3:0
Fall, Spring
* Prerequisite(s): University Advanced Standing
Covers the fundamental skills and principles of gathering news with a camera. Demonstrates how students can improve the way they see information for distribution via the mass media. Allows students to articulate how they feel about images and describe why such images work well or poorly for publication. Lab access fee of $20 applies.

COMM 332G (Cross-listed with: MGMT 332G)
Cross Cultural Communications for International Business
3:3:0
Fall, Spring
* Prerequisite(s): (ENGL 2150 or COMM 1050) and University Advanced Standing
Discusses today's business environment which requires work in a multi-ethnic setting. Overviews critical elements that arise from the various cultural backgrounds which can impact both domestic and international organizations. Proceeds from a management point of view with lessons easily derived for the mid-level manager as well as for line personnel. Concentrates on managerial communications, negotiations, cultural changes, and management functions.

COMM 3410 (Cross-listed with: FAMS 3410)
Fundamentals of Mediation and Negotiation
3:3:0
Fall, Spring
* Prerequisite(s): (COMM 1050 or COMM 2110 or LEGL 3150) and University Advanced Standing
Teaches students to understand and participate knowledgeably on a basic level in the processes of mediation and negotiation. Emphasizes conceptual knowledge of both processes and improves practical skills and effectiveness as a mediator and negotiator. Uses an interactive-workshop format that blends theory with simulated class role-play.

COMM 3420 (Cross-listed with: BESC 3420)
Communication and Conflict
3:3:0
Fall, Spring, Summer
* Prerequisite(s): (FAMS 3410 or COMM 3410 or COMM 2110 or LEGL 3150) and University Advanced Standing
Studies contemporary theories of conflict and communication. Analyzes the roles of culture, gender, personal, and organizational ethics in conflicts and disputes. Covers the nature of conflict and teaches methods of negotiation, mediation, and conflict resolution with an emphasis on collaborative problem-solving. Canvas Course Mats $66/McGraw applies.

COMM 350R
Special Topics in Communication
3:3:0
* Prerequisite(s): University Advanced Standing
On Sufficient Demand
Promotes awareness of the role of competent communication in intercultural awareness and sensitivity. Reviews classical and current definitions of culture and describes their general characteristics, with specific focus on the issue of cultural diversity. Describes the components and process of intercultural communication including perception and motivation. Provides an overview of differences and similarities in verbal and nonverbal intercultural communication. Identifies guidelines for achieving intercultural communication competence.

COMM 3510
Visual Communication Theory
3:3:0
Fall, Spring
* Prerequisite(s): University Advanced Standing
Examines the physiopysychological bases of perception, cognition, semantics, aesthetics and history that lead to realization of visual messages within the context of communication. Discusses the ethical dimensions of visual image making and critiques contemporary visual images across all mass media.

COMM 3520
Public Relations Case Studies
3:3:0
Fall, Spring, Summer
* Prerequisite(s): COMM 1500, COMM 2320, COMM 3020, and University Advanced Standing
Examines public relations strategic planning process through the analysis of case studies. Addresses strategic communication planning issues in media relations, crisis communications, ethics, creative planning, research, and evaluation, using real-world situations and clients. Promotes learning individually and in teams. Software fee of $20 applies.

COMM 3530
Public Relations Writing
3:3:0
Fall, Spring, Summer
* Prerequisite(s): (COMM 1130 or COMM 1050), COMM 2300, and University Advanced Standing
Develops skills in persuasive writing for institutional or individual clients. Provides a hands-on experience in applying public relations writing tools for corporate, non-profit, government, and public relations organizations. Covers writing for the media, designing and writing corporate literature, and working with the public on behalf of a business or individual as it relates to public relations. Lab access fee of $20 applies.

COMM 3540
Sports Public Relations
3:3:0
Fall, Spring
* Prerequisite(s): COMM 2300, and University Advanced Standing
Examines the history of sports communication for public relations, spotlights sports communication key influencers, and highlights the skills necessary to effectively communicate in a changing sports marketplace. Examines students to how public relations, social networking, corporate involvement, and mass media continue to shape a dynamic field that remains a top choice for creative communication professionals across the globe. Incorporates students' sports writing skills as they learn the execution of sports digital media plans, media conferences, and media availability.
Course Descriptions

COMM 3560
Public Relations Event and Media Coordination
3:3:0 Fall
* Prerequisite(s): COMM 2300, and COMM 3530; University Advanced Standing.

Examines the process of event coordination as it relates to public relations and media management. Reviews the history of festivals and events. Provides an understanding of the concepts of project coordination, strategic planning, and strategic vision within event coordination. Explores media management within event coordination for events that include award shows, film festivals, government press conferences, sporting events, fundraisers, promotional events, and more. Explores public-relations careers within event coordination, and helps students create, develop, manage, execute, and evaluate an event from a public-relations approach.

COMM 3570
Crisis Communication
3:3:0 Fall
* Prerequisite(s): COMM 2300, University Advanced Standing

Provides a broad theoretical and practical understanding of crisis communication and risk assessment. Examines recent crisis cases to understand what constitutes and causes organizational crises, how to avoid crises, and what to do when a crisis hits. Evaluates communicative channels and messages, including new media, and develops strategies to prepare and manage a crisis situation.

COMM 362G
International Communication
3:3:0 On Sufficient Demand
* Prerequisite(s): COMM 3020, COMM 3050, and University Advanced Standing

Introduces theories of international communication. Covers different systems of the press in different countries. Analyzes specific case studies in international media.

COMM 3660
Investigative Reporting
3:3:0 On Sufficient Demand
* Prerequisite(s): COMM 1610 with a C- or higher and University Advanced Standing

Explores news and information in a democratic framework. Develops interview techniques, public record use, fact checking and electronic data access in relation to complex social issues.

COMM 3680
Advertising Media Planning
3:3:0 On Sufficient Demand
* Prerequisite(s): COMM 2300 and University Advanced Standing

Teaches the process of media planning. Covers procedures, issues, and methods of evaluation. Takes a problem-solving approach, oriented to targeting particular audiences in appropriate ways.

COMM 3690
Creative Strategy in Communication Campaigns
3:3:0 On Sufficient Demand
* Prerequisite(s): COMM 2300 or COMM 2250 and University Advanced Standing; all courses must be C- or better.

Prepares students for careers in public relations, journalism, and communication by exploring the role of research, copywriting, design, and media structures in developing persuasive messages. Emphasizes execution of creative strategies that are appealing to the intended audience, consistent with communication objectives, and formatted correctly for the media in which they are implemented.

COMM 3700
Free Expression in a Democratic Society
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing

Examines the role of the free speech and free press clauses of the First Amendment of the U.S. Constitution from legal, ethical, political, and pragmatic perspectives. Covers basic rules governing the media (advertisers, newspapers, public relations specialists, and electronic media) and individuals. Includes analysis of court decisions, executive orders, administrative rules, and legislation intended to limit or regulate speech and examples of people/organizations who have challenged these rules.

COMM 3780
Mormons Media and Culture
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing; COMM 3020 and COMM 3050 each recommended

Examines the intersection of media, popular culture, and Mormonism. Analyzes the social construction of Mormonism through representations in the media, official and unofficial LDS discourse, folklore, material culture, and history. Discusses cultural theories of race, gender, orientalism, and tribalism.

COMM 3790
Case Studies in Journalism
3:3:0 Spring
* Prerequisite(s): COMM 1610 with a C- or higher) and University Advanced Standing

Examines historically significant examples of the press in action from historical, ethical, and critical perspectives. Requires a research paper. Lab access fee of $20 applies.

COMM 401G
Communication Education
3:3:0 Fall, Spring
* Prerequisite(s): COMM 1020 and University Advanced Standing; all courses must be C- or better.

Explores communication education. Identify concepts and apply them to the service and interaction. Focuses on teaching. Encourages critical examination of diversity, research, socio-emotional bonding, outreach to the communication community, and instructional issues that relate to teaching communication. Offers experience in the role of teaching assistant. Global/Intercultural understanding as it applies to communication theory is considered and explored from a variety of perspectives. Examines the perspectives, experiences and concerns of individuals and groups representing cultures other than one's own and specifically as those differences apply to public speaking. Understanding is integrated throughout the course content. Understanding and appreciation should enhance your educational experience and facilitate your preparation to participate as active, informed, respectful citizens.

COMM 4110
Interpersonal Communication Theory & Research
3:3:0 Fall
* Prerequisite(s): COMM 2110, COMM 3020, and COMM 3050 with a C- or higher in each) or Instructor Approval, and University Advanced Standing

Surveys current interpersonal research. Explores the interrelated nature of theory and research. Provides the foundational knowledge required to critically assess current research in the field. Creates an opportunity to systematically explore a personal area of interest within the area of interpersonal communication.

COMM 4115
Advanced Health Communication
3:3:0 On Sufficient Demand
* Prerequisite(s): COMM 2115 or Instructor Approval) and University Advanced Standing; all courses must be C- or better.

Examines persuasion, interpersonal and organizational theories which are applied to patient, caregiver, technology, organizations and the mass media in an attempt to understand the health communication processes. Examine how communication influences health. Provides research skills necessary for the capstone course.

COMM 4120
Group Communication
3:3:0 Spring
* Prerequisite(s): COMM 2120, COMM 3020, and COMM 3050 with a C- or higher in each) or Instructor Approval, and University Advanced Standing

Extends understanding of group operation and experience through current theory and research studies. Provides experiential activity of working in class groups. Enables students to study groups in their social environments, investigate real-world group policy, and discover the benefits of viewing groups as having stable yet permeable boundaries.
COMM 4170
Contemporary Issues in Organizational Communication
3:3:0 Spring
* Prerequisite(s): (COMM 2400 or Instructor Approval) and University Advanced Standing; all courses must be C- or better.
Provides an introduction, overview, and in-depth look at the role of communication in contemporary organizations. Demonstrates the importance and challenges of communication within organizations. Emphasizes the interdependence of internal and external forms of organizational communication.

COMM 4180
Communication and Social Behavior
3:3:0 Fall, Spring
* Prerequisite(s): (COMM 3020 and COMM 3050) and University Advanced Standing; all courses must be C- or better.
Examines the complex relationship between human communication and the social worlds in which we live. Looks at ways behavior in roles, institutions, and culture are socially constructed through language. Examines discourses and their role in constructing social phenomena, with an emphasis on the relationships between discourse and power.

COMM 4200 (Cross-listed with: FAMS 4200)
Advanced Mediation and Negotiation
3:3:0 Fall
* Prerequisite(s): (ENGL 2010 with a C+ or higher) and (FAMS 3410 or COMM 3410 or BESC 3420 or COMM 3420) and University Advanced Standing
Prepares students to perform at an advanced level in the processes of mediation and negotiation. Builds on the fundamentals learned in the basic course, improves knowledge of both processes, and sharpens practical skills and effectiveness as a mediator or negotiator. Uses an interactive-workshop format that blends theory with simulated class role-play. A certification with the Utah State Court Administrator's office may be offered to those who pass the course and complete 10 hours of mediation and negotiation at the conclusion of the semester.

COMM 4250
Communication and Leadership
3:3:0 Fall
* Prerequisite(s): University Advanced Standing
Encourages students to critically analyze leadership in terms of interpersonal effectiveness and professionalism from both a theoretical and practical perspective. Examines leadership-related, advanced oral and written communication, interpersonal communication, group and team communication and effectiveness, emotional intelligence, and power and influence.

COMM 431R
Communication Executive Lecture Series
1:1:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
Presents lectures by guest speakers emphasizing current public relations and communication topics concerning the student, community, nation, etc. Exposes students to varying topics and industry experts each semester. May be repeated as desired.

COMM 4500
Media and Politics
3:3:0 On Sufficient Demand
* Prerequisite(s): (COMM 3020, and COMM 3050 with a C- or higher in each) and University Advanced Standing
Examines theories and research of media and politics. Analyzes the intersection between traditional and emerging media platforms and current issues in political campaigns, attitudes towards politics, and democratic participation.

COMM 4630
Wolverine Student Public Relations Firm
3:3:0 Fall, Spring
* Prerequisite(s): COMM 3520 AND COMM 3530; both courses must be C- or better and Advanced University Standing.
Provides industry experience in a public relations firm setting working in corporate and nonprofit sectors. Applies writing, media relations, event planning, branding, copy editing, content creation, and social media management for real-world organizations consistent with accepted public relations practices. Teaches market and consumer research and provides regular contact with clients. Prepares students to create and implement public relations campaigns, including evaluations for client work.

COMM 479R
Journalism Workshop
3:1:6 Fall, Spring
* Prerequisite(s): University Advanced Standing
For student newspaper staff. Provides student newspaper staff experience in writing, editing and publishing. Allows students to work on the student newspaper and complete specific learning objectives related to print production such as news and feature writing, columns and editorials. Focuses on layout, production, photography, advertising, and sales in a real-world newspaper environment. May be repeated for a maximum of 6 credits toward graduation. May be graded credit/no credit. Lab access fee of $20 applies.

COMM 481R
Internship
1 to 8:1 to 8:0 Fall, Spring, Summer
* Prerequisite(s): Departmental Approval and University Advanced Standing
For upper division students working toward a Bachelor of Arts or Bachelor of Science degree in Integrated Studies with a Communication emphasis. Provides a transition from school to work where academic concepts are applied to actual practice through on-the-job experience commensurate with upper-division classroom instruction. Requires instructor approval and final report. May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.

COMM 4850
Public Relations Campaigns
3:3:0 Fall, Spring, Summer
* Prerequisite(s): COMM 3020, COMM 3520, and COMM 3530; Junior or Senior standing; and University Advanced Standing; all courses must be C- or better; and Instructor Approval
Applies PR skills, case studies, and writing analysis to create strategic public relations campaigns for a number of clients. Requires students to generate a portfolio of work for one or more clients. Software fee of $20 applies.

COMM 4930
Communication Capstone
1 to 3:1 to 3:0 On Sufficient Demand
* Prerequisite(s): Departmental approval and University Advanced Standing
For advanced qualified students who wish to undertake a well-defined project or directed study related to an area of special interest. Requires individual initiative and responsibility. Includes limited formal instruction and faculty supervision. Projects may include writing a publishable paper, creating a portfolio of published news articles, producing an annotated bibliography, oral or multimedia presentation, or other advanced options approved by the instructor. May be taken for a maximum of 9 credit hours toward graduation.

Computing (COMP)

COMP 1000
Computer and Information Literacy
3:3:0 On Sufficient Demand
Discusses computer and information literacy, focusing on current technology, emerging technology, and social media. Promotes appropriate and ethical use of technology, critical-thinking skills, and problem-solving strategies. Develops skills in word processing, spreadsheet, presentation, and image-editing applications for personal and college success.

COMP 301R
Digital Lecture Series
1:1:0 Fall, Summer
* Prerequisite(s): ENGL 2010 and University Advanced Standing
Guest speakers lecture on current topics in computer science, digital media, and information systems/technology. May be repeated for a maximum of 3 credits toward graduation.
Collision Repair Technology (CRT)

CRT 100R
Paint Your Own Car
2:1:4 Fall, Spring, Summer
Designed as a survey class. Discusses and demonstrates safety, sanding, masking, feather edging, priming, and refinishing of student’s vehicle. Students will finish their own projects in this class. Body and fender dents, rust out, etc., should be taken care of before class enrollment. The instructor will inspect and approve each project prior to allowing it in the program. Course is open to any community member who may profit from the instruction. May be repeated as desired for interest. Tool room fee of $19 for equipment applies.

CRT 1110
Surface Preparation
2:2:0 Fall
Covers environmental and personal safety when handling collision industry chemicals. Discusses metal preparation, surface treatment, painting and surface rust removal, proper sanding of old finishes, and film build tolerances. Teaches application and uses of undercoats, primers, primer surfacers, sealers and primer sealers. Covers block sanding, guide coats, wax and grease removers, and surface pre-cleaning techniques. Software fee of $10 applies. Lab access fee of $15 for computers applies.

CRT 111L
Surface Preparation Lab
1:0:3 Fall
* Corequisite(s): CRT 1110
Provides laboratory experience for surface preparation techniques aligning with lectures from CRT 1110. Topics include finish removal, sanding techniques, undercoating materials. Tool room fee of $19 for equipment applies. Course Lab fee of $40 for materials applies.

CRT 1120
Nonstructural Repair
2:2:0 Fall, Summer
Offers in-depth analysis of minor damage and applied metal working techniques. Studies properties of metal, elasticity, corrosion protection, work hardening, rough out, hammer and dolly techniques, heat shrinking, pick and file and grinding methods. Presents application of corrosion protection materials, body fillers, including metal and fiber reinforced fillers, and their shaping. Emphasizes safety precautions. Software fee of $10 applies. Lab access fee of $15 for computers applies.

CRT 112L
Nonstructural Repair Lab
1:0:3 Fall, Summer
* Corequisite(s): CRT 1120
Provides a laboratory experience for nonstructural repair techniques aligning with lectures from CRT 1120. Topics include fillers use, metallurgy, shrinking and stretching. Tool room fee of $19 for equipment applies. Course Lab fee of $22 for materials applies.

CRT 1130
Overall Refinishing and Problem Solving
2:2:0 Spring
Teaches use and maintenance of shop paint spray equipment. Studies types of undercoatings including sealers, primers, and primer surfacers, their use, limitations, and application. Discusses refinishing products, their solid levels, coverage, and recommended refinishing systems. Teaches prevention and removal of refinishing processing defects. Covers cutting and buffing. Uses ICAR Advanced Technical Curriculum. Successful completers should be prepared for ASE certification. Software fee of $10 applies. Lab access fee of $15 for computers applies.

CRT 113L
Overall Refinishing and Problem Solving Lab
1:0:3 Spring
* Corequisite(s): CRT 1130
Provides a laboratory experience for overall refinishing and problem solving techniques aligning with lectures from CRT 1130. Topics include safety, substrate usage, application techniques, base coats, clear coats, single stage paints, and tri coat processes, application / refinishing / material defects, causes and cures. Tool room fee of $19 for equipment applies. Course Lab fee of $74 for materials applies.

CRT 1140
Panel Replacement and Adjustment
2:2:0 Spring
Studies removal, replacement, and alignment of bolt-on body panels. Presents multiple latch mechanisms and their adjustments. Various trim and body fasteners are discussed. Uses ICAR Advanced Technical Curriculum. Successful completers should be prepared for ASE certification. Software fee of $10 applies. Lab access fee of $15 for computers applies.

CRT 114L
Panel Replacement and Adjustment Lab
1:0:3 Spring
* Corequisite(s): CRT 1140
Provides a laboratory experience for panel replacement and adjustment techniques aligning with lectures from CRT 1140. Topics include replacement and alignment of bolt-on body panels, fasteners and trim. Tool room fee of $19 for equipment applies.

CRT 1210
Blending Tinting and Detailing
2:2:0 Spring

CRT 121L
Blending Tinting and Detailing Lab
1:0:3 Spring
* Corequisite(s): CRT 1210
Provides a laboratory experience for blending tinting and detailing techniques. Identifies proper procedures for Single stage, Base coat, and Tri stage blending. Identifies detailing techniques and materials. Tool room fee of $10 for equipment applies. Course Lab fee of $53 for materials applies.

CRT 1230
Welding and Cutting
2:2:0 Fall, Summer
Introduces gas welding and cutting followed by intense study of MIG, TIG, STRSW welding of mild, high strength, ultra high strength steels, and aluminum. Studies the most common joints as they apply to current vehicles construction techniques. Introduces plasma arc cutting techniques. Uses ICAR Advanced Technical Curriculum. Successful completers should be prepared for ASE certification. Software fee of $10 applies. Lab access fee of $15 for computers applies.

CRT 123L
Welding and Cutting Lab
1:0:3 Fall, Summer
* Corequisite(s): CRT 1230
Provides a laboratory experience for welding and cutting techniques aligning with lectures from CRT 1230. Topics include MIG, TIG , Squeeze Type Resistant Spot Welding (STRSW), welding processes. Tool room fee of $19 for equipment applies. Course Lab fee of $39 for materials applies.

CRT 2310
Collision Damage Reporting
2:2:0 Fall
* Prerequisite(s): CRT 1120, CRT 1130, CRT 1230, recommended

CRT 231L
Collision Damage Reporting Lab
1:0:3 Fall
* Prerequisite(s): CRT 112L, CRT 113L, CRT 123L, all recommended
* Corequisite(s): CRT 2310
Provides a laboratory experience for collision damage estimating techniques aligning with lectures from CRT 2310. Topics include: damage analysis sequence, repair and replace decisions, using crash estimating guide, procedure page analysis of crash estimating guide, selecting parts and labor amounts in crash estimating guide, and various estimating programs for the computer. Tool room fee of $19 for equipment applies. Course Lab fee of $23 for materials applies.
**Course Descriptions**

**CRT 2320**

**Structural Damage Analysis**

2:2:0 * Fall

* Prerequisite(s): CRT 1230

Teaches visual inspection, gauging, measuring, laser technology, and procedures needed to correctly evaluate primary and secondary structural damage. Includes lecture, demonstrations, and lab. Uses ICAR Advanced Technical Curriculum. Successful completers should be prepared for ASE certification. Software fee of $10 applies. Lab access fee of $15 for computers applies.

**CRT 232L**

**Structural Damage Analysis Lab**

1:0:3 * Fall

* Prerequisite(s): CRT 123L

* Corequisite(s): CRT 2320

Provides a laboratory experience for analyzing structural damage to conventional and unibody frames. Aligns with lectures from CRT 2320. Topics include: damage identification, body and frame measurement systems, interpret dimension information, set up and properly use a variety of manual, and computerized measuring systems. Tool room fee of $19 for equipment applies. Course Lab fee of $20 for materials applies.

**CRT 2330**

**Structural Repair**

2:2:0 * Fall

* Prerequisite(s): CRT 1230

Teaches methods, strategies, and technology needed to align and straighten unibody and conventional frame components made from high strength steel and plastics. Studies alignment of steering and suspension components. Includes lecture, demonstrations, and lab. Software fee of $10 applies. Lab access fee of $10 applies.

**CRT 233L**

**Structural Repair Lab**

1:0:3 * Fall

* Prerequisite(s): CRT 123L

* Corequisite(s): CRT 2330

Provides a laboratory experience for aligning and straightening unibody and conventional components made from high strength steel and plastics. Studies alignment of steering and suspension components. Includes lecture, demonstrations, and lab. Tool room fee of $19 for equipment applies.

**CRT 2340**

**Full and Partial Panel Replacement**

2:2:0 * Spring

* Prerequisite(s): CRT 1140, CRT 1230

Teaches removal, alignment, welding, gluing, and corrosion protection technology needed to replace unibody components including rails, pillars, and weld-on panels. Includes lecture, demonstrations, and lab. Uses ICAR Advanced Technical Curriculum. Successful completers should be prepared for ASE certification. Software fee of $10 applies. Lab access fee of $15 for computers applies.

**CRT 234L**

**Full and Partial Panel Replacement Lab**

1:0:3 * Spring

* Prerequisite(s): CRT 114L, CRT 123L

* Corequisite(s): CRT 2340

Provides a laboratory experience for full and partial panel replacement, aligning with lectures from CRT 2340. Topics include: removal, alignment, welding, gluing, and corrosion protection technology needed to replace unibody components: including rails, pillars, and weld-on panels. Tool room fee of $19 for equipment applies. Course Lab fee of $15 for materials applies.

**CRT 2400**

**Plastic Paintless Dent Repair**

2:2:0 * Spring

* Prerequisite(s): CRT 1110, CRT 1120

**CRT 240L**

**Plastic PaintLess Dent Repair Lab**

1:0:3 * Spring

* Prerequisite(s): CRT 111L, CRT 112L

* Corequisite(s): CRT 2400

**CRT 2420**

**Plastic Repair**

4:1:5:7 * Spring

Teaches various repair methods, tools, and materials used to correctly repair plastic materials and SMC panels in modern vehicles. Includes lecture, demonstrations, and lab. Uses ICAR Advanced Technical Curriculum. Successful completers should be prepared for ASE certification. Software fee of $10 applies. Lab access fee of $15 for computers applies.

**CRT 2430**

**Mechanical and Electrical Repair**

4:1:5:7 * Spring

Teaches basic mechanical systems theory, removal, and replacement. Studies A/C systems, cooling, braking, emission, restraint, and electrical systems. Includes lecture, demonstrations and lab. Uses ICAR Advanced Technical Curriculum. Successful completers should be prepared for ASE certification. Software fee of $10 applies. Lab access fee of $15 for computers applies.

**CRT 2440**

**Mechanical Advanced Vehicle Systems**

2:2:0 * Spring

**CRT 244L**

**Mechanical Advanced Vehicle Systems Lab**

1:0:3 * Spring

* Corequisite(s): CRT 2440

**CRT 2450**

**Bags Brakes Steering**

2:2:0 * Spring

Teaches the operation and repair of active and passive restraint systems. Diagnosis of sensors, modules and related components is also discussed. Discusses drum, disc, and anti-lock brake systems and components. Covers parallelogram, and rack and pinion steering systems, repair, replacement and diagnosis of each system is addressed. Uses Advanced Tech I-CAR curriculum.

**CRT 245L**

**Bags Brakes Steering Lab**

1:0:3 * Spring

* Corequisite(s): CRT 2450

Teaches the operation and repair of active and passive restraint systems. Diagnosis of sensors, modules and related components is also discussed. Discusses drum, disc, and anti-lock brake systems and components. Covers parallelogram, and rack and pinion steering systems, repair, replacement and diagnosis of each system is addressed. I-CAR Advanced Tech curriculum is used. Tool room fee of $19 for equipment applies. Course Lab fee of $27 for materials applies.

**CRT 2510**

**Custom Welding**

2:2:0 * Fall

For students pursuing a Diploma or an AAS degree in Collision Repair Technology with an emphasis in Custom Street Rod Technology or interested community members with a welding background. Covers TIG welding processes for mild steel, stainless steel, and aluminum. Teaches oxyacetylene welding processes for mild steel, brass, copper, pot metal, and aluminum.

**CRT 251L**

**Custom Welding Lab**

1:0:3 * Fall

* Corequisite(s): CRT 2510

Provides a laboratory experience for TIG welding processes for mild steel, stainless steel, and aluminum. Instruction in Oxyacetylene welding processes for mild steel, brass, copper, pot metal, and aluminum. Tool room fee of $19 for equipment applies. Course Lab fee of $69 for materials applies.
Course Descriptions

CRT 2520 Customizing 2:2:0 Fall
For students pursuing a Diploma or an AAS degree in Collision Repair Technology with an emphasis in Custom Street Rod Technology or interested community members. Covers fenching, shaving, body modifications, convertible conversions, building hood scoops, louvers, flare, and other technical customizing processes. * Corequisite(s): CRT 2520

CRT 252L Customizing Lab 1:0:3 Fall
Provides a laboratory experience for fenching, shaving, body modifications, convertible conversions, building hood scoops, louvers, flare, and other technical customizing processes. Tool room fee of $19 for equipment applies. Course Lab fee of $11 for materials applies.

CRT 2530 Panel Fabrication 2:2:0 Fall
For students pursuing a Diploma or an AAS degree in Collision Repair Technology with an emphasis in Custom Street Rod Technology or interested community members. Covers basic fabricating tools such as sheet metal brake, slip rolls, band saw, and nibblers. Uses specialty tools such as English wheel, power hammer, kraffformer, plenisher hammer, shrinkers, and stretchers. Teaches panel fabrication and hammer forming. * Corequisite(s): CRT 2530

CRT 253L Panel Fabrication Lab 1:0:3 Fall
Provides a laboratory experience for basic fabricating tools such as sheet metal brake, slip rolls, band saw, and nibblers. Uses specialty tools such as English wheel, power hammer, kraffformer, plenisher hammer, shrinkers, and stretchers. Teaches panel fabrication and hammer forming. Tool room fee of $19 equipment applies. Course Lab fee of $60 materials applies.

CRT 2540 Structural Body Fabrication 2:2:0 Not Offered
For students pursuing a diploma or AAS degree in Collision Repair Technology with an emphasis in Custom Street Rod Technology or interested community members. Covers body construction from bumper to bumper and from roof to floor. Enhances knowledge of structural components of a well constructed vehicle.

CRT 254L Structural Body Fabrication Lab 1:0:3 Not Offered
* Corequisite(s): CRT 2540
Provides a laboratory experience for body construction from bumper to bumper and from roof to floor. Enhances knowledge of structural components of a well constructed vehicle.

CRT 2610 Top Chopping Sectioning and Channeling 2:2:0 Spring
* Prerequisite(s): CRT 2510, CRT 251L
For students pursuing a Diploma or an AAS degree in Collision Repair Technology with an emphasis in Custom Street Rod Technology or interested community members with a welding background. Covers fenching, shaving, body modifications, convertible conversions, building hood scoops, louvers, flare, and other technical customizing processes.

CRT 261L Top Chopping Sectioning and Channeling Lab 1:0:3 Spring
* Prerequisite(s): CRT 2510, CRT 251L
* Corequisite(s): CRT 261L
Provides a laboratory experience for methods of top chopping, sectioning and channeling techniques. Tool room fee of $19 for equipment applies. Course Lab fee of $16 for materials applies.

CRT 2620 Frames 2:2:0 Spring
* Prerequisite(s): CRT 2510, CRT 251L
For students pursuing a Diploma or an AAS degree in Collision Repair Technology with an emphasis in Custom Street Rod Technology or interested community members with a welding background. Identifies the different types of frames and how to modify them. Teaches sub-framing, pro-streeting, narrowing of rear ends, drive shafts, and complete frame change over. Covers exhaust systems and other alterations, front to rear.

CRT 262L Frames Lab 1:0:3 Spring
* Prerequisite(s): CRT 2510, CRT 251L
* Corequisite(s): CRT 2620
Provides a laboratory experience for identifying the different types of frames and how to modify them. Teaches sub-framing, pro-streeting, narrowing of rear ends, drive shafts, and complete frame change over. Covers exhaust systems and other alterations, front to rear. Tool room fee of $19 equipment applies.

CRT 2630 Detailing and Custom Painting 2:2:0 Spring
* Prerequisite(s): CRT 1110, CRT 1120, CRT 1130, CRT 1140, CRT 1210
For students pursuing a Diploma or an AAS degree in Collision Repair Technology or Custom Street Rod Technology or interested community members with an automotive painting background. Teaches custom painting and detailing for show cars. Emphasizes flames, scallops, shredding, checker boarding, air brush techniques, murals, fish scales, three stage paints, pearls, candies, and multi-colored changes.

CRT 263L Detailing and Custom Painting Lab 1:0:3 Spring
* Prerequisite(s): CRT 111L, CRT 112L, CRT 113L, CRT 121L
* Corequisite(s): CRT 2630
Provides a laboratory experience for custom painting and detailing for show cars. Emphasizes flames, scallops, shredding, checker boarding, air brush techniques, murals, fish scales, three stage paints, pearls, candies, and multi-colored changes. Tool room fee of $19 for equipment applies. Course Lab fee of $73 for materials applies.

CRT 2640 Panel Fabrication of Aluminum 2:2:0 Fall
* Prerequisite(s): CRT 1110, CRT 1120, CRT 1130, CRT 1140
For students pursuing a diploma or an AAS degree in Collision Repair Technology with an emphasis in Custom Street Rod Technology or interested community members. Covers basic hand tools, such as: hammers, dollys, leather bags, and slappers. Use of specialty equipment, such as: English wheel, Pullmax, nibbler, power hammers, and bead rollers. Teaches making bucks, patterns and forms. Teaches panel fabrication of aluminum.

CRT 264L Panel Fabrication of Aluminum Lab 1:0:3 Fall
* Corequisite(s): CRT 2640
Provides laboratory experience for use of: hammers, dollys, leather bags, and slappers. Instructs in the use of specialty equipment, such as: English wheel, Pullmax, nibbler, power hammers, and bead rollers. Teaches making bucks, patterns and forms. Teaches panel fabrication of aluminum. Tool room fee of $19 for equipment applies. Course Lab fee of $80 for materials applies.

CRT 2650 Automotive Interior Design 2:2:0 Spring
* Prerequisite(s): CRT 1110, CRT 1120, CRT 1130, CRT 1140
 Discusses automotive interior designs with emphasis on color coordination, and materials. Identifies a variety of techniques used in alteration, sewing, layout, and attachment processes.

CRT 265L Automotive Interior Design Lab 1:0:3 Spring
* Corequisite(s): CRT 2650
Offers a laboratory experience for CRT 2650 lecture. Demonstrates interior design materials, color coordination, and stitching techniques. Teaches fabrication, design attachment, molding, layout and cutting. Tool room fee of $19 for equipment applies. Course Lab fee of $96 for materials applies.
Course Descriptions

**CS 2810**
Object Oriented Programming
3:3:0 Fall, Spring, Summer
* Prerequisite(s): CS 1400 and (MATH 1050 or MATH 1055 with a C+ or better, or MATH above 1050)
Teaches proper program structure using the core concepts of object-oriented programming: classes, objects, encapsulation, inheritance and polymorphism. Presents problems of increasing size and complexity requiring OOP techniques, standard libraries and other appropriate language constructs. Presents methods to identify, define and implement solutions to naturally recursive problems. May be delivered online. Lab access fee of $45 applies.

**CS 2250**
Java Programming
3:3:0 Not Offered
* Prerequisite(s): CS 1400
Covers practical Java programming in-depth, including abstract classes and interfaces, proper use of the packages Java.lang, Java.io, and Java.util, GUI design and implementation, and programming. Lab access fee of $45 applies.

**CS 2300**
Discrete Mathematical Structures I
3:3:0 Fall, Spring, Summer
* Prerequisite(s): CS 1410 and (MATH 1050 or higher)
For Computer Science Majors. Covers algebraic structures applied to computer programming. Includes logic, sets, elementary number theory, mathematical induction, recursion, algorithm complexity, combinatorics, and relations. First of a two-semester sequence. Lab access fee of $45 applies.

**CS 2370**
C plus plus Programming
3:3:0 Spring
* Prerequisite(s): CS 1410
Introduces C++ programming for students with prior programming experience. Covers language fundamentals, core standard library components, error handling, value semantics, pointers and memory management, object-oriented programming, and templates. Lab access fee of $45 applies.

**CS 2420**
Introduction to Algorithms and Data Structures
3:3:0 Fall, Spring, Summer
* Prerequisite(s): CS 1410
Uses data abstraction to design and implement modular programs of medium size and complexity. Structures solutions to problems using common data structures and algorithms such as advanced arrays, lists, stacks, records, dynamic data structures, searching and sorting, vectors, trees, linked lists, and graphs. Examines alternative solutions to problems. Analyzes algorithmic complexity metrics in Big-O notation. Lab access fee of $45 applies. Canvas Course Mats $66/Cengage applies.

**CS 2450**
Software Engineering
3:3:0 Fall, Spring, Summer
* Prerequisite(s): CS 2300, CS 2420
Presents concepts, methodology and best-practices necessary to develop large scale software projects. Includes step-wise software requirements analysis, design, implementation, testing and release. Discusses software generation, reuse, scheduling, verification, and maintenance. Emphasizes current "real world" industry best-practices and tools. Lab access fee of $45 applies.

**CS 2550**
Web Programming I
3:3:0 Fall, Spring
* Prerequisite(s): CS 1410 or DGM 2760 or INFO 1200
Covers design and development of browser-based programs with an emphasis on single-page applications. Teaches generation and modification of HTML via JavaScript, debugging techniques, communicating with web servers, and use of XML and JSON. Lab access fee of $45 for computers applies.

**CS 2600**
Computer Networks I
3:3:0 Fall, Spring
* Prerequisite(s): CS 2810 or (INFO 1200 and IT 1600)
A rigorous introduction to computer networking theory and technologies for Computer Science and Information Technology majors. Includes theory of data communications protocols; theory and design of transmission systems; transmission media; and communication software. Emphasizes the lower layers of the Open Systems Interconnection model. Requires lab exercises to be completed outside of lecture. Lab access fee of $45 for computers applies.

**CS 2690**
Computer Networks II
3:3:0 Fall, Spring
* Prerequisite(s): CS 1410, CS 2300, CS 2600, CS 2370
* Prerequisite(s) or Corequisite(s): MATH 1210
Continues CS 2600 Computer Networks I. Focuses on the upper layers of the OSI and Internet models. Covers Internet (TCP/IP) protocols, routing theory, transport protocols, network application interfaces, presentation formatting, information theory and compression, cryptography, and other emerging technologies as time permits. Requires lab exercises and programming assignments to be completed outside of lecture. Software fee of $15 applies. Lab access fee of $45 for computers applies.

**CS 2810**
Computer Organization and Architecture
3:3:0 Fall, Spring, Summer
* Prerequisite(s): CS 1400
Uses assembly language to introduce basic concepts of computer organization. Includes number systems, CPU organization, instruction sets, programming in assembly, memory organization, debugging, program design, and documentation. Covers interrupts, vector tables, and disk I/O. Lab access fee of $45 for computers applies.
CS 281R
Internship
1 to 8:1 to 8:0  Fall, Spring, Summer
* Prerequisite(s): Department approval

Provides on-the-job work experience for CNS majors. Utilizes the skills and abilities in the fields of computer science, software engineering, networking, and/or computer engineering. May be repeated for a maximum of three credits toward graduation. May be graded credit/no credit.

CS 291R
Independent Study
1 to 6:0 to 6:0 to 18  Not Offered

This course will allow the student to pursue an independent topic in computer science and study this topic in-depth in a flexible non-classroom environment. A maximum of three hours may be counted towards graduation without prior written CNS Department approval. The topic must be approved by the instructor and the CNS Department Chair. Lab access fee of $45 for computers applies.

CS 296R
CS Seminar
1 to 3:0 to 3:0 to 12  Not Offered

Presents topics of current interest to computer science in a seminar environment. Includes invited lectures by experts in the field, or a review of a particular technology by a faculty member. A maximum of three hours may be counted towards graduation without prior written CS Department approval. Lab access fee of $45 for computers applies.

CS 305G
Global Social and Ethical Issues in Computing
3:3:0  Fall, Spring
* Prerequisite(s): ENGL 2010 and (CS 1030 or CS 1400 or INFO 1120 or DGM 1110) and University Advanced Standing

Examines how computers have affected global society and how they could further affect it in the future. Challenges students to (1) examine several types of ethical reasoning to establish an ethical framework to assist in making normative judgments, (2) examine various ethical issues surrounding computer usage, particularly in differing societal contexts, (3) understand the responsibilities they bear, to know how their actions can affect both society and individual people in their own and other cultural settings, and to appreciate both the good and the harm they can do and (4) consider many of the moral and professional issues that those who work with computers might expect to face. Lab access fee of $45 for computers applies.

CS 3060
Operating Systems Theory
3:3:0  Fall, Spring
* Prerequisite(s): CS 2370, CS 2420, and University Advanced Standing. If a computer science or software engineering major, also CS 2810 and matriculation to computer science or software engineering. If a computer engineering major, also ECE 2700 and ECE 3730

Introduces the Unix operating system. Presents the underlying theory and concepts of an operating system, and covers the following topics in depth: device management, processes, threads, synchronization, scheduling, deadlocks, memory management, virtual memory, and file systems. Provides practical experience in writing programs that use standard Unix system calls to interface directly with the operating system. Lab access fee of $45 for computers applies.

CS 3240
Discrete Mathematical Structures II
3:3:0  Fall, Spring
* Prerequisite(s): CS 2300, CS 2420, CS 2810, computer engineering major or (matriculation to computer science or software engineering), and University Advanced Standing

Presents concepts from discrete mathematics including formal languages, and automata, including Turing machines, regular expressions, grammars, and computability. Lab access fee of $45 for computers applies.

CS 3250
Java Software Development
3:3:0  Fall, Spring
* Prerequisite(s): CS 2420, matriculation to computer science or software engineering if computer science or software engineering major, and University Advanced Standing

Covers object-oriented, functional programming and event-driven features of the Java Programming Language using common libraries, idioms, and software design patterns and principles. Includes abstract classes, interfaces, inner classes, lambda expressions, collections, streams, modern GUIs, I/O, serialization, socket programming, concurrency and parallel multicore programming. Lab access fee of $45 for computers applies.

CS 3260
CsharpNET Software Development
3:3:0  Fall, Spring
* Prerequisite(s): Matriculation to computer science or software engineering and University Advanced Standing

Introduces the C# programming language and the .NET Framework. Discusses the various datatypes, built-in class in namespaces, and how to develop user defined classes and namespaces. Includes programming assignments for console, GUI, and ASP.NET applications. Lab access fee of $45 for computers applies.

CS 3270
Python Software Development
3:3:0  Spring
* Prerequisite(s): CS 2420 or INFO 2200, matriculation to computer science or software engineering if computer science or software engineering major, and University Advanced Standing

Covers the features of the Python programming language. Includes scripting, dynamic typing, data types (sequences, sets, mappings, files, etc.), loops, iterators, generators, functions, coroutines, classes and objects, modules, packages and scope, runtime services, data wrangling, concurrent programming, etc. Lab access fee of $45 for computers applies.

CS 3310
Analysis of Algorithms
3:3:0  Fall, Spring
* Prerequisite(s): MATH 1210, matriculation to computer science or software engineering, and University Advanced Standing

Introduces development and mathematical analysis of fundamental computer algorithms. Teaches divide and conquer and greedy algorithms, dynamic programming, backtracking, branch and bound and NP-completeness. Lab access fee of $45 for computers applies.

CS 3320
Numerical Software Development
3:3:0  Fall, Spring
* Prerequisite(s): MATH 1210, matriculation to computer science or software engineering, and University Advanced Standing

Teaches the tools necessary for modern scientific computation. Covers computer representation of floating-point numbers, error analysis and numerical stability. IEEE floating-point standards, testing of numerical algorithms, calculation of elementary functions, roots of equations, solutions of linear systems, numerical integration and differentiation, interpolation and approximation, Monte Carlo methods. Lab access fee of $45 for computers applies.

CS 3370
C Plus Plus Software Development
3:3:0  Fall, Spring
* Prerequisite(s): CS 2370, CS 2810, matriculation to computer science or software engineering, and University Advanced Standing

Teaches C++ programming in a production environment, emphasizing mastery of the standard C++ library. Covers the following topics in-depth: const correctness, operator overloading, exception handling, exception-safe design, programming with assertions, automated unit testing, advanced memory management, generic programming with templates, containers, iterators, algorithms, concurrency, and functional programming. Introduces library development, common idioms, and other advanced topics. Emphasizes accepted software engineering practices. Lab access fee of $45 for computers applies.
CS 3380
JavaScript Software Development
3:3:0 Fall
* Prerequisite(s): CS 2420, CS 2550, matriculation into the
CS program, and University Advanced Standing
Covers modern JavaScript features of functional
programming, not JavaScript programming limited to
the browser. Topics include rest/sent/reports, string
interpolation, regular expressions, object property
shorthand, computed properties, method properties,
destructuring assignments using object and array
matching, module export/import, classes & inheritance,
promises, iterators, generators, map/set, reflection,
localization & formatting. Introduces common idioms
and design patterns. Emphasizes accepted software
engineering practices. Lab access fee of $45 for
computers applies.

CS 339R
Advanced Programming Language Other
3:3:0 Not Offered
* Prerequisite(s): Varies depending on language offered;
University Advanced Standing
Introduces and explores advanced state-of-the-art
programming languages and concepts. Investigates
topics using language specific analysis, design, Rapid
Application Development (RAD), implementation,
and testing. Explores language specific syntax, semantics,
libraries, the integrated development environment,
and debugging techniques. Demonstrates language
concepts by developing and writing programs. A maximum of
3 credits will count towards graduation; however, with prior
written CNS Department approval more than 3 credits may
be counted towards graduation. May be delivered hybrid.
Lab access fee of $45 for computers applies.

CS 3410
Human Factors in Software Development
3:3:0 Fall
* Prerequisite(s): (CS 3250 or CS 3260 or CS 3370 or
INFO 2200) and University Advanced Standing
Studies issues of software analysis, design, and
development for and from the perspective of human-
computer interaction. Emphasizes design of the human-
computer interface, effective presentation of data via
graphics, color, text, sound, etc., to the user. Uses
development tools for effective graphic presentation,
the elements of effective information presentation to users.
Lab access fee of $45 for computers applies.

CS 3450
Principles and Patterns of Software Design
3:3:0 Fall, Spring
* Prerequisite(s): (CS 3250 or CS 3260 or CS 3270 or
CS 3370) and University Advanced Standing
Gives students familiarity with modern principles and
practices of software design. Emphasizes design patterns,
including their motivation and the design principles on
which they are based. Lab access fee of $45 for computers applies.

CS 3520
Database Theory
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Matriculation to computer science or
software engineering and University Advanced Standing
Introduces the underlying theories of Relational Database
Management Systems (RDBMS) as well as their practical
use retrieving data using both embedded SQL and
relational algebra. Implements queries that start from
simply joining, selecting, and projecting data, then
progresses to more complex data retrieval techniques that
require the use of set operations, sub-queries, and group
by having clauses. Discusses entity-relationship (ER)
modeling, creating a RDBMS from an ER model, B+ Trees,
ACID transactions, normalization, locking, concurrency
issues, and alternatives to an RDBMS. Lab access fee of
$45 for computers applies.

CS 3540
Game Programming
3:3:0 Fall
* Prerequisite(s): Matriculation to computer science or
software engineering and University Advanced Standing
Teaches techniques for two and three-dimensional
graphics programming using DirectX, OpenGL, and/
or game engines built on those libraries. Presents
concepts of game design that relate to the design and
implementation of game software, including procedural
generation of assets. Includes application of artificial
intelligence concepts to game programming. Introduces
the use of network programming techniques for
development of multi-player games. May be delivered
hybrid. Lab access fee of $45 for computers applies.

CS 3660
Web Programming II
3:3:0 Fall, Spring
* Prerequisite(s): CS 2420, CS 2550, and one of CS
3250 or CS 3260 or CS 3270 or CS 3370, and University
Advanced Standing
Builds upon concepts taught in CS 2550 Web
Programming I. Teaches how to design, implement,
test, and debug medium sized web applications using
both client and server side technologies. Includes web
security, data markup languages, server side scripting
technologies, web application interactions with databases,
and web service architectures. Teaches how to develop
a full web-site having sophisticated user interactions at
a variety of security levels. May be delivered hybrid. Lab
access fee of $45 for computers applies.

CS 3670
Network Programming
3:3:0 Spring
* Prerequisite(s): CS 2690, CS 3250, and University
Advanced Standing
Covers concept and practical application of socket
communication and network protocols. Presents design
and implementation of networked applications. May be
delivered online. Lab access fee of $45 for computers applies.

CS 3680
Mobile Device Programming
3:3:0 Spring
* Prerequisite(s): Matriculation to computer science or
software engineering and University Advanced Standing
Teaches software design and programming principles and
practices for developing applications for mobile devices.
Addresses issues such as application life-cycle, user
interfaces on touch-screen devices, options for data
storage and communication, power and performance, and
using graphics and media. Examines hardware features
common in mobile devices such as GPS, accelerometers,
and cameras. Lab access fee of $45 for computers applies.

CS 3720
Database Programming
3:3:0 On Sufficient Demand
* Prerequisite(s): CS 3250 and University Advanced
Standing
Develops the mastery of programming interfaces to
local, remote, web and cloud databases. Uses console,
Microsoft Windows WPF and web user interfaces. Lab
access fee of $45 for computers applies.

CS 4100
Database Management System
Construction
3:3:0 Spring
* Prerequisite(s): CS 3250 and (CS 3220 or CS 3250 or
CS 3260) and University Advanced Standing
Looks at issues involved in actually implementing a DBMS.
Students will implement a relational DBMS. Features of
the DBMS include project, select and join, indexing, B+
trees, parsing and query optimization. Lab access fee of
$45 for computers applies.

CS 4230
Software Testing and Quality Engineering
3:3:0 Fall
* Prerequisite(s): CS 2450, one of (CS 3250 or CS 3260 or
CS 3270 or CS 3370), ECE 3710, and University
Advanced Standing
Provides a comprehensive exploration of strategies for
testing computer systems. Includes unit testing, system
testing, developing software testing organization, and
establishing software Total Quality Management (TQM)
programs. Students will conduct system tests of software
packages. Lab access fee of $45 for computers applies.

CS 4380
Advanced High Performance Computer
Architecture
3:3:0 Fall, Spring
* Prerequisite(s): CS 3060, (CS 3370 Recommended),
and University Advanced Standing
Presents theory and concepts of high-performance
computer architectures. Includes digital logic, buses,
registers, ALU’s, control units, pipelining, parallelism,
DASH’s, SASD’s, RAID, caching, instruction-sets,
memory hierarchy, multiprocessing, interconnection via
networks. Lab access fee of $45 for computers applies.
Course Descriptions

CS 439R
Advanced Current Topics in Computer Science
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): Department approval and University Advanced Standing
Provides exposure to emerging technologies and topics of current interest in computer science. Varies each semester depending upon the state of technology. A maximum of 6 hours may be counted toward graduation without CS Department approval. Lab access fee of $45 for computers applies.

CS 4400
Software Engineering II
3:3:0  Fall
* Prerequisite(s): CS 2450, CS 2600, CS 3520, and (CS 3250 or CS 3260 or CS 3270 or CS 3370), and University Advanced Standing
* Prerequisite(s) or Corequisite(s): CS 3450
Covers principles and practices of early phases of software development life cycle. Studies software requirements elicitation, analysis, and design. Includes in-depth, practical study of at least one major software development approach as applied to a realistic organizational systems problem. Explores requirements definition, analysis including prototyping, functional and nonfunctional requirements specification, legacy systems, and architecture patterns. Lab access fee of $45 for computers applies.

CS 4440
Applied 3D Computer Graphics
3:3:0
* Prerequisite(s): CS 2420 with a C or better and (CS 3220 or CS 3250 or CS 3260 or CS 3270 or CS 3370 or CS 339R), and University Advanced Standing
Provides exposure to emerging technologies and topics of current interest in computer science. Varies each semester depending upon the state of technology. A maximum of 6 hours may be counted toward graduation without CS Department approval. Lab access fee of $45 for computers applies.

CS 4470
Artificial Intelligence
3:3:0  Fall, Spring
* Prerequisite(s): CS 3240, CS 3310, CS 3320, and (CS 3250 or CS 3260 or CS 3270 or CS 3370), and University Advanced Standing
Provides exposure to emerging technologies and topics of current interest in computer science. Varies each semester depending upon the state of technology. A maximum of 6 hours may be counted toward graduation without CS Department approval. Lab access fee of $45 for computers applies.

CS 4480
Digital Image Processing and Computer Vision
3:3:0  Spring
* Prerequisite(s): CS 2300, CS 2420, CS 3320, and University Advanced Standing
Prepares students for creating software solutions in the multimedia market of today and into the future. Covers digital sampling of analog signals, basic image processing in the spatial domain and frequency domain, edge and line detection, photo enhancement, feature extraction, and object recognition. May be delivered online. Lab access fee of $45 for computers applies.

CS 4490
Compiler Construction
3:3:0  Fall, Spring
* Prerequisite(s): CS 4380, CS 4450, and University Advanced Standing
Studies theory, analysis and design of class developed compiler. Requires completion of a program level assessment test. Lab access fee of $45 for computers applies.

CS 4500
Advanced Topics in Database
3:3:0  Spring
* Prerequisite(s): (CS 3520 or INFO 3410) and University Advanced Standing
Covers transaction processing, concurrency control techniques, database recovery techniques, database security and authorization, database integrity, distributed databases and client-server architectures, load balancing, data warehousing, data mining, database machines, mobile database, multimedia database, GIS, genome data management, data fragmentation, data encryption, locking, and deadlock. Lab access fee of $45 for computers applies.

CS 4550
Networking Specialization
3:3:0  Fall
* Prerequisite(s): CS 2690, matriculation to computer science or software engineering program, CS 3520, and University Advanced Standing
Covers transaction processing, concurrency control techniques, database recovery techniques, database security and authorization, database integrity, distributed databases and client-server architectures, load balancing, data warehousing, data mining, database machines, mobile database, multimedia database, GIS, genome data management, data fragmentation, data encryption, locking, and deadlock. Lab access fee of $45 for computers applies.

CS 4610
TCP/IP Internet Architecture
3:3:0  Fall
* Prerequisite(s): CS 2690, matriculation to computer science or software engineering program, and University Advanced Standing
Provides theoretical, practical, administrative perspectives of the TCP/IP protocol and its use with the Internet. Includes coverage of IPv4, IPv6, TCP, OSPF and related protocols, IP addressing, subnetting issues, and domain name services are also covered. Lab access fee of $45 for computers applies.

CS 4620
Data Mining
3:3:0  Not Offered
* Prerequisite(s): CS 3520 and University Advanced Standing
Introduces the process of knowledge discovery and the basic theory of automatic extracting models from data, validating those models, solving the problems of how to extract (mine) valid, useful, and previously unknown interesting patterns from a source (database or web) which contains an overwhelming amount of information. Explains various models (decision trees, association rules, linear model, clustering, bayesian network, neural network) and how to apply them in practice. Algorithms applied include searching for patterns in the data, using machine learning, and applying artificial intelligence techniques. Teaches how to implement several relevant algorithms and use existing tools to mine real-world, business driven databases. Lab access fee of $45 for computers applies.

CS 4660
NoSQL Database Development
3:3:0  Fall
* Prerequisite(s): Matriculation into the Computer Science or Software Engineering program, CS 3520, and University Advanced Standing
Introduces theory, concepts, architecture, and use of non-traditional database management systems. Discusses the appropriate use of each in its own niche. Lab access fee of $45 for computers applies.

CS 4670
Undergraduate Research Project for Networking Specialization
3:3:0  Spring
* Prerequisite(s): CS 3660, CS 4610, and University Advanced Standing
Creates a system suitable for presentation and defense including project proposal, management plan, system design documentation, relevant testing and benchmarks, and final written and oral reports. Includes system design, systems integration and systems management. Encourages open source and community service projects. Requires completion of a program level assessment test. Lab access fee of $45 for computers applies.
CS 4690 Distributed Internet Application Development 3:3:0 Fall  
* Prerequisite(s): CS 3660 and (CS 3250 or CS 3260 or CS 3270 or CS 3370), and University Advanced Standing  
Provides experience building significant software solutions that span large heterogeneous networks. Includes heterogeneous operating systems, data stores (SQL and NoSQL), service architectures, remote objects, remote services, and data exchange. Lab access fee of $45 for computers applies.

CS 4770 Software Development for Robotics 3:3:0 On Sufficient Demand  
* Prerequisite(s): CS 3370 and University Advanced Standing; CS 4470 recommended  
Teaches students through hands on development the intricacies of programming robots such as autonomous vehicles and/or industrial manufacturing robots. Includes behavior based programming, intelligent agents, low level device drivers, sensor calibration and processing, real time programming requirements, motion planning and navigation, and machine learning. Lab access fee of $45 for computers applies.

CS 479R Advanced Current Topics in Computer Science 1 to 3:0 to 3:0 to 12 On Sufficient Demand  
* Prerequisite(s): Department Approval and University Advanced Standing  
Combines and integrates concepts, methodologies, and skills developed in previous Computer Science course work. Studies the specification, analysis, design, implementation, and completion of a complex and comprehensive project. Requires a project/portfolio using project management techniques. A maximum of 3 hours may be counted towards graduation without prior written Computer Science Department approval. Lab access fee of $45 for computers applies.

CS 481R Internship 1 to 8:1 to 8:0 Fall, Spring, Summer  
* Prerequisite(s): Matriculation to computer science or software engineering, Instructor Approval, and University Advanced Standing  
Provides opportunity to use work experience to add to educational background and academic experience. A maximum of 3 credit hours may be counted towards graduation without prior written CNS Department approval. May be graded credit/no credit.

CS 4880 Cloud Computing 3:3:0 Spring  
* Prerequisite(s): Matriculation into the Computer Science or Software Engineering program, CS 4690, and University Advanced Standing  
Develops mastery of programming to cloud databases. Emphasizes real-world scenarios involving architecture, build, development, testing, and deployment on commercially available cloud databases. Covers concurrent programming, distributed programming, microservices, migration, and hybrid clouds. Lab access fee of $45 for computers applies.

CS 489R Undergraduate Research Project 2 to 6:2 to 6:0 Not Offered  
* Prerequisite(s): Department approval and University Advanced Standing  
Explores applications and tradeoffs of state of the art algorithms in parallel/concurrent programming, data search, graphics, graph theory, data structures, mathematical programming, machine reasoning, machine learning, network flow, and other domains. Applies both theory and practice to various projects with a focus on concurrent/parallel programming.

CS 4900 Full Stack Web Senior Capstone 3:3:0 Spring  
* Prerequisite(s): CS 3410, CS 4660, (CS 3250 or CS 3260), and University Advanced Standing  
Explores technologies associated with modern databases and cloud database management systems. Covers design, development and deployment of all parts of a web application. Lab access fee of $45 for computers applies.

CS 491R Independent Study 1 to 6:0 to 6:0 to 18 Not Offered  
* Prerequisite(s): Prior written Department Chair approval and University Advanced Standing  
Explores technologies associated with modern databases and cloud database management systems. Such as in-memory databases, and data analysis through mapReduce and other algorithms. Explores technologies associated with modern databases management systems, such as in-memory databases, cloud database management systems.

CS 496R Senior Seminar 1 to 3:0 to 3:0 to 12 Not Offered  
* Prerequisite(s): University Advanced Standing  
Provides experience designing and implementing a relational DBMS with features such as projection, select and join, indexing, B+ trees, and parsing. Examines database performance and implements query optimization.

CS 6100 Database Management System Construction 3:3:0 Fall  
* Prerequisite(s): Acceptance into the Master of Computer Science program  
Examines database performance and implements query optimization.

CS 6150 Advanced Algorithms 3:3:0 Fall  
* Prerequisite(s): Acceptance into the Master of Computer Science program  
Explores applications and tradeoffs of state of the art algorithms in parallel/concurrent programming, data search, graphics, graph theory, data structures, mathematical programming, machine reasoning, machine learning, network flow, and other domains. Applies both theory and practice to various projects with a focus on concurrent/parallel programming.

CS 6300 Software Engineering Leadership 3:3:0 Fall  
* Prerequisite(s): Acceptance into the Master of Computer Science program  
Explores applications and tradeoffs of state of the art algorithms in parallel/concurrent programming, data search, graphics, graph theory, data structures, mathematical programming, machine reasoning, machine learning, network flow, and other domains. Applies both theory and practice to various projects with a focus on concurrent/parallel programming.

CS 6400 Modern Databases 3:3:0 Fall, Spring  
* Prerequisite(s): CS 6470  
Explores recent trends in database technology, including the history of NoSQL, NoSQL aggregate data, distribution models, and NoSQL consistency. Teaches data analysis and machine learning by exploring concepts associated with processing massive data sets such as parallel data analysis through mapReduce and other algorithms. Explores technologies associated with modern databases management systems, such as in-memory databases, cloud database management systems.

CS 6470 Machine Learning 3:3:0 Spring  
* Prerequisite(s): Acceptance into the Master of Computer Science program  

CS 6480 Advanced Machine Learning 3:3:0 Spring  
* Prerequisite(s): CS 6470  

CS 6490 Advanced Research Project 2 to 6:2 to 6:0 Not Offered  
* Prerequisite(s): Department approval and University Advanced Standing  
Explores applications and tradeoffs of state of the art algorithms in parallel/concurrent programming, data search, graphics, graph theory, data structures, mathematical programming, machine reasoning, machine learning, network flow, and other domains. Applies both theory and practice to various projects with a focus on concurrent/parallel programming.

Course Descriptions
Course Descriptions

**CS 6500**
Software Architecture  
3:3:0 Spring  
* Prerequisite(s): Acceptance into the Master of Computer Science program  
Evaluates software architecture and the high level design of large scale software systems. Explores common architectural styles and patterns. Teaches techniques of documenting and assessing software architectures. Teaches characteristics of software architecture evolution. Evaluates several large-scale software architectures.

**CS 6510**
Design and Simulation of Operating Systems  
3:3:0  
* Prerequisite(s): Acceptance into the Master of Computer Science program  
Analyzes current topics in operating systems design and simulation. Covers modern computer architecture; several types of memory management; current scheduling algorithms for multiple processes; disk management; virtual memory and interprocess communication.

**CS 6600**
Graduate Project I  
3:3:0  
* Prerequisite(s): CS 6300, CS 6510, CS 6400  
Teaches the design and development of a walking skeleton with students participating in all aspects of software development, including: requirements elicitation, architecture, design, implementation, testing, and deployment. First semester of a two-semester capstone course.

**CS 6610**
Graduate Project II  
3:3:0  
* Prerequisite(s): CS 6600  
Guides through completion and delivery of the large-scale system started in CS 6600. Delivers appropriate system documentation. Teaches the writing and execution of system tests that ensure a high quality system. Must be taken immediately after CS 6600.

**CS 6620**
Advanced Data Mining and Visualization  
3:3:0  
* Prerequisite(s): Acceptance into the Master of Computer Science program; and (CS 3520 or the Departmental Approval)  
Explores advanced concepts of data mining and knowledge discovery including sequence mining, audio video mining, and text mining. Analyzes, designs, develops, and evaluates data mining techniques and tools, including data preprocessing, data characterization and comparison, decision trees, association rule mining in large databases, classification and prediction. Uses clustering and cluster analysis and statistical modeling, advanced methods and applications, extracting meaningful patterns from massive datasets using methods such as neural networks and machine learning algorithms.

**CS 6700**
Advanced Mathematics for Computer Science  
3:3:0 Spring  
* Prerequisite(s): Acceptance into the Master of Computer Science program  
Solves computer science problems using advanced mathematical models. Applies calculus functions of multiple variables, linear equations, matrix algebra, determinants, Gaussian elimination, eigenvalues, linear programming, and finite-state Markov chains.

**CS 6730**
Advanced Embedded Systems Engineering  
3:3:0  
* Prerequisite(s): CS 6510  
Provides a hands-on design experience of software design at the system layer where hardware meets software. Explores embedded computing platforms, interacting with the external world, real-time operation, constraints and optimization, and other techniques which are important for building embedded systems that work in the real world. Applies design/implementation/debugging of embedded functionality through a series of projects and homework exercises.

**CS 6800**
Computer Graphics and Mixed Realities  
3:3:0 Fall, Spring  
* Prerequisite(s): Acceptance into the Master of Computer Science program  
Introduces computer graphics beyond 2D and 3D graphics into mixed reality, where virtual objects interact with the real world. Applies topics such as 2D/3D graphics, augmented reality, virtual reality, immersive visualization, the use of graphics/physics engines, and 3D printing.

**Dance (DANC)**

**DANC 1010**  
Dance as an Art Form  
3:3:0 Fall, Spring, Summer  
Explores multi-cultural dance and movement expression. Studies the different ways in which world cultures are expressed through dance and movement. Overviews dance history and traces the evolution of dance as an art form. Examines the art and craft of dance making, dance as an expression of culture and community. Explores dance as artistic expression in 20th Century America. Course lab fee of $30 for World Dance applies.

**DANC 1100**  
Beginning Ballet  
1:0:2 Fall, Spring  
For all students without previous ballet experience. Emphasizes ballet discipline, develops posture, alignment, and muscular control to improve health and appearance of physical body.

**DANC 1160**  
Music for Dancers  
1:0:3 Spring  
* Prerequisite(s): Acceptance into the Master of Science  
GF  
Presents a fundamental approach to the basic elements of music with an emphasis on its relationship to dance. Studies simple and complex rhythmic patterns, rhythmic analysis of select world music styles (African, Eastern European, and American Funk rhythms), vocalizing, instrumentational, score reading, musical structure, and compositional principles. Includes vocal, instrumental, and movement participation; lecture; writing; and discussion.

**DANC 1200**  
Beginning Modern/Contemporary Dance  
1:0:2 Fall, Spring  
* Prerequisite(s): Acceptance into the Master of Science  
Gives students experience in modern/contemporary dance technique, emphasizing locomotor skills and movement expression. Introduces elements of dance, time, space, and energy.

**DANC 127R**  
Ballet Technique I  
3:1:6.5 Fall, Spring  
* Prerequisite(s): Acceptance into the Master of Science  
For intermediate level ballet students. Requires ability to handle the varying technical difficulties of classical ballet. Includes theories from Soviet, French, Italian, American, English, and Danish schools. Provides hands-on experience in barre and center floor work to increase strength, flexibility. Emphasizes body alignment and correct placement. Prepares students for a more intensive study in ballet. Does not fulfill a dance major requirement. May be repeated for a total of 18 credits. Course Lab fee of $216 for support applies.

**DANC 1330**  
Studio Workshop Creative Process in Dance  
1:5:1.5 Not Offered  
* Prerequisite(s): Acceptance into the Master of Science  
A multi-disciplinary approach to the creative process in dance. Overviews the creative process and explores the development of individual artistry and personal voice in dance. Examines how the creative process in other disciplines informs creative work in dance. Includes participation and lecture.

**DANC 141R**  
Introduction to Modern/Contemporary Dance Technique and Theory  
2:1:3 Fall, Spring  
* Prerequisite(s): Acceptance into the Master of Science  
Increases physical skills in dance technique and performance technique. Introduces principles and concepts that govern human movement. Emphasizes development of strength, flexibility, coordination, core support, and movement expressiveness. Includes aspects of composition, improvisation, and performance as they relate to technique. Develops foundational skills in modern dance technique. Prepares students for more intensive study. Does not fulfill a dance major requirement. May be repeated for a total of 6 credits toward graduation.

<td>Modern/Contemporary Dance Technique and Theory I/Semester I</td>
</tr>
<tr>
<td></td>
<td>3:1:6.5 Fall, Spring, Summer</td>
</tr>
<tr>
<td></td>
<td>* Prerequisite(s): Audition</td>
</tr>
<tr>
<td></td>
<td>Introduces Dance majors to modern/contemporary dance techniques. Focuses on development of solid foundational skills in modern dance technique and theory that prepare the student for an intensive major program. Emphasizes the development of strength, flexibility, core support, coordination, kinesthetic awareness and memory, and movement expressiveness. Includes experience in improvisation and composition as a means of understanding and applying technical skills in performance settings. May be repeated for a total of six credits toward graduation. Course Lab fee of $216 for support applies.</td>
</tr>

<tr>
<td>DANC 1500</td>
<td>Beginning Jazz Dance</td>
</tr>
<tr>
<td></td>
<td>1:0:2 Fall, Spring</td>
</tr>
<tr>
<td></td>
<td>Gives students experience in jazz dance including rhythms, style, and jazz techniques. Includes basic jazz terminology.</td>
</tr>
<tr>
<td>DANC 1510</td>
<td>Intermediate Jazz Dance</td>
</tr>
<tr>
<td></td>
<td>1:0:3 Fall, Spring</td>
</tr>
<tr>
<td></td>
<td>* Prerequisite(s): Instructor Approval</td>
</tr>
<tr>
<td></td>
<td>For students who have fundamental dance skills and basic jazz techniques. Teaches intermediate jazz dance technique, style and rhythm. Increases coordination, stamina, strength and flexibility through appropriate principles of jazz training.</td>
</tr>
<tr>
<td>DANC 1520</td>
<td>Folk Dance I</td>
</tr>
<tr>
<td></td>
<td>1:0:2 Not Offered</td>
</tr>
<tr>
<td></td>
<td>Presents music, dance steps, and styles of folk dances from different countries. Teaches basic dance formations, positions, and terminology.</td>
</tr>
<tr>
<td>DANC 1530</td>
<td>Folk Dance II</td>
</tr>
<tr>
<td></td>
<td>1:0:2 Not Offered</td>
</tr>
<tr>
<td></td>
<td>* Prerequisite(s): DANC 1520</td>
</tr>
<tr>
<td></td>
<td>Acquaints students with intermediate level folk dances from around the world, including steps, styling, music and costumes. Discusses cultural characteristics that are expressed through folk dance.</td>
</tr>
<tr>
<td>DANC 1540</td>
<td>Clogging I</td>
</tr>
<tr>
<td></td>
<td>1:0:2 Not Offered</td>
</tr>
<tr>
<td></td>
<td>Teaches basic steps, styling and history of clogging. Includes dances and freestyle clogging choreography.</td>
</tr>
<tr>
<td>DANC 1550</td>
<td>Clogging II</td>
</tr>
<tr>
<td></td>
<td>1:1.5:1.5 Not Offered</td>
</tr>
<tr>
<td></td>
<td>* Prerequisite(s): DANC 1540 or equivalent experience</td>
</tr>
<tr>
<td></td>
<td>Teaches buck-style clogging and steps of complex rhythm and structure. Includes upper body movement patterns and emphasizes total body coordination. Examines contemporary and historical trends in clogging.</td>
</tr>
<tr>
<td>DANC 1560</td>
<td>African Dance I</td>
</tr>
<tr>
<td></td>
<td>1:0:2 Fall, Spring</td>
</tr>
<tr>
<td></td>
<td>Explores traditional movements and rhythms from Central and West Africa and is accompanied by live drumming. Focuses on the development of solid foundational skills in African dance technique. Emphasizes the cultural significance of various dances and rhythms as well as the influences of the African aesthetic in contemporary dance and culture. Includes participation, video, and guest instructors from Africa. Course fee of $40 for support applies.</td>
</tr>
<tr>
<td>DANC 1580</td>
<td>Tap Dance I</td>
</tr>
<tr>
<td></td>
<td>1:0:2 Not Offered</td>
</tr>
<tr>
<td></td>
<td>Introduces basic steps and rhythms of tap dance. Reviews the history of this American theatrical dance form.</td>
</tr>
<tr>
<td>DANC 1590</td>
<td>Hip Hop Dance I</td>
</tr>
<tr>
<td></td>
<td>1:0:2 Fall, Spring</td>
</tr>
<tr>
<td></td>
<td>Explores a variety of Hip-hop styles and moves to the latest music. Introduces students to fundamental dance techniques. Discusses Hip-hop as a cultural movement.</td>
</tr>
<tr>
<td>DANC 1600</td>
<td>Hip Hop II</td>
</tr>
<tr>
<td></td>
<td>1:0:3 Fall, Spring</td>
</tr>
<tr>
<td></td>
<td>* Prerequisite(s): Previous Hip-Hop dance experience and Instructor Approval</td>
</tr>
<tr>
<td></td>
<td>For all students interested in developing intermediate/advanced skills in Hip-Hop. Explores Hip-Hop through different styles, across the floor combinations, break dancing, and in-class performances. Broadens the students' understanding of this fun, loose, upbeat, and energetic style of dance and culture.</td>
</tr>
<tr>
<td>DANC 1610</td>
<td>Dance Conditioning</td>
</tr>
<tr>
<td></td>
<td>1:1.5:2.5 Fall, Spring</td>
</tr>
<tr>
<td></td>
<td>For dance students enrolled in modern dance, ballet, jazz, or ballroom dance classes and for students interested in dance-specific conditioning. A beginning course in dance conditioning. Covers theory and practice. Emphasizes body balancing in strength, flexibility and endurance training supported by knowledge of basic principles of anatomy and biomechanics. Includes stress management, nutrition, body image, somatotypes, and body connectivity work.</td>
</tr>
<tr>
<td>DANC 1620</td>
<td>Polynesian Dance I</td>
</tr>
<tr>
<td></td>
<td>1:0:3 Fall, Spring</td>
</tr>
<tr>
<td></td>
<td>Explores basic forms of authentic Polynesian dance with a focus on the dances of Tonga, New Zealand, Tahiti and Hawaii. Teaches the origins of the Polynesian people, their &quot;tapa&quot; systems, culture, religions, musical instruments and legends through movement classes, research, discussion and video. Develops understanding of Polynesian dance and the sacredness of this beautiful art form.</td>

DANC 248R
Special Topics In Dance
2:1:2 Fall, Spring
Provides students an in-depth exploration of specialized dance forms outside of traditional course offerings, with an emphasis on World Dance forms such as Polynesian, Classical Indian, Argentine Tango, Capoeira, Balinese and Tibetan Folk Dance. Focuses on learning specific dance forms through active participation. Includes integration of theoretical, historical and social concepts which deepen the student’s understanding of the context in which the dance form was practiced historically and is practiced today. May be repeated for a total of 6 credits towards graduation.

DANC 250R
Advanced Jazz Dance
2:1:3.5 Fall, Spring
* Prerequisite(s): Instructor Approval
Explores advanced level jazz technique, performance and composition skills. Includes preparation for the professional audition through movement experiences, lecture with group discussions, video, guest teacher(s), and group projects. May be repeated for a total of six credit hours.

DANC 2560
African Dance II
1:0:3 Not Offered
* Prerequisite(s): DANC 1560 or previous African Dance experience
Explores dance traditions of West and Central Africa, as well as other countries in the African Diaspora, including Brazil, Cuba, and Haiti. Focuses on strong foundational skills in various African dance styles and emphasizes the cultural and historical significance of the various dances and rhythms. Explores more complex movement and rhythmic structures than African I and challenges the students’ physical stamina. Accompanied by live drumming. Course fee of $50 for support applies.

DANC 265R
Fundamentals of Movement
2:1:2 Fall
* Prerequisite(s): DANC 1200 recommended
For students and community members who want to move with greater ease, efficiency, and sense of connection in the body. Emphasizes body awareness and developmental human movement patterning. Makes application to the areas of dance, sport, theater, somatics, performance, and psychology. Includes Bartenieff Fundamentals and basic principles of Laban Movement Analysis. Develops integrated and harmonious movement patterns in the body. May be repeated for four credits total toward graduation.

DANC 2670
Introduction to Laban Studies
2:1:2 Spring
* Prerequisite(s): DANC 265R
For all dance students and others interested in understanding how the components of movement combine to create functional and expressive movement statements. Introduces the basic principles of Laban Movement Analysis (LMA). Presents a comprehensive system for analyzing the complexity of human movement based on the theories of Rudolph Laban and Irmgard Bartenieff. Utilizes physical performance and observation methods. Emphasizes the process of perceiving and making meaning of human movement from a variety of contexts.

DANC 270R
American Social Dance II
1:0:3 Fall, Spring, Summer
* Prerequisite(s): Instructor Approval
For students with Bronze level American Social Dance experience or equivalent. Teaches intermediate (Silver) level patterns of American Social Dance including Foxtrot, Waltz, Triple Swing, Viennese Waltz, West Coast Swing, and Cha Cha. Emphasizes, on an intermediate level, correct rhythm, poise, footwork, and foot positions, dance position, and etiquette. Successful completers will have a good general knowledge of Silver level curriculum. May be repeated for a maximum of 2 credits toward graduation. Course fee of $20 for practical experience applies.

DANC 271R
International Ballroom Dance II
1:0:3 Fall, Spring, Summer
* Prerequisite(s): Instructor Approval
For students with Bronze level International Ballroom Dance experience. Teaches the intermediate (Silver) level patterns of International Style Waltz, Quickstep, Tango, Foxtrot, and Viennese Waltz. Emphasizes, on an intermediate level, rhythm, poise, footwork, foot positions, dance position, alignment, rise and fall, body flight and correct leading and following. Successful completers will have a good general knowledge of Silver level curriculum. May be repeated for a maximum of 2 credits toward graduation. Course fee of $20 for practical experience applies.

DANC 272R
Latin Ballroom Dance II
1:0:3 Fall, Spring, Summer
* Prerequisite(s): Instructor Approval
For students with Bronze level Latin Ballroom Dance experience or equivalent skill level. Teaches the intermediate (Silver) level patterns of International Style Rumba, Samba, Cha Cha, and Paso Doble. Emphasizes, on an intermediate level, rhythm, poise, footwork, foot positions, dance position, alignment, and correct leading and following. Successful completers will develop a good general knowledge of Silver level curriculum. May be repeated for a total of 2 credits toward graduation. Course fee of $20 for practical experience applies.

DANC 276R
Ballroom Dance Company Back Up Team
1:0:3 Fall, Spring, Summer
* Prerequisite(s): By audition only.
For students with or without prior ballroom dance team experience. Teaches American and International techniques as a performance discipline. Includes choreography, rehearsals, performances, demonstrations, competition. Also teaches fundamentals of formation team dancing, stage performance and team competition. Requires individual practice. Prepares dancers for audition to touring team. May be repeated for up to 4 credits toward graduation. Course fee of $50 for specialized clothing applies.

DANC 281R
Internship in Dance I
1 to 3:1 to 3:0 Fall, Spring, Summer
* Prerequisite(s): Departmental Approval
Provides an opportunity for students to receive college credit and explore career options in dance by working in dance-related fields. Applies academic concepts to actual work experiences. Requires approval of faculty sponsor and completion and acceptance of application. Requires completion of an orientation, completion of Master Agreement between UVU and employer, completion of goals and tasks as required by academic department, and completion of final evaluation. May be repeated for a total of 6 credits towards graduation. May be graded credit/no credit.

DANC 3140
Dance Production and Lighting
2:1:2 Spring
* Prerequisite(s): University Advanced Standing
Introduces essential aspects of dance production. Focuses on theory and practice of lighting for dance. Includes consideration of costume, set design, sound design, backstage organization, make-up for dance, promotion, and programming. Includes lecture and lab experience.

DANC 3160
Dance Accompaniment
2:1:2 Spring
* Prerequisite(s): DANC 1160 and University Advanced Standing
Designed for students interested in musical accompaniment for dance. Builds on knowledge and skills developed in DANC 1160. Explores rhythmic structures and its components in music and dance, composing a percussion score for dance, and building percussion instruments. Emphasizes practical skills in performing simple and complex rhythmic patterns on drum. Includes participation, writing, lecture, and discussion.
Course Descriptions

DANC 321R
Pointe III
1:0:3 Fall, Spring
* Prerequisite(s): Advanced equivalent skill level to be determined by audition.
* Corequisite(s): DANC 327R

For women dance majors and others with an interest in the professional dance world. Emphasizes pointe. Builds strength and control. Explores various styles from classical and contemporary repertoire. Women develop successful virtuosity en pointe. Completers will have skills necessary to perform at an advanced technical skill level and have skills necessary to perform variations from classical repertoire. Includes guest teachers. May be repeated for a total of six credits toward graduation. Course Lab fee of $120 for support applies.

DANC 322R
Ballet Technique and Theory III for Men
1:0:3 Fall, Spring
* Prerequisite(s): DANC 327R or DANC 427R

Focuses on men's ballet technique at an intermediate and prepares men dance majors for the professional world. Emphasizes jumps and technical abilities specifically for men. Builds strength and control necessary for further study. Explores the development of musicality and epaulement as it relates to artistic interpretations. Prepares students to perform men's variations from the classical repertoire. May be repeated for a total of four credit hours.

DANC 327R
Ballet Technique III
3:1:6.5 Fall, Spring
* Prerequisite(s): DANC 227R or Advanced equivalent skill level to be determined by audition

Focuses on men's ballet technique at an intermediate and prepares men dance majors for the professional world. Emphasizes jumps and technical abilities specifically for men. Builds strength and control necessary for further study. Explores the development of musicality and epaulement as it relates to artistic interpretations. Successful completers will be prepared to participate on a corp de ballet professional performance level. May be repeated for a total of 18 credits toward graduation. Course Lab fee of $216 for support applies.

DANC 3330
Modern Dance Workshop
2:1:2 Fall
* Prerequisite(s): DANC 2340 and University Advanced Standing

A continuation of DANC 2330 and DANC 2340. Emphasizes the relationship between improvisation and composition in the choreographic process. Focuses on developing fluency in creating and developing content and creating appropriate form for that content. Explores established choreographic forms in both solo and small group settings. Requires some choreographic work outside of class.

DANC 3340
Ballet Choreography
2:1:2 Spring
* Prerequisite(s): DANC 2230, DANC 2340, and University Advanced Standing
* Corequisite(s): DANC 327R, DANC 427R, or DANC 428R and (DANC 321R or DANC 421R)

For dance majors desiring ballet emphasis. Investigates and explores the choreographic process with relationship to narration as well as all choreographic concepts. Includes the creation of student works that give shape and form to ideas based on a specific theme or statements. Examines plot, character, and theme as part of the creative process.

DANC 3350
Choreography
2:1:2 Spring
* Prerequisite(s): DANC 3330 and University Advanced Standing

Provides in-depth experience in the choreographic process. Focuses on development of personal voice in choreography and the ability to generate choreographic form intrinsic to thematic content. Explores the use of choreographic forms and devices as means of developing thematic content. Requires intensive exploration of the creative process through imaginative thinking, creating, and crafting in movement.

DANC 3400
Dance in the Elementary School
2:1:2 Fall, Spring
* Prerequisite(s): University Advanced Standing

Introduces the philosophy, educational benefits, and teaching methods of dance for children. Teaches movement as an effective and motivational medium for building self awareness, expression, and discipline. Develops skills in the psychomotor, affective, and cognitive domains. Places emphasis on learning through problem-solving and on integrative learning. Addresses the Utah State Core Curriculum in Dance for the elementary school. Completion of a second course is required to satisfy the fine arts requirements (see Graduation section of catalog).

DANC 341R
Modern/Contemporary Dance Technique and Theory Level III/ Semester I
3:1:6.5 Fall
* Prerequisite(s): By audition

Builds technical, performance, and theoretical understanding and skills in modern/contemporary dance. Expands on the skills and concepts introduced in DANC 341R. Emphasizes body and performance techniques, axial and locomotor skills, total body connectivity movement progressions; increased spacial, rhythmic, and qualitative acuity; risk-taking; and movement commitment. Includes aspects of composition, improvisation, and performance as they relate to technique. May be repeated for up to 9 credits total toward graduation. Course Lab fee of $216 for support applies.

DANC 3420
Dance in the Elementary Schools Practicum
3:2:3 Spring
* Prerequisite(s): DANC 3400 and University Advanced Standing

Builds on the methods, strategies, and dance pedagogy studied in the DANC 3400 Dance in the Elementary Schools course. Focuses on the practicum experience in the elementary schools using the Utah Secondary Dance Core Curriculum.

DANC 342R
Modern/Contemporary Dance Technique and Theory Level III/ Semester II
3:1:6.5 Spring
* Prerequisite(s): DANC 341R or by audition

Builds technical, performance and theoretical understanding and skills in modern/contemporary dance. Expands on the skills and concepts introduced in DANC 341R. Emphasizes body and performance techniques, axial and locomotor skills, total body connectivity movement progressions; increased spacial, rhythmic, and qualitative acuity; risk-taking; and movement commitment. Includes aspects of composition, improvisation, and performance as they relate to technique. May be repeated for up to 9 credits total toward graduation. Course Lab fee of $216 for support applies.

DANC 3450
Modern/Contemporary Dance Teaching Methods
3:3:0 Fall
* Prerequisite(s): DANC 3400 and University Advanced Standing

Introduces methodologies, strategies, ideologies, and philosophies of dance pedagogy based on current research and practices. Emphasizes lesson plan writing using the Utah State Secondary Dance Core Curriculum and the National Dance Standards. Integrates theory and practice through lecture, discussion, writing, and classroom teaching experiences in the college and public school settings.

DANC 346R
Synergy Dance Company
3:0:9 Fall, Spring
* Prerequisite(s): Audition required
* Corequisite(s): DANC 143R or DANC 144R or DANC 243R or DANC 244R or DANC 341R or DANC 342R or DANC 441 R or DANC 442R

Designed for students to gain more advanced understanding of artistry through the process and performance of student, faculty, and guest choreography in a formal and informal performance settings. Combines participation in technique, performance, composition, and improvisation. Also includes lectures and demonstrations for local schools and other interested groups. May be repeated for a maximum of 9 credits toward graduation. Course Lab fee of $75 for practical experience applies.

DANC 348R
Special Topics in Dance
1 to 3:0 to 3:0 to 9
* Prerequisite(s): University Advanced Standing and Department Approval

Addresses emerging topics, issues, and developments related to dance. Includes lectures, demonstrations, and studio time for application and evaluation. May be repeated for a maximum of 9 credits toward graduation.
DANC 356G
World Dance Forms
3:2:2 Spring
* Prerequisite(s): Matriculation in any BFA or BS Dance major and University Advanced Standing

Explores the richness and beauty of various cultures from around the world through the medium of dance. Teaches students a deeper knowledge and appreciation of various world dance, or multi-cultural dance forms, through participation in movement classes, informal performances, and dance-related cultural events in class, on campus, and in the community. Serves to deepen the student's understanding of the profound relationship between dance and culture, and dance and human existence throughout time through readings, group discussions, interactive assignments, cultural research projects, concert attendance, writing, dancing, singing and playing music. Explores the evolution and dissemination of the various cultural dance forms studied in class. Course Lab fee of $40 applies.

DANC 3610
Intermediate Dance Conditioning and Injury Prevention
2:1:2 Spring
* Prerequisite(s): DANC 1610 and University Advanced Standing

An intermediate course for dance majors that covers the theory and practice of core conditioning principles with specific application to dance. Regularly scheduled conditioning work outs with accompanying lectures, where recognition and appropriate responses to common dance injuries will be discussed.

DANC 3630
Dance History WE
3:3:0 Fall, Spring
* Prerequisite(s): ENGL 2110, DANC 356G, and University Advanced Standing

Introduces the art of dance in the Western tradition. Emphasizes the relationship of dance to lineage-based, ancient, medieval, Renaissance, Baroque, Classical, Romantic, and Modern cultures. Explores keystone Western dance history concepts and the work of various recognized dance scholars. Introduces students to a wide range of publications in the field. Includes lecture and movement experiences. Emphasizes skills of critical analysis, synthesis, and interpretation in writing about dance.

DANC 365R
Advanced Fundamentals of Movement
2:1:2 Fall
* Prerequisite(s): DANC 265R, DANC 2670, and University Advanced Standing

Continues and deepens the content of DANC 265R. Emphasizes application of principles of Bartenieff Fundamentals to varied movement contexts. Explores the connections between Laban Movement Analysis (LMA) elements of Body, Effort, Shape, and Space and applies the connections to developing increased ease in movement function and liveliness of expression in many movement forms. Develops increased skill and awareness in movement sensation, perception, practice, observation, analysis, prescription, and interpretation. Utilizes LMA symbology. Involves lecture, participation, observation, and written and verbal analysis. May be repeated for 4 credits toward graduation.

DANC 3670
Movement Analysis
3:3:0 On Sufficient Demand
* Prerequisite(s): DANC 265R or equivalent, and University Advanced Standing

An advanced survey course in movement analysis. Focuses on application of the concepts and theories of Laban Movement Analysis in the context of observing, recording, analyzing, and making meaning from human body movement. Includes in-depth study of motif score writing and applying Body, Effort, Shape and Space Harmony paradigms. Utilizes physical performance and written and verbal observation methods. Examines application to disciplines that concern themselves with human movement behavior such as behavioral sciences, theater, communications, human performance, human development, business, and education.

DANC 3680
Dance Kinesiology
4:4:0 Spring
* Prerequisite(s): (ZOOL 1090 or ZOOL 2320) and University Advanced Standing

Studies the neuromusculoskeletal system in practical application to dance. Analyzes demands placed on the dancer's body and identifies how to maximize efficiency and reduce injuries while maintaining requisite aesthetic elements. Includes lecture and lab experiences.

DANC 3690
Motif and Labanotation I
2:2:0 Not Offered
* Prerequisite(s): DANC 265R, DANC 2670, and University Advanced Standing

Teaches Motif Writing and beginning Labanotation. Expands students' understanding of the written symbol system of Laban Movement Analysis and deepens observation and analysis skills critical for understanding dance and varied manifestations of human movement expression. Relates Motif Writing and Labanotation to dance history and current dance choreography and performance. Includes application of Motif Writing to teaching dance technique, composition, and improvisation. Emphasizes the theory of human movement description and analysis formulated by Rudolph Laban and requires students to both write and read beginning to intermediate level notated scores. Includes lecture, discussion, observation, and participation including reading from score, written and embodied symbology assignments, teaching assignments, and completion of several creative projects.

DANC 370R
American Social Dance III
1:0:3 Fall, Spring
* Prerequisite(s): Instructor Approval

For students who have successfully completed Bronze and Silver American Social Dance courses and for members of the Ballroom Tour Team. Teaches the advanced (Gold) level patterns of American Style Foxtrot, Cha Cha, Waltz, Triple Swing, Viennese Waltz, and West Coast Swing. Emphasizes, on an advanced level, correct poise, style, rhythm. Also teaches correct footwork, foot position, alignments, rise and fall, partnering, correct leading and following, and etiquette. First semester successful completers will have a general knowledge of Gold level curriculum. Second semester successful completers will have an in-depth knowledge of Gold level curriculum. May be repeated for two credits toward graduation. Course fee of $30 for practical experience applies.

DANC 371R
International Ballroom Dance III
1:0:3 Fall, Spring
* Prerequisite(s): Instructor Approval

For students who have completed Bronze and Silver International Ballroom Dance courses, and for members of the Ballroom Tour Team. Teaches the advanced (Gold) level patterns of International Style Waltz, Quickstep, Tango, Foxtrot, and Viennese Waltz. Emphasizes, on an advanced level, correct poise, style, rhythm. Also teaches correct footwork, foot positions, alignments, rise and fall, partnering, floor craft, and correct leading and following. First semester focuses on developing a general knowledge of Gold level curriculum. Second semester focuses on developing an in-depth knowledge of Gold level curriculum. May be repeated for a maximum of 4 credits toward graduation. Course fee of $30 for practical experience applies.

DANC 372R
Latin Ballroom Dance III
1:0:3 Fall, Spring
* Prerequisite(s): Instructor Approval

For students who have successfully completed Bronze and Silver Latin Ballroom Dance courses and for members of the Ballroom Tour Team. Teaches the advanced (Gold) level patterns of Latin Style Rumba, Samba, Cha Cha, Paso Doble, and Jive. Emphasizes, on an advanced level, correct poise, style, rhythm. Also teaches correct footwork, foot position, alignments, rise and fall, partnering, correct leading and following, amounts of turn, Cuban action, and movement principles. First semester focuses on developing a general knowledge of Gold level curriculum. Second semester focuses on developing an in-depth knowledge of Gold level curriculum. May be repeated for a maximum of 4 credits toward graduation. Course fee of $30 for practical experience applies.
Course Descriptions

DANC 3730  
American Social Dance Teaching Methods  
2:2:0  
Spring  
* Prerequisite(s): DANC 1700 or equivalent skill level, DANC 270R or equivalent skill level, and University Advanced Standing  
For dance majors and other students with an interest in teaching social dance. Focuses primarily on teaching techniques using Bronze level patterns. Emphasizes calling steps. Explores proper music selection and tempo. Includes actual teaching time of peers and a beginning class. Completers should be able to adequately teach social dance in either a formal or informal setting.

DANC 3740  
Ballroom Dance Choreography  
2:1:2  
Spring  
* Prerequisite(s): (DANC 270R, DANC 271R, DANC 272R, or Instructor Approval) and University Advanced Standing  
Investigates and explores the choreographic process with reference to choreographic concepts. Involves the creation of dance skills that give shape and form to ideas based on a specific theme, style, or statement. Includes Latin, International Ballroom, American Rhythm and Smooth, and Cabaret styles. Explores formation team competition, solo couple competition, formation team stage performance, and solo couple stage performance as part of the creative process.

DANC 3750  
Studies in Ballroom Dance Styles  
2:2:0  
Fall  
* Prerequisite(s): (ENGL 1010 or ENGH 1005) and University Advanced Standing  
Investigates and explores historical ballroom dance styles. Emphasizes the social and cultural context in which ballroom dance is created and performed. Includes career, life style, education, gender, moral and ethical concerns related to ballroom dance issues. Also covers ballroom dance history, evolution, and current trends. Identifies similarities and differences between ballroom dance and other dance forms. Involves discussion, lecture, research, student presentations and participation.

DANC 376R  
Ballroom Dance Company Back-up Tour Team  
2:0:6  
Fall, Spring  
* Prerequisite(s): Audition  
For students with advanced ballroom dance experience. Teaches American, International Ballroom, and Latin techniques using intermediate and advanced choreography in performance and competitive discipline. Includes choreography, stage performances, competitions, and demonstrations with increased emphasis on dance technique and proper execution of formations. Requires individual practice. Prepares dancers for audition to touring team. May be repeated for eight credits toward graduation. Course fee of $50 for specialized clothing and materials applies.

DANC 421R  
Pointe IV  
1:0:3  
Fall, Spring  
* Prerequisite(s): Advanced equivalent skill level to be determined by audition  
* Corequisite(s): DANC 427R  
For women dance majors and other students with an interest in the professional dance world. Emphasizes pointe. Continues to build strength and control through increased complex combinations. Explores advanced levels of styles from classical and contemporary repertoire. Develops virtuosity en pointe. Prepares students to perform at a professional technical skill level. Includes guest teachers. May be repeated for a total of six credits toward graduation. Course Lab fee of $120 for support applies.

DANC 422R  
Ballet Technique and Theory IV for Men  
1:0:3  
Fall, Spring  
* Prerequisite(s): Intermediate/Advanced equivalent skill level to be determined by audition  
* Corequisite(s): DANC 227R or DANC 327R or DANC 427R  
Emphasizes jumps, turns and other technical abilities specifically for men at an advanced level. Builds strength and control necessary for performing male variation, particularly from the classical ballet repertoire. Explores the development of musicality as it relates to artistic interpretations. May be repeated for a total of eight credit hours.

DANC 423R  
Pointe V  
1:0:3  
Fall, Spring  
* Prerequisite(s): DANC 321R or to be determined by audition  
* Corequisite(s): DANC 427R or DANC 428R  
For women dance majors and other students with an interest in the professional dance world. Emphasizes pointe. In-depth study of styles from classical and contemporary repertoire. Women develop successful virtuosity en pointe. Completers will have skills necessary to perform at an professional technical and artistic skill level and have the advanced experience necessary to pursue a professional career in Dance. Includes guest teachers. May be repeated for a total of six credits toward graduation. Course Lab fee of $120 for support applies.

DANC 424R  
Pas de deux  
1:0:2  
Fall, Spring  
* Prerequisite(s): (DANC 321R or DANC 327R) and (DANC 421R or DANC 427R or DANC 428R); advanced equivalent skill level to be determined by audition  
* Corequisite(s): (DANC 427R or DANC 428R) and (DANC 424R or DANC 423R)  
For dance majors and other students with an interest in developing their advanced level technique. Emphasizes work as pairs through tradition styling and classical technique. Explores various pas de deuxs from classical and through contemporary repertoire. Includes master guest teachers and study of traditional classical pas de deux choreography. Teaches skills necessary to perform pas de deux from classical repertoire. May be repeated for a total of four credits toward graduation. Course Lab fee of $126 applies.

DANC 425R  
Repertory Ballet Ensemble  
3:0:9  
Fall, Spring  
* Prerequisite(s): Audition required  
* Corequisite(s): DANC 327R or DANC 427R  
For serious ballet students showing a high level of talent and technical achievement. Explores the development of artistic interpretation as students learn styles of various repertoire works. Prepares students to perform as a competent corps de ballet member. May be repeated for a maximum of 9 credits toward graduation. Course fee of $50 for specialized clothing applies.

DANC 4260  
Ballet Pedagogy  
3:2:2  
Fall  
* Prerequisite(s): University Advanced Standing  
Emphasizes appropriate teaching methodologies for all levels of ballet technique, pointe and men's class. Develops interpersonal skills as they relate to classroom management. Explores the styles and teaching methodologies of all ballet schoolings/styles to help students develop and construct effective lesson plans and curriculum. Course lab fee of $61 applies.

DANC 427R  
Ballet Technique IV  
3:1:6.5  
Fall, Spring  
* Prerequisite(s): DANC 327R or advanced equivalent skill level to be determined by audition  
* Corequisite(s): DANC 421R  
For ballet students at an advanced skill level who are able to handle the varying technical difficulties of classical ballet. Provides experience in barre and center floor work to increase strength and flexibility. Emphasizes the development of musicality as it relates to artistic interpretations. Successful completers will be prepared to participate on a corp de ballet professional performance level. May be repeated for a total of 18 credits toward graduation. Course Lab fee of $216 for support applies.

DANC 428R  
Ballet Technique V  
3:1:6.5  
Fall, Spring  
* Prerequisite(s): DANC 427R or advanced equivalent skill level to be determined by audition  
* Corequisite(s): DANC 421R or DANC 423R  
For ballet students who successfully audition for Utah Regional Ballet Company at an advanced skill level and artistic skill level who are prepared for the technical difficulties required at a professional level. Provides hands-on experience in barre and center floor work to fully develop the professional artist. Successful completers will be prepared to participate on a professional performance level. May be repeated for a total of 24 credits toward graduation. Course Lab fee of $216 for support applies.
DANC 429R
Utah Metropolitan Ballet Repertory
3:0:9 Fall, Spring
* Prerequisite(s): Advanced/Professional Skill level; determined by audition
* Corequisite(s): DANC 421R, DANC 423R or DANC 427R, DANC 428R

For serious ballet students showing a high level of talent and technical achievement. Explores the development of artistic interpretation as students learn styles of various repertoire works. Successful completers should be qualified to perform as a competent corps de ballet member. May be repeated for a maximum of 9 credits toward graduation. Course fee of $50 for specialized clothing applies.

DANC 4350
Senior Capstone I
1:1:0 Fall
* Prerequisite(s): DANC 3140, DANC 3630, DANC 3680, and DANC 3340, or DANC 3350, or DANC 3740, and University Advanced Standing

The first of two courses designed to prepare senior dance majors with the skills, resources, and portfolio/ marketing materials needed to apply for graduate work or professional opportunities in dance. Emphasizes portfolio development and biographical writing, personal web page creation, audition and interview strategies, and dance resources. Includes writing, performance, research, and multimedia work.

DANC 4360
Senior Capstone II
2:2:0 Spring
* Prerequisite(s): DANC 3680 and DANC 4350 and DANC 4880 and (DANC 3340 or DANC 3350 or DANC 3740 with a B- or higher) and University Advanced Standing

Designed for senior dance students as the second course in a capstone sequence. Emphasizes through choreography, performance, and production a synthesis of the knowledge and skills developed in the B.S. and B.F.A. degrees in Dance. Includes writing, collaborative work, discussion, lecture, and intensive studio preparation of choreography.

DANC 441R
Modern/Contemporary Dance Technique and Theory Level IV/Semester I
3:1:6.5 Fall
* Prerequisite(s): By audition

Builds technical, performance, and theoretical understanding and skills in modern dance/contemporary dance. Emphasizes body and performance techniques, axial and locomotor skills, total body connectivity, movement progressions, increased spacial, rhythmical and qualitative acuity, risk-taking, and movement commitment. Includes aspects of composition, improvisation, and performance as they relate to technique. May be repeated for up to 9 credits total toward graduation. Course Lab fee of $216 for support applies.

DANC 442R
Modern/Contemporary Dance Technique and Theory Level IV/ Semester II
3:1:6.5 Spring
* Prerequisite(s): DANC 441R or by audition

Builds rigorous technical, performance, and theoretical training. Emphasizes advanced performance sequences and progressions that utilize technical, kinesthetic, and expressive skills. Includes challenging spacial, rhythmical, and qualitative performance skills, risk-taking, and movement commitment. Includes aspects of composition, improvisation, and performance as they relate to technique. May be repeated for up to 9 credits total toward graduation. Course Lab fee of $216 for support applies.

DANC 4430
Dance Teaching Practicum
3:2:3 Spring
* Prerequisite(s): DANC 3450 and University Advanced Standing

For secondary dance licensure majors or dance majors interested in dance pedagogy. Builds on the methodologies, strategies, ideologies and philosophies of dance pedagogy studied in DANCE 3430. Emphasizes lesson plan and unit development, instruction, and assessment based on the National and Utah State Dance Standards. Focuses on the integration of theory and practice during a practicum experience in the secondary public schools setting. Includes writing, reading, discussion, and participation.

DANC 446R
Contemporary Dance Ensemble
3:0:9 Fall, Spring
* Prerequisite(s): By audition

* Corequisite(s): DANC 341R or DANC 342R or DANC 441R or DANC 442R

Designed for students with advanced technical, performance, and artistic skills. Provides students interested in further developing their artistry with opportunities to perform the works of professional choreographers in formal and informal settings. Explores a variety of contemporary and historical choreographic approaches. Prepares students for work in a professional modern dance company. May be repeated for a maximum of 9 credits toward graduation. Course Lab fee of $75 for practical experience applies.

DANC 472R
Latin Ballroom Dance IV
2:1:2 Fall, Spring
* Prerequisite(s): Instructor Approval

For students who have successfully completed Bronze, Silver and Gold International Ballroom Dance classes and for members of the Ballroom Tour Team. Includes preparation to dance, choreograph and compete on a championship amateur level. Teaches the advanced (Gold-Bar) level patterns of Latin style Rumba, Samba, Cha Cha, Paso Doble, and Jive. Emphasizes, on a pre-professional level, correct poise, style, and rhythm. Also teaches and enhances correct footwork, foot positions, alignment, rise and fall, partnering, floor craft, body flight, precedes and follows, and correct leading and following. First semester focuses on developing a general knowledge of Gold-Bar level curriculum. Second semester focuses on developing an in-depth knowledge of Gold-Bar level curriculum. May be repeated for a maximum of 8 credits toward graduation. Course fee of $30 for practical experience applies.

DANC 4740
International Ballroom and Latin Teaching Methods
3:3:0 Fall
* Prerequisite(s): DANC 271R, DANC 272R, DANC 3730, and University Advanced Standing

Covers technical and theoretical aspects of basic figures in Waltz, Tango, Foxtrot, Quickstep, Cha Cha, Samba, Rumba, Paso Doble, and Jive, such as footwork, amounts of turn and rhythm. Emphasizes correct teaching methods associated with each dance. Prepares students to obtain membership in the Imperial Society of Teachers of Ballroom Dance and to teach professionally.

DANC 476R
Ballroom Dance Company Tour Team
3:0:9 Fall, Spring
* Prerequisite(s): Audition

For students with advanced Ballroom Dance Team experience. Audition required. Teaches advanced technique in performance and competitive discipline. Includes choreography, performances, demonstrations, and tours, in formation team dancing, stage performance, team competition, team match, and individual competitive events. Requires individual practice. May be repeated for 9 credits toward graduation. Course fee of $100 for specialized clothing and materials applies.

DANC 481R
Internship in Dance II
1 to 3:1 to 3:0 Fall, Spring
* Prerequisite(s): Matriculation in BFA or BS in Dance and Departmental Approval, and University Advanced Standing

Provides an opportunity for upper-division students to receive college credit and work in a dance-related field. Offers students the opportunity to focus on a specific career path and prepare themselves to enter the profession. Applies academic concepts to actual work experiences. Requires approval of faculty sponsor and completion and acceptance of application. Also requires completion of an orientation, completion of Master Agreement between UVU and employer, completion of goals and tasks as required by academic department, and completion of final evaluation. May be repeated for a total of 6 credits towards graduation. May be graded credit/no credit.
DANTC 4880
Current Issues in Dance
3:3:0  Fall
* Prerequisite(s): DANC 3630, and University Advanced Standing
Introduces students to the issues and philosophical views that have influenced dance and other art forms. Examines current trends and issues in dance. Includes lecture, discussion, readings, video, guest artists, and collaborative projects.

DANTC 4920
Dance as Cultural Practice
3:3:0  Not Offered
* Prerequisite(s): DANC 2110 and (DANC 365R or DANC 3670) and University Advanced Standing
Designed for students with an interest in dance and cultural representation. Takes a critical cultural approach to the study of dance as a means of encoding cultural values. Analyzes issues of gender, identity, religion, power, art, semiotics, and media/technology in relation to dance. Explores the effects of dance as cultural representation on society. Emphasizes critical theories of dance, representation, identity, feminism, and postmodernism. Requires student presentation of research projects.

Dental Hygiene (DENT)

DENT 1010
Dental Hygiene I
3:3:0  Fall
* Prerequisite(s): Acceptance into Dental Hygiene Program
* Corequisite(s): DENT 1015
For students accepted into the Dental Hygiene Program. Introduces basic principles and skills used in the practice of dental hygiene, including infection control, patient assessment and treatment. Requires practicing on dental mannequins and student patients. Teaches all skills to clinical competence. Builds on basic and dental sciences and is foundational for the ensuing Dental Hygiene II, III, and IV courses. Course fee of $3175 for practical experience applies.

DENT 1015
Dental Hygiene I Preclinical lab
2:0:6  Fall
* Prerequisite(s): Acceptance into Dental Hygiene Program
* Corequisite(s): DENT 1010
For students accepted into the Dental Hygiene Program. Introduces basic principles and skills used in the clinical practice of dental hygiene, including infection control, patient assessment and treatment. Skills are practiced in a preclinical setting on dental mannequins and student patients; all skills are taught to clinical competence. Builds on basic and dental sciences and prepares for clinical dental hygiene practice on community patients. Course Lab fee of $73 applies.

DENT 1020
Oral Anatomy and Physiology
4:4:0  Fall
* Prerequisite(s): Acceptance into Dental Hygiene Program
For students in the Dental Hygiene Program. Focuses on study in the normal development, structure, and function of the orofacial region. Provides microscopic and macroscopic study of oral structures in a laboratory setting. Builds on basic sciences and prepares for the study of the dental sciences and clinical dental hygiene.

DENT 1030
Dental Materials
2:1:3  Spring
* Prerequisite(s): Accepted into Dental Hygiene program
Presents the history, composition, chemical, and physical properties and use of materials commonly utilized in the dental laboratory and dental operatoriy. Builds on dental sciences. Provides laboratory experience in performing common dental laboratory procedures and prepares for the clinical practice of expanded functions. Course Lab fee of $75 applies.

DENT 1040
Dental Hygiene II
3:3:0  Spring
* Prerequisite(s): Acceptance into Dental Hygiene Program
* Corequisite(s): DENT 1015
Provides advanced dental hygiene modalities, including oral health education, practice management, patient assessment and treatment. Emphasizes treatment planning and emergency preparedness. Builds on basic and dental sciences and prepares for clinical dental hygiene practice. Course fee of $3175 for practical experience applies.

DENT 1045
Dental Hygiene II Clinical
3:0:9  Spring
* Prerequisite(s): Acceptance into Dental Hygiene Program
* Corequisite(s): DENT 1040
Provides for developing clinical dental hygiene skills, practiced on patients in a clinical setting, including oral health education, practice management, patient assessment and treatment. Emphasizes treatment planning and emergency preparedness. All skills are taught to clinical competence. Builds on basic and dental sciences and prepares for clinical dental hygiene practice. Course Lab fee of $85 applies.

DENT 1050
Clinical Dental Radiography
1:1:0  Fall
* Prerequisite(s): Acceptance into Dental Hygiene Program
* Corequisite(s): DENT 1055

DENT 1055
Clinical Dental Radiography Lab
1:0:3  Fall
* Prerequisite(s): Acceptance into Dental Hygiene Program
* Corequisite(s): DENT 1050

DENT 1060
General and Oral Pathology
2:2:0  Spring
* Prerequisite(s): Acceptance into Dental Hygiene program
Focuses on the study of commonly encountered systemic and oral diseases; etiology, presentation, treatment and effect on dental treatment, including associated emergency procedures. Emphasizes the principles of inflammation, immunology, healing, and repair. Builds on basic and dental sciences and prepares for clinical dental hygiene practice.

DENT 1070
Medical Emergencies in the Dental Office
2:2:0  Fall
* Prerequisite(s): Acceptance into Dental Hygiene program
Introduces the basic principles and management of medical emergencies that could occur in a dental office, including the care and clinical management of medically compromised patients.

DENT 2020
Dental Pharmacology
3:3:0  Spring
* Prerequisite(s): Acceptance into Dental Hygiene Program
Focuses on pharmacology as it affects the clinical practice of dentistry. Emphasizes drugs commonly used in dentistry, for treatment of common systemic and oral diseases, and for emergency treatment: effects, administration, and toxicity. Builds on basic and dental sciences and prepares for clinical dental hygiene practice.

DENT 206G
Oral Public Health
3:2:3  Fall, Spring
* Prerequisite(s): Acceptance into the Dental Hygiene Program
Examines the principles of community health, including assessment, planning, implementation, and evaluation of health care, with an emphasis on oral health. Builds on knowledge of ethics, basic and dental sciences, and clinical dental hygiene practice. Provides the knowledge and skills necessary to function in a community health setting and includes learning experiences in community health agencies. Analyzes and evaluates global or intercultural issues. Evaluates cultural rules and biases. Explores stereotypical cultural conceptions.
DENT 3010 Dental Anesthesiology 3:3:0 Fall
* Acceptance into Dental Hygiene program and University Advanced Standing
* Corequisite(s): DENT 3015
Focuses on pain control to include local and topical analgesia, nitrous oxide, conscious sedation, and other means of pain control that will be taught to the accepted standard of care. Requires application of knowledge gained from this course to direct clinical application on their patients in the clinical setting. Builds on basic and dental sciences and prepares the student for clinical dental hygiene practice and will also prepare the student for their local anesthesia boards exams. Course fee of $3175 for practical experience applies.

DENT 3015 Dental Hygiene III Clinical 4:0:12 Fall
* Prerequisite(s): Acceptance into Dental Hygiene program and University Advanced Standing
* Corequisite(s): DENT 3010
Introduces skills involving oral anesthesia (pain control) and supportive periodontal treatment. Utilizes advanced skills of dental hygiene practice, including assessment and treatment on patients of all ages in a clinical setting, with emphasis on planning and comprehensive treatment. Requires demonstration of clinical competence unless otherwise noted in the course outline. Includes more rigorous skill and patient difficulty levels than the first year clinical experiences. Builds on basic and dental sciences and foundational skills to include DENT3010, and prepares the student for clinical dental hygiene practice. Course Lab fee of $63 applies.

DENT 3030 Periodontology 3:3:0 Fall
* Prerequisite(s): Acceptance into the Dental Hygiene Program and University Advanced Standing
Focuses on the study of the healthy periodontal tissues, and the factors, recognition, and classes of periodontal disease. Provides background knowledge of nonsurgical and surgical treatment of periodontal disease. Builds on basic and dental sciences and prepares for clinical dental hygiene practice.

DENT 3040 Dental Hygiene IV 2:2:0 Spring
* Prerequisite(s): Acceptance into Dental Hygiene program and University Advanced Standing
* Corequisite(s): DENT 3045
Provides comprehensive didactic experience in all phases of dental hygiene practice for patients, regardless of special needs. Introduces nutritional and tobacco cessation counseling. Builds on basic and dental sciences and prepares for various practice settings in clinical dental hygiene. Course fee of $3175 for practical experience applies.

DENT 3045 Dental Hygiene IV Clinical 4:0:12 Spring
* Prerequisite(s): Acceptance into Dental Hygiene program and University Advanced Standing
* Corequisite(s): DENT 3040
Provides comprehensive clinical experience in all phases of dental hygiene practice for patients, to include special needs. Course teaches to clinical competence. Introduces nutritional and tobacco cessation counseling. Builds on basic and dental sciences and prepares for various practice settings in clinical dental hygiene. Course Lab fee of $63 applies.

DENT 3050 Dental Hygiene Seminar 1:1:0 Spring
* Prerequisite(s): Acceptance into the Dental Hygiene Program
Explores topics relevant to contemporary practice of dental hygiene, including their professional roles, career and stress management, ethical and legal aspects, and the role of the dental hygienist in the dental specialty practices. Builds on clinical practice and prepares for entry into the many aspects of the profession of dental hygiene. Includes observation of various dental specialty practices.

DENT 3060 Advanced Dental Hygiene Public Health 3:3:0 Spring
* Prerequisite(s): DENT 206G and University Advanced Standing

DENT 3100 Office and Private Practice for the Dental Hygienist 3:3:0 Fall
* Prerequisite(s): 2 year hygiene degree, departmental approval, and University Advanced Standing
Expands beyond the dental hygiene basics taught in hygiene school. Addresses topics in dental hygiene practice that will help the clinical dental hygienist become more proficient in their field and a leader in dental hygiene. Studies practice management issues, productivity, salary enhancement, cutting edge technology, dental insurance, salaries and benefits, team work, patients and money considerations, and other challenges faced in the dental hygiene profession.

DENT 3200 Teaching the Dental Hygiene Patient 3:3:0 Summer
* Prerequisite(s): Admission to the BS Dental Hygiene and University Advanced Standing
Addresses areas such as learning theories, teaching strategies, societal-cultural considerations, and evaluation and applies them specifically to the needs of the dental hygienist when teaching his/her patients and the community at large.

DENT 406G Global Community Health Project 3:3:0 Summer
* Prerequisite(s): Admissions to the Dental Hygiene Program or upon approval by program director, and University Advanced Standing
Addresses the complexities inherent in global and/or intercultural oral health and the community health theories and strategies used to address these concerns. Includes the planning and execution of a 10 day oral health education or service project in either another culture or another country (e.g., Native American reservation in Utah or Guatemala). Students from all disciplines may participate.

DENT 4200 Teaching the Dental Hygiene Student 3:3:0 Summer
* Prerequisite(s): DENT 3200, DENT 3060, and University Advanced Standing
Prepares the dental hygienist to become a successful educator in a dental hygiene program by addressing areas such as: learning theories, teaching strategies, learning objectives, lesson plans, syllabi, curriculum design evaluation tools, and roles of an educator. May be delivered online.

DENT 4300 Dental Hygiene Capstone 1:1:0 Spring
* Prerequisite(s): Admission to the BS Dental Hygiene and University Advanced Standing
Requires the student to integrate several main areas of study in the BS program and create a paper or project that reflects comprehensive knowledge and ability to reflect, connect and then produce a work based on their learning experiences throughout the BS program.

DENT 481R Internship in Dental Hygiene 1 to 4:1 to 4:0 Spring
* Prerequisite(s): University Advanced Standing and Dental Hygiene Department approval
Utilizes the student's current practice as a dental hygienist to further apply and develop their skills and knowledge. May be repeated for up to 8 credits toward the BS Dental Hygiene.

DENT 489R Undergraduate Research in Dental Hygiene 3:0:9 Summer
* Prerequisite(s): Departmental Approval and University Advanced Standing
Explores research proposal process and design. Provides opportunity to develop basic research skills in searching and critically appraising evidence-based literature. Engages in evidence-based decision making, developing clinical questions and translating research into practice. Creates a significant intellectual and creative research proposal in the dental discipline. May be repeated for a maximum of 6 credits toward graduation.
DENT 490R  
Special Topics in Dental Hygiene  
3:3:0  
Summer  
* Prerequisite(s): University Advanced Standing and Accepted into Dental Hygiene program

Explores special topics in Dental Hygiene. Focuses on special topics of current and future relevance to the profession of dental hygiene including societal, economic, and cultural impacts of topics. Topics are subject to change from year to year. May be repeated for a maximum of 6 credits toward graduation.

Digital Media (DGM)

DGM 1061  
Digital Cinema Editing I  
3:3:1  
Fall, Spring, Summer

Introduces the interface, tools, techniques, and operations of a variety of Non-Linear Editing (NLE) software programs. Introduces standard editing concepts and practices necessary for the creation and completion of Digital Cinema projects made for various distribution channels. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 1062  
Animation for the Internet  
2:1:3  
On Sufficient Demand

Introduces the interface, tools set, tweening techniques, and operations of an animation software package for online use. Requires creation of an interactive project with sound, video, and motion. Introduces basic scripting. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 1063  
Image Editing  
2:1:3  
Fall, Spring

Introduces students to the interface, fundamental set of tools, techniques and operations of Photoshop. Requires creation and modification of digital images. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 1110  
Digital Media Essentials I  
4:4:0  
Fall, Spring, Summer

Beginning course designed to give students an in-depth introduction and well-grounded understanding of the digital media way of thinking, opportunities in the field, various tools, and introduction to development techniques. Topics include: audience assessment, digital imaging, compression algorithms, ethical dilemmas, message design through text, audio, images, animation, and digital video. May be delivered online. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 1220  
Digital Design Essentials  
3:3:0  
Fall, Spring

Teaches fundamentals of digital layout for web development and how to properly create engaging interfaces for digital media. Addresses technical challenges for digital mediums to deliver effective digital experiences. Introduces basic content creation and sprint thinking independent of software platforms. Lab access fee of $45 for computers applies.

DGM 1230  
Interaction Design Essentials  
3:3:0  
Fall, Spring

* Prerequisite(s): DGM 1220

Implements creative development layouts into interactive designs. Focuses on integration with industry development tools. Introduces basic overview of product development, pattern libraries, layout and development standards using interaction and industry practices for digital experiences. Lab access fee of $45 for computers applies.

DGM 1240  
Communicating Digital Design  
3:3:0  
Fall, Spring

* Prerequisite(s): DGM 1230

Focuses on the development of highly creative and visual design documentation; how to communicate both written and visual information in meaningful ways in a highly technical field. Teaches why communicating a particular design challenge is just as important as the design itself, and why writing, layout, and visual clarity is critical to mastering UX and Digital Product Design. Sets the foundation for all document assignments in the Web Design and Development degree. Lab access fee of $45 for computers applies.

DGM 1500  
Intro to Digital Cinema  
1:1:0  
Fall

Offers an overview of the Digital Cinema major and industry. Teaches students the expectations and time tables required of them as they progress through the major. Develops a broad understanding of the various aspects of the filmmaking process and how training for these various aspects is conducted at UVU. Emphasizes industry standards of safety and professionalism. Should be taken in the first semester of classes in the program. Lab access fee of $45 for computers applies.

DGM 1510  
Film Production Analysis  
3:1:6  
Fall, Spring

Film Production Analysis is a foundation class for those interested in the digital media and motion picture business. Analyzes the various technologies and production techniques that make up motion picture communication. Involves viewing a motion picture each week of class and analyzing how the producer and director incorporated production and structural techniques to produce a compelling story. Covers the eight sequence structural elements of motion picture storytelling, how each crew member of the production team contributes to the overall impact, how scripting is used to direct the team to create a strong cinematic effect, and how the three act eight sequence structure guides the entire team through the pre-production, production and post-production process. Software fee of $15 applies. Course fee of $18 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 1520  
Digital Cinema Production I  
3:2:2  
Fall, Spring, Summer

Introduces professional video production techniques used for non-narrative digital cinema projects. Covers production processes such as working with clients, storytelling, camera techniques, basic lighting techniques, production management and basic non-linear editing techniques. Requires participation in a high-quality semester project that will take a non-narrative project through the entire pre-production, production and post-production process. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 1550  
Survey of Animation  
3:2:3  
Fall, Spring, Summer

Introduces animation principles and studio processes used in the contemporary animation industry. Emphasizes the synthesis of technology and aesthetics in the production of an animated title. Includes an introduction to animation milestones and personalities. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 1560  
Introduction to 3D Modeling and Surfacing  
3:3:0  
Fall, Spring

Covers the 3D pipeline which includes pre-production (rough placeholder art), production (finished art), and post production (composite and effects). Instructs students to develop 3D models, UV maps, and 2D textures. Teaches how to integrate models into a realtime rendering engine. Lab access fee of $45 for computers applies.
DGM 210R
Special Topics in Digital Media
1 to 4:0 to 4:0 to 12  On Sufficient Demand

Designed for students interested in specific digital media tools and concepts. Includes relevant and changing topics and tools used in production. Emphasizes hands-on experience along with lectures and demonstrations. This class may be taken for a total of nine credits, but curriculum may vary from one semester to another. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2110
Digital Cinema Production II
3:2:2  Fall, Spring, Summer
* Prerequisite(s): DGM 1250

Presents professional digital cinema production techniques used in narrative filmmaking. Addresses problem-solving issues related to pre-production, production and post-production. Serves as a Production Assistant Certification course recognized by the Utah Film Commission. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2120
Web Essentials
3:3:0  Fall, Spring, Summer

Provides the fundamentals necessary to plan, design, develop, deploy, and critique a web site which includes images, sound, video, forms, and separates content from presentation. Focuses on the fundamentals of web programming languages. Examines various ways to build an accessible web page. May be delivered hybrid and/or online. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2130
Digital Audio Essentials
3:2:3  Fall, Spring, Summer
* Prerequisite(s): MAT 1010

Reviews basic sound principles, cable types, microphone types, and basic techniques of use. Teaches recording of basic sounds and musical instruments into a Digital Audio Workstation. Introduces multi-track audio, editing, EQing, mixing, and mastering a 3-minute piece with voice and music. Includes a final project consisting of a multi-track music project designed for use in film, commercial radio, or other multimedia applications. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2140
Electronics for Media
3:2:3  Fall

Covers connectors and cable wiring standards and soldering techniques used in this field. Emphasizes electronic equipment and circuits used with electrical safety in media. Includes basic DC/AC theory such as voltage, current, resistance, power dissipation, batteries, and magnetism. Introduces the basic construction and theory of operation of circuits used in media containing electronic components, resistors, capacitors, inductors, transformers, diodes, transistors, electron tubes, operational amplifiers, and linear ICs. Designed for Digital Media students. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 220R
Special Topics in Digital Design
1 to 4:0 to 4:0 to 12  On Sufficient Demand

Designed for students interested in specific authoring tools and concepts used in digital media processes. Includes relevant and changing topics and tools used in digital authoring. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for a maximum of nine credits toward graduation. Course fee of $10 for materials applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2210
3D Modeling and Animation Essentials
4:3:3  Fall, Spring, Summer
* Prerequisite(s): Portfolio Acceptance

Addresses the basics of 3D modeling, rigging, texturing, animation, and rendering. Demonstrates how to utilize these techniques in a production pipeline for games and animation. Includes basic techniques and theories used in a 3D animation pipeline. Software fee of $15 applies. Course fee of $19 for equipment applies. Lab access fee of $45 for computers applies.

DGM 2211
Rigging and Animation Essentials
3:2:3  Spring
* Prerequisite(s): Portfolio Acceptance

Introduces fundamental rigging for a typical 3D character and simple 3D performance motion for animated films and games. Software fee of $15 applies. Lab access fee of $45 applies.

DGM 221R
Interaction Design Practicum
1:0:3  Spring
* Prerequisite(s): DGM 2250

Instructs in the design and production of a fully-featured digital media project, including concept, design, content creation and acquisition, testing, revision, mastering, and publication with hands-on guidance. May be repeated for a maximum of 3 credits toward graduation. Lab access fee of $45 for computers applies.

DGM 2221
Game Essentials
3:2:3  Fall
* Prerequisite(s): Portfolio Review Acceptance

Provides a foundation for basic game development pipeline. Covers low poly count modeling in a variety of software packages and use of 3D models in an industry-standard game development engine. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2240
Interaction Design
3:3:0  Fall, Spring
* Prerequisite(s): DGM 1230

Focuses on strategies and principles used in digital media development to enhance the user experience. Teaches how to understand stakeholder goals, identify and specify user needs and requirements through user research and design documentation, engage in interactions with target audiences through interviews, observation, and discussion, as well as create and test prototypes. Deals with solving real-world problems faced by consumers using products in the market. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2250
Principles of Digital Design
3:3:0  Fall, Spring
* Prerequisite(s): DGM 1220

Teaches principles of visual design, how to properly create engaging interfaces for digital media, and practice good integration with industry development tools. Addresses the complexity of designing rich media experiences around digital devices ranging from computer screens to personal information devices. May be delivered online. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2260
Immersive Authoring I
3:3:0  Fall
* Prerequisite(s): DGM 1230

Focuses on the application of media technologies that possess the ability to create rich immersive experiences for distribution on optical media such as CD, DVD-ROM, and over the Internet. Introduces participants to a variety of authoring systems and development techniques when creating Digital Media experiences. *Laptop Required. May be delivered online. Software fee of $15 applies. Course fee of $18 applies. Lab access fee of $45 for computers applies.

DGM 2270
Digital Publishing I
3:3:0  Fall
* Prerequisite(s): DGM 1230

Focuses on the development of engaging mobile apps for distribution on a myriad of devices. Teaches the fundamental building blocks of publishing digital media experiences of all types and may include interactive guide, catalogs, brochures, training manuals, kiosks, and exhibits. Covers the development of apps for touchscreen ‘native’ content and feature real-time updates. *Laptop & Device Required May be delivered online. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2271
Digital Media Design I
3:3:0  Fall, Spring
* Prerequisite(s): DGM 2120

Introduces students to the underlying design and development principles that create favorable circumstances for user-centered digital media experiences. Establish the development techniques and processes required for Web and mobile apps, which may include native OS and Web Apps as well as interactive digital publication Apps. Further introduces topics such as responsive design, use of grids and layout patterns according to platform, as well as underlying development considerations such as content inventory and Information Design. Offers students a greater appreciation for good design and the basic skills necessary to produce world-class media experiences. May be delivered online. Software fee of $15 applies. Lab access fee of $45 for computers applies.
Course Descriptions

DGM 2280
Digital Effects I
3:3:0 Fall, Spring
* Prerequisite(s): DGM 1230

Focuses on the use of digital visual effects in mobile publishing environments. Includes multi-layer effects in known mobile layouts, creation of digital mattes and parallax for unique visual user engagement, as well as integration techniques according to development platforms. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 230R
Special Topics in Digital Graphics
1 to 4:0 to 4:0 to 12 On Sufficient Demand

Designed for students interested in specific graphic tools and concepts currently used in digital media production. Includes relevant and changing topics and tools. Emphasizes hands-on experience along with lectures and demonstrations. This class may be taken for a total of nine credits, but curriculum may vary from one semester to another. Course fee of $10 for materials applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2320
Digital Photography and Compositing I
3:3:0 Fall, Spring

Introduces digital image acquisition and manipulation. Teaches the mechanics of the digital camera, and introduces lighting, white balance, color temperature, digital ISO and electronic image stabilization. Discusses image compositing, EXIF data analysis and archiving. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2340
Output and Color for Digital Cinema I
3:2:2 Fall, Spring
* Prerequisite(s): DGM 1061

Introduces digital workflow management of digital still and cinema camera assets. Addresses codecs, asset backup, management, transcoding, preparation of assets for the NLE workflow and final asset output for various digital distribution channels. Introduces color correction and color grading techniques, principles and concepts in a variety of professional software platforms. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2341
Digital Output for Interactive Media
3:3:0 Fall, Spring
* Prerequisite(s): DGM 1220 or instructor approval

Focuses on the digital workflow and management of still images, video, audio and digital effects media assets. Addresses use of codecs and format types for use in mobile media use scenarios. Introduces the proper handling of assets in various development platforms and user experience design best practices when using assets on touch-based devices. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 240R
Special Topics in Digital Audio
1 to 4:0 to 4:0 to 12
* Prerequisite(s): DGM 1110

Designed for students interested in specific audio tools and concepts currently used in digital audio production. Includes relevant and changing topics and tools. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for a maximum of nine credits toward graduation. Software fee of $15 applies. Lab access fee of $45 for computers, applies.

DGM 2410
Core Recording Principles
3:3:0
* Prerequisite(s): DGM 2130

Teaches mic choice and placement, acoustic positioning, in-line signal processing, level matching, impedance matching, phase error elimination, pre-mixing and recorded stems, DAWs, Pro-Tools intermediate skills, project budgeting, and artist and client relations. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2430
Core Mixing Principles
3:3:0
* Prerequisite(s): DGM 2410

Teaches the science and art of audio mixing, centering on a broad range of musical and media post-production material. Covers initial mix plan, signal flow, and fix, fit and feature skills for all signal processors, including equalization, compression, limiting, delay, reverb, distortion, doubling, phase, flange, chorus, other modulation effects, characteristics of algorithms (digital, solid state, transformers, rectifiers, tube, electro-optical, convolution). Also, teaches mix room acoustics, treatments and workarounds. Lab access fee of $45 for computers applies.

DGM 2440
Sound for Film and Television
3:3:0 Spring
* Prerequisite(s): DGM 2130

Teaches the basics of gathering sound for use in film and video productions. Covers proper boom miking and wireless mic techniques, and acoustics preparation to record dialogue and sound effects on location and on sound stages. Examines the processes utilized in editing audio of multimedia productions, including the balancing of artistic relationships, mixing and mastering of music, sound effects tracks and Foley. Offers practical experience in audio-only productions as well as audio-video relationships. Culminates in a digital cinema mixing session. Primarily a lab class, may couple with another video class to gather the sound for a cohesive project. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2460 (Cross-listed with: COMM 2560)
Radio Production
3:3:0 Fall

Teaches the history of radio, and the structure of typical radio stations, from management to programming and sales, and production and promotion. Covers method of producing radio promos, radio shows, commercials and news segments, as well as features and interviews. Examines the use of Digital Audio Workstations to produce several radio segments of the student’s choosing. Includes lectures, demonstrations, and guest lecturers from radio stations in the community. Software fee of $20 applies. Lab access fee of $45 for computers applies.

DGM 2481
Digital Audio Restoration
3:3:0 Fall
* Prerequisite(s): DGM 2130

Teaches the value and use of various tools to restore, preserve, and archive audio from a variety of sources, including vinyl records, tapes, film soundtracks, etc. Additional topics include removal of ambient noise (fans, AC, etc) from class film projects, impulsive noise (clicks and pops), periodic noise (hum and buzz), and random noise (spectral subtraction of ambient noise). In addition, some attention will be given to the subject of audio forensics, or restoring audio for intelligence or law enforcement applications. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2490
Digital Audio Workstation Training I
3:2:3
* Prerequisite(s): DGM 2130

Teaches proficiency in the use of a Digital Audio Workstation at the beginning level. Implements the first half of AVID Corporation’s “ProTools User Level” certification, and successful completion of this course, together with its follow-on course, DGM 2491, will earn students their AVID ProTools certification at the “User” level. Lab access fee of $45 for computers applies.

DGM 2491
Digital Audio Workstation Training II
3:2:3
* Prerequisite(s): DGM 2130, DGM 2490

Teaches proficiency in the use of a Digital Audio Workstation at the intermediate level. Implements the second half of AVID Corporation’s “ProTools User Level” certification, and successful completion of this course, together with its preceding course, DGM 2490, will earn students their AVID ProTools certification at the “User” level. Lab access fee of $45 for computers applies.

DGM 250R
Special Topics in Digital Cinema
1 to 4:0 to 4:0 to 12 On Sufficient Demand
* Prerequisite(s): DGM 2110

Designed for students interested in specific video tools and concepts currently used in digital media processes. Includes relevant and changing topics and tools used in industry. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for a maximum of nine credits toward graduation. Lab access fee of $45 for computers applies. Software fee of $15 applies. Course fee of $10 for equipment applies.
DGM 2510
Visual Effects for Digital Cinema I
3:2:3  Fall
* Prerequisite(s): DGM 1061
Introduces a variety of professional Visual Effects software used in conjunction with NLE (Non-Linear Editing) software in current industry use. Establishes a foundation of understanding of cinematic post-production workflows utilized by professional visual effects houses. Lab access fee of $45 for computers applies.

DGM 2540
Cinematography I
3:2:3  Fall, Spring
* Prerequisite(s) or Corequisite(s): DGM 1520
Introduces the basic concepts of lighting, grip/electric work, and beginning cinematography. Teaches a full understanding of lighting instruments, power distribution, lighting support, rigging, dollies, and production equipment. Teaches how to work as a member of a team/department applying on-set protocols to meet the needs of production objectives. Software fee of $15 applies. Lab access fee of $45 for computers applies. Course fee of $46 for equipment applies.

DGM 2545
Virtual Reality for Digital Cinema Storytelling
3:2:2  Fall, Spring
* Prerequisite(s): DGM 1061, DGM 1510, DGM 1520
Introduces the technical foundations of virtual reality for cinema production including capture, image stitching, editing, and output. Discusses potential narrative and documentary applications for the use of virtual reality as a storytelling vehicle. Allows students hands-on practice as they create various VR projects. Discusses current and evolving distribution and delivery channels for VR filmed content. Lab access fee of $45 for computers applies.

DGM 2570
Storytelling for Digital Media I
3:2:2  Fall, Spring
* Prerequisite(s): DGM 1510
Focuses on traditional three-act structure and character-driven storytelling. Introduces dramatic and persuasive writing for filmed media content including short narrative films and documentaries. Applies cinematic storytelling approaches to emerging technologies such as interactive media, gaming, and virtual reality. Lab access fee of $45 for computers applies.

DGM 2600
The Animated Image
3:3:0  Fall
* Prerequisite(s): ENGL 1010 or ENGH 1005
Chronicles the development of Animation as a medium dependent on both aesthetics and technology from its inception in the late 19th century through contemporary scientific and entertainment venues. Introduces key international personalities and industry benchmarks. Discusses animation both as a means of self-expression and as a commercial enterprise. Includes film screenings and research assignments. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 260R
Special Topics in Animation and Game Development
1 to 4:0 to 4:0 to 12
Designed for students interested in specific animation tools and concepts currently used in digital animation production. Includes relevant and changing topics and trends. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for a maximum of nine credits toward graduation. Lab access fee of $45 for computers applies. Software fee of $15 applies. Course fee of $12 for equipment applies.

DGM 2610
Game Design I
3:2:3  Spring
* Prerequisite(s): DGM 2221 and Portfolio Acceptance
Explores video and computer gaming from historic, economic, and production perspectives. Introduces game theory, analysis, design documentation, and development. Lab access fee of $45 for computers applies.

DGM 2620
Principles of Animation I
3:2:3  Fall
* Prerequisite(s): Portfolio Review Acceptance
Explores and applies animation pipeline practices. Emphasizes the study of objects in motion and the communication of key ideas in the development of a second-year animation project. Lab access fee of $45 for computers applies. Software fee of $15 applies. Course fee of $18 for software and plug-ins applies.

DGM 2640
Character Development
3:2:2  Spring
* Prerequisite(s): DGM 2210 and DGM 2620 and Portfolio Review Acceptance
In-depth study and application of 3D character development for animation and games. Requires a firm understanding of 3D modeling, basic rigging, basic texturing, and principles of animation. Students will design, model, rig, and animate 3D characters following industry processes. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2660
Digital Storyboarding for Animation
3:3:0  Fall, Spring
* Prerequisite(s): Portfolio Review Acceptance
Introduces contemporary storyboarding practices, both linear and non-linear, key to communicating information clearly, and consistently in a cost-effective manner. *Laptop Required. Lab access fee of $45 for computers applies. Software fee of $15 applies. Course fee of $12 for software and plug-ins applies.

DGM 2670
Scriptwriting for Animation and Games II
3:0
* Prerequisite(s): Portfolio Review Acceptance
Focuses on the basic elements of scriptwriting languages in modern 3D applications. Develops a firm understanding of basic scripting concepts in a 3D environment, including libraries, expressions, arrays, conditionals, loops, and functions. Discusses simplification of complex user operations and the development of basic user interfaces. Utilizes industry standard applications such as Maya, Houdini, and Unity3D. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 270R
Special Topics in Web Design and Development
1 to 4:0 to 4:0 to 12
Designed for students interested in specific web design tools and concepts currently used in multimedia creation. Includes relevant and changing topics and tools used in multimedia. Emphasizes hands-on experience along with lectures and demonstrations. Completers should be able to use the web design tools to create a typical multimedia project. Curriculum may vary from one semester to another. May be repeated for a maximum of nine credits toward graduation. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 2740
Principles of Web Languages
3:3:0  Fall
* Prerequisite(s): DGM 2120, DGM 2250
Focuses on solving various Web design and coding problems using current Internet technologies. Emphasizes solving unique coding problems using HTML, CSS, and jQuery that arise when implementing a Web design. May be delivered online. Software fee of $15 applies. Course fee of $18 for software and plug-ins applies. Lab access fee of $45 for computers applies.
Course Descriptions

DGM 2760  
Web Languages I  
1:3:0  
Fall, Spring  
* Prerequisite(s): DGM 1600

Examines client-side languages that allow viewers to interact with the content of Web pages. Extensively uses methods for creating highly interactive web sites without the use of authoring tools. Teaches how to make the static content within a typical webpage more dynamic, interesting, and most importantly, useful. Culminates with a final project to design and create materials for use in a well-designed interactive web site. May be delivered online. Software fee of $15 applies. Course fee of $18 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 2780  
Web Tools and Frameworks I  
3:3:0  
Fall, Spring  
* Prerequisite(s): DGM 2740

Introduces the necessary frameworks and tools needed to build structured, maintainable, and scalable web pages common in the industry. Incorporates project-based learning to help students gain solid web development experience through hands-on programming and problem solving a real world project. Software fee of $15 applies. Course fee of $18 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 281R  
Internship  
1 to 8:1 to 8:0  
Fall, Spring, Summer  
* Prerequisite(s): Departmental Approval

For Digital Media majors only. Provides a transition from school to-work where learned theory is applied to actual practice through a meaningful on-the-job experience. Includes student, employer and coordinator evaluations, on-site work visits, and written assignments. Completers should obtain experience in establishing and accomplishing individualized work objectives that improve work performance. Internship is intended for entry level DGM students who are working at that level. Credit is determined by the number of hours a student works during the semester and completion of individually set goals. May be repeated for a maximum of 16 credits towards graduation. May be graded credit/no credit.

DGM 296R  
Seminar  
1 to 3:1 to 3:0 to 9  
On Sufficient Demand

Provides short courses, workshops, and special programs in information management or current administrative topics. Curriculum may vary from one semester to another. May be repeated for a maximum of nine credits.

DGM 301R  
Digital Lecture Series  
1:1:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing

Uses guest speakers who lecture on current topics in digital media. May be repeated for a maximum of 3 credits toward graduation.

DGM 302R  
Digital Cinema Production Lecture Series-CineSkype  
1:1:0  
Fall, Spring  
* Prerequisite(s): (DGM 1520 or CINE 2150 or THEA 1023) and University Advanced Standing

Presents a series of feature-length films and the opportunity to discuss the challenges that went into their creation with the individual filmmaker(s). Introduces participants to directors, screenwriters, producers, and editors currently working in the industry. May be repeated for a maximum of three credits toward graduation. (Note: Some films screened may be considered controversial and carry an "R" rating.)

DGM 3061  
Professional NLE Certification  
3:3:0  
Fall, Spring  
* Prerequisite(s): DGM 1061 and University Advanced Standing

Provides guidance and materials allowing participants to certify in Non-Linear Editing software on various platforms. Focuses on certification on the User-level and Pro-level of Avid Media Composer. Extensively covers technical editing consideration including workflows, media management, color, sound, output, and scripting. Lab access fee of $45 for computers applies.

DGM 3110  
Corporate Issues in Digital Media  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Covers business and legal issues in multimedia. Reviews good business practices for the multimedia industry. Studies universal marketing and sales principles and mastery, as well as e-commerce fundamentals. Teaches copyright laws and procedures, obtaining permissions, creating and using contracts, protecting corporate assets, standards, security and privacy issues, and other legal issues regarding multimedia communication. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 312G  
Digital Media for Intercultural Communication  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Explores issues, concepts, and practices for making digital media accessible to people from diverse cultures and people with disabilities. Covers design considerations and techniques for the Web and other digital technologies. Presents methods for understanding and comparing different cultures and ways of approaching and enhancing intercultural interactions. Addresses accessibility standards, guidelines, and laws important for digital media developers to know and implement. May be delivered online. Lab access fee of $45 for computers applies. Software fee of $15 applies. Course fee of $10 for equipment applies.

DGM 320R  
Advanced Topics in Digital Media Design  
1 to 4:0 to 4:0 to 12  
On Sufficient Demand  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Intended for advanced students with an interest in digital design and authoring. Includes relevant and changing topics and tools. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies. Software fee of $15 applies. Course fee of $10 for equipment applies.

DGM 3220  
Digital Media Project Management  
3:3:0  
Fall, Spring  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Teaches the foundational management principles that contribute to both the quality and profitability of digital media products. Introduces technical project management skills to help with budgeting and scheduling as well as critical soft skills, such as how to manage product design, make good decisions, communicate effectively, and build productive work relationships. Also, teaches about different types of project documents that enable and support effective, successful projects. May be delivered online. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3240  
Interaction Design Colloquium  
3:3:0  
Spring  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Provides advanced students with unique and current industry perspectives on interaction design through seminar discussions, workshops, and industry on-site experiences. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3260  
Immersive Authoring II  
3:3:0  
Spring  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Focuses on advanced application of media technologies and design paradigms when creating rich immersive experiences for distribution as a net-based desktop or mobile application. This course is designed to be highly adaptable to enable infusion of unique and emerging technologies that are critical for digital media majors to understand. Laptop required. Lab access fee of $45 for computers applies. Software fee of $15 applies. Course fee of $19 for software and plug-ins applies.

684  Course Catalog 2020-2021  Utah Valley University
DGM 3261  Authoring Virtual Reality Experiences  
3:3:0  Fall  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Explores the use of technology for photographing locations for Virtual Reality experiences. Covers how to develop Virtual Reality content for digital screens. Addresses the use of Virtual Reality environments in real world applications to remotely tour college campuses, museums, shops, sports venues, plan events at locations; show real estate, influence travel to vacation getaways; and create historical documentation. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3270  Digital Publishing II  
3:3:0  Spring  
* Prerequisite(s): DGM 2270 and University Advanced Standing, and University Advanced Standing

Focuses on the development of engaging mobile apps for distribution on a myriad of devices. Teaches advanced development of publishing digital media experiences of all types and includes techniques for coding immersive experiences beyond standard practices. Such apps will be developed for touchscreen `native' content and feature real-time updates. *Laptop & Device Required. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3271  Digital Product Design  
3:3:0  Spring  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Teaches advanced development techniques of Product Design fused with User Experience Design / User Interface Design, which can create more robust experiences, through problem solving and effective communication. Focuses heavily on how digital designers can influence the user experience, and participatory outcomes of such experiences, through well-planned interactions, digital layout, and adaptation to the physical hardware. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3280  Authoring Adaptive Experiences I  
3:3:0  Spring  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Focuses primarily on the ability to curate and realign rich content assets through internet-based Apps. Focuses on the application of media technologies that possess the ability to create adaptable content media experiences. Focuses primarily on the ability to use/reuse content in meaningful ways through unique and highly efficient distribution means. Describes how distribution can be to desktop, mobile, and advancing technologies in the home or automobile markets. Laptop Required. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3290  Developing Digital Media for Instruction and Training  
3:3:0  Fall  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Teaches the lifecycle of training and development in a business setting. Uses the Instructional System Design (ISD) process, which includes identifying performance deficiencies and appropriate interventions, developing objectives, selecting appropriate learning technologies, developing course content, selecting effective instructional aids, delivering training, and evaluating training effectiveness. Reviews basic educational principles in teaching adult learners and managing classroom dynamics. Examines legal issues, cross-cultural preparation, and workforce diversity as they relate to training and development. Provides hands-on training experiences. Completers should be prepared to apply basic principles to training and development opportunities. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 330R  Advanced Topics in Digital Media Graphics  
1 to 4:0 to 4:0 to 12  On Sufficient Demand  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Intended for advanced students with an interest in digital graphics and design. Includes relevant and changing topics and tools. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for a maximum of 9 credits toward graduation. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3320  Digital Photography and Compositing II  
3:3:0  Fall, Spring  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Builds on skills acquired in Digital Photography and Imaging I. Uses photo imaging tools like Photoshop, Light Table, and Aperture in the creation and manipulation of digital images for use in a broad range of output specific formats. Teaches advanced image manipulation, and compositing and asset management to deliver finished digital image deliverables for such things as the web, DVD, media, print, billboard, and wrap advertising media. Lab access fee of $45 for computers applies.

DGM 3340R  Advanced Topics in Digital Audio  
1 to 4:0 to 4:0 to 12  On Sufficient Demand  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Intended for advanced students with an interest in digital audio. Includes relevant and changing topics and tools. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for a maximum of 9 credits toward graduation. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3410  Audio Engineering for the Studio I  
3:3:0  Fall  
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Reviews basic sound principles (standing waves, studio acoustics, psycho-acoustics), microphone types and techniques of use. Covers theory and application of mixers, signal processors, and effects. Outlines proper construction and grounding of a recording studio. Introduces one or more digital audio workstations, which will be used to record a band or classical project. Requires the completion of a mixdown of a multi-track project. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3420  Studio Recording II  
3:3:0  Spring  
* Prerequisite(s): DGM 3410, Portfolio Review Acceptance, and University Advanced Standing

Reviews principles of good audio engineering covered in the introductory class, but in greater depth, including, cable types, microphone types, mixers, and techniques of use. Emphasis will be on mixing techniques for each individual instrument involved in the recording. Covers in-depth theory and application of mixers, signal processors, and effects. Addresses advanced studio recording techniques and mixes on several key instruments, including piano and drums. Continues further in-depth topics on impedance matching, power requirements, and use of the decibel. Includes acoustic properties and sound transmission loss of common studio surface materials. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3430  Recording Studio Design Principles and Practices  
3:3:0  On Sufficient Demand  
* Prerequisite(s): DGM 3410, Portfolio Review Acceptance, and University Advanced Standing

Addresses many issues found in the design, construction and maintenance of a recording studio. Explores the physics, mathematics, electronics, and practical issues to properly design and build a successful recording studio. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3440  Sound for Games  
3:3:0  * Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing; Laptop capable of running the Unreal Developer's Kit and Unity.

Teaches sound design and implementation for video games using both the Unreal Developer's Kit (Unreal Engine) and the Unity Game Engine. Includes visual and text-based scripting, signal flow, resource allocation and preservation, priority, layering, mastering for end-format, computer-based, console-based, and mobile-targeted development, and whole-project planning and execution. Software fee of $15 applies. Lab access fee of $45 for computers applies.
Course Descriptions

DGM 3460
Live Sound Reinforcement
3:3:0  Spring
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Teaches fundamental sound concepts: propagation, absorption, reflection, transmission, frequency response, effective manipulation of the decibel in calculations of loudness, power, and voltages. Covers intelligent use of microphone patterns, and loudspeaker and monitor placement. Investigates indoor sound vs. outdoor sound. Teaches proper cabling and connections, speaker crossovers, and theory of bi-amplification. Covers mixer diagrams and basic electronics. Incorporates practical experience acquired in giving technical support to UVU theater, music department, or public relations functions. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3481
Advanced Audio Restoration and Forensics
3:3:0  Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Covers advanced principles and practices for digitally restoring difficult audio specimens, and includes forensic audio restorative and reconstructive techniques important to historical, investigative, and criminological fields as well. Also covers, in more depth, the cylinder recording period at the turn of the century. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3490
Digital Audio Workstation Training III
3:2:3  Fall, Spring
* Prerequisite(s): Portfolio review acceptance; DGM 2490, DGM 2491, and University Advanced Standing

Teaches proficiency in the use of a Digital Audio Workstation at the advanced level. Is the UVU implementation of the first half of AVID Corporation's "ProTools Operator Level" certification, and successful completion of this course, together with its follow-on course, DGM 3491, will make AVID ProTools certification at the "Operator" level available. Lab access fee of $45 for computers applies.

DGM 3491
Digital Audio Workstation Training IV
3:2:3  Fall, Spring, Summer
* Prerequisite(s): Portfolio review acceptance; DGM 3490, and University Advanced Standing

Teaches proficiency in the use of a Digital Audio Workstation at the expert level. Currently, this is the UVU implementation of the second half of AVID Corporation's "ProTools Operator Level" certification, and successful completion of this course, together with its preceding course, DGM 3490, will make AVID ProTools certification at the "Operator" level available. Lab access fee of $45 for computers applies.

DGM 350R
Advanced Topics in Digital Motion Picture Production
1 to 4:0 to 4:0 to 12  On Sufficient Demand
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Includes relevant and changing topics and tools used in digital motion picture industry. Emphasizes hands-on experience. Uses digital cinema and production management and development tools to create a typical digital media project. Curriculum may vary from one semester to another. May be repeated for a maximum of 9 credits toward graduation. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 351R
Digital Broadcasting
3:1:6  On Sufficient Demand
* Prerequisite(s): DGM 2110, Portfolio Review Acceptance, and University Advanced Standing

Teaches planning, management and execution of live video productions integrating multiple cameras. Teaches the roles of the broadcast production team. Studies digital standards for broadcast equipment. Includes multiple 10 hour hands-on broadcast production labs. May be repeated for a maximum of 12 credits toward graduation. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3520
Digital Cinema Production III
3:2:2  Fall, Spring
* Prerequisite(s): DGM 2110 and University Advanced Standing

Teaches skills to produce a micro-budget film. Introduces practical production techniques including paperwork for the Screen Actors Guild and for standard distribution deliverable requirements. Involves the completion of various finished short films both in groups and as individuals. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3550
Digital Cinema Editing II
3:3:1  Fall, Spring
* Prerequisite(s): DGM 1061, Portfolio Review Acceptance, and University Advanced Standing

Develops an understanding of how editing can shape cinematic storytelling using content from a variety of media and in various styles. Provides further practice in hands-on application on a variety of professional Non-Linear Editing platforms. Course fee of $13 for software and plug-ins applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3570
Storytelling for Digital Media II
3:2:2  Fall, Spring
* Prerequisite(s): DGM 2570 or THEA 2742, Portfolio Review Acceptance and University Advanced Standing

Teaches advanced writing for cinema, television and emerging media. Includes writing assignments each week that will be read and analyzed according to the structure and execution of a goal. Discusses a specific scriptwriting subject each week such as finding the idea, researching, outlining and rewriting. Course fee of $13 for software and plug-ins applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.
DGM 3571 Animation Story Development Workshop 3:2:3 Spring
* Prerequisite(s): ENGL 2010 and Portfolio Review Acceptance and University Advanced Standing
Covers short themed preproduction and development for animated and interactive titles. Includes research, outlining, writing using the iterative process, and preparation for story reel production. Lab access fee of $45 for computers applies.

DGM 3580 Digital Cinema Directing Workshop I 3:2:3 Fall, Spring
* Prerequisite(s): DGM 1510, DGM 1520, DGM 2110, Portfolio Review Acceptance and University Advanced Standing
Offers an advanced workshop format class structure. Utilizes project-based opportunities to apply and hone skills in digital cinema direction, editing scripts, casting, rehearsing and performing a scene. Includes polishing concept for shooting, then shooting and editing for presentation and critique. Course fee of $13 for software and plug-ins applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3590 Documentary I 3:2:2 On Sufficient Demand
* Prerequisite(s): (DGM 1061, DGM 1510, DGM 1520, portfolio review acceptance or instructor approval) and University Advanced Standing
Presents intermediate viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Explores the diversity of documentary styles and approaches including interview, archival, observational, etc. Focuses on character driven stories using traditional three act structures. Requires the completion of various exercises from conceptualization through post-production, culminating in production of short documentary project. Lab access fee of $45 for computers applies.

DGM 360R Advanced Topics in Animation and Games 1 to 4:0 to 4:0 to 12
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing
Intended for advanced students with an interest in digital animation. Includes relevant and changing topics and tools. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for maximum of 9 credits toward graduation. Course fee of $12 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3610 Game Design II 3:2:3 On Sufficient Demand
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing
Continues the study of game theory, analysis, and design documentation. Emphasizes game development using a game development engine. A laptop computer is required for this course. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3620 Technical Direction and Design for Animated Applications 3:2:3 Fall
* Prerequisite(s): DGM 2221, DGM 2620, DGM 2670, Portfolio Review Acceptance, and University Advanced Standing
Introduces industry standard technical direction problem solving practices. Includes project management, aesthetic development, and game play design. Software fee of $15 applies. Course fee of $20 applies. Lab access fee of $45 for computers applies.

DGM 3621 Hard Surface Modeling 3:2:3 On Sufficient Demand
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing
Teaches theories, tools, and principles of current industry modeling trends, specifically for video games and short animated films. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3641 Game Level Design 3:2:3
* Prerequisite(s): DGM 2610, Portfolio Review Acceptance, and University Advanced Standing
Provides an advanced treatment of the three step process in level/environmental design: Research and analysis, concept and prototype development, and testing and comparative metrics. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3650 Animation and Game Project I 3:1:6 Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing
Emphasizes industry pipeline processes. Covers the application of lighting and rendering in 3D animation and game environments. Includes composition, technical lighting, layer-based rendering, and texture baking. A junior-level group project will be completed in the course of the semester. Lab access fee of $45 for computers applies.

DGM 3660 Advanced Rigging and Character Effects 3:2:3 Spring
* Prerequisite(s): DGM 2211, Portfolio Review Acceptance, and University Advanced Standing
Studies the process of rigging, and the motion of characters and objects in games and animation. Includes full character, muscle, facial, and dynamic rigs. Reinforces principles of animation. Lab access fee of $45 for computers applies.

DGM 3670 Scripting for Animation and Games III 3:2:3 Fall
* Prerequisite(s): DGM 2670, Portfolio Review Acceptance, and University Advanced Standing
Provides in-depth training in advanced scripting concepts and practices in 3D video game development. Focuses on the application of advanced technical concepts as they impact game development. Addresses networking and distributed systems issues, including scalability and latency compensation techniques, for designing games for online multi-player environments. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3680 Animation and Game Project II 3:1:6 Spring
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing
Devoted to the pre-production of a multi-semester team project for gaming and animation students. Includes research, writing, scripting, designing, storyboard and pre-visualization of a client-driven project. Software fee of $15 applies. Course fee of $19 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 370R Advanced Topics in Web Design and Development 1 to 4:0 to 4:0 to 12
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing
Intended for advanced students with an interest in Internet authoring. Includes relevant and changing topics and tools. Emphasizes hands-on experience along with lectures and demonstrations. Curriculum may vary from one semester to another. May be repeated for maximum of 9 credits toward graduation. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3740 Web Content Management 3:3:0 Spring
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing
Instructs students on how to create a site that in content rich, dynamic, and meaningful to site visitors. Teaches participants how to effectively plan, develop, and arrange content through the use of information design principles, content management systems, and analysis tools. Culminates with students building a live site for a real-world client where students must solve real design, development, and delivery issues. Software fee of $15 applies. Course fee of $19 for software and plug-ins applies. Lab access fee of $45 for computers applies.
Course Descriptions

DGM 3750
Media Traffic and Analytics
3:3:0  Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Provides students access to all the leading and most effective traffic techniques, ranging from organic search traffic and all aspects of SEO, through paid traffic of all kinds, and on to free, direct traffic methods. Includes Web and Mobile traffic techniques and analytical tools. Covers all the concepts involved in these areas of traffic and analytics, and will have experience actually generating traffic to a real web page (and may even make money), and using analytical tools to evaluate their results. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 3760
Web Languages II
3:3:0  Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Covers server-side web development and database interaction. Offers the skills and knowledge necessary to produce web sites in a professional environment. Covers current technology and design standards for websites that are database driven using current languages and platforms. Demonstrates how database interaction can enhance a multimedia website. Includes lectures, demonstrations, and weekly projects. May be delivered hybrid. Software fee of $15 applies. Course fee of $19 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 3780
Web Tools and Frameworks II
3:3:0  Spring
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Participants learn advanced techniques for delivering exceptional Flash based Internet applications. Teaches advanced scripting fundamentals, how to deliver content through server-side database connectivity, and engaging the audience through highly interactive experiences. Software fee of $15 applies. Course fee of $19 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 3790
Rich Internet Application Development I
3:3:0  Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Describes various Rich Internet Application development technologies. Investigates RIA development and delivery technologies such as JavaScript frameworks, API usage, and developer productivity tools with a special emphasis on the integration of Digital Media into Internet applications. Teaches the design and development workflow for interactive, media-rich applications delivered via networked browser, computer desktops, and mobile devices. Software fee of $15 applies. Course fee of $19 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 4000
Writing for Digital Media
3:3:0  Fall, Spring
* Prerequisite(s): ENGL 2010, Portfolio Review Acceptance, and University Advanced Standing

Teaches the role of the written word in the digital arena and the writing skills for students to become effective communicators within the various forms of multimedia including web pages, digital animation, audio, video and cinema. Lab access fee of $45 for computers applies.

DGM 4261
Mixed Reality Studio
3:3:0  Spring
* Prerequisite(s): DGM 3261, Portfolio Review Acceptance, and University Advanced Standing

Applies knowledge and skills from previous mixed reality courses to assemble and publish highly interactive mixed reality experiences to multiple platforms. Represents the culmination of previous mixed reality courses in which projects will be hands-on practical application of technologies preparing students for senior capstone projects. Lab access fee of $45 for computers applies.

DGM 4280
Authoring Adaptive Experiences II
3:3:0  Spring
* Prerequisite(s): DGM 3280 and University Advanced Standing

Focuses on the advanced application of media technologies that possess the ability to create adaptable content media experiences. Focuses primarily on the ability to curate and realign rich content assets through Internet-based Apps. Teaches principles of distribution that can be applied to desktop, mobile, and advancing technologies in the home or automobile markets with a specific focus on dynamic retrieval and adaptation of content. *Laptop Initiative Requirement. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4290
Designing Voice Experiences
3:3:0  Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Teaches fundamentals of Voice Experience design and development for verbal digital interfaces. Addresses technical challenges for verbal and conversational digital experiences in real world applications. Introduces basic content creation and verbal logic theory for varying artificial intelligence platforms. Lab access fee of $45 for computers applies.

DGM 4310
Senior Capstone I
3:1:6  Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

For senior Digital Media students. Provides a capstone experience working in digital media. Develops individual real world projects in consultation with a faculty advisor. Encourages team work. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4410
Senior Capstone II
3:1:6  Spring
* Prerequisite(s): DGM 4310, Portfolio Review Acceptance, and University Advanced Standing

Conclusion of DGM 4310. Concludes the capstone experience for digital media students. Addresses post production issues such as testing, packaging, and documentation. Offers the opportunity to present projects to students, faculty, sponsors, and potential employers or clients. Course fee of $10 for equipment applies. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4420
Applied Digital Media Technology
3:3:0  On Sufficient Demand
* Prerequisite(s): University Advanced Standing

For educators and general public interested in technology integration. Examines the ever-expanding array of options available to educators, business personnel and government agencies for creating and distributing rich media based materials. Explores what new technologies and creative practices are available and how to implement them into their present workflow. Focuses on getting the most out of Digital Media technology. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4430
Audio Mastering
3:3:0  Fall
* Prerequisite(s): DGM 3420, Portfolio Review Acceptance, and University Advanced Standing

Deals with the final step in any audio production—Mastering. Covers the art of final EQ and Compression. Explores the issues of bit depth, sampling rates, dither, jitter, EQ techniques, and Dynamic Range manipulation (expanders and compressors). Looks into analog and digital signal processors, including reverb, and the final step of putting an album together with a brief discussion on vinyl pre-mastering. Teaches the use no fewer than 15 different compressors, both analog and digital for comparative listening tests. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 450R
Story Editing for Digital Media
3:2:3  Fall, Spring, Summer
* Prerequisite(s): DGM 1510 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): DGM 2570 or THEA 2742

Teaches necessary skills for working with writers and producers preparing scripts for production through various media technologies. Uses Daniel Methodology to analyze stories in all stages from early concept to production scripts, identify strengths, diagnose weaknesses, and find possible solutions to strengthen the scripts. Teaches consulting techniques for working with writers and producers to communicate clearly and in a way that encourages and empowers them to suit their storytelling plan to the appropriate technologies. May be repeated for a maximum of 6 credits toward graduation. Lab access fee of $45 for computers applies.
DGM 4510
Visual Effects for Digital Cinema II
3:2:3 Spring
* Prerequisite(s): DGM 2510 and University Advanced Standing

Provides an advanced practicum in a variety of professional Visual Effects software used in conjunction with NLE (Non-Linear Editing) software in current industry use. Further develops on the foundation of understanding of cinematic post-production workflows utilized by professional visual effects houses. Overviews a broad survey of types of visual effects in use today and the evolution of various programs and their shifting capabilities. Lab access fee of $45 for computers applies.

DGM 4511
Film Production Analysis II
3:1:6 Fall, Spring
* Prerequisite(s): (DGM 1510 or instructor approval) and University Advanced Standing

Immerses participants in the theory and practice of effective storytelling through digital media. Features films and Daniel Methodology analysis as a foundation, then branches into applying Daniel Methodology to other media, including television series, documentaries, animation, gaming, interactive design and virtual reality. Prepares students for the rigorous requirements of the digital media industry in key creative professional roles, including writing, directing, producing and editing. Lab access fee of $45 for computers applies.

DGM 4530
Special Topics—Cinematography Masterworks
3:2:3 Fall
* Prerequisite(s): DGM 1510, DGM 1520, DGM 2540, and University Advanced Standing

Surveys selected cinematographers and their works. Looks at each cinematographer's films in chronological order from their earliest to more recent and analyzes their progression throughout their career. Evaluates individual technique and style in depth, breaking down films, scene by scene. Lab access fee of $45 for computers applies.

DGM 4543R
Cinematography III
3:2:3 Spring
* Prerequisite(s): DGM 3540 and University Advanced Standing

Offers an advanced workshop format class structure. Utilizes project-based opportunities to apply and hone advanced professional skills in composition, lighting and camera movement. May be repeated for a maximum of 9 credits toward graduation. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4550
Producing II
3:3:0 Spring
* Prerequisite(s): DGM 3550

Implements the advanced process of motion picture development and distribution with focus on the role of the producer in identifying, evaluating, developing, financing and securing distribution. Lab access fee of $45 for computers applies.

DGM 4560
Output and Color for Digital Cinema II
3:2:2 Fall, Spring
* Prerequisite(s): DGM 1061, DGM 2340, Portfolio Review Acceptance or instructor approval, and University Advanced Standing

Focuses on advanced digital post-production workflow, digital output, and color grading for digital cinema productions. Further trains in professional industry standard software used for color grading, output and compression. Prepares students for a career in post-production with emphasis on the careers of the Digital Imaging Technician and Color Grader. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 456R
Digital Cinema Editing III
3:2:2 Fall, Spring
* Prerequisite(s): DGM 3560, Portfolio Review Acceptance, and University Advanced Standing

Offers advanced practicum in Digital Cinema editing and craft. Prepares students for employment as professional editors and assistant editors in a variety of work environments on a variety of types of media. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies.

DGM 457R
Storytelling for Digital Media III
3:2:3 Fall, Spring, Summer
* Prerequisite(s): DGM 1510 and (DGM 2570 or THEA 2742), University Advanced Standing

Prerequisite(s) or Corequisite(s): DGM 450R
Focuses on advanced writing for longform media projects including feature narrative films, documentary projects, episodic television series, experimental new media, interactive games, etc. Introduces participants to the process, discipline and format necessary to outline, write and refine a character-driven media script that will ultimately have a running-time of greater than forty-five minutes. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies.

DGM 458R
Digital Cinema Directing Workshop II
3:2:3 Fall, Spring
* Prerequisite(s): DGM 3580 and University Advanced Standing

Offers a professional level workshop format class structure for students interested in feature film and television direction, as well as other narrative screen-based content. Focuses include approaches to evaluating story and screenplays, directing actors, staging and blocking scenes, and approaches to visual/cinematic storytelling. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies.

DGM 459R
Documentary II
3:2:3 On Sufficient Demand
* Prerequisite(s): DGM 1520, DGM 3590, and University Advanced Standing

Presents advanced viewing and discussion of selected documentaries and instruction in various production skills necessary to create video documentaries. Explores the diversity of documentary styles and approaches including interview, archival, observational, etc. Requires the completion of various exercises from conceptualization through postproduction, culminating in the production of a professional level documentary project. May be repeated for a maximum of nine credits toward graduation. Lab access fee of $45 for computers applies.

DGM 4610
Designing Technology Based Training
3:0 On Sufficient Demand
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Provides shadowing opportunities in an educational or business setting where students can see basic principles of training and development in action and gain insights into training design, development, implementation, and evaluation. Uses the course map content from the DGM 3290 course to pre-author a technology-based training program, which includes creating a course navigation map (flowchart) to determine course sequence and navigational paths, designing storyboard frames with multimedia elements, and generating the navigation map and storyboards into an authoring tool. Completers should be prepared to apply shadowing experiences, discussion insights, and pre-authoring computer skills to future training opportunities. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4620
Producing Technology Based Training
3:0 On Sufficient Demand
* Prerequisite(s): DGM 4610 and University Advanced Standing

Builds on information taught in DGM 3290 and DGM 4610. Generates storyboards from a computer design tool into an authoring tool. Teaches basic principles of building and editing frames with text and multimedia elements. Provides practice and feedback, remediation as needed. Addresses individual learner needs and evaluation of program effectiveness. Uses program objectives to evaluate final program product. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4621
Performance Animation
3:2:3 On Sufficient Demand
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Teaches basic animation principles, such as: flexibility, timing and spacing, overlapping action, the successive-breaking-of-joints, and overlapping action. Covers theatrical performance animation, emotional facial, phoneme, and dialoged animation. Explores expressive character enactment, representative of life. Software fee of $15 applies. Lab access fee of $45 for computers applies.
Course Catalog 2020-2021

Utah Valley University

DGM 4630
Technical Direction for Animation and Game Development I
3:0:0 Fall
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

Focuses on the production of digital special effects and compositing in 2D and 3D environments. Includes multi-layer effects, green screen, digital mattes, and grading. Tools may include visual effects editing and particle generation software. Software fee of $15 applies. Course fee of $19 for software and plug-ins applies. Lab access fee of $45 for computers applies.

DGM 4640
Technical Direction for Animation and Game Development II
3:0:0 Spring
* Prerequisite(s): DGM 4630, Portfolio Review Acceptance, and University Advanced Standing

Focuses on the use of digital special effects in a three-dimensional environment including high-end particle effects, digital fluids, and advanced simulation. Tools include industry standard Maya and Houdini. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 4790
Rich Internet Application Development II
3:0:0 Spring
* Prerequisite(s): DGM 3790, Portfolio Review Acceptance, University Advanced Standing

Describes various Rich Internet Application development technologies with a focus on utilizing server-side resources. Investigates a wide variety of RIA technologies including cloud services, API development, and dynamic data stores. Teaches how to design and develop RIAs using a variety of tools, code frameworks, and delivery clients. Requires creation of interactive and useful media-rich web experiences for end users. Software fee of $15 applies. Lab access fee of $45 for computers applies.

DGM 481R
Internship
1 to 8:1 to 8:0 Fall, Spring, Summer
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

For Digital Media majors only. Provides a transition from school to work where learned theory is applied to actual practice through a meaningful on-the-job experience. Includes student, employer and coordinator evaluations, on-site work visits, and written assignments. Completers should obtain experience in establishing and accomplishing individualized work objectives that improve work performance. Internship is intended for senior DGM students who are working at that level. Credit is determined by the number of hours a student works during the semester and completion of individually set goals. May be repeated for a maximum of 16 credits towards graduation. May be graded credit/no-credit.

DGM 497R
Independent Study
1 to 3:0 to 3:0 to 9 Fall, Spring, Summer
* Prerequisite(s): Portfolio Review Acceptance and University Advanced Standing

For bachelor's degree students and other interested persons. Offers independent study as directed in reading or in individual projects; offered at the discretion and approval of the department chairperson. May be repeated for a maximum of 6 credits toward graduation.

Diesel Mechanics (DMT)

DMT 1000
Related Oxyacetylene and Arc Welding
3:1:7 Fall, Spring

Specialty course designed for diesel mechanics, other trade areas, and interested community members. For beginning students. Covers theory and practice of oxyacetylene and arc welding of mild steel. Includes identification of basic and filler metals and melting temperatures of various metals. Emphasis is placed on root penetration and fusion of welded materials. Completers should be able to weld in their professional area. Tool room fee of $19 for equipment applies.

DMT 1005
Basic Shop and Safety Skills
2:1:3 Fall, Spring, Summer

Covers the selection and usage of basic occupational hand tools. Presents fasterener types and applications. Provides practice on proper drill and tap skills. Includes experience learning correct measuring skills. Addresses manufacturers electronic service literature and search engines. Classifies and employs shop measuring tools with their specific functions. Covers recognition of fundamental heavy truck/equipment engine, power-train and chassis components. Emphasizes shop safety guidelines and proper handling of hazardous materials. Requires safety certification.

DMT 1110
Diesel Engine Overhaul Lab
4:4:0 Fall, Spring
* Corequisite(s): DMT 1110
* Prerequisite(s) or Corequisite(s): DMT 1005

Specialty course designed for diesel mechanics, other trade areas, and interested community members. For beginning students. Covers theory and practice of oxyacetylene and arc welding of mild steel. Includes identification of basic and filler metals and melting temperatures of various metals. Emphasis is placed on root penetration and fusion of welded materials. Completers should be able to weld in their professional area. Tool room fee of $19 for equipment applies.

DMT 111L
Diesel Engine Overhaul Lab
2:0:6 Fall, Spring
* Corequisite(s): DMT 1110
* Prerequisite(s) or Corequisite(s): DMT 1005

Provides hands on experience in diesel engine operating principles, factors affecting performance, design variations, and identification of components. Includes disassembly and reassembly of diesel engines following industry standard overhaul procedures. Focuses the identification, inspection, and measuring of parts to determine condition for reuse. Utilizes failed components to assist in teaching troubleshooting skills. Tool room fee of $19 for equipment applies. Course Lab fee of $22 for materials applies.

DMT 1120
Diesel Engine Operation Tune Up Lab
4:4:0 Fall, Spring
* Corequisite(s): DMT 1120
* Prerequisite(s) or Corequisite(s): DMT 1110 and DMT 111L

Covers diesel engine components, controls, operating systems, and performance factors. Addresses engine component replacement, tune-up adjustments, and the requirements for engine dynamo-meter testing. Emphasizes basic engine operating factors and troubleshooting complaints such as: low power, smoke conditions, and engine faults. Software fee of $10 applies. Lab access fee of $15 for computers applies.

DMT 112L
Diesel Engine Operation Tune Up Lab
2:0:6 Fall, Spring
* Corequisite(s): DMT 112L
* Prerequisite(s) or Corequisite(s): DMT 1110 and DMT 111L

Examines diesel engine components, operating systems, and performance factors. Provides opportunity to perform hands on component replacement and tune-up adjustments. Provides the opportunity to run an engine under load in a dynamometer test cell. Troubleshoots common engine operating complaints, such as low power, smoke conditions, engine faults, etc. Tool room fee of $19 for equipment applies. Course Lab fee of $27 for materials applies.

DMT 1510
Electrical Systems I
4:4:0 Fall, Spring
* Prerequisite(s): AUT 1260 (or any MAT or MATH course 1000 or higher) with a C- or better
* Corequisite(s): DMT 151L

Teaches the definition of electricity: voltage, current, and resistance as well as the electrical rules of Ohm's law, Watt's law, Kirchoff's circuit laws. Provides examples of the application of the above laws in both series and parallel circuits. Includes instruction on the proper use of DVOM's and their function in diagnosing and troubleshooting electrical circuitry on heavy trucks and equipment. Teaches electrical components and symbols. Teaches correct repair procedures for wiring, fuses, and connectors. Addresses starting and charging system operation and testing. Emphasizes all safety procedures practices. Software fee of $10 applies. Lab access fee of $15 for computers applies.
Course Descriptions

DMT 151L

Electrical Systems I Lab
2:0:6 Fall, Spring
* Prerequisite(s): AUT 1260 (or any MAT or MATH course 1000 or higher) with a C- or better
* Corequisite(s): DMT 1510

Provides hands-on experience using a DVOM on series and parallel circuits. Identifies electrical components and examines their functions. Describes testing batteries, starting systems, and charging systems. Identifies the correct repairs on these systems and when applicable. Provides practice in electrical safety and preventative maintenance. Covers basic electrical repair techniques. Tool room fee of $19 for equipment applies. Course Lab fee of $30 for materials applies.

DMT 1520

Electrical Systems II
2:2:0 Fall, Spring
* Corequisite(s): DMT 152L
* Prerequisite(s) or Corequisite(s): DMT 1510 and DMT 151L

Covers heavy and medium duty vehicle electrical systems including lighting, climate control, computer controls and accessories. Emphasizes DOT lighting regulations for vehicles and trailers. Introduces fundamentals of electrical circuitry and schematics. Examines the computer controls on modern vehicle electrical systems. Software fee of $10 applies. Lab access fee of $15 for computers applies.

DMT 152L

Electrical Systems Lab II
1:0:3 Fall, Spring
* Corequisite(s): DMT 1520
* Prerequisite(s) or Corequisite(s): DMT 1510 and DMT 151L

Focuses on lab work for the troubleshooting and repair of heavy/miduym duty electrical systems and electronic engine management. Includes vehicle and trailer lighting, monitoring, and control systems. Emphasizes DOT safety regulations requirements. Tool room fee of $19 for equipment applies. Course Lab fee of $25 for materials applies.

DMT 2230

Heating Ventilation Air Conditioning and Refrigeration Theory
2:2:0 Fall, Spring
* Corequisite(s): DMT 223L
* Prerequisite(s) or Corequisite(s): DMT 1510 and DMT 151L

Teaches the principles of heat transfer using refrigerant as the medium. Emphasizes the identification and operation of individual system components. Discusses the different types of refrigerants used in the mobile industry as well as recovery, recycling, storage, handling, and disposal. Also covers the theory and operation of auxiliary power units used on highway trucks. Software fee of $10 applies. Course fee of $10 for materials applies. Lab access fee of $15 for computers applies.

DMT 223L

Heating Ventilation Air Conditioning and Refrigeration Lab
1:0:3 Fall, Spring
* Corequisite(s): DMT 2230
* Prerequisite(s) or Corequisite(s): DMT 1510 and DMT 151L

Teaches correct use of modern HVACR testing and repair equipment. Provides hands-on opportunity to troubleshoot and service modern HVACR systems. Examines and practices EPA approved handling of current refrigerants used in current vehicles and equipment. Provides hands-on opportunity to locate, identify, test, service, and troubleshoot different types of mobile AC systems using EPA approved equipment & procedures. Also provides hands-on experience with auxiliary power units used on highway trucks. Tool room fee of $19 for equipment applies. Course Lab fee of $19 for materials applies.

DMT 2310

Fluid Power I Theory
4:4:0 Fall, Spring
* Prerequisite(s): AUT 1260 (or any MATH MAT course 1000 or higher) with a C- or better
* Corequisite(s): DMT 231L

Outlines the fundamental principles of fluid power (hydraulics). Emphasizes the relationship between pressure, force, area, and resistance. Covers Bernoulli’s principle in connection with hydraulic: flow, horsepower torque and the conservation of energy. Illustrates the application and operation of all of the essential components and valving found in in a hydraulic system. Identifies types of circuit designs and schematic symbols. Software fee of $10 applies. Lab access fee of $15 for computers applies.

DMT 231L

Fluid Power I Lab
2:0:6 Fall, Spring
* Prerequisite(s): AUT 1260 (or any MATH MAT course 1000 or higher) with a C- or better
* Corequisite(s): DMT 2310

Provides practical lab experience for the identification, operation, and repair of basic hydraulic system components and circuits. Utilizes various lab equipment and machinery to highlight basic system designs and use of schematics. Emphasizes the safe and proper usage of hydraulic diagnostic equipment or tools necessary for component and system testing. Tool room fee of $19 for equipment applies. Course Lab fee of $17 for materials applies.

DMT 2320

Fluid Power II Theory
4:4:0 Fall, Spring
* Corequisite(s): DMT 232L

Covers troubleshooting and repair skills for heavy and medium duty trucks for air brake systems and ABS brake systems. Discusses alignment fundamentals. Uses hands on exercises to develop these skills. Focuses on proper maintenance and adjustment to foundation brakes and wheel ends. Requires performance tasks on various suspension designs and frame maintenance. Tool room fee of $19 for equipment applies. Course Lab fee of $22 for materials applies.

DMT 232L

Fluid Power II Lab
2:0:6 Fall, Spring
* Corequisite(s): DMT 2320
* Prerequisite(s) or Corequisite(s): DMT 2310 and DMT 231L

Focuses on the use of hydraulic test equipment to diagnose and troubleshoot systems using electronic, proportional or load sensing components. Covers the testing and correct adjustment of load sensing/ pressure compensated pumps. Provides for the disassembly, inspection, reassembly and testing of hydostatic transmissions. Provides experience to build and troubleshoot electronically controlled hydraulic circuits, troubleshoot electronically controlled hydraulic transmissions as well as Allison transmissions. Emphasizes the use of diagnostic tools and service manuals. Tool room fee of $19 for equipment applies.

DMT 2410

Chassis Theory
4:4:0 Fall, Spring
* Corequisite(s): DMT 241L

Provides theory on maintenance and repair of heavy duty chassis systems. Covers air brake systems, ABS systems, suspension systems, steering geometry, front end and tandem alignment, and frame maintenance. Emphasizes Department of Transportation highway safety requirements, and preventative maintenance. Software fee of $10 applies. Lab access fee of $15 for computers applies.

DMT 241L

Chassis Lab
2:0:6 Fall, Spring
* Corequisite(s): DMT 2410

Covers troubleshooting and repair skills for heavy and medium duty trucks for air brake systems and ABS brake systems. Discusses alignment fundamentals. Uses hands on exercises to develop these skills. Focuses on proper maintenance and adjustment to foundation brakes and wheel ends. Requires performance tasks on various suspension designs and frame maintenance. Tool room fee of $19 for equipment applies. Course Lab fee of $22 for materials applies.

DMT 2420

Power Train Theory
4:4:0 Fall, Spring
* Corequisite(s): DMT 242L

Provides theory in maintenance and repair of heavy duty power trains systems. Teaches clutches, single and multiple counter shaft transmission, computer controlled transmissions, drive line geometry, differentials and Department of Transportation safety requirements. Emphasizes troubleshooting, highway safety, and preventative maintenance. Software fee of $10 applies. Lab access fee of $15 for computers applies.
Course Descriptions

DMT 242L
Power Train Lab
2:0:6  Fall, Spring
* Corequisite(s): DMT 2420

Provides hands-on experience in maintenance and repair of heavy duty power train systems. Applies tasks for clutches, single and multiple counter shaft transmission, computer controlled transmissions, drive line geometry, differentials and DOT safety requirements. Emphasizes troubleshooting, highway safety, and preventative maintenance. Tool room fee of $19 for equipment applies. Course Lab fee of $22 for materials applies.

DMT 2530
Electronic Engine Management
2:2:0  Fall, Spring
* Prerequisite(s): DMT 1510, DMT 151L, DMT 1520, and DMT 152L
* Corequisite(s): DMT 253L, Recommended

Covers electronic fuel systems: parts, component ID, usage and operation. Includes instruction for electronic governors, set up, operation and diagnosis. Analyses advanced electronic fuel injectors and injection systems. Includes examination of sensor types, function and testing. Teaches the operation and component identification of current emission equipment as well as the present EPA emission standards.

DMT 253L
Electronic Engine Management Lab
1:0:3  Fall, Spring
* Prerequisite(s): DMT 1510, DMT 151L, DMT 1520, and DMT 152L
* Corequisite(s): DMT 2530

Covers the identification, location and function of all electronically controlled fuel system components, including sensors, governors, injectors, pumps, valving, and conductors. Explains the usage of computer based diagnostic equipment for troubleshooting and electronic engine management. Covers the identification, location and function of all emission system related components. Focusses on the proper maintenance and service of these systems.

DMT 281R
Cooperative Work Experience
1 to 8:1 to 8:0  Fall, Spring
* Corequisite(s): DMT 285R

Designed for Diesel Mechanics Technology majors. Provides paid, on-the-job work experience in the Diesel Service Industry. Meets for 4 hours, individual work experience is coordinated by a Cooperative Coordinator. Involves study of identifying and maximizing service opportunities. Students register for this class with approval of the Cooperative Coordinator. Includes lecture, guest speakers, video tapes, role playing, case analysis, oral presentations, and written assignments. Completers should be better able to perform in their field of work or study.

DMT 285R
Cooperative Correlated Class
1:1:0  Fall, Spring
* Corequisite(s): DMT 281R

Designed for Diesel Mechanics Technology majors. Identifies on-the-job problems through in-class discussion and study. Includes the study of identifying and maximizing service opportunities. Students register for this class with approval of the Cooperative Coordinator. Includes lecture, guest speakers, video tapes, role playing, case analysis, oral presentations, and written assignments. Completers should be better able to perform in their field of work or study.

DMT 291R
Special Projects
1 to 5:0:3 to 15  Fall, Spring
* Prerequisite(s): Advisor and Instructor Approval

For students majoring in diesel technology. Involves special projects. Allows independent projects that are designed to enhance beginning or advanced abilities. Repeatable for as many times as desired.

DMT 298R
Technical Workshop
1 to 4:0:2 to 12  On Sufficient Demand

For Diesel Technology students and other interested community members. Tailored to a specific topic, product, component, or vehicle related to the diesel service industry. Its purpose is to update technician training by addressing changes in products or equipment. Topics will vary. May be presented by an OEM, a dealer representative, or faculty member. Repeatable.

DMT 299R
VICA
1:1:0  Fall, Spring
* Prerequisite(s): EART 1050

Designed for Diesel Mechanics Technology majors. Supports and facilitates the goals and objectives of Vocational Industrial Clubs of America (VICA). VICA is a pre-professional student organization that develops social awareness, civic, recreational, and social activities. Students may participate in local, state, and national contests.

Elec Automat and Robotic Tech (EART)

EART 1050
DC Electrical Math
2:2:0  Fall, Spring, Summer
* Prerequisite(s): MAT 1010 or Departmental Approval

Utilizes algebraic formulas and methods to solve electrical problems related to DC electrical systems. Calculates voltage, current, resistance, power, and efficiency for DC circuits. Teaches circuit analysis techniques such as superposition, source transform, Thvenin's theorem, mesh and nodal analysis. Introduces wire sizing and resistance calculations pertaining to the National Electrical Code. Software fee of $20 applies.

EART 1060
AC Electrical Math
2:2:0  Fall, Spring, Summer
* Prerequisite(s): EART 1050

Utilizes algebraic formulas and methods to solve electrical problems related to AC electrical systems. Calculates voltage, current, resistance, reactance, impedance, power, VARs, volt-amperes and efficiency for single phase and three phase AC systems. Applies trigonometry, complex numbers, and phasors to circuit analysis techniques. Analyzes sine waves, transformers, transformer connections and power factor for single phase and three phase electrical systems. Teaches three phase balanced systems.

EART 1130
Applied Electrical Theory
4:4:0  Fall, Spring
* Corequisite(s): EART 1180

Reviews basic DC and AC theory involving voltage, current, resistance, reactance, batteries, magnetism, power and the use of digital meters. Introduces relay logic, logic gates, electrical wiring, safety, and troubleshooting techniques. Studies resistors, inductors, and capacitors. Includes basic Digital Fundamentals of numbering systems and Boolean algebra. Software fee of $20 applies. Lab access fee of $45 for computers applies.

EART 1180
Applied Electrical Lab
4:0:12  Fall, Spring, Summer
* Prerequisite(s) or Corequisite(s): EART 1050 and EART 1060

Emphasizes lab experiences in basic DC/AC theory such as voltage, current, resistance, batteries, magnetism, wire sizing, splicing, soldering, conduit bending, and troubleshooting. Applies Ohm's Law to practical DC and AC circuits. Provides hands on training in capacitors, inductors, resistors, and RLC circuits. Includes safety procedures, basic electrical tools, and electrical schematics and symbols. Introduces industrial and commercial, wiring techniques. Applies relays, ladder diagrams, logic gates, and switches to low voltage controls and electrical systems. Software fee of $20 applies. Lab access fee of $45 for computers applies. Course lab fee of $25 for materials applies.

EART 1250
Industrial Electrical Code
2:2:0  Fall, Spring
* Prerequisite(s): EART 1050, EART 1060, or departmental approval

Covers pertinent topics within the National Electrical Code related to commercial and industrial environments. Teaches code related to, electrical plans, specifications, wiring and installation methods, feeder load calculations, motor installation, motor controllers, panelboards, hazardous locations, protective devices, and grounding for commercial, and industrial applications. Software fee of $18 applies. Lab access fee of $45 for computers applies.
EART 1260 Logic 2:1:3 Fall, Spring
* Prerequisite(s): EART 1130, EART 1050, and EART 1180; or departmental approval

For students who desire a basic understanding of Digital Logic systems. Covers the basic logic levels, the 1's and 2's complement. Studies binary, decimal, octal, and hexadecimal numbers. Includes problems using Boolean Algebra, and DeMorgan's theorems. Teaches how to minimize combinational gates and troubleshoot logic circuits. Includes lecture, demonstrations, and lab work emphasizing hands-on lab experiments using logic gate circuits. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EART 1280 Electric Motor Control 4:4:0 Fall, Spring
* Prerequisite(s): EART 1050, EART 1060, EART 1130, and EART 1180; or departmental approval
* Prerequisite(s) or Corequisite(s): EART 1250, EART 1285

Covers installation, troubleshooting, preventive maintenance, and theory on DC/AC motors, generators, and associated industrial control circuitry. Introduces ladder logic, controls, sensors, motor starters, overloads, and electronic devices used to control and protect DC/AC Machines. Describes three phase systems, transformers, and delta-wye connections. Introduces AC variable speed drives. Supports hands-on labs and projects in EART 1285. Software fee of $20 applies. Lab access fee of $45 for computers applies.

EART 1285 Electric Motor Control Lab 4:0:12 Fall, Spring
* Prerequisite(s): EART 1050, EART 1060, EART 1130, EART 1180
* Prerequisite(s) or Corequisite(s): EART 1250, EART 1285

Covers the proper use of tools and test equipment needed to maintain motors and their controllers. Emphasizes the use of schematics, line diagrams, ladder logic, and wiring diagrams. Covers DC/AC, single phase, and three phase motors. Integrates logic design, motor protection, and wiring of motor control centers. Includes the workings of single phase and three phase transformers including delta and wye configurations. Course Lab fee of $14 for supplies/materials applies. Lab access fee of $45 for computers applies. Software fee of $20 applies.

EART 2110 Industrial Electronics I 4:4:0 Fall, Spring
* Prerequisite(s): EART 1280, and EART 1285; or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2115, EART 2250, EART 2255

Introduces semiconductor theory. Covers the concepts of PN junctions, transistors, operational amplifiers, voltage amplifiers, diodes, and other special semiconductor and industrial electronics. Includes lecture and demonstrations. Course lab fee of $29 for materials applies. Lab access fee of $45 for computers applies.

EART 2115 Industrial Electronics I Lab 2:0:6 Fall, Spring
* Prerequisite(s): EART 1280, EART 1285, or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2110, EART 2250, EART 2255

Introduces semiconductor theory. Covers the concepts of PN junctions, transistors, operational amplifiers, voltage amplifiers, diodes, and other special semiconductor and industrial electronic components. Includes practical hands-on labs. Software fee of $20 applies. Lab access fee of $45 for computers applies.

EART 2150 Industrial Hydraulics and Pneumatics 2:2:0 Fall, Spring
* Prerequisite(s): EART 2110, EART 2115, EART 2250, EART 2255 or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2160, EART 2250, EART 2215, EART 2270, EART 2275

Covers the fundamentals of hydraulic and pneumatic components and systems used in industrial applications. Studies pumps, motors, directional and flow control valves, cylinders, transmission, and fluids. Emphasizes maintenance, safety, and environmental problems. Examines troubleshooting techniques and blueprint/print reading. Course Lab fee of $15 for supplies/materials applies. Lab access fee of $45 computers applies.

EART 2155 Industrial Hydraulics and Pneumatics Lab 1:0:3 Fall, Spring
* Prerequisite(s): EART 2250, EART 2255, EART 2110, EART 2115
* Prerequisite(s) or Corequisite(s): EART 2160, EART 2165, EART 2270, EART 2275

Covers the fundamentals of hydraulic and pneumatic components and systems used in industrial applications. Studies pumps, motors, directional and flow control valves, cylinders, transmission, and fluids. Emphasizes maintenance, safety, and environmental problems. Examines troubleshooting techniques and blueprint/print reading. Software fee of $20 applies. Lab access fee of $45 for computers applies.

EART 2160 Industrial Electronics II 2:2:0 Fall, Spring
* Prerequisite(s): EART 2110, EART 2115, EART 2250, EART 2255 or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2165, EART 2270, EART 2275, EART 2280, EART 2285

Explains the theory and operation of industrial solid state thyristor devices, power circuits, integrated circuits, and DC/AC electronic motor controls. Covers basic electronic components found in variable speed drives. Introduces stepper and servo motor theory. Includes lecture and demonstration. Course Lab fee of $11 for materials applies. Lab access fee of $45 computers applies.

EART 2165 Industrial Electronics II Lab 1:0:3 Fall, Spring
* Prerequisite(s): EART 2110, EART 2115, EART 2250, EART 2255, or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2160, EART 2270, EART 2275, EART 2280, EART 2285

Teaches the theory and operation of industrial solid state thyristor devices, power circuits, integrated circuits, and DC/AC electronic motor controls. Emphasizes practical application of electronics found in variable speed drives. Implements stepper and servo motors. Includes hands-on labs. Software fee of $20 applies. Lab access fee of $45 for computers applies.

EART 2250 Industrial Programmable Logic Controllers—PLCs 4:4:0 Fall, Spring
* Prerequisite(s): EART 1280, EART 1285 or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2110, EART 2115, EART 2255

Covers the theory, programming, and industrial control system applications of small and medium sized programmable logic controllers (PLCs). Studies basic maintenance, operation, troubleshooting, and programming instructions / techniques for industrial PLCs. Concentrates on interfacing analog and digital I/O to the PLC. Covers human machine interface (HMI) configuration, programming and PLC integration. Includes lecture, demonstration, print reading, and industry examples. Course lab fee of $90 for equipment applies. Lab access fee of $45 for computers applies. Canvas Course Mats $78/McGraw applies.

EART 2255 Industrial Programmable Logic Controllers—PLCs Lab 2:0:6 Fall, Spring
* Prerequisite(s): EART 1280, EART 1285
* Prerequisite(s) or Corequisite(s): EART 2250, EART 2210, EART 2115

Covers the theory, programming, and industrial control system applications of small and medium sized programmable logic controllers (PLCs). Studies basic maintenance, programming, and troubleshooting techniques for industrial PLCs. Teaches human-machine interface (HMI) configuration, programming, and PLC integration. Includes PLC communications via serial and industrial Ethernet. Includes hands-on labs and projects. Software fee of $20 applies. Lab access fee of $45 for computers applies.

EART 2260 Advanced Logic 3:2:3 On Sufficient Demand
* Prerequisite(s): EART 1260 or departmental approval
* Corequisite(s): EART 2160

Covers theory and industrial applications of Comparators, Decoders, Encoders, Multiplexers, Demultiplexers, Latches (SR and D), Flip Flops (SR, D, and JK), One-shots, Timers, Counters, and Shift Registers. Includes lecture, demonstrations, and lab projects with hands-on experience. Emphasizes implementation and troubleshooting of logic circuits. Completers should be able to work in industry in related work at entry level positions with safety and environmental awareness. Course Lab fee of $15 for materials applies.
Course Descriptions

EART 2270
Industrial Programmable Automation Controllers—PACs
2:2:0
* Prerequisite(s): EART 2250, EART 2255, EART 2110, EART 2115, or Departmental Approval
* Prerequisite(s) or Corequisite(s): EART 2275, EART 2160, EART 2165
Introduces the theory and application of advanced industrial programmable automation controller (PAC) instructions, user-defined data types, add-on instructions, and advanced programming techniques. Studies PAC programming languages including ladder logic and function block pertaining to industrial control applications. Covers theory related to PAC integration of devices to variable speed drives, analog / digital sensors, and encoders. Includes advanced Human Machine Interface (HMI) programming concepts and introduces basic concepts of programmable safety relays. Includes lecture and demonstration. Course lab fee of $90 for equipment applies. Lab access fee of $45 for computers applies.

EART 2275
Industrial Programmable Automation Controllers—PACs Lab
1:0:3
* Prerequisite(s): EART 2250, EART 2255, EART 2110, EART 2115, or Departmental Approval
* Prerequisite(s) or Corequisite(s): EART 2270, EART 2160, EART 2165
Covers the implementation and application of advanced industrial programmable automation controller (PAC) instructions, user-defined data types, add-on instructions, and advanced programming techniques. Develops PAC programs using ladder logic and function blocks to control systems and machines. Covers PAC integration of devices to variable speed drives, sensors, and encoders. Implements advanced human-machine interface (HMI) programming. Integrates programmable safety relays into class projects. Includes hands-on labs and projects. Software fee of $20 applies. Lab access fee of $45 for computers applies.

EART 2280
Process Control Instrumentation
2:2:0
* Prerequisite(s): EART 2110, EART 2115, EART 2250, EART 2255; or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2285
Covers basic theory on measuring process variables such as temperature, pressure, level, and flow. Discusses open loop and closed loop control including PID loops. Introduces instrumentation maintenance, installation, and device specifications. Discusses basic calibrations, safety instruments and standards, classified areas, and intrinsically safe systems. Presents competency in process and instrumentation diagrams (P&ID). Covers HART and modbus communications in industrial instrumentation.

EART 2285
Process Control Instrumentation Lab
1:0:3
* Prerequisite(s): EART 2110, EART 2115, EART 2250, EART 2255; or departmental approval
* Prerequisite(s) or Corequisite(s): EART 2280
Implements process control instrumentation on class projects. Integrates open loop and closed loop control including PID loops with industrial instrumentation and a PLC. Explores basic calibrations, safety instruments and standards, classified areas, and intrinsically safe systems. Implements process and instrumentation diagrams (P&ID) on industrial systems. Integrates HART and modbus communications into applicable industrial projects. Covers programming and troubleshooting of industrial instruments in a hands-on environment. Computer Lab fee of $90 applies. Lab access fee of $45 for computers applies.

EART 281R
Cooperative Work Experience
1 to 8:1 to 8:0
On Sufficient Demand
* Prerequisite(s): Approval of Department Chair
Provides paid on-the-job work experience that relates to Electrical Automation and Robotics Technology (EART) in the student’s major. Work experience, the related class, and enrollment are coordinated by the EART Cooperative Coordinator. Completers must individually set and complete goals/meeting objectives based on the job description from their work assignment. May be graded credit/no credit.

EART 285R
Cooperative Correlated Class
1:1:0
On Sufficient Demand
* Prerequisite(s): Approval of Department Chair
Designs to identify on-the-job problems and to remedy those problems through in-class discussion and study. Focusses on preparing for, participating in, and utilizing the experiences available from working in a cooperative education/internship program.

ECE 1020
Computer Engineering Problem Solving with MATLAB and LabVIEW
1:1:0
* Prerequisite(s): MATH 1050 or higher
Introduces the field of Computer Engineering through programming in the MATLAB and LabVIEW languages. Teaches the design of various components of a prototype communication system while learning about the following aspects of MATLAB: scripts and function files, math functions, commands for array construction and manipulation, string expressions, logic operators, control flow, and graphics. No prior knowledge of computer engineering is assumed. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 2220
Fundamentals of Electric Circuit Analysis
3:3:0
Spring
* Prerequisite(s): MATH 1210, PHYS 2210
Studies fundamental electric circuit analysis techniques. Develops analysis techniques using Kirchoff’s laws, Thévenin and Norton equivalents, superposition, and phasors. Covers transient and steady-state time-domain analysis, and frequency analysis. Lab access fee of $25 for computers applies.

ECE 22215
Fundamentals of Electric Circuit Analysis Lab
1:0:3
On Sufficient Demand
* Prerequisite(s): MATH 1210, PHYS 2210
Covers fundamental electric circuit analysis techniques. Develops analysis techniques using Kirchoff’s laws, Thévenin and Norton equivalents, superposition, and phasors. Covers transient and steady-state time-domain analysis, and frequency analysis. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 2280
Process Control Instrumentation
3:3:0
* Prerequisite(s): MATH 1210, PHYS 2210, ECE 1000
Develops linear circuit theory and its application in the analysis and design of RLC active circuits. Covers DC, AC, and transient analysis utilizing node and mesh analysis. Introduces the use of CAD tools. Integrates a laboratory. Lab access fee of $45 for computers applies.

ECE 2285
Process Control Instrumentation Lab
1:0:2
* Prerequisite(s): MATH 1210, PHYS 2210
Laboratory for EENG 2250 develops linear circuit theory and its application in the analysis and design of RLC active circuits. Covers DC, AC, and transient analysis utilizing node and mesh analysis. Introduces the use of CAD tools. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 2700
Digital Design I
3:3:0
Fall
* Prerequisite(s): MATH 1050 or MATH 1055
* Corequisite(s): ECE 2705
Studies the design and application of combinational and sequential logic circuits with discrete and programmable logic devices. Lab access fee of $45 for computers applies.
ECE 2705  Digital Design I Lab  
1:0:2  Fall, Spring  
* Prerequisite(s): MATH 1050 or MATH 1055  
* Corequisite(s): ECE 2700  
Designed to accompany ECE 2700. Covers design of digital systems with discrete and programmable logic devices. Includes the use of CAD tools for system design and verification. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 2760  Introduction to Semiconductor Theory and Nanotechnology  
3:3:0  Fall, Spring  
* Prerequisite(s): MATH 1060 or higher (MATH 1090 not included)  
Introduces the theory of semiconductor materials and devices. Provides an understanding of Nano/microfabrication technology and the physics of semiconductor devices. Covers design principles for the fabrication of newly developed devices and applications. Lab access fee of $45 for computers applies.

ECE 3250  Energy Conversion  
3:3:0  Spring  
* Prerequisite(s): ECE 2250, University Advanced Standing, and (Formal Acceptance into the Electrical Engineering Program, or Departmental Approval)  
Introduces the theory of energy conversion including torque and power in singly/doubly excited electromagnetic systems, single and three-phase transformers, single and three-phase induction motors including speed control, three-phase synchronous generators and DC machines. Lab access fee of $45 for computers applies.

ECE 3350  Control Systems  
3:3:0  Spring  
* Prerequisite(s): ECE 2250, University Advanced Standing, and (Formal Acceptance into the Electrical Engineering Program, or Departmental Approval)  
Describes modeling of control systems engineering. Covers modeling in the frequency and time domains, analog and discrete transfer function models, reduction of multiple subsystems, system response specifications, control system characteristics, root locus analysis and design, frequency response analysis and design. Emphasizes computer-aided analysis. Lab access fee of $45 for computers applies.

ECE 3450  Electromagnetics and Transmission Lines  
3:3:0  Spring  
* Prerequisite(s): PHYS 2220, ECE 2250, University Advanced Standing, and (Formal Acceptance into the Electrical Engineering Program, or Departmental Approval)  
Introduces the fundamentals of electromagnetic field theory and application: vector analysis, electric and magnetic fields, potential theory, dielectric and magnetic material properties, conductance, capacitance, and inductance, Maxwell’s equations and circuit concepts. Explains transmission lines as a bridge to understanding electromagnetic field theory. Covers basic principles of radiation and propagation in waveguides and antennas. Lab access fee of $45 for computers applies.

ECE 3710  Applied Probability and Statistics for Engineers and Scientists  
3:3:0  Fall, Spring, Summer  
* Prerequisite(s): MATH 1210 and University Advanced Standing  
Studies probability and statistical theory with an emphasis on engineering and computer science applications. Covers descriptive statistics, discrete and continuous random variables, probability distributions, hypothesis testing, expectation, estimation, ANOVA testing, and regression analysis. Includes computer analysis of data and simulation. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 3730  Embedded Systems I  
3:3:0  Fall, Spring  
* Prerequisite(s): ECE 2700, University Advanced Standing, and (Formal Acceptance into the Electrical or Computer Engineering Program, or Departmental Approval)  
Introduces the fundamentals of embedded systems and software aspects of embedded processor architectures and assembly language programming. Develops the theory and technology necessary for the interconnection of devices and systems to microcontrollers by using hardware and software examples and students’ projects. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 3740  Digital Design II  
3:3:0  Fall, Spring  
* Prerequisite(s): ECE 2700, University Advanced Standing, and (Formal Acceptance into the Electrical Engineering Program or Computer Engineering program, or Departmental Approval)  
Covers the design and verification of digital systems. Emphasizes hierarchical design principles and the use of programmable logic devices (PLDs). Utilizes modern CAD tools and design languages (VERILOG). Lab access fee of $45 for computers applies.

ECE 3750  Engineering Analysis  
3:3:0  Fall  
* Prerequisite(s): MATH 1220, ECE 1000, and University Advanced Standing  
Introduces the fundamentals of the application of Laplace and Fourier transforms. Studies Linear systems, abstract vector spaces, matrices through eigenvalues and eigenvectors, solution of ordinary differential equations, Laplace transforms, first order systems, and complex numbers. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 3760  Electronic Systems  
3:3:0  Fall, Spring  
* Prerequisite(s): ECE 2250, PHYS 2220, University Advanced Standing, and (Formal Acceptance into the Electrical Engineering Program or Computer Engineering program, or Departmental Approval)  
Introduces semiconductor theory and the fundamentals of diode and transistor operation. Covers the use of discrete and integrated active devices in linear amplifier and switching applications. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 3765  Electronic Systems Lab  
1:0:2  Fall, Spring  
* Prerequisite(s): ECE 2250, PHYS 2220, and University Advanced Standing  
* Corequisite(s): ECE 3760  
Designed to accompany ECE 3760. Covers electronic analog circuit design, simulation, construction, debugging and measurement of circuit performance quantities using advanced instrumentation techniques. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 3770  Signals and Systems  
3:3:0  Fall  
* Prerequisite(s): ECE 3750, University Advanced Standing, and (Formal Acceptance into the Electrical Engineering Program or Computer Engineering program, or Departmental Approval)  
Introduces the theory and practice of control systems engineering. Covers modeling in the frequency and time domains, analog and discrete transfer function models, reduction of multiple subsystems, system response specifications, control system characteristics, root locus analysis and design, frequency response analysis and design. Emphasizes computer-aided analysis. Lab access fee of $45 for computers applies.

ECE 3780  Communication Systems and Circuits  
3:3:0  Spring  
* Prerequisite(s): ECE 3770, University Advanced Standing, and (Formal Acceptance into the Electrical Engineering Program, or Departmental Approval)  
Introduces the fundamentals of electronic communication systems and circuits. Covers pulse code modulation, angle modulation, amplitude modulation, and noise in communication systems. Lab access fee of $45 for computers applies.

ECE 3785  Signals and Systems Lab  
1:0:3  Spring  
* Prerequisite(s): ECE 3770 and University Advanced Standing  
* Corequisite(s): ECE 3780  
Introduces the fundamentals of electronic communication systems and circuits. Covers pulse code modulation, angle modulation, amplitude modulation, and noise in communication systems. Lab access fee of $45 for computers applies.

ECE 4250  Power Systems Engineering  
3:3:0  On Sufficient Demand  
* Prerequisite(s): ECE 3250, (Formal Acceptance into the Electrical Engineering Program, or Departmental Approval), and University Advanced Standing  
Introduces power system analysis and design with the aid of a personal computer. Emphasizes AC power generation, distribution and usage. Covers single-phase and 3-phase power, motors, generators, power distribution and the grid, generation plants, smart grids, and power flow control. Lab access fee of $45 for computers applies.
Course Descriptions

ECE 4700
Computer Architecture for Engineering Applications
3:3:0  Fall, Spring
* Prerequisite(s): ECE 3740 and University Advanced Standing

Uses register transfer languages and simulation tools to describe and simulate computer operation; central processing unit organization, microprogramming, input/output, pipelining, virtual memory concepts, VLIW, superscalar out of order, ILP, and memory system architectures. Lab access fee of $45 for computers applies.

ECE 4730
Embedded Systems II
3:3:0  Spring
* Prerequisite(s): ECE 3730 and University Advanced Standing

Presents the design of hardware and software required for embedded, real-time systems. Covers types of real-time systems, fuzzy logic, sensors, real-time operating systems, C programming skills, and wireless sensor networks. Lab access fee of $45 for computers applies.

ECE 4740
Queueing Theory
3:3:0  Fall, Spring
* Prerequisite(s): STAT 2040, ECE 3750, and University Advanced Standing

Includes computer systems network modeling using stochastic processes: queueing theory models, performance analysis, resource allocations, large-system response parameters. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 4750
Digital Signal Processing
3:3:0  Fall, Spring
* Prerequisite(s): ECE 3770, ECE 3701, and University Advanced Standing

Introduces the theory of digital signal processing and its application to practical problems. Covers z-transforms, discrete-time Fourier transforms, FIR (Finite Impulse Response) and IIR (Infinite Impulse Response) digital filter design. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 4755
Digital Signal Processing Lab
1:0:3  Spring
* Prerequisite(s): ECE 3770 and University Advanced Standing

Performs software and hardware experiments illustrating the basic principles and techniques of digital signal processing. Teaches programming of real-time signal processing algorithms on a concrete DSP chip, and Accelerate the DSP code on the GPU. Lab access fee of $45 for computers applies.

ECE 4760
VLSI Design
3:3:0  Fall
* Prerequisite(s): ECE 3760 and University Advanced Standing

Focuses on theories and techniques of VLSI design on CMOS technology. Studies the fundamental concepts and structures of designing digital VLSI systems, including CMOS devices and circuits, standard CMOS fabrication processes, CMOS design rules, static and dynamic logic structures, interconnect analysis, CMOS chip layout, simulation and testing, low power techniques, design tools and methodologies, VLSI architecture. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 4765
VLSI Design Laboratory
1:0:2  Fall
* Prerequisite(s): ECE 3765 and University Advanced Standing

Designed to accompany ECE 4760. Teaches students the complete process of building a ready-to-fabricate CMOS integrated circuit using a commercial design software. Lab experiments include the layout design of CMOS transistors, gate level design, design using VHDL, CHIP design and pin configuration, and simulation of the circuit for slack time and power consumption. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 4770
Artificial Neural Networks
3:3:0  Fall
* Prerequisite(s): MATH 1210 and University Advanced Standing

Introduces a range of topics in the field of artificial neural networks: modeling of brains, applicable algorithms, and related applications. Develops the theory of a number of neural network models such as Perceptron, Multilayer Perceptron, and Hopfield networks. Emphasizes algorithms for implementing simple artificial neural networks and their applications. Software fee of $10 applies. Lab access fee of $45 for computers applies.

ECE 4780
Wireless and Mobile Communications
3:3:0  Spring
* Prerequisite(s): MATH 1210, ECE 2250, and University Advanced Standing

Covers the fundamentals of analog and digital wireless communications. Includes baseband and bandpass, analog and digital signaling techniques along with appropriate mathematical background in Fourier transforms, probability and random variables. Introduces both software and hardware designs. Lab access fee of $45 for computers applies.

ECE 4800
Computer Engineering Senior Design Project
3:3:0  Fall, Spring
* Prerequisite(s): ECE 3740 and University Advanced Standing

Serves as a project-oriented capstone course for computer engineering majors. Emphasizes major hardware and software design. Includes identification and completion of a suitable design project to be mutually selected by the faculty supervisor and student. Requires weekly written and oral presentations as well as a final written project report and an oral presentation. Requires completion of a program level assessment test. Software fee of $10 applies. Course fee of $27 for materials/testing applies. Lab access fee of $45 for computers applies.

ECE 481R
Electrical and Computer Engineering Internship
1 to 3:1 to 3:0  Fall, Spring, Summer
* Prerequisite(s): Admission to Computer Engineering program or Electrical Engineering program, Instructor Approval, and University Advanced Standing

Provides an opportunity to gain career-related experience while earning academic credit. Credit is determined by the number of hours a student works during the semester. May be Graded Credit/No Credit. May be repeated for a maximum of three credits toward graduation.

ECE 4900
Electrical and Computer Engineering Capstone I
3:3:0  Fall
* Prerequisite(s): ECE 3730 and University Advanced Standing

Focuses on team-oriented design projects. Incorporates engineering standards and realistic constraints including economic, environmental, sustainability, manufacturability, ethical, health and safety, social, and political. Emulates the problems encountered by engineers working in commercial, industrial, and governmental entities. Capstone I and II must be taken in consecutive semesters. Lab access fee of $45 for computers applies.

ECE 490R
Advanced Current Topics in Computer Engineering
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): Department Approval and University Advanced Standing

Provides exposure to emerging technologies and topics of current interest in computer engineering. Varies each semester depending upon the state of technology. May be repeated for a maximum of 6 credits toward graduation without prior written department approval. Lab access fee of $45 for computers applies.

ECE 491R
Independent Study
1 to 3:0 to 9  On Sufficient Demand
* Prerequisite(s): Prior written Department Chair approval and University Advanced Standing

Offers independent study as directed by a faculty advisor in reading, individual projects, etc. Varies each semester depending upon the state of technology. A maximum of 3 credit hours may be counted towards graduation without prior written Department approval.
ECE 4950  
Electrical and Computer Engineering  
Capstone II  
3:3:0  
Spring  
* Prerequisite(s): ECE 4900 and University Advanced Standing

Serves as a second semester of the two-semester design experience from conception to modeling or prototype. Focuses on team-oriented design projects. Incorporates engineering standards and realistic constraints including economic, environmental, sustainability, manufacturability, ethical, health and safety, social, and political. Emulates the problems encountered by engineers working in commercial, industrial, and governmental entities. Capstone I and II must be taken in consecutive semesters. Lab access fee of $45 for computers applies.

Edu Child and Family Studies (ECFS)

ECFS 208R  
Directed Readings  
1 to 4:0:3 to 12  
On Sufficient Demand

For second-year ECFS students. Includes readings with analysis and discussion of selected topics in child education and family relationships. Requires approval of the department for registration. May be taken for a maximum of four credits.

ECFS 2900  
Independent Study  
1 to 5:1:0 to 12  
Fall, Spring, Summer  
* Prerequisite(s): Approval of ECFS Department

Provides independent study through faculty-directed individual projects related to working with children and families. Possible areas of study include curriculum, behavior management, program administration, family studies, and case studies in applied theory.

ECFS 3320  
Gender Perspectives in Education  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): University Advanced Standing

For educators, counselors, student teachers, those wanting to recertify, and other interested students. Explores gender issues that may affect the educational experience of girls and boys. Examines history, biases, myths, and stereotypes. Develops sensitivity to issues of gender through discovery learning. Assists participants to recognize cultural and individual issues as they pertain to gender.

ECFS 4720  
Characteristics and Identification of Gifted Students  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): Permission of instructor and University Advanced Standing

Designed for senior teacher education students and in-service teachers. Reviews different conceptualizations of intelligence and giftedness and practices and instruments used for identification. Describes characteristics and cognitive, social and developmental needs of gifted students.

ECFS 4730  
Teaching Gifted Students  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): ECFS 4720, Instructor Permission, and University Advanced Standing

For senior education students and in-service teachers in local schools. Describes the various settings in which gifted students are served. Reviews instructional strategies and assessment appropriate to teaching gifted students, and strategies for dealing with parents.

ECFS 492R  
Special Topics in Gifted Education  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): (EDEL 3000 or EDSC 3000), Instructor Permission, and University Advanced Standing

Designed for senior education students and local in-service teachers. Includes topics, such as underserved populations of gifted students, contemporary issues in gifted education, creativity, etc. May be repeated 3 times for credit.

ECFS 494R  
Special Topics in Educational Psychology  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): (EDEL 3000 or EDSC 3000), Instructor Permission, and University Advanced Standing

Explores topics in educational psychology as it relates to classrooms. Includes topics, such as motivation to learn and succeed, classroom application of learning and cognition, role of emotion in learning, etc. Varies each semester. May be repeated 3 times for credit.

Economics (ECON)

ECON 1010  
Economics as a Social Science  
3:3:0  
Fall, Spring

An introductory course which studies the operation of a mixed market system, including production, domestic and global trade, and labor-management economics. Includes business cycles and monetary and fiscal policies designed to modify those cycles. Canvas Course Mats $78/McGraw

ECON 2010  
Microeconomics  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): MATH 1050, MATH 1055, MATH 1090 or higher or appropriate test score

Designed for business management transfer students and as elective credit for other business students desiring economic decision-making skills. Covers intermediate microeconomics. Uses lecture, class discussion, videos, student presentations, and computer simulation. Completers should be ready to take university upper-level economics courses and to make upper-level management decisions. May be delivered online. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw

ECON 2020  
Intermediate Microeconomics  
3:3:0  
Fall, Spring  
* Prerequisite(s): MATH 1050, MATH 1055, MATH 1090 or higher or appropriate test score

Provides the basic understanding of macroeconomic concepts such as Gross Domestic Product (GDP), inflation, unemployment, interest rates, fiscal and monetary policy, among others. Offers business students the needed framework to comprehend the role of macroeconomic policies in the United States. Uses lecture, class discussions, group work, student presentations, and videos for engaged learning. Prepares business students with the necessary prerequisite knowledge to successfully gain admittance to upper-division university economics courses. May be delivered online. Lab access fee of $30 for computers applies. Canvas Course Mats $72/McGraw applies.

ECON 3010  
Intermediate Microeconomics  
3:3:0  
Fall, Spring  
* Prerequisite(s): MGMT 3345 and (MATH 1100 or MGMT 2240 with a B or higher in each), Matriculation into the Woodbury School of Business, and University Advanced Standing

Covers intermediate microeconomic theory for economics and finance majors planning on extending their economics training into econometrics, mathematical economics and other related courses. Reviews microeconomic theory and models to develop an understanding of, and ability to use, modern microeconomic theory, measurement, and policy.

ECON 3020  
Managerial Economics  
3:3:0  
Fall, Spring

* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Extends the discussion of economic theory of markets, demand and supply, elasticity, and marginal analysis process to make more effective decisions. Emphasizes an applied approach using basic theoretical concepts. Discusses the concepts of production theory and cost analysis in both the short and long run. Describes how to apply economic decision making in a variety of competitive markets including perfect competition, monopoly, monopolistic competition and oligopoly. Reviews elements of risk and uncertainty in a microeconomic framework. Canvas Course Mats $72/McGraw applies.

ECON 3030  
Intermediate Macroeconomics  
3:3:0  
Spring  
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Extends discussion of models of income determination, economic growth theory, analysis of fiscal and monetary policy theory, international trade issues, and alternative views related to the impact of macro theory in the US and world economies. Prepares economics majors for other advanced economic theory and policy courses.
ECON 3040 Environmental Economics
3:3:0 On Sufficient Demand
* Prerequisite(s): Instructor Approval and University Advanced Standing

Introduces economic issues of ecological and environmental theory and policy. Identifies the economic tools appropriate for the analysis of ecological and environmental challenges for an inter-disciplinary group of engineering, science, social science, and natural resources management professionals. Presents the macroeconomic concepts useful for reviewing these types of issues. Evaluates public policy issues related to environmental, ecological, and natural resource challenges.

ECON 305G International Economics
3:3:0 Spring
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Covers theoretical and practical concepts of international trade, policy, and finance in a global economy. Reviews both macro and micro topics such as comparative advantage and trade policy as well as macro issues such as balance of payments, exchange rates, and global capital markets. Includes coverage of cultural and intercultural relationships that exist within an economic context. Canvas Course Mats $96/ Pearson applies.

ECON 3060 Money and Banking
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Matriculation into any Woodbury School of Business program and University Advanced Standing

Studies the US financial system including primary institutions and markets. Includes analysis of the Federal Reserve System, American and International financial markets. Reviews the impact of monetary policy on financial institutions and financial intermediation. Presents the term structure of interest rates, money, capital, and mortgage markets, and management of financial institutions and insurance companies.

ECON 3370 Economic Modeling and Quantitative Analysis
3:3:0 Fall
* Prerequisite(s): Matriculation into Woodbury School of Business, MGMT 3345, and University Advanced Standing

Discusses economic modeling, quantitative methods and applications in economics. Covers intermediate mathematical tools required for economic and financial analysis. Prerequisite course for econometrics.

ECON 3810 Labor Economics
3:3:0 On Sufficient Demand
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Provides an analysis of the theory and practice of labor markets. Defines the factors that influence the demand and supply of labor in a modern economy. Develops the concepts for a theory of human capital. Reviews factors such as wage determination, occupational differences, problems of gender, labor turnover, discrimination, impacts of education and training, impacts of labor unions, immigration, changes in technology, and other related issues. Lab access fee of $30 for computers applies.

ECON 3820 Economic Development
3:3:0 Fall
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Describes and evaluates economic models of development in third world and emerging economies. Includes a review of theories of economic growth, the importance of creating new economic institutions, the importance of education and human capital development, and the importance of creating stable political and social cultures in the development of modern economic systems. Lab access fee of $30 for computers applies.

ECON 3830 History of Economic Thought
3:3:0 Fall
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Traces the evolution of formal economic theory primarily beginning with Adam Smith, the first classical economic theorist. Studies other classical writers including Ricardo and Malthus as well as Marx's criticisms. Studies neoclassical analysis through Marshall and the critiques of the Austrian school. Reviews the modern theorists including Keynes and the development of macroeconomics, the development of empirical and mathematical economic theories, monetarism, and other post-Keynesian analysis. Lab access fee of $30 for computers applies.

ECON 4010 Advanced Microeconomics
3:3:0 Spring
* Prerequisite(s): ECON 3010 and University Advanced Standing

Advanced course in microeconomics for economics majors. Addresses the issues related to modern economic theories of imperfect competition, the market of factors of production, cost analysis, the distribution of income, general equilibrium, and welfare economics.

ECON 4020 Advanced Macroeconomics
3:3:0 On Sufficient Demand
* Prerequisite(s): ECON 3030, MGMT 3345, and University Advanced Standing

Is an advanced course in macroeconomics for economics majors. Provides economics graduates an understanding of modern macroeconomic theory including traditional macro issues, models with incomplete nominal adjustment, inflation theory, dynamic inconsistency and recent theories of unemployment.

ECON 4040 Game Theory
3:3:0 On Sufficient Demand
* Prerequisite(s): ECON 4010, ECON 4320, and University Advanced Standing

Designed to give students the skills to assess economic and social issues where strategic interaction is relevant. Teaches students to condition their responses based on the reactions and behavior of other individuals rather than merely in response to outside constraints, which is the usual approach to optimization theory. Provides concepts, tools, and experience to deal with game theory situations.

ECON 4100 Analysis of Financial Institutions and Markets
3:3:0 Fall
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Studies money, banking, and financial markets from an economics perspective. Examines the structure of interest rates and their influence in financial markets. Reviews financial instruments, financial intermediaries, banking institutions and the types of assets and liabilities common to those systems. Covers money supply and money demand within the central banking system.

ECON 4150 Public Finance
3:3:0 Spring
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Designed as elective credit for Business Management and other bachelor of science degree majors. Develops knowledge, skills, and attitudes required for those employed in and analyzing the public sector. Describes the three levels within the public structure including respective purposes and functions, revenue generation alternatives, budgeting, deficit financing, public choice, income redistribution, public goods, and externalities. Lab access fee of $30 for computers applies. Canvas Course Mats $78/McGraw applies.

ECON 4320 Mathematical Economics
3:3:0 Fall
* Prerequisite(s): ECON 3010, and University Advanced Standing

Discusses advanced concepts in economic modeling, the application of mathematical models in economic analysis, and advanced research methods in economics. Covers advanced mathematical applications in economics and finance for students interested in advanced econometric analysis and model building. Lab access fee of $30 for computers applies.

ECON 4340 Econometrics Applications
3:3:0 Spring
* Prerequisite(s): ECON 3370 and University Advanced Standing

Provides an opportunity for economics students with mathematical and statistical skills to apply those capabilities in real-world applications of the science of econometrics. Examines some of the well-known examples of econometric analysis that formed the foundation of econometrics science. Develops analytical skill by defining data inputs and working through a series of projects of the type students might encounter in future professional experience. Lab access fee of $30 for computers applies.
ECON 4500
US Economic Development and History
3:3:0 Spring
* Prerequisite(s): Matriculation in the Woodbury School of Business, University Advanced Standing
Provides an analysis of the economic development of the United States. Describes the factors that led to the development of colonies in the Americas and the causes of the Revolution and formation of a government. Discusses the economic causes for western expansion, transportation development, and the rise of American capitalism. Reviews the shift from agrarian to industrial development, the economic development of big business and big government, the impact of depression, and the economics of world war and peace. Lab access fee of $30 for computers applies.

ECON 490R
Special Topics in Economics
3:3:0 Not Offered
* Prerequisite(s): Departmental approval and University Advanced Standing
Provides short courses, workshops, and special programs in economics and current business and public policy topics. May be repeated for a maximum of 6 credits toward graduation.

ECON 4960
Senior Seminar Current Economic Issues
3:3:0 Fall, Spring
* Prerequisite(s): Department Chair Approval and University Advanced Standing
Provides exposure to emerging topics of current interest in economics. Topics vary each semester. Lab access fee of $30 for computers applies.

ECON 4970
Economic Research Design and Implementation
3:3:0 Not Offered
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing
Defines the scientific approach to managerial decision-making and project management. Describes issues related to problem definition, model development, data collection, model implementation using the data, model validation, results analysis, and using the findings to implement changes to solve problems. Examines both quantitative and qualitative models and methods. Allows students to work on real-world projects through the Utah Community Research Group (Utah CRG) and its research partners.

ECON 6300
Managerial Economics
3:3:0 Spring
* Prerequisite(s): Acceptance in the MBA program
Applies concepts and theories, based on managerial economic to business problems. Analyzes cost theory, pricing, market structures, and forecasting.

ECON 6330
Econometrics
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance in the MBA program
Provides graduate level introduction to applied regression tools, including simple and multivariate regression analysis; linear, nonlinear, and qualitative dependent variable models; distributed lags; seemingly unrelated regression, and model specification and validation tests.

Edu Early Childhood Education (EDEC)

EDEC 1640
Childrens Music and Movement
2:2:0 Spring
Covers historical foundations of music for young children. Explores strategies for teaching music and movement. Explores music appreciation, creative and structured music, and transitions and movement activities for young children. Investigates musical instruments and their use. Provides opportunities to teach music and movement activities to children. Examines music and movement curricula, academic content and learning environments. Course fee of $10 for materials applies.

EDEC 2300
Including Young Diverse Learners
2:2:0 Fall
* Prerequisite(s): PSY 1100; ACT (or equivalent) composite score of 21+ or completion of (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-
Introduces the implications of diversity and exceptionality in young children. Emphasizes the impact of diversity in children's educational settings. Includes basic assessment strategies. Introduces teaching strategies to address children with special needs and/or from diverse populations. Emphasizes inclusive and adaptive strategies for supporting young children with exceptionalities. Covers partnerships, families, and communities. Includes 10 hours of field experiences.

EDEC 2500
Child Development Birth to Eight Years
3:3:0 On Sufficient Demand
* Prerequisite(s): PSY 1100; ACT (or equivalent) composite score of 21+ or (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-
Covers developmental theories and milestones of a child's development. Emphasizes growth in all developmental domains. Focuses on supportive parental and care giver behaviors. Addresses the influence of out-of-home care. Examines the role of play when creating supportive environments. Investigates risk factors that impede optimal development. Includes 15 hours of structured observation, assessment, and interactions with young children.

EDEC 2600
Introduction to Early Childhood Education
2:2:0 Fall, Spring
* Prerequisite(s): ACT (or equivalent) composite score of 21+, or (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-
Introduces the field of early childhood education. Focuses on the historical, theoretical and philosophical foundations of early childhood education. Emphasizes developmentally appropriate practices, constructivism, and integrated, child-centered curriculum. Covers learning in all domains and content areas. Explores the components that identify quality programs for young children. Addresses ethical and professional teaching practices. Includes 8 hours of classroom observations. Canvas Course Mats of $51/Sage applies.

EDEC 2610
Child Guidance
3:3:0 Fall, Spring
* Prerequisite(s): ACT (or equivalent) composite score of 21+, or (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-
Focuses on the adult role in fostering the social and emotional development of young children. Emphasizes strategies adults can use to build positive self-concept, appropriate social behaviors, empathy, independence, responsibility and effective communication in children. Addresses the value of play to enhance children's social development. Introduces strategies to reduce aggressive behaviors. Examines factors that effect resiliency in young children. Includes 20 hours of structured field observations and interactions with young children.

EDEC 2620
Early Childhood Curriculum
3:3:0 Fall, Spring
* Prerequisite(s): ACT (or equivalent) composite score of 21+, or (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-, EDEC 2600 recommended
Examines the philosophy of Developmentally Appropriate Practice in connection to teaching preschool children, preparing the classroom environment, and planning/implementing instruction. Investigates a variety of curriculum models. Addresses the role of play to support learning in all areas of development. Introduces the principles of intentional teaching. Focuses on creating and teaching child-guided and teacher-guided learning experiences using early childhood standards. Covers integrating content when planning lessons. Includes curriculum mapping to facilitate integration of state core curriculum standards in early childhood classrooms. Includes 20 hours of field experiences in an early childhood classroom. Course fee of $10 for materials applies.
EDEC 2630
Literacy and Literature for Early Childhood
3:3:0 Fall, Spring
* Prerequisite(s): ACT (or equivalent) composite score of 21+, or (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-

Introduces practical aspects of fostering literacy development in young children. Focuses on emerging and early literacy in the home, early care, and education settings. Investigates strategies for holistic integration of various literacy processes. Addresses the role of appropriate children's literature to support early language and literacy development. Examines methods for developing positive attitudes towards reading, writing and books.

EDEC 2700
Early Childhood Practicum
3:3:0 Fall, Spring
* Prerequisite(s): ACT (or equivalent) composite score of 21+, or (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-, EDEC 2600 with a B- or higher
* Corequisite(s): EDEC 2620
* Prerequisite(s) or Corequisite(s): EDEC 2610 and EDEC 2620

Provides support-teaching and lead-teaching experiences in partnership preschool programs. Includes planning and implementing learning plans. Focuses on appropriate interactions with children in whole groups, small groups and individually. Addresses positive and effective guidance strategies. Provides parent education opportunities. Provides individual and collaborative reflection on teaching practices. Addresses professional and ethical teaching practices. Requires an assigned field experience with children. Course fee of $25 for materials applies.

EDEC 2720
Early Childhood Assessment
2:2:0 Fall, Spring
* Prerequisite(s): ACT (or equivalent) composite score of 21+, or (ENGL 1010 or ENGH 1005 or higher) with a minimum grade of C-, EDEC 2600 with a B- or higher
* Corequisite(s): EDEC 2700
* Prerequisite(s) or Corequisite(s): EDEC 2610 and EDEC 2620

Addresses assessment of children in an early childhood classroom during the practicum experience. Focuses on authentic assessment of young children, using anecdotal observations, child work samples, photos, checklists, event samplings, and logs. Emphasizes using child assessment to inform curriculum planning. Prepares participants to create child portfolio assessments for use in parent conferences. Includes creating a professional teaching portfolio assessment.

EDEC 3820
Assessment in the PreK-K classroom
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): EDEC 2620

Addresses assessment with children in pre-k or kindergarten classrooms. Focuses on authentic assessment of young children using anecdotal observations, child work samples, checklists, event samplings, and logs. Emphasizes assessment to inform curriculum planning. Addresses the connection between daily child assessment to Utah Early Childhood Core Standards or Utah State Kindergarten Core standards. Prepares participants to create child portfolio assessments for use in conference with parents. Includes personal professional portfolio assessment.

EDEL 1010
Introduction to Education
2:2:0 Fall, Spring, Summer

Facilitates matriculation into professional education programs. Examines the relationships of teaching, learning, motivating, and instructing in classroom settings. Includes observation in public schools to help students understand these relationships and appreciate the role of professional educators in today’s society. Requires substantial commitment of time to off-campus field experiences.

EDEL 2200
Computer Technology in Education
2:2:0 Fall, Spring, Summer

Explores the evaluation, selection, and use of technology for children. Develops students’ confidence in the use of a variety of technologies. Includes authentic hands-on experiences with digital tools. May be delivered online.

EDEL 2330
Childrens Literature
3:3:0 Fall, Spring, Summer

EDEL 3000
Educational Psychology
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Stresses research-based teaching/learning principles used in a classroom setting to enhance learning. Includes study of parent education, involvement, and support strategies, and collaboration with community agencies and professionals. Emphasizes the application of theory to practice with emphasis on teacher/student instructional interaction and teacher/parent/community agency interactions. Designed to help students understand how children develop and learn and how that knowledge should influence classroom teaching.

EDEL 3050
Foundations of American Education
2:2:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and Admission to Professional Education Program or permission of department chair

Provides a broad and comprehensive overview of American education. Facilitates the understanding of current educational practices in America as a result of the social, historical, economic, and political forces that have had influence on the education system. Provides opportunities for students to evaluate their own belief system concerning education.

EDEL 3100
Kindergarten Classroom
2:2:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Examines the philosophy of Developmentally Appropriate Practice in connection to interactions with kindergarten children, preparing the classroom environment, and planning/implementing instruction. Addresses the role of play to support learning in all areas of development. Includes strategies for supporting children's social, emotional, and cognitive development. Introduces the principles of intentional teaching. Emphasizes lesson planning in all content areas. Addresses the teacher's responsibility in creating a child-centered environment that supports creativity, critical thinking, communication, and collaboration.

EDEL 3250
Instructional Media
2:2:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Integrates technologies into classroom instruction. Prepares future teachers to use technologies to differentiate their instruction to meet the needs of all students. Explores ways technology can be used to revitalize pedagogy. Provides future teachers with the ability to develop lesson activities that empower students to make meaningful connections and develop 21st Century skills.
EDEL 330G Multicultural Understanding
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

EDEL 3350 Curriculum Design and Assessment
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Considers the role of the teacher and students in the development of a classroom management plan. Establishes a foundation for selecting a model to follow permission of department chair
* Corequisite(s): EDEL 4880, EDEL 4980, and EDEL 4990
Presents strategies for routine management of the classroom environment and materials, and the initial set up of a classroom and management plans.

EDEL 4200 Classroom Management I
1:1:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Introduces students to basic classroom management ideas. Provides learning strategies for managing students and materials in the classroom environment. Explores basic classroom management theories and practices.

EDEL 4210 Classroom Management II
1:1:0 Fall, Spring
* Prerequisite(s): EDEL 4200 and University Advanced Standing
* Corequisite(s): Admission to Professional Education Program or permission of department chair
Establishes a foundation for selecting a model to follow for the development of a classroom management plan. Considers the role of the teacher and students in developing rules and establishing habits in a classroom setting.

EDEL 4230 Classroom Management III
1:1:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Presents strategies for routine management of the classroom environment and materials, and the initial set up of a classroom and management plans.

EDEL 4240 Classroom Management IV
1:1:0 Fall, Spring
* Prerequisite(s): University Advanced Standing, EDEL 4230, admission to Professional Education Program or permission of department chair
* Corequisite(s): EDEL 4880, EDEL 4980, and EDEL 4990
Mentors teacher candidates through school-based collaboration with cooperating teacher or intern coach to determine best practices for classroom management. Includes developing a resume, tips on interviewing for a teaching position, and assistance with a teacher performance assessment.

EDEL 4400 Literacy Methods I
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Presents practical and theoretical foundations for fostering reading competence in children, kindergarten through grade 3. Addresses literacy models, research-based reading instruction, and literacy assessments. Includes collaborative activities and public school field experience with children. Emphasizes findings of the National Reading Panel, International Reading Association standards and positions in literacy instruction, as well as Utah Common Core curriculum requirements.

EDEL 4410 Literacy Methods II
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Presents practical and theoretical foundations for fostering reading competence in children, grade 3 to 6. Surveys three essential components of learning to read: fluency, vocabulary, and comprehension as well as reading motivation and academic reading. Addresses the explicit gradual release of responsibility model and think-alouds. Provides collaborative activities and public school field experience where original lesson plans are taught. Emphasizes findings of the National Reading Panel, International Reading Association standards and positions in literacy instruction, as well as Utah Common Core curriculum requirements.

EDEL 4420 Language Arts Methods
3:3:0 Fall, Spring
* Prerequisite(s): Admission to Professional Education Program or department chair permission and University Advanced Standing
Presents methods for teaching reading and language art concepts to children, grades K-6. Includes classroom instruction and field experiences with children.

EDEL 443G Teaching English as a Second Language
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Introduces teachers to the teaching of English as a second language not only for linguistic development, but for cognitive, academic and social development. Includes classroom instruction and field experiences with children. Presents methods for promoting reading competence and fostering literacy in limited English-speaking children, grades K-6. Prepares teachers to teach English as a second language in U.S. public schools. Covers both theoretical and applied aspects of second language learning and teaching and provides techniques, activities, strategies and resources to plan instruction for English language learners (ELLs).

EDEL 4510 Elementary Math Methods I
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Presents practical and theoretical foundations for teaching math concepts to children, grades K-6. Focuses on developing a mathematical mindset, choosing worthwhile mathematical tasks, and planning lessons. Includes classroom instruction and field experiences with children.

EDEL 4520 Elementary Science Methods
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Introduces methods for teaching science concepts to children, grades K-6. Includes classroom instruction and field experiences with children. Includes hands-on laboratory experiences.

EDEL 4530 Elementary Social Studies Methods
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Presents methods for teaching social studies concepts to children, grades K-6. Includes classroom instruction and field experiences with children.

EDEL 4540 Elementary Creative Arts Methods
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
Presents methods for integrating music, art, dance, and drama experiences across the curriculum in grades K-6. Includes classroom instruction and field experiences with children.
Course Descriptions

EDEL 4550 Elementary Math Methods II 3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing, EDEL 4510, and admission to Professional Education Program or permission of department chair

Presents methods for teaching math concepts through the contexts of specific mathematical content to children, grades K-6. Includes classroom instruction and field experiences with children.

EDEL 4620 Differentiation for Special Populations 2:2:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Includes theory and philosophy for teachers working with diverse populations, grades K-6. Outlines critical need for knowing students' personal, cultural, and community assets, as well as academic strengths and needs. Addresses strategies for pre- and formative assessment determining instruction that differentiates content, learning processes, and products for students' readiness, interests, and learning profiles.

EDEL 4880 Student Teaching--Grades K-6 9:9:0 Fall, Spring
* Prerequisite(s): University Advanced Standing, admission to Professional Education Program or permission of department chair, and successful completion of all other professional coursework.
* Corequisite(s): EDEL 4240, EDEL 4980, and EDEL 4990

Provides a culminating 12-week teaching experience in an elementary classroom, grades K-6. Enhances knowledge, skills, and attitudes in preparation for a teacher preparation assessment. Course Lab fee of $200 for practical experience applies.

EDEL 491R Independent Study 2 to 4:0 to 4:0 to 12 On Sufficient Demand
* Prerequisite(s): Department Chair Approval and University Advanced Standing

For Bachelor Degree seeking students and other interested persons. Offers independent study as directed at the discretion and approval of the department chairperson. May be repeated for a maximum of 3 credits toward graduation.

EDEL 4980 Elementary Education Capstone Seminar 1:1:0 Fall, Spring
* Prerequisite(s): University Advanced Standing, admission to Professional Education Program or permission of department chair, and successful completion of all other professional coursework.
* Corequisite(s): EDEL 4240, EDEL 4880, and EDEL 4990

Integrates previous coursework and current student teaching or internship experience. Includes designing, teaching and assessing a comprehensive learning segment in both literacy and math. Engages preservice teachers in professional analysis and reflection.

EDEL 4990 Teacher Performance Assessment Project 2:2:0 Fall, Spring
* Prerequisite(s): University Advanced Standing, admission to Professional Education Program or permission of department chair, and successful completion of all other professional coursework.
* Corequisite(s): EDEL 4240, EDEL 4880, and EDEL 4980

Introduces the teaching and learning cycle: planning, instruction, and assessment. Assists students in completing an authentic assessment tool that shows how they develop and evaluate student learning. Documents authentic practices from the student's teaching experience that address planning, instruction, assessment, analyzing teaching, and academic language to reveal the impact of a candidate's teaching performance on student learning. Course Lab fee of $300 applies.

EDE Secondary Education (EDSC)

EDSC 2000 Teacher Education in the Latino Culture 2:2:0 Not Offered
* Prerequisite(s): Departmental Approval

Introduces LET students to the teacher education system. Explores what it means to be a teacher in the Latino culture with emphasis on being a teacher in Utah. Examines general education classes along with teacher education classes in order to help students understand their importance in the education system. Demonstrates the importance of culture and ancestry in teacher education.

EDSC 2050 Educational Psychology 3:3:0 Fall, Spring
* Prerequisite(s): Admission to Professional Education Program and University Advanced Standing

Stresses research-based teaching and learning principles used in secondary classroom settings to enhance student learning and motivation. Emphasizes the application of theory to practice. Designed to help students in the professional secondary teacher preparation program prepare for state teacher licensing requirements. Requires service-learning.

EDSC 3050 Foundations of American Education 2:2:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Provides a broad and comprehensive overview of American education. Facilitates the understanding of current educational practices in America as a result of the social, historical, economic, and political forces that have had influence on the education system. Provides opportunities for students to evaluate their own belief system concerning education.

EDSC 3250 Instructional Media 2:2:0 Fall, Spring, Summer
* Prerequisite(s): Admission to Professional Education Program and University Advanced Standing

Focuses on using technology in 7-12th grade and addresses the integration of technology in all curricular areas for all students. Investigates theoretical and practical issues surrounding the use of multimedia, Internet resources, Web 2.0 functionality, educational software, and social networking within the curriculum. Examines applications and processes of Educational Technology, 21st Century learning skills, and the impact of national educational technology standards for content areas to teacher pedagogy and development in the classroom.

EDSC 4200 Classroom Management I 2:2:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Provides effective classroom management procedures (including classroom setup). Develops strategies to build strong student-teacher relationships and classroom management philosophy, rules, and consequences. Identifies strategies for 1st day success and strategies to handle behavior problems encountered in the classroom.

EDSC 4250 Classroom Management II 2:2:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
* Corequisite(s): (EDSC 4850 and EDSC 4990) or (EDSP 4990 and EDSP 4885 or EDSP 4895)

Develops strategies for planning and conducting instruction. Establishes appropriate strategies for handling chronic misbehavior and students with behavioral or emotional disorders. Explores practical and appropriate responses, including internal control and behavior modification strategies with an emphasis on self-monitoring. Prepares preservice secondary teachers to interact well with parents.
EDSC 4440  
Content Area Literacies  
3:3:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair  
Prepares preservice secondary teachers to facilitate reading, writing and study skills achievement in the content areas at the secondary school level. Includes field experience in public schools.

EDSC 445G  
Multicultural Instruction ESL  
3:3:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair  
Prepares pre-service secondary teachers to understand and facilitate achievement in the content areas for ethnically and linguistically diverse students at the middle school and high school level. Covers foundations of multicultural education and instructional methodology for adaptations for ethnically and linguistically diverse students. Emphasizes inclusive, anti-bias classroom strategies for supporting learning and development of diverse students. Encourages examination of personal beliefs and attitudes about diversity. Introduces teachers to the teaching of English as a second language not only for linguistic development, but for cognitive, academic and social development. Covers both theoretical and applied aspects of second language learning and teaching and provides techniques, activities, strategies and resources to plan instruction for English language learners (ELLs).

EDSC 4500  
Secondary Teaching Methods  
3:3:0  
Fall, Spring  
* Prerequisite(s): Acceptance to Professional Secondary Education, EDSC 3000, EDSC 4550, Department Chair Approval, and University Advanced Standing  
For students majoring in Secondary Education. Examines teaching methodology as related to teaching and learning. Teaches strategies to prepare teacher candidates for secondary education licensure in relation to a student's major. Utilizes group projects, classroom exercises and teaching projects. Evaluated by participation, teacher evaluation, exams, portfolio, reflective journal and final teaching project.

EDSC 4550  
Secondary Curriculum Instruction and Assessment  
3:3:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair  
Examines state standards to prepare preservice secondary teachers to write objectives, lesson plans, and units using appropriate models of instruction and assessment. Includes a field experience component.

EDSC 4850  
Student Teaching Secondary  
4 to 10:4 to 10:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing, admission to Professional Education Program or permission of department chair, and successful completion of all other professional coursework  
Corequisite(s): EDSC 4250 and EDSC 4990  
Provides a thirteen-week teaching experience in a secondary classroom, grades 7-12. Includes application of knowledge, skills, and attitudes derived in previous course work and program experience. Requires students to be recommended for a secondary education license from the Utah State Board of Education. Course Lab fee of $200 for practical experience applies.

EDSC 491R  
Independent Study  
2 to 4:0 to 4:0 to 12  
On Sufficient Demand  
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair  
Provides an overview of the individual education plan (IEP), service delivery patterns, assessment and programming variables, organizational variables, and instruction and classroom management models necessary for teaching students with mild and moderate disabilities. Provides strategies in how to select, adapt, and use a repertoire of evidence-based instructional strategies to advance learning.

EDSC 4990  
Teacher Performance Assessment Project  
2:2:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing, admission to Professional Education Program or permission of department chair, and successful completion of all other professional coursework  
Corequisite(s): EDSC 4250 and EDSC 4850  
Introduces the teaching and learning cycle: planning, instruction, and assessment. Assists students in completing an authentic assessment tool that shows how they develop and evaluate student learning. Documents authentic practices from the student's teaching experience that address planning, instruction, assessment, analyzing teaching, and academic language to reveal the impact of a candidate's teaching performance on student learning. Course Lab fee of $300 applies.

EDSP 340G  
Exceptional Students  
2:2:0  
Fall, Spring, Summer  
Covers the role of teachers in the inclusion of exceptional children, working with parents and specialists, and in developing individual educational plans for exceptional children. Introduces characteristics and special needs of exceptional children who have physical, emotional, social, mental, or health exceptionalities. Stresses curriculum modification planning necessary for special needs students. Addresses ethical behaviors specific to teaching exceptional children. Requires ten hours of field work.

EDSP 4100  
Instructional Strategies and Program Management for Students with Mild/Moderate Disabilities  
3:3:0  
Fall  
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair  
Provides an overview of the individual education plan (IEP), service delivery patterns, assessment and programming variables, organizational variables, and instruction and classroom management models necessary for teaching students with mild and moderate disabilities. Provides strategies in how to select, adapt, and use a repertoire of evidence-based instructional strategies to advance learning.

EDSP 4110  
Special Education Law/Policies/Procedures  
3:3:0  
Fall  
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair  
Provides overview of the role of the federal, state, and local government in special education issues with special emphasis on case and regulatory law, including Utah regulation. Focuses on six major principles of the Individuals with Disabilities Education Act as they relate to the free and appropriate public education for all students.

EDSP 4120  
School to Post-School Transition Planning  
2:2:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair  
Provides students with knowledge, strategies, and resources necessary to prepare students with disabilities for the transition from school to postsecondary education, employment, community participation, and independent living. Provides skills for transition planning and helping students access services necessary to reach their desired outcomes and become as independent as possible. Emphasizes the person-centered planning process, which embeds decisions based on students' preferences, interests, and abilities.
EDSP 4130 Math Instruction for Students with Mild/Moderate Disabilities
2:2:0  Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
* Corequisite(s): EDSP 4131

Provides specific strategies and techniques to use in teaching students with learning difficulties both in pull-out special educational settings and in more inclusive general education settings. Provides math curricula aligned with the Utah Core standards using Utah Effective Teaching standards. Emphasizes how to implement targeted interventions in Math at the Tier 3 level for students who are not making progress at the Tier 1 and Tier 2 interventions.

EDSP 4131 Math Practicum 1:1:0  Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
* Corequisite(s): EDSP 4130

Provides students the opportunity spend time in practicum placements to practice applying skills, competencies, and techniques to teach math to students with mild or moderate disabilities. Provides students with an opportunity to work with practicum coordinators to analyze and solve instructional and management problems by making data-based decisions.

EDSP 4135 Reading and Writing Instruction for Students with Mild/Moderate Disabilities K-12 2:2:0  Fall
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair
* Corequisite(s): EDSP 4136

Provides specific strategies and techniques to use in teaching students with learning difficulties both in pull-out special educational settings and in more inclusive general education settings. Features reading and writing curricula aligned with the Utah Core standards using Utah Effective Teaching standards. Emphasizes evidence-based practices and empirically supported instruction for teaching reading and writing to students with disabilities combined with data based decision making.

EDSP 4140 Collaboration and Consultation with Parents and School Staff 3:3:0  Fall
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Provides strategies for collaborating and communicating with families, other educators, related service providers, individuals with exceptionalities, and personnel from community agencies in culturally responsive ways. Provides a review of interagency collaboration and consultation for life skills. Emphasizes creating multidisciplinary teams and professional learning communities who are prepared to assist parents and other teachers in collaborative problem solving.

EDSP 4160 Assessment and Evaluation in Special Education 3:3:0  Fall, Spring
* Prerequisite(s): University Advanced Standing and admission to Professional Education Program or permission of department chair

Provides an overview of multiple methods of assessment. Presents the connection between gathering assessment information and applying results to decisions regarding students’ eligibility for special education services. Includes administering eligibility assessment tests, interpreting results, and communicating results of assessment tools.

EDSP 4885 Special Education Student Teaching--Grades K-12 4 to 10:4 to 10:0  Fall, Spring
* Prerequisite(s): Admission to Professional Education Program, Successful completion of all professional education courses, and University Advanced Standing
* Corequisite(s): EDSC 4250 and EDSP 4990

Provides a 13-week teaching experience in a special education classroom setting, grades K-6. Provides consultation and feedback through observation forms administered by their university consultant and student teaching mentor. Monitors application of knowledge, skills, and attitudes derived in previous course work and program experience. May be graded Credit/No Credit. Course Lab fee of $200 for practical experience applies.

EDSP 4895 Special Education Student Teaching--7-12 8:8:0  Fall, Spring
* Prerequisite(s): Admission to Professional Education Program or permission of department chair, successful completion of all other professional coursework, and University Advanced Standing
* Corequisite(s): EDSC 4250 and EDSP 4990

Provides a 13-week teaching experience in a special education classroom setting, grades 7-12. Provides consultation and feedback through observation forms administered by their university consultant and student teaching mentor. Monitors application of knowledge, skills, and attitudes derived in previous course work and program experience. Course Lab fee of $200 for practical experience applies.

EDSP 4990 Teacher Performance Assessment Project 2:2:0  Fall, Spring
* Prerequisite(s): University Advanced Standing, admission to Professional Education Program or permission of department chair, and successful completion of all other professional coursework
* Corequisite(s): EDSC 4250 and EDSP 4885 or EDSP 4885

Introduces the teaching and learning cycle: planning, instruction, and assessment. Assists students in completing an authentic assessment tool that shows how they develop and evaluate student learning. Documents authentic practices from the student’s teaching experience that address planning, instruction, assessment, analyzing teaching, and academic language to reveal the impact of a candidate’s teaching performance on student learning. May be graded credit/no credit. Course Lab fee of $300 applies.
**EDUC 5340**  
Methods of Second Language Acquisition for Practitioners  
3:3:0  
* Summer  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Prepares teachers to teach content in students' second language in U.S. public schools. Includes applied aspects of second language learning and teaching. Provides general and special educators, and dual language or second language specialists the techniques, activities, strategies, and resources needed to plan instruction for second language learners. Emphasizes the development of teaching skills in language development, literacy, and content-area instruction for K-12 students. Requires 15 hours of field experience/practicum hours as part of course assignments.

**EDUC 5350**  
Theories of Second Language Acquisition for Practitioners  
3:3:0  
* Summer  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Examines the intricate web of variables that interact in the second language learning process, including linguistic, cognitive, social, cultural, and political factors. Examines each of these factors in turn and develops understanding of how they work together to foster or inhibit successful second language learning and acquisition. Requires 15 hours of field experience/practicum hours as part of course assignments. Course fee of $15 applies.

**EDUC 5360**  
Multicultural Education for Practitioners  
3:3:0  
* Spring  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Identifies the connections between language, culture, and identity. Examines multicultural education in the classroom through a focus on the historical, sociological, and philosophical foundations of education in the development of the United States and its education system. Outlines methods to create multicultural/multilingual curricula with a special focus on culturally/linguistically-responsive instruction and assessment techniques.

**EDUC 5370**  
Assessment for Second Language Learners for Practitioners  
3:3:0  
* Summer  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Examines methods and practice for the testing of bilingual students at the classroom level. Focuses on assessment of language proficiency in English language learners (ELL) and the assessment of academic achievement of bilingual students in specific content areas. Develops and reviews tasks (test items), response formats, scoring systems, and test administration procedures as critical to attaining validity and fairness. Examines major current testing policies for linguistic minority students. Practicum required. Course fee of $15 applies.

**EDUC 5380**  
Second Language Literacy Development for Practitioners  
3:3:0  
* Fall  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Provides teachers with a theoretical framework for understanding literacy and linguistic development of students learning in a second language. Provides an understanding of the literacy instructional needs of these students. Increases knowledge and skill in instructional practices that support second language literacy learning.

**EDUC 5390**  
Family and Community Involvement for Practitioners  
3:3:0  
* Spring  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Provides strategies classroom teachers may use for facilitating community participation in the education of minorities. Examines how the teacher's role impacts the adjustment of students to the classroom environment. Studies the techniques of family-school collaboration as well as constructive methods of evaluation. Practicum required. Course fee of $15 applies.

**EDUC 5500**  
Teaching K-6 Numbers and Operations for Practitioners  
3:3:0  
* On Sufficient Demand  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Designed for K-6 teachers. Covers the content of Number and Operations to develop a comprehensive understanding of our number system and relate its structure to computation, arithmetic, algebra, and problem solving. Includes number, number sense, computation, and estimation through a coordinated program of activities that develop number concepts and skills. Special attention in this course will be given to planning lessons in the mathematical content of number and operations and problem solving strategies. Emphasizes interpreting and assessing students' work and learning, and the integration of the NCTM process standards and the Utah Intended Learning Outcomes (ILOs). Course fee of $15 applies.

**EDUC 5510**  
Teaching K-6 Rational Numbers and Proportional Reasoning for Practitioners  
3:3:0  
* On Sufficient Demand  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Provides practicing teachers a deeper understanding of probability and data representation and analysis. Special attention in this course will be given to applying content understandings to classroom practice, interpreting and assessing students' work and learning, and to integrating NCTM process standards and the Utah Intended Learning Outcomes (ILOs) into instruction.

**EDUC 5550**  
Teaching K-6 Geometry and Measurement for Practitioners  
3:3:0  
* On Sufficient Demand  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Provides practicing teachers a deeper understanding of the geometry and measurement content that exists in the state core and instructional strategies to facilitate the instruction of this content. Special attention in this course will be given to applying content understanding in geometry and measurement to classroom practice, interpreting and assessing students' work and learning, and to integrating NCTM process standards and the Utah Intended Learning Outcomes (ILOs) into instruction. Course fee of $15 applies.

**EDUC 5540**  
Teaching K-6 Data Analysis and Problem Solving for Practitioners  
3:3:0  
* On Sufficient Demand  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Develops a firm problem-solving foundation. Using skills and strategies applied in mathematical contexts practicing teachers will learn to think, work with others, present solutions orally to the whole class, and write up detailed solutions. Provides practicing teachers a deeper understanding of probability and data representation and analysis. Special attention in this course will be given to applying content understandings to classroom practice, interpreting and assessing students' work and learning, and to integrating NCTM process standards and the Utah Intended Learning Outcomes (ILOs) into instruction.

**EDUC 5550**  
Teaching K-6 Assessment and Intervention for Practitioners  
3:3:0  
* On Sufficient Demand  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Provides practicing teachers a deeper understanding of the various types of assessment and their appropriate use for guiding instruction, intervention, and evaluation of student learning of mathematics content. Special attention will be given to the application of mathematical content understandings to planning for classroom instruction and assessment of student learning that is consistent with NCTM process standards and Utah instructional learning outcomes.

**EDUC 5600**  
Education of the Gifted and Talented  
3:3:0  
* On Sufficient Demand  
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education  
Prepares teachers of GT learners to better understand the field as an evolving and changing discipline influenced by philosophies, research-based principles and theories, relevant laws and policies, cultural and historical points of view, and human issues that influence professional practice, including assessment, instructional planning, delivery, and program evaluation. Explores characteristics of gifted individuals with emphasis on identifying needs and a general overview of possible services for gifted learners. Prepares teachers to advocate for GT students and their programs in schools and school districts.
Course Descriptions

EDUC 5610 Social and Emotional Needs of the Gifted 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Explores current research and material relevant to the social and emotional issues that may arise for gifted and talented students. Develops a deeper understanding of social and emotional issues that students with gifts and talents experience in K-12 classrooms. Prepares teachers of GT learners and their families to advocate for GT services. Requires 15 hours of field experience/practicum hours in addition to class time.

EDUC 5620 Identification/Evaluation in Gifted Education 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Prepares teachers to use the results of a variety of assessment tools for both identification and learning progress decisions. Defines the processes of identification, legal policies, and ethical principles of measurement and assessment related to referral, eligibility, program planning, instruction, and placement. Requires 15 field experience/practicum hours in addition to class time.

EDUC 5630 Theory into Practice in Gifted and Talented Education 2:2:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Prepares teachers to understand societal influences on the development of curricula. Helps teachers to develop long- and short-range units of instruction anchored in both general and special curricula for gifted and talented students, taking into consideration each individual's abilities and needs, the learning environment, and cultural and linguistic factors.

EDUC 5635 Methods and Materials in Gifted Education for Practitioners 2:2:0 On Sufficient Demand
* Prerequisite(s): Utah Teaching License or permission from the Dean of the School of Education
Requires teacher-participants to locate, create, and or adapt curricular materials needed to implement differentiated instruction for gifted and talented learners. Helps teachers develop materials and methods of instruction that will encourage creative problem-solving and should be adaptable for a variety of student abilities and needs, the learning environment, and cultural and linguistic factors that may influence instruction.

EDUC 5640 Improvement of Curriculum Instruction in the Content Areas 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Prepares teachers of gifted and talented students with the selection, adaptation, creation, and implementation of differentiated instructional models and strategies, especially those related to fostering creativity. Requires 15 field experience/practicum hours in addition to class time.

EDUC 5650 Leadership in Gifted and Talented Education 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Prepares teachers to effectively use leadership principles to collaborate with students and their families, other educators, and related service providers to advocate for individuals with gifts and talents as they promote the learning and well-being of individuals with gifts and talents across settings and diverse learning experiences.

EDUC 5660 Reading Assessments and Instructional Interventions for Practitioners 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Helps practicing teachers become proficient in developing and using a variety of formal and informal assessments and instructional procedures to increase or accelerate students' reading achievement as appropriate. Prepares teachers to screen for reading problems, diagnose reading strengths and needs, and monitor progress to ensure students achieve optimal growth in reading within the context of a Multi-Tiered System of Supports. Develops procedures for gathering, analyzing, and interpreting data to inform instruction, and presents an overview of methods for communicating findings to stakeholders.

EDUC 5661 Foundations of Literacy 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Helps practicing teachers acquire foundational and declarative knowledge about literacy instruction, including historical perspectives on reading instruction, an introduction to theories and models of literacy acquisition, and discussions of research related to lifelong literacy and its instructional implications. Requires students to examine the history of the field of literacy, including the debates and various stances of reading researchers and the instructional directives developed as a result of the research.

EDUC 5662 Instruction with Literature and Informational Texts for Children and Young Adults 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Provides an overview of literary and informational texts for children and young adults, with emphasis on classic and recent publications, and their appropriate use in the classroom. Discusses important authors, historical context, and background, and considers current trends and classroom applications in literacy.

EDUC 5663 Content Area Reading and Writing Instruction for Practitioners 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Helps practicing teachers develop an in-depth understanding of the research findings, issues, principles, and practices related to exemplary, research-based literacy instruction in the content areas. Prepares teachers to provide every student with meaningful and engaging opportunities to learn high-level skills through reading, writing, and speaking while working with graphics and texts, including images, video, and audio, in the K-12 curriculum. Teaches how to evaluate texts in various content areas or topics to identify the qualitative and quantitative features of a text and address reader and task considerations.

EDUC 5664 Instructional Implications of Literacy Development for Practitioners 3:3:0 On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Focuses on emergent literacy development for students in grades K-12 and how that development is well-designed for appropriate literacy learning environments, experiences, and instructional interventions for emergent language learners. Covers the history, major perspectives, and theories about how students understand and develop literacy. Develops understandings of developmentally appropriate instruction, reading behaviors, and literacy development within the larger framework of the communicative arts, i.e., oracy, written expression, reading, spelling, handwriting, listening, the visual and performing arts, and the social community, i.e., family, socio-economic conditions, culture, ethnicity, language, etc.

EDUC 5665 Reading Comprehension Instruction for Practitioners 3:3:0 Fall, Spring, Summer
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education
Helps practicing teachers acquire knowledge and understanding of current theories and models that impact reading comprehension and apply that knowledge in instruction. Focuses on understanding reading comprehension, increasing the range, quality and complexity of reading materials used by students, and supporting student responses to text. Builds teachers' ability to help their students use texts efficiently and effectively to develop and express complex, critical thinking.
EDUC 5666
Effective Writing Instruction for Practitioners
3:3:0  On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Examines theories, concepts, and methodologies that promote the development of strategic writers. Prepares teachers to provide research-based methods for teaching K-12 students to develop a range of writing skills and applications including how to compose opinion/argumentation, informational/expository, and narrative writing. Facilitates teachers’ ability to assess K-12 student writing.

EDUC 5700
Foundations of Dual Language Immersion Education
3:3:0  On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Presents a historical overview and the theoretical and research foundations for dual language and immersion education. Emphasizes the practical application of theory and research in immersion programs.

EDUC 5710
Instructional Strategies and Curriculum and Classroom Management for the Elementary Classroom
3:3:0  On Sufficient Demand
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Designed to acquaint secondary teachers seeking a K-12 Dual Language Immersion (DLI) endorsement with instructional strategies and classroom management for the elementary classroom. Focuses on helping students understand the elementary curriculum and plan units of instruction. Requires completion of an instructional design plan for an instructional unit of the participants’ choice for a learner and a capstone project. Requires 15 hours of field experience/practicum hours in a DLI classroom in addition to class time.

EDUC 5750
Energy in STEM for Elementary Teachers
3:3:0  On Sufficient Demand
* Prerequisite(s): Recommended: Education Majors or Licensed Educators

Provides teachers with a deep and useful understanding of energy and the nature of how students use concepts of energy to make sense of phenomena across life, earth, and physical science. Enhances teacher insights into: 1) how force, matter and energy interact, 2) the relationships of matter to forces and interactions within fields, and 3) pedagogical content knowledge around teaching and learning about energy. Also connects knowledge of concepts of force to practices in technology, engineering and mathematics.

EDUC 5760
Force in STEM for Elementary Teachers
3:3:0  On Sufficient Demand
* Prerequisite(s): Recommended: Education Majors or Licensed Educators

Provides teachers with a deep and useful understanding of force and the nature of how students use concepts of force to make sense of phenomena across life, earth, and physical science. Enhances teacher insights into: 1) how force, matter and energy interact, 2) the relationship of force to energy and interactions within fields, and 3) pedagogical content knowledge around teaching and learning about force. Also connects knowledge of concepts of force to practices in technology, engineering and mathematics.

EDUC 5770
Matter in STEM for Elementary Teachers
3:3:0  On Sufficient Demand
* Prerequisite(s): Recommended: Education Majors or Licensed Educators

Provides teachers with a deep and useful understanding of matter and the nature of how students use concepts of matter to make sense of phenomena across life, earth, and physical science. This understanding enhances teacher insights into: 1) how matter and energy interact, 2) the relationships of matter to forces and interactions within fields, and 3) pedagogical content knowledge around teaching and learning about matter. Also connects knowledge of concepts of matter to practices in technology, engineering and mathematics.

EDUC 5780
Nature of Science and Engineering
3:3:0  On Sufficient Demand
* Prerequisite(s): Recommended: Education Majors or Licensed Educators

Explores the nature of science using science and engineering principles, practices, and processes. Explores applications to Science, Technology, Engineering, and Mathematics using learner-based pedagogy. Develops teaching practices to assist participants in educating K-6 students in selected Earth and Life Science Standards.

EDUC 5790
STEM Practices with a Focus on Technology and Problem-Based Learning
3:3:0  On Sufficient Demand
* Prerequisite(s): Recommended: Education Majors or Licensed Educators

Engages participants in developing meaningful understandings of problem-based approaches to teaching, learning, and the integration of STEM practices across the curriculum using appropriate technology. Requires the development and creation of problem-based, hands-on experiences.

EDUC 5800
Cognition Education and Technology for Practitioners
3:3:0  Spring
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Examines the increasingly pervasive role of electronic media in educating and socializing young students, especially as it affects the K-12 classroom. Explores the range of content available to these students, their families, and their classrooms and reviews research on the role of media in shaping individual identity and affecting school performance; analyzes public policies that affect teachers and students.

EDUC 5810
Instructional Curriculum & Educational Leadership in the Digital Age for Practitioners
3:3:0  Summer
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Examines issues surrounding the use of technology in curricular and instructional design, especially as designing coursework for an online learning environment. Requires students to incorporate appropriate digital media formats to create an online learning environment. Addresses issues of school leadership, as participants may become mentors in the area of educational technology.

EDUC 5820
Designing and Producing Media for Instruction for Practitioners
3:3:0  Summer
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Helps students produce educational media materials for their particular classroom. Requires students to collaborate with others to design, produce, test, and revise a unique project tailored for their instructional practice. Requires students to use a variety of digital tools to conceptualize, design, fashion, and evaluate media projects.

EDUC 5830
Digital Models of Instruction for Practitioners
3:3:0  Summer
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Examines the increasingly pervasive role of electronic media in educating and socializing young students, especially as it affects the K-12 classroom. Explores the range of content available to these students, their families, and their classrooms and reviews research on the role of media in shaping individual identity and affecting school performance; analyzes public policies that affect teachers and students.

EDUC 5840
Universal Design for Learning for Practitioners
3:3:0  Fall
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Focuses on universal design for learning (UDL) that differentiates curricula and learning environments for a wide range of student abilities and disabilities. Requires students to learn to apply the UDL approach in designing differentiated learning experiences for their classrooms using educational technology.
Course Descriptions

EDUC 5850 Digital Course Design Capstone for Practitioners
3:3:0 Spring
* Prerequisite(s): Professional educator license or permission of the Dean of the School of Education

Teaches students to design and create media for content-specific units of instruction. Requires students to use technology specific to a given discipline, and to incorporate instructional design and digital media to create an online unit of study.

EDUC 6010 ABA Concepts and Principles
3:3:0 Fall
* Prerequisite(s): Admission to the Master of Education program or permission of the Dean of the School of Education

Provides students with a strong foundation in the basic concepts and principles of ABA, including the history and philosophical assumptions of behavior analysis and autism spectrum disorder. Graduate fee of $640 applies.

EDUC 6020 Ethics and Professional Competencies in Applied Behavioral Analysis
3:3:0 Fall
* Prerequisite(s): Admission to the Master of Education program or permission of the Dean of the School of Education

Defines ethical responsibilities required in the field of applied behavior analysis. Introduces policy and practice related to informed consent, protection of confidentiality, selection of least intrusive and least restrictive behavior change procedures within the context of case methodology. Emphasizes legal issues and ethical decision making processes. Covers professional, disciplinary, and ethical standards for Board Certified Behavior Analyst certification in depth. Course fee of $640 applies.

EDUC 6030 Developing and Changing Behaviors
3:3:0 Spring
* Prerequisite(s): Admission to the Master of Education program or permission of the Dean of the School of Education

Explains various behavioral assessments and intervention strategies. Focuses on single subject designs and procedures for measuring behavior, displaying data, and interpreting results. Examines ways to evaluate and analyze behavior change. Course fee of $640 applies.

EDUC 6040 Measurement in Single Subject Design
3:3:0 Spring
* Prerequisite(s): Admission to the Master of Education program or permission of the Dean of the School of Education

Introduces methods for collection and interpretation of various types of data. Focuses on the importance of making data-driven decisions for behavior change procedures based on functional relationships. Course fee of $640 applies.

EDUC 6050 Functional Behavior Assessment and Treatment
3:3:0 Fall
* Prerequisite(s): Admission to the Master of Education program or permission of the Dean of the School of Education

Focuses on using methods and tools for selecting and defining target behaviors and for behavior measurement. Provides experience in methods to develop new behavior using imitation, modeling, shaping, and chaining and methods to decrease behaviors using extinction, differential reinforcement and antecedent interventions. Reviews and extends the study of functional behavior assessment, verbal behavior, generalization, and maintenance of behavior change. Course fee of $640 applies.

EDUC 6060 Advanced Topics in Applied Behavior Analysis
3:3:0 Fall
* Prerequisite(s): Admission to the Master of Education program or permission of the Dean of the School of Education

Focuses on advanced topics in behavior analysis, including current research, changes in relevant legislation, emerging areas of behavior analysis, measurement technology, school applications, teaching methodology, innovative interventions, and ethics. Course fee of $640 applies.

EDUC 6070 Training Supervision and Performance Monitoring in Applied Behavior Analysis
3:3:0 Spring
* Prerequisite(s): Admission to graduate status, admission to the Master of Education program, or permission of the Dean

Examines the training, supervision, and performance monitoring from an applied Behavior Analytic perspective. Provides students with a strong foundation in effective training as it applies to parents, staff, and supervisors. Develops competency in supervision of ABA interns. Provides an overview of systems-level analysis, including organizational assessment, quality assurance, performance, and outcome monitoring.

EDUC 6080 Cognition, Education, and Technology
3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Examines the increasingly pervasive role of electronic media in educating and socializing young students. Explores the range of content available to these students and their families; documents the developing child's patterns of use and understanding of media; examines theories and methods for assessing media effects; reviews research on the role of media in shaping individual identity and responses to social issues; and analyzes public policies that affect teachers and students.

EDUC 6081 Instruction, Curriculum and Educational Leadership in the Digital Age
3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Examines issues surrounding teachers and the use of technology in curricular and instructional design. Emphasizes designing coursework for an online learning environment. Explores the history and models of instructional design and teaches incorporation of appropriate digital media formats to create an online learning environment. Introduces the integrated nature of the Technological Pedagogical Content Knowledge (TPACK) and the National Educational Technology Standards (NETS) as frameworks for identifying and applying knowledge needed to teach and assess student learning with technology. Addresses issues of leadership, as students may become mentors in the area of educational technology.

EDUC 6082 Designing and Producing Media for Instruction
3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Designed to help students produce educational media materials. Offers students the opportunity to collaborate with others to design, produce, test, and revise a unique project for television, multimedia, the web, mobile applications, video games, radio, photography, or other formats. Teaches the use of a variety of tools and formats, including digital storytelling, video, online research tools, WebQuests, advanced Excel, Google tools, Web 2.0, and GPS. Requires the conceptualization, design, fashioning, and evaluation of media projects. Explores several analytic frameworks drawn from both instructional design and education research.

EDUC 6083 Digital Models of Instruction
3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Focuses on using instructional design and Web page design principles. Examines the best instructional use of online options, including flipped and hybrid course design, and gaming. Requires completion of an instructional design plan for an instructional unit of the participants' choice for a learner group of their choice.

EDUC 6084 Universal Design for Learning
3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Focuses on universal design for learning (UDL) that creates curricula and learning environments that are designed to achieve success for a wide range of student abilities and disabilities. Covers the UDL approach, which takes advantage of advances in the fields of cognitive neuroscience of learning, educational technologies, and multimedia. Teaches how to apply the UDL approach in designing differentiated learning experiences using educational technology.
EDUC 6085 Digital Course Design Capstone 3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean
Teaches students to design and create media for content-specific units of instruction. Covers the use of technology specific to a given discipline, and teaches how to incorporate instructional design and digital media to create an online unit of study.

EDUC 6100 Research Methodology 3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status Admission to the School of Education Masters Degree Program Or permission of the Dean
Introduces the principal methodologies used in research in education. Presents basic information about the purposes of research, the scientific method, and basic qualitative and quantitative research. Identifies methods for locating, reading, interpreting and using research reports and in applying measurement issues and research methods to classroom problems. Investigates teacher research practices and ways it can be used to study teaching and teacher education.

EDUC 6110 Applied Statistics for Education 3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status Admission to the School of Education Masters Degree Program or permission of the Dean
Introduces elementary statistics in educational settings and includes descriptive statistics, sampling, central tendency, and inferential methods. Emphasizes reading, understanding and evaluating statistics in research reports.

EDUC 6120 Personal Leadership and Organizational Design 3:3:0 Summer
* Prerequisite(s): Admission to Master of Education: Educational Leadership Emphasis leading to USBE Education Leadership License Area of Concentration or Admission to Educational Leadership, Graduate Certificate leading to USBE Education Leadership License Area of Concentration
Introduces students to critical concepts about leadership theories and practice. Provides both historical perspective and current understanding to approaches, methods, and practices of leaders. Provides insight into how leadership skills and organization strategies produce increased productivity and better learning/working environments for P-12 students’ academic success and well-being. Provides opportunity for class members to examine their own beliefs and develop a personal model of leadership. Emphasizes attributes that promote integrity, fairness, transparency and trust.

EDUC 6130 School Operations and Management-Finance/Law/Safety 3:3:0 Fall
* Prerequisite(s): Admission to Master of Education: Educational Leadership Emphasis leading to USBE Education Leadership License Area of Concentration or Admission to Educational Leadership, Graduate Certificate leading to USBE Education Leadership License Area of Concentration
Explores school finance, law, and safety as primary themes in school management and operations. Provides an overview of current K-12 management conditions and theory. Discusses these themes 1) best management theories and practices for not-for-profit organizations, 2) rules and regulations that govern school finance, 3) court rulings in areas of student speech, discipline, and other points of tensions in public schools, and 4) school organization to keep students physically and emotionally safe.

EDUC 6140 Instructional Leadership and Data-based Decision Making 3:3:0 Fall
* Prerequisite(s): Admission to Master of Education: Educational Leadership Emphasis leading to USBE Education Leadership License Area of Concentration or Admission to Educational Leadership, Graduate Certificate leading to USBE Education Leadership License Area of Concentration
Advances student understanding, skill, and capacity to facilitate coherent systems of curriculum development, impactful instruction, valid assessment. Builds professional capacity for data interpretation and decision making for the success and well-being of students and faculty.

EDUC 6150 School Operations and Management-Communication/Planning/HR/Evaluation 3:3:0 Spring
* Prerequisite(s): Admission to Master of Education: Educational Leadership Emphasis leading to USBE Education Leadership License Area of Concentration or Admission to Educational Leadership, Graduate Certificate leading to USBE Education Leadership License Area of Concentration
Explores school communication, planning, human resources, and evaluation as primary themes in school management and operations. Provides an overview of current K-12 management conditions and theory. Reviews the role of legislation, policy, and leadership on the primary themes. Prepares students to communicate with stakeholders, strategically plan for school improvement, know best practices in the hiring and retention of public school staff.

EDUC 6160 Leading Professional Learning Communities 3:3:0 Spring
* Prerequisite(s): Admission to Master of Education: Educational Leadership Emphasis leading to USBE Education Leadership License Area of Concentration or Admission to Educational Leadership, Graduate Certificate leading to USBE Education Leadership License Area of Concentration
Introduces students to critical concepts about building a school culture that leverages the strengths of collective solutions. Provides background information on the development of professional learning communities (PLCs) and how they can impact high student performance. Scaffolds student knowledge on how to organize and implement PLCs. Identifies leadership skills required to effectively manage change within the school setting. Introduces assessments to use in identifying challenges and summarizing impact of PLC fairness, transparency and trust.

EDUC 6170 Leading Change/Innovation/Educational Entrepreneurship 3:3:0 Summer
* Prerequisite(s): Admission to Master of Education: Educational Leadership Emphasis leading to USBE Education Leadership License Area of Concentration or Admission to Educational Leadership, Graduate Certificate leading to USBE Education Leadership License Area of Concentration
Introduces critical concepts of school change. Addresses strategies to encourage and manage innovation and entrepreneurship. Prepares students to aid learners in developing deeper abilities to create, critique, and collaborate to solve complex challenges facing society. Prepares students to successfully manage change and innovation in teaching and learning in the 21st century. Guides students in learning to anticipate needed changes and to develop skills to effectively lead innovation in their school settings.

EDUC 6200 Masters Project 3:3:0 Fall
* Prerequisite(s): Admission to Graduate Status Admission to the School of Education Masters Degree Program or permission of the Dean
Provides working knowledge of action research methods in the public schools. Sets the standards for the professional M.Ed. action research-based project. Utilizes APA guidelines. Establishes techniques and strategies for successful project completion.

EDUC 6201 Teacher Performance Assessment Project 2:2:0 Spring
* Prerequisite(s): Admission to Secondary Teaching, Graduate Certificate Program * Corequisite(s): EDUC 6203
Introduces the teaching and learning cycle: planning, instruction, and assessment. Assists students in completing an authentic assessment tool that shows how they develop and evaluate student learning. Documents authentic practices from the student’s teaching experience that address planning, instruction, assessment, analyzing teaching, and academic language to reveal the impact of a candidate’s teaching performance on student learning.
EDUC 6202 Classroom Management Practicum 3:2:3 Fall
* Prerequisite(s): Admission to Secondary Teaching, Graduate Certificate Program
Provides first-hand, supervised, clinical experience in observing and implementing effective class management practices.

EDUC 6203 Student Teaching Graduate Licensure 6:6:0 Spring
* Prerequisite(s): Admission to Secondary Teaching, Graduate Certificate Program
Corequisite(s): EDUC 6201
Includes 400 hours of student teaching experience in a secondary classroom, grades 7-12. Includes application of knowledge, skills, and attitudes derived in previous coursework and program experience. Is required for students to be recommended for a secondary education license from the Utah State Office of Education. May be Graded Credit/No Credit.

EDUC 6300 Curriculum Design 3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean
Provides a foundation in curriculum theory and practice. Introduces instructional design theories, principles and models. Outlines the historical development, current processes and practices of curriculum development, instructional design, implementation, and assessment. Investigates research and theory about educational contexts, motivation, curriculum, learning, and development as they relate to models of instruction. Examines applications and processes of curriculum decision making and the impact of national standards for content areas to curriculum design and development in classroom and district settings.

EDUC 6310 Assessing Educational Practices 3:3:0 Fall
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean
Examines theoretical and practical concepts that are foundational in educational evaluation and assessment. Explains learning assessments. Focuses on assessment instruments, assessment design, appropriate use of assessment techniques and the data derived from assessments to understand student progress and instructional design to promote student learning.

EDUC 6320 21st Century Teaching and Learning 3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean
Focuses on instructional design and delivery incorporating 21st century learning design. Introduces a range of instructional models, most emphasizing cognition and the processing of information. Requires planning and implementing instruction using several selected models.

EDUC 6330 Diversity and Differentiation in the Classroom 3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean
Provides an in-depth understanding of differentiated instructional design and delivery. Focuses on planning and implementing instruction for a diverse classroom community.

EDUC 6340 English as a Second Language Methods 3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean or the instructor
Prepares teachers to teach English as a second language in U.S. public schools. Includes both theoretical and applied aspects of second language learning and teaching. Provides general and special educators and second language specialists techniques, activities, strategies and resources to plan instruction for English language learners (ELLs). Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

EDUC 6350 Theories of Second Language Acquisition 3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean or the instructor
Describes the variables that interact in the second language learning process, including linguistic, cognitive, social, cultural, and political factors. Examines learning a second language as both an individual and social experience. Examines the linguistic, cognitive, psychological, and emotional elements of learning a second language. Identifies the interactions between the individual and the contexts in which s/he interacts and then attempts to understand how they work together to foster or inhibit successful second language learning and acquisition.

EDUC 6360 Multicultural Education 3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean or the instructor
Examines multicultural education through a focus on the historical, sociological, and philosophical foundations of education. Emphasizes the role of ethnicity in the development of the United States and its education system. Outlines multicultural/multilingual curricula with a special focus on culturally/linguistically-responsive instruction and assessment techniques.

EDUC 6370 Assessment of Second Language Learners 3:3:0 Summer
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean or the instructor
Examines theory, methods, and practice in the testing of bilingual students at both the classroom level and the large-scale level in the context of school accountability. Focuses on assessment of language proficiency in English language learners (ELL) and the assessment of academic achievement of bilingual students in specific content areas. Develops and reviews tasks (test items), response formats, scoring systems, and test administration procedures as critical to attaining validity and fairness. Examines testing major current testing policies for linguistic minority students. Practicum required.

EDUC 6380 Literacy and Linguistics in English as a Second Language 3:3:0 Fall
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean or the instructor
Focuses on how teachers can best meet the literacy and language needs of students from a variety of cultural, socioeconomic and language groups. Explores frameworks for providing high-quality literacy instruction to all students. Analyzes classrooms and schools that have been successful in accomplishing this. Examines ethnic identities and personal conceptions of diversity, and how these may impact instructional decisions. Analyzes students and families represented in their classrooms. Discusses ways to build bridges between home and school cultures.

EDUC 6390 Family and Community Involvement 3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean or the instructor
Provides strategies for facilitating community participation in the education of minorities. Examines the role of the teacher in the classroom and community with the intention of developing insight and understanding of how the teacher’s role in these areas impacts the adjustment of adolescents during grades 7-12. Considers models and methods for facilitating positive relationships. Studies the techniques of family-school collaboration as well as constructive methods of evaluation. Practicum required.

EDUC 6400 Teachers as Leaders 3:3:0 Spring
* Prerequisite(s): Admission to Graduate Status
Admission to the School of Education Masters Degree Program Or permission of the Dean
Introduces students to critical concepts about transformational leadership. Provides awareness of how leadership skills and task importance motivates people; focuses on the team or organization strategies that produce increased productivity and better work for colleagues and students. Focuses on issues and strategies for teacher leadership.
EDUC 6410  Contemporary Issues  3:3:0  Summer  
* Prerequisite(s): Admission to Graduate Status  
Admission to the School of Education Masters Degree  
Program or permission of the Dean  

Presents contemporary theories of learning and teaching  
from personal and public perspectives and how those  
thoughts converge with professional practice in classrooms  
and schools. Provides a study of the philosophical  
fundamentals of curriculum and instruction in American  
schools, the social and cultural conditions that influence  
education, and new concepts in education curriculum  
materials, and methods of instruction.  

EDUC 6420  Diversity in Higher Education  3:3:0  Fall  
* Prerequisite(s): Admission to graduate status,  
admission to Master of Education program, or  
permission of the Dean  

Examines multiple critical lenses informing the higher  
education landscape on issues related to marginalization,  
identity, silence, under-representation and other factors  
that American higher education has historically been  
inadequate at addressing. Guides students to develop  
a personal framework based in reflexivity around  
bias. Synthesizes collegial, institutional, historical and  
contextual nuances to provide foundational knowledge.  
Develops a dispositional and interdisciplinary approach  
to facilitate inclusion within particular higher education roles  
and activities.  

EDUC 6430  Law-Policy-Ethics in Higher Education  3:3:0  Fall  
* Prerequisite(s): Admission to graduate status,  
admission to the Master of Education program, or  
permission of the Dean  

Examines legal frameworks, liability, compliance,  
constitutional and civil rights, competing rights of  
institutions, faculty, staff, and students, and contractual  
obligations in higher education. Explores the legal, ethical,  
institutional, and political processes that influence higher  
education and the relationship between law and the  
system of higher education. Critiques legal issues as a  
way to define the role and meaning of higher education in  
today's society.  

EDUC 6440  Leadership in Higher Education  3:3:0  Spring  
* Prerequisite(s): Admission to graduate status,  
admission to the Master of Education program, or  
permission of the Dean  

Examines organizational theory, models, governance, and  
management processes in higher education, leadership  
perspectives and leadership theory. Explores leadership  
as a discipline that transcends functional area, serving as  
a framework to lead and guide within higher education.  
Investigates leadership theories and formulates personal  
approach as an educational leader.  

EDUC 6450  Planning-Budget-Organizational Effectiveness  3:3:0  Fall  
* Prerequisite(s): Admission to graduate status,  
admission to the Master of Education program, or  
permission of the Dean  

Examines the principles and practices of strategic  
planning, evaluation, accountability, and financial  
management in higher education institutions, operating  
units, and academic programs.  

EDUC 6460  Student Success and Development  3:3:0  Spring  
* Prerequisite(s): Admission to graduate status,  
admission to the Master of Education program, or  
permission of the Dean  

Presents various theories relevant to college student  
development and applies those theories to the field  
through class discussion, papers, and special projects.  
Introduces students to the major theories of learning,  
development, and retention and connects them with  
current practice.  

EDUC 6470  Foundations and Contexts of Higher Education  3:3:0  Summer  
* Prerequisite(s): Admission to graduate status,  
admission to the Master of Education program, or  
permission of the Dean  

Examines diverse models and systems of higher  
education in an effort to provide contexts for  
effective work and leadership in higher education  
environments. Explores the nuances of higher education  
institutions in terms of political dynamics, shared  
governance, technology, innovation, organizational  
culture, and external/internal constituent expectations and  
perceptions. Discusses U.S. and international models of  
higher education and future possibilities.  

EDUC 6500  Teaching K-6 Numbers and Operations  3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to School of Education  
graduate program; professional educator license; or  
permission of the Dean of the School of Education  

Designed for K-6 teachers. Covers the content of  
Number and Operations to develop a comprehensive  
understanding of our number system and relate its  
structure to computation, arithmetic, algebra, and problem  
solving. Includes number, number sense, computation,  
and estimation through a coordinated program of activities  
that develop number concepts and skills. Special attention  
in this course will be given to how children learn and  
connect the fundamental concepts of number systems,  
children's developmental trajectories in the mathematical  
content of number and operations, how children construct  
their understanding of various number systems and  
arithmetical, children's typical error patterns, problem  
solving strategies, interpreting and assessing students'  
work and learning, and integration of the NCTM process  
standards and the Utah Intended Learning Outcomes (ILOs).  

EDUC 6510  Teaching K-6 Rational Numbers and Proportional Reasoning  3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to School of Education  
gr graduate program, professional educator license;  
EDUC 6500, or permission of the Dean of the School of  
Education.  

Provides practicing teachers a deeper understanding  
of rational numbers, operations with rational numbers,  
proportionality, and instructional strategies to facilitate  
the instruction of this content for elementary students.  

EDUC 6520  Teaching K-6 Algebraic Reasoning  3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to School of Education  
gr graduate programs; professional educator license; or  
permission of the Dean of the School of Education.  

Provides practicing teachers a deeper understanding  
of algebraic expressions, equations, functions, real numbers,  
and instructional strategies to facilitate the instruction  
of this content for elementary students.  

EDUC 6530  Teaching K-6 Geometry and Measurement  3:3:0  On Sufficient Demand  
* Prerequisite(s): Acceptance to graduate studies in the  
School of Education; professional educator license, or  
permission of the Dean of the School of Education.  

Provides practicing teachers a deeper understanding of  
the geometry and measurement content that exists in  
the state core and instructional strategies to facilitate  
the instruction of this content. Special attention in this  
course will be given to how children learn and connect  
the fundamental concepts of geometry and measurement,  
children's developmental trajectories in this mathematical  
content, how children construct their understanding of  
various geometric concepts, children's typical error  
patterns, problem solving strategies, interpreting and  
assessing students' work and learning, and integration  
of the NCTM process standards and the Utah Intended  
Learning Outcomes (ILOs).  

EDUC 6540  Teaching K-6 Data Analysis and Problem Solving  3:3:0  On Sufficient Demand  
* Prerequisite(s): Professional educator license;  
admission to graduate program in the School of  
Education; or permission of the Dean of the School of  
Education.  

Develops a firm problem-solving foundation. Using skills  
and strategies applied in mathematical contexts practicing  
teachers will learn to think, work with others, present  
solutions orally to the whole class, and write up detailed  
solutions. Provides practicing teachers a deeper  
understanding of probability and data representation  
and analysis. Special attention in this course will be  
given to children's typical error patterns, problem solving  
strategies, interpreting and assessing students' work and  
learning, and integration of the NCTM process standards  
and the Utah Intended Learning Outcomes (ILOs).
Course Descriptions

EDUC 6550  
Teaching K-6 Assessment and Intervention  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Professional educator license; admission to graduate level in the School of Education; or permission of the Dean of the School of Education.

Provides practicing teachers a deeper understanding of the various types of assessment and their appropriate use for guiding instruction, intervention, and evaluation of student learning of mathematics content. Teaches how to screen students for mathematics problems or potential mathematics problems, diagnose students' mathematics strengths and needs, and monitor students' progress to ensure students will make optimal progress in mathematics. Teaches procedures for managing and analyzing assessment data.

EDUC 6600  
High Ability Education  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission into the Master of Education program

Prepares teachers of GT learners to better understand the field as an evolving and changing discipline influenced by history, philosophies, research-based principles and theories, relevant laws and policies, cultural and historical points of view, and human issues that influence professional practice, including assessment, instructional planning, delivery, and program evaluation. Explores characteristics of gifted individuals with emphasis on identifying needs and a general overview of possible services for gifted learners. Prepares teachers to advocate for GT students and their programs in schools and school districts. Emphasizes discussing and finding applications from current research in gifted, talented, and advanced education.

EDUC 6610  
Social and Emotional Needs of High Ability Learners  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to the Master of Education program

Explores current research and material relevant to the social and emotional issues that may arise for gifted and talented students. Focuses on current research through discussions, projects, and classroom observation. Develops a deeper understanding of social and emotional issues that students with gifts and talents experience in K-12 classrooms. Applies findings from current and seminal literature in the field. Includes classroom observations of connections between cognitive development and affective domain. Includes 15 hours of field experience/practicum in addition to class time.

EDUC 6620  
Identification/Evaluation of High Ability Learners  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to Master of Education program

Prepares teachers to use the results of a variety of assessment tools for both identification and learning progress decisions. Defines the processes of identification, legal policies, and ethical principles of measurement and assessment related to referral, eligibility, program planning, instruction, and placement. Includes current and historic documents and research to contrast ideas of determining “giftedness” throughout history with modern conceptions underlying gifted and talented education. Includes 15 field experience/practicum hours in addition to class time.

EDUC 6630  
Theory into Practice for High Ability Education  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to Master of Education program

Prepares teachers to understand societal influences on the development of curricula. Focuses on long- and short-range units of instruction anchored in both general and special curricula for gifted and talented students. Addresses individual's abilities and needs, the learning environment, and cultural and linguistic factors. Includes current research-based classroom practices.

EDUC 6635  
Methods and Materials for High Ability Learners  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to Master of Education program

Requires teacher-participants to locate, create, and or adapt curricular materials and methods of instruction needed to implement differentiated instruction for gifted and talented learners. Encourages creative problem-solving for a variety of student abilities and needs, the learning environment, and cultural and linguistic factors that may influence instruction. Requires application of current findings from the literature to the evaluation of methods and materials for gifted and talented instruction.

EDUC 6640  
High Ability Curriculum and Instruction in the Content Areas  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to Master of Education program

Prepares teachers of gifted and talented students with the selection, adaptation, creation, and implementation of differentiated instructional models and strategies, especially those related to fostering creativity. Evaluates current research on outcomes from instruction based on creative processes that are designed to foster creative, critical, and analytic thinking. Requires 15 field experience/practicum hours in addition to class time.

EDUC 6660  
Reading Assessments and Instructional Interventions  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Focuses on curriculum-based measurement, the assessment/instructional cycle, and how to use assessment data to design and implement instructional interventions to increase students' reading achievement. Studies the four federal assessment categories: screening, progress monitoring, diagnosis, and outcomes, as well as assessment instruments within the various categories and the 3-tiered model. Focuses on building students' oral language and background knowledge, teaching alphabet knowledge and phonemic awareness, teaching students to use and recognize and use common phonics spelling patterns, building vocabulary, increasing fluency, teaching students to apply comprehension strategies, and fostering students reading engagement. Describes reading assessments and interventions that are appropriate at the primary, intermediate, and secondary levels.

EDUC 6661  
Literacy and Cognition of Reading  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Provides foundational knowledge about literacy instruction, including an historical perspective on reading instruction, an introduction to theories and models of literacy acquisition, a study of language systems and language acquisition, and theories related to the literacy development of people across the lifespan and their instructional implications. Includes the debates and various stances of reading researchers, and the instructional directives that grew out of the research.

EDUC 6662  
Early Literacy Instruction  
3:3:0  On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Designed to help students understand the history, major perspectives and theories about how young children understand literacy. Focuses on developmentally appropriate instruction and the value of play relating to oral and print literacy in kindergarten and the primary grades. Examines literacy development within the larger framework of the communicative arts, i.e., oracy, written expression, reading, spelling, handwriting, listening, the visual and performing arts, and the social community, i.e., family, socioeconomic conditions, culture, ethnicity, language, etc.
EDUC 6663  
**Content Area Reading**  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Designed to help practicing teachers develop an in-depth understanding of the research findings, issues, principles and practices related to exemplary, research-based reading and writing instruction in the content areas. Covers the use of textbooks and nonfiction reading materials for young students who are beginning readers and writers. Focuses on how to assist all learners to read, understand and learn from nonfiction reading materials. Covers assisting students at all grade levels in their reading of materials and writing of text related to science, social studies, history, math art, music, etc.

EDUC 6664  
**Adolescent Literacy**  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Provides practicing secondary teachers with concepts, models, and strategies to support adolescent literacy instruction. Familiarizes teachers with practical constructs for understanding adolescent literacy, its importance, how it can be fostered and employed for student learning, how the challenges of adolescent literacy differ from the challenges of early reading instruction, and how systematic interventions can help remediate chronic failure in literacy and learning. Teaches effective literacy improvement practices that can be realistically implemented in the context of secondary teachers' many demands.

EDUC 6665  
**Reading Comprehension Instruction**  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Focuses on reading comprehension instruction as the essence of reading. Emphasizes the theoretical foundations that support comprehension such as schema theory and the construction-integration theory. Includes the following five research-supported strategies: activating prior knowledge, questioning, analyzing text structure, creating mental or visual images and summarizing. Teaches how to offer explicit teacher-led comprehension strategy instruction that will lead to helping their students coordinate a set of comprehension strategies. Teaches how to help students construct meaning through rich discussions and interactions around a variety of text structures and genres. Prepares teachers to provide scaffolded support including demonstrations, pictures, diagrams, and collaboration with other students.

EDUC 6666  
**Effective Writing Instruction**  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program, Or permission of the Dean

Focuses on using effective strategies for teaching writing across the curriculum and for diverse populations. Teaches application of the writing process, writing workshop, and interactive writing procedures in the classroom. Covers the development of orthographic knowledge and how to assess student work using the Qualitative Spelling Inventory and the Six-Trait Writing Model.

EDUC 6750  
**Energy in Elementary STEM Education**  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): Admission to Graduate Status; Admission to the School of Education Masters Degree Program; Or permission of the Dean or the instructor

Prepares teachers to teach English as a second language in U.S. public schools. Includes both theoretical and applied aspects of second language learning and teaching. Provides general and special educators and second language specialists techniques, activities, strategies and resources to plan instruction for English language learners (ELLs). Emphasizes oral language development, literacy and content-area instruction for teaching K-12 students.

EDUC 6760  
**Force in Elementary STEM Education**  
3:3:0  
On Sufficient Demand

Provides teachers with a deep and useful understanding of force and the nature of how students use concepts of force to make sense of phenomena across life, earth, and physical science. Explores the theory of and enhances teacher insights into: 1) how force, matter and energy interact, 2) the relationship of force to energy and interactions within fields, and 3) pedagogical content knowledge around teaching and learning about force. Also connects knowledge of concepts of force to practices in technology, engineering and mathematics, and engages participants in evaluating technology appropriate to elementary STEM instruction. Requires participants to make connections between current learning theories and methods of STEM instruction.

EDUC 6770  
**Matter in Elementary STEM Education**  
3:3:0  
On Sufficient Demand

Models effective and engaging instructional practices for teaching about matter in the elementary classroom, and connects knowledge of concepts of matter to practices in technology, engineering and mathematics. Requires participants to design and implement STEM lessons that will help elementary students use content knowledge about matter to make sense of phenomena across life, earth, and physical science. Designed to help participants gain insights into: 1) how matter and energy interact, 2) the relationships of matter to forces and interactions within fields, and 3) pedagogical content knowledge for teaching about matter. Involves participants in active instructional strategies and pedagogical theories. Focuses on designing learning environments that support collaborative learning and engagement in STEM lessons.

EDUC 6780  
**Science and Engineering in Elementary STEM Education**  
3:3:0  
On Sufficient Demand

Explores the nature of science using science and engineering principles, practices, and processes. Investigates applications of learning theory to Science, Technology, Engineering and Mathematics using problem-based learning experiences. Requires participants to develop teaching practices to assist them in integrating engineering practices across disciplines as they apply Utah Science Standards to elementary STEM instruction.

EDUC 6790  
**Technology and Problem-Based Learning in Elementary STEM Education**  
3:3:0  
On Sufficient Demand

Engages participants in developing meaningful understandings of problem-based approaches to teaching, learning, and the integration of STEM practices across the curriculum using appropriate technology. Requires participants to demonstrate their skills through the development of problem-based, hands-on learning experiences for elementary students, based on findings from current research and theory of cognitive development. Critically evaluates technology for STEM education, based on current national guidelines.

EDUC 6910  
**Project I**  
1:0:3  
Fall

* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program Or permission of the Dean and completion of EDUC 6200

Provides instruction regarding writing a formal classroom-based research project proposal to present to the School of Education Graduate Board. Obtain human subject clearance. Course will be graded credit/no credit.

EDUC 6920  
**Project II**  
1:0:3  
Spring

* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program Or permission of the Dean and completion of EDUC 6910

Provides support regarding Implementation of the classroom-based applied research project. Course will be graded credit/no credit.

EDUC 693R  
**Project III**  
1:0:3  
Spring

* Prerequisite(s): Admission to Graduate Status, Admission to the School of Education Masters Degree Program Or permission of the Dean and completion of EDUC 6920

Provides support regarding completion of a classroom-based applied research project and acceptance of the classroom-based applied project by the School of Education graduate Board. Course will be graded credit/no credit. Repeatable with department approval.
Course Descriptions

EDUC 694R
Directed Individual Study
.5 to 3:3 to 3:0 On Sufficient Demand
* Prerequisite(s): Admission to Graduate Status; Admission to the School of Education Masters Degree Program or permission of the Dean
Provides individual instruction for Master of Education students wishing to further their understanding of the field of education. Focuses on individual research regarding instructional methods and/or assessment. May be repeated for a maximum of 6 credits. Graded Credit/No Credit.

Engineering Graphics and Design Technology (EGDT)

EGDT 1000
Introduction to Engineering Drawing and Technical Design
2:2:0 Fall, Spring
Covers basic sketching, instruments and their use, lettering, geometric construction, dimensioning, multi-view drawings, and section views, using CAD (computer-aided drafting) and traditional hand tools. Teaches introductory skills required in several first-year drafting technology courses. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1010
Electrical Electronic Drafting
3:3:0 Fall, Spring
* Prerequisite(s): EGDT 1000 or equivalent and EGDT 1040 both with a grade of C- or higher
Introduction to several types of electrical-electronic drawings such as Block, Connection, Logic, Schematic, Wiring, and Panel Diagrams. Introduction to basic DC theory, electricity and electrical terms, including Ohm's law, Watt's law, Logic Truth Tables, Series and Parallel Circuits, and Printed Circuit Board Design; using lectures, projects, worksheets, labs, and drawing assignments. Prepares students for advancement to EGDT 2010. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1020
3D Architectural Modeling
3:3:0 Fall, Spring, Summer
For Engineering Graphics and Design Technology and Construction Management majors. Utilizes a Building Information Modeling system (BIM) to design 3D architectural models. Covers model design theory, parametric modeling methods, generation of residential and commercial construction plans and details, building components and systems, and manipulation of model information. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1040
Fundamentals of Technical Engineering Drawing
3:3:0 Fall, Spring, Summer
Introduces fundamental technical engineering drawings, practices, and standards used by various engineering disciplines. Provides basic sketching, computer-aided drafting (CAD) tools, geometric construction, drawing layout, standard dimensioning, multi-view drawings, sectioning, plotting, checking, correcting, and other CAD and drafting skills. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1050
Introduction to 3D Printing
2:2:0 Spring
Introduces basic knowledge and skills related to 3D printing. Covers the acquisition of 3D print files and teaches basic 3D computer modeling skills using common 3D modeling software. Introduces 3D printing software and the use of 3D printers to produce prototype or functional models. Requires students to create and print projects given as class assignments and model and print a project of their choosing. Lab access fee of $45 for computers applies.

EGDT 1060
MicroStation Infrastructure Design
3:3:0 Spring
Teaches the MicroStation Open Roads drafting software system used to draw and plot various types of infrastructure projects. Demonstrates civil design skills needed in an infrastructure design workflow for a typical UDOT or civil engineering transportation project. Includes Digital Terrain Models (DTM’s), horizontal and vertical alignments, plan and profiles, grading design, and utilities/piping design and drafting. Focuses on the development of a civil engineering infrastructure plan set for a typical state highway or freeway. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1070
3 Dimensional Modeling Inventor
3:3:0 Fall, Spring
Teaches basic 3D computer modeling course which emphasizes the development of 3D machine parts, assemblies, and drawings in a constraint-based modeling environment using AutoDesk Inventor. Emphasizes the feature based design process, which simulates actual manufacturing processes with 2D sketching tools and with 3D modeling tools including extrusions, revolutions, sweeps, loft, coils, shells, placed features, patterns, and many others. Also teaches creation of basic multi-part assemblies, constraint-driven assembly animation, and generation of detailed production drawings. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1071
3 Dimensional Modeling—Solidworks
3:3:0 Fall, Spring, Summer
Teaches basic 3D computer modeling, which emphasizes the development of 3D machine parts, assemblies, and drawings in a constraint-based modeling environment using Solidworks. Emphasizes the feature based design process, which simulates actual manufacturing processes with 2D sketching tools and with 3D modeling tools including extrusions, revolutions, sweeps, loft, coils, shells, placed features, patterns, and many others. Also teaches creation of basic multi-part assemblies, constraint-driven assembly animation, and generation of detailed production drawings. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1080
AutoLisp
2:2:0 On Sufficient Demand
* Prerequisite(s): EGDT 1040 with a grade of C- or higher
Covers creating and storing AutoLisp files and programs. Includes customizing the AutoCAD menu for personal and drafting use. Teaches creating new macros for speeding up repetitive drawing tasks. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1090
Introduction to Architectural Drafting and Design
2:2:0 On Sufficient Demand
Covers basic procedures used in the development of residential plans. Includes architectural drafting standards, symbols, and techniques. Uses lectures and text reading assignments related to the drawings and worksheets. Introduces students to the architectural profession and related fields. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1100
Architectural Drafting
3:3:0 Fall, Spring
* Prerequisite(s): EGDT 1020 with a grade of C- or higher
For Engineering Graphics and Design Technology majors and other students who wish to broaden their basic drafting skills in the field of residential architectural drafting. Covers procedures used in developing a complete set of residential plans. Includes architectural drafting standards and code requirements. Reinforces math skills using dimensioning and estimating exercises. Uses lectures and text reading assignments with related worksheets and drawings. Prepares students for advancement into EGDT 2100 and for entry-level employment in related fields. Software fee of $18 applies. Lab access fee of $45 for computers applies.
Course Descriptions

EGDT 1200
Mechanical Drafting
3:3:0  Fall, Spring
* Prerequisite(s): EGDT 1070 or EGDT 1071, both with a grade of C- or higher

Requires previous knowledge of line work, lettering, geometric construction, and dimensioning. Teaches engineering sketching and detail drawing from design layouts. Uses Machinery's Handbook, ANSI Standard and manufacturer's reference materials involving retaining rings, bearings, oil seals, and other hardware. Emphasizes geometric dimensioning and tolerancing. Includes precision dimensioning, surface finish, materials, screw threads, and machining processes and applications. Course fee of $10 for materials applies. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1300
Structural Drafting
3:3:0  Fall, Spring
* Prerequisite(s): EGDT 1040 with a grade of C- or higher

Covers fundamentals of structural design. Studies structural steel detailing of beams, columns, braces, templates, marking and numbering systems, bill of materials, welding symbols, and erection drawings to AISC standards. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1400
Surveying Applications and Field Techniques I
3:2:2  Fall, Spring, Summer

For people seeking a supervisor's license, civil engineering majors, Engineering Graphics and Design Technology majors, Construction Management majors, and anyone else wishing to learn fundamentals of surveying. Covers history of surveying, mathematics, field notes, measurement and computations, basic surveying instruments and equipment, level reading procedures, bearing computations, topography, mathematical traverse closures, area computations, and basic property surveying. Completers should be able to work in the job-entry phase of the surveying field. Course fee of $12 for materials applies. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 1600
Technical Math Algebra
3:3:0  Fall, Spring
* Prerequisite(s): MAT 0920 or equivalent with "C" grade or better or appropriate test scores

Covers the basic principles of algebra, geometry, and trigonometry as they relate to problem solving on the job. Includes solving equations, percent, proportion, variation, calculator operations, measurements, formula rearrangement, functions and graphs, and solving right and oblique triangles.

EGDT 1610
Technical Math Geometry Trig
3:3:0  Fall, Spring
* Prerequisite(s): EGDT 1600 or equivalent course with a grade of C- or higher

Covers more advanced principles of algebra, geometry, and trigonometry as they relate to problem solving on the job. Includes systems of equations, powers and roots, trigonometry functions, vectors, polynomials, quadratic equations, exponents and radicals, and circle concepts.

EGDT 1720
Architectural Rendering
3:3:0  Fall, Spring, Summer

Discusses how Architectural Rendering plays an important role in the way we view and present the world around us, including: elements of the physical and natural world, as well as the influences human cultures have on our society through the construction of buildings, structures, and other works of man. Introduces the necessary skills and practices required in architectural rendering theory and presentation. Develops skills in perspective, layout, shading, color theory and presentations of interior and exterior architectural rendering projects. Course fee of $10 applies.

EGDT 2010
Advanced Electrical CAD
2:2:0  On Sufficient Demand
* Prerequisite(s): EGDT 1010 and EGDT 1040, with "C-" grade or higher

For second year Drafting Technology majors. Concentrates on the completion of electrical-electronic diagrams using CAD procedures. Those layout procedures studied will include logic and schematic diagrams. Printed wiring board and AC motor control wiring diagram layout from reference schematics will also be covered. Includes a basic introduction to AC electrical theory including inductance and capacitance and their relationship to AC motors and motor controls. Completers should have entry-level skills for an electrical-electronic drafting position. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2050
Plate Layout
2:2:0  Spring
* Prerequisite(s): EGDT 2020 with a grade of C- or higher

A continuation of Descriptive Geometry (EGDT 2020). Patterns are made of rolled or folded surfaces such as bins, hoppers, duct work, vent pipes, tanks, storage containers, etc. Patterns are also made for pipe end cuts, pipe intersections, transition pieces and twist angles. Emphasizes three types of pattern development: (1) parallel line, (2) radial line, (3) triangulation. Includes practical problems in finding the line of intersection between surfaces and drawing patterns. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2100
Advanced Architectural
3:3:0  Fall, Spring
* Prerequisite(s): EGDT 1100 and EGDT 1020 both with a grade of C- or higher

Covers the layout, detailing, dimensioning, and room identification of a commercial floor plan in a 3D Architectural software. Includes completing a door and window schedule, a furnishing plan, a reflected ceiling plan, building sections, a roof plan, and exterior elevations. Covers the sketching of common details along with discussions on the various methods and materials used in commercial construction. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2200
Advanced Mechanical
3:3:0  Spring
* Prerequisite(s): EGDT 1200 and (EGDT 1070 or EGDT 1071) all with a grade of C- or higher

Employs 3D modeling software to enhance design processes, including sketching, parametric modeling, 3D assemblies, and producing 2D working drawings. Included are sheet metal, structural parts, mass property, and stress analysis. Software fee of $18 applies. Lab access fee of $45 computers applies.

EGDT 2300
Advanced Structural CAD
3:3:0  Spring
* Prerequisite(s): EGDT 1300 and (MATH 1060 or EGDT 1610) both with a grade of C- or higher

A second year class for students who have completed first year structural drafting and want to enhance their knowledge of structural steel detailing. Includes the proper views and dimensioning practices for columns, stairways, handrails, cross-bracing, anchor bolt layout, erection drawing, and field bolt lists. Completers should be ready for entry-level employment as a structural steel detailer for small detailing companies or large construction companies. Software fee of $18 applies. Lab access fee of $45 computers applies.

EGDT 2070
Descriptive Geometry
3:3:0  Fall
* Prerequisite(s): EGDT 1000 or equivalent and EGDT 1040 both with a grade of C- or higher

Required for Engineering Graphics and Design Technology majors. Elective for engineering majors or others interested in graphical problem solving. Teaches advanced orthographic projection principles used to render view of objects from any conceivable direction. Instructs students in the creation of views needed to solve problems graphically rather than mathematically. Solutions include true length and angle, true size and shape, clearance, bearing, slope and grade, intersections, shortest distance, dished angle, and revolution. Use of accurate scaling techniques is reinforced. Problems are completed either manually or using CAD. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2040
Piping Drafting
2:2:0  Fall, Spring
* Prerequisite(s): EGDT 1040 with a grade of C- or higher

Includes single-line and double-line pipe symbols. Covers both isometric and orthogonal projection. Studies piping connections such as welded, screwed, soldered, flanged, and bell and spigot. Uses manufacturer's and reference materials specifications. Includes information on copper tubing and brass fittings. Uses hydraulic theory and formulas. Also uses computer (CAD) to develop drawings. Software fee of $18 applies. Lab access fee of $45 for computers applies.

Utah Valley University  Course Catalog 2020-2021  715
Course Descriptions

EGDT 2310
Structural Steel Modeling
3:3:0 Spring
* Prerequisite(s): EGDT 1040 and EGDT 1300 both with a grade of C- or higher
Teaches Tekla Structures modeling software. Includes modeling of structural steel buildings, hoppers, stairs, piping, and miscellaneous steel projects. Prepares students for detail and erection drawings which are produced for fabrication and erection of structural steel projects. Software fee of $18 applies. Lab access fee of $45 computers applies.

EGDT 2400
Surveying Applications and Field Techniques II
3:3:0 Fall
* Prerequisite(s): EGDT 1040 or equivalent, EGDT 1400 and (EGDT 1600 or MATH 1060) both with a grade of C- or higher
Covers advanced concepts in the U.S. Public Land and State Plane Coordinate systems. Utilizes advanced surveying instruments such as total station, automatic level, GPS equipment, and data collectors. Covers advanced leveling procedures, volume computations, monumentation, mapping, boundary surveys, and route surveys. Features the writing of legal property descriptions. Builds upon knowledge of safe surveying procedures. Includes use of surveying calculation softwares. Covers horizontal curve calculations and highway staking. Completes should be able to work as an instrument person on survey crews and also prepare the drawings related to the surveys. Lab access fee of $45 for computers applies Software fee of $18 applies. Course fee of $12 for materials applies.

EGDT 2500
3 Dimensional Modeling--Civil 3D
3:3:0 Fall
* Prerequisite(s): EGDT 1040, EGDT 1400
Describes design workflows of typical civil engineering firms. Employs functions of Autodesk Civil 3D application software for civil design and modeling. Includes Digital Terrain Models (DTMs), street alignments, plan and profiles, grading, and utilities/piping design and drafting. Develops a full set of civil engineering improvement plans for a residential subdivision. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2600
Statics
3:3:0 Fall, Spring
* Prerequisite(s): MATH 1060 or EGDT 1610 both with a grade of C- or higher
For students preparing for the second year design classes. Covers the basic principles of statics, coplanar force systems, coplanar-concurrent force systems, and noncoplanar-concurrent force systems. Prepares students for entry-level employment as a design drafter in structural, architectural, and mechanical drafting.

EGDT 2610
Strength of Materials
3:3:0 Fall, Spring
* Prerequisite(s): EGDT 2600 with a grade of C- or higher
Studies strength of materials dealing with direct stress in compression, tensile, and shear. Also covers engineering materials and their properties dealing with stress and deformation, centroids, moments of inertia, section modules, tension and the calculations of beams, girders and columns under various loading conditions. Includes calculations to determine the deflection in beams and girders under various load conditions.

EGDT 2710
Special Problems Mechanical
2:2:0 On Sufficient Demand
* Prerequisite(s): EGDT 2200 with a grade of C- or higher
An advanced course in mechanical layout and design using solid modeling techniques. Students, with approval, may design and layout projects of their choice. Final details are fabricated in the machine shop. Lab access fee of $45 for computers applies.

EGDT 2720
Special Problems Surveying
2:2:0 On Sufficient Demand
* Prerequisite(s): EGDT 2400 and (MATH 1060 or EGDT 1610) both with a grade of C- or higher
For people seeking a surveyor's license, civil engineering, drafting and construction management majors. Covers instrument maintenance and calibration, basic photogrammetry and surveying for photogrammetry, mine surveying, construction surveying, resection, and legal aspects of land surveying. Completes should have job skills for surveying and civil technology. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2730
Special Problems Civil Drafting
2:2:0 On Sufficient Demand
* Prerequisite(s): EGDT 1400 with a grade of C- or higher
For people seeking a surveyor's license or intended Civil Engineering and Engineering Graphics and Design majors desiring a civil drafting emphasis. Covers preparation of drawings associated with surveying and civil engineering and design. Projects include: property surveys and subdivision design, geotechnical investigations, wastewater treatment, storm drains, highway design, topographic mapping, earthen and concrete dams, and NICET certifications. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2740
Special Problems Architectural
2:2:0 On Sufficient Demand
* Prerequisite(s): EGDT 1100 with a grade of C- or higher
A special problems course in architectural drafting. Teaches how to layout and detail a floor plan using a 3D modeling package. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2750
Special Problems Architectural Rendering
2:2:0 On Sufficient Demand
For students who wish to develop additional architectural rendering skills to enhance their job performance. Covers theory of perspective, laying out a building perspective from blueprints, inking techniques to develop a finished rendering, and quick coloring methods for ink renderings. Course fee of $10 for materials applies.

EGDT 2760
Special Problems Structural
2:2:0 On Sufficient Demand
* Prerequisite(s): EGDT 1300 with a grade of C- or higher
Provides opportunities for in-depth study in structural steel drafting. Teaches beam sizing and selection for design drawing. Requires a special class project with complete objectives and goals outlined and presented to the instructor for approval. Emphasizes project documentation. Computer graphics are an important part of this course. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 2780
Special Problems Electrical
2:2:0 On Sufficient Demand
* Prerequisite(s): EGDT 1010 with a grade of C- or higher
For students who wish to advance beyond EGDT 2010 through the development of an outside project which incorporates advanced theory and drafting procedures. The instructor will review project outline to ensure that it meets course objectives and will monitor student progress, establishing progressive goals. Software fee of $18 applies. Lab access fee of $45 for computers applies.

EGDT 281R
Cooperative Work Experience
1 to 8:1 to 8:0 Fall, Spring, Summer
* Prerequisite(s): EGDT 1010, EGDT 1040, EGDT 1070 or EGDT 1071, EGDT 1020, EGDT 1100, EGDT 1200, EGDT 1300, and EGDT 1400, all with a C- or higher
For drafting students to receive actual on-the job work experience. Requires work assignments to be set up with businesses and industries who are involved in drafting and design, construction, or manufacturing. Eight credits may apply toward graduation. May be graded credit/no-credit.

EGDT 285R
AEC Design Lecture Series
5:5:0 Fall
Provides student opportunities to network and collaborate with industry professionals. Provides exposure to career options within the architecture and other related design industries. Emphasizes the importance of professional ethics and communicating with others.

EGDT 2860
Cooperative Correlated Instruction SkillsUSA
5:5:0 Spring
SkillsUSA is a first year class for Engineering Graphics and Design Technology majors. Includes leadership training, parliamentary procedure, job interview skills, prepared speaking, extemporaneous speaking, and organizational skills. Upon completion, the student should understand the SkillsUSA organization and how it helps to build leadership skills.
Course Descriptions

ENGD 2870 Portfolio and Career Preparation 1:1:0 Fall, Spring
Required for Engineering Graphics and Design Technology majors. Teaches necessary job acquisition skills. Instructs students in the job search process, including production of typical types of correspondence, job interview techniques, and creation of presentation-quality portfolios. Correspondence includes letters of application, resumes, follow-up letters, letters of acceptance and rejection, and references. Interview techniques include interview preparation, appearance, and question/answer techniques. Final project is portfolio of samples of work in all areas of Engineering Graphics & Design Technology learned for the degree. Software fee of $18 applies. Lab access fee of $45 for computers applies.

ENG 3450 Civil Design Systems 3:3:0 Spring
"Prerequisite(s): EGDT 2500, EGDT 3500, and University Advanced Standing
Teaches theories, principles, and practices of traffic systems design, gravity and pressure piping systems design, surface grading systems, and hydrology. Explores various computational and design software used to develop finished construction drawings for public and private infrastructure projects.

ENG 3500 Advanced Civil Drafting and Design 3:3:0 Spring
"Prerequisite(s): EGDT 1400 each with a grade of C- or higher and EGDT 2500, 2500, and University Advanced Standing
Covers the analysis, design and preparation of drawings associated with the surveying and civil engineering fields. Exposes the student to the NICET certification process. Focuses on GPS and GIS technologies to acquire design data. Develops a working knowledge of the Utah Department of Transportation Standard Plans and Specifications. Projects include: property surveys, topographic mapping, subdivision design, geotechnical investigations, Water and Wastewater Treatment Plants, storm drainage, highway design, traffic flow diagrams, and earthen and concrete dams. Lab access fee of $45 for computers applies.

English (ENGL)

ENGL 1005 Literacies and Composition Across Contexts 5:5:0 Fall, Spring, Summer
"Prerequisite(s): ENGH 0890 or appropriate placement scores.
Focuses on reading-based writing with strong rhetorical concentration; expands critical reading, writing, and thinking concepts from 0890 and prepares students for reading, writing, and thinking in ENGL 1010 and other future courses and future situations. Provides strong skills development in digital literacy for multi-media content creation, research, and presentations. Provides a project-based curriculum, along with best-practices pedagogies, providing students with authentic contexts, audiences, and opportunities to be intrinsically motivated to develop writing and reading skills and knowledge. May be delivered hybrid and/or online. Canvas Course Mats of $33/Fountain Head Press applies. Lab access fee of $15 applies.

ENGL 1010 Introduction to Academic Writing 3:3:0 Fall, Spring, Summer
"Prerequisite(s): Appropriate test scores taken within the last five years.
Teaches rhetorical knowledge and skills, focusing on critical reading, writing, and thinking. Introduces writing for specific academic audiences and situations. Emphasizes writing as a process through multiple drafts and revisions. May be delivered hybrid and/or online. Lab access fee of $7 for computers applies.

ENGL 101H Introduction to Writing 3:3:0 Fall, Spring
"Prerequisite(s): Appropriate test scores taken within the last five years.
Teaches rhetorical knowledge and skills, focusing on critical reading, writing, and thinking. Introduces writing for specific academic audiences and situations. Emphasizes writing as a process through multiple drafts and revisions. Includes major essay assignments, writing and collaboration, research writing, journals, and portfolios. Honors sections challenge the student to take more qualitatively substantive and/or advanced approaches to course content and assignments. Lab access fee of $7 for computers applies.

ENGL 2130 Science Fiction 3:3:0 Spring
"Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGL 1005
Surveys major science fiction authors from the 19th century to the present. Teaches key elements of the genre, including world creation, character, and significant themes. May include a creative writing component.

ENGL 201H Intermediate Writing Humanities/Social Sciences 3:3:0 Fall, Spring
"Prerequisite(s): Appropriate ACT test scores taken within the last three years or completion of ENGL 1010 or ENGL 101H with a grade of C- or higher, or ENGL 1005 with a grade of C or higher.
Emphasizes academic inquiry and research in the humanities and social sciences. Explores issues from multiple perspectives. Teaches careful reasoning, argumentation, and rhetorical awareness of purpose, audience, and genre. Focuses on critically evaluating, effectively integrating, and properly documenting sources. May be delivered hybrid and/or online. Lab access fee of $7 for computers applies.

Requirements for English Literature Majors

To graduate with a degree in English literature, students must complete all required course work and earn a minimum grade of C- in every course counted toward the major.

Introduction to Academic Writing (ENGL 1010) or Introduction to Writing (ENGL 101H) is required for all students who are pursuing a major in English literature.

ENGL 1010 or ENGL 101H must be completed within the last three years or completion of ENGL 1010 or ENGL 101H with a grade of C- or higher, or ENGL 1005 with a grade of C or higher.

ENGL 201H Intermediate Writing Humanities/Social Sciences 3:3:0 Fall, Spring
"Prerequisite(s): Appropriate ACT test scores taken within the last three years or completion of ENGL 1010 or ENGL 101H with a grade of C- or higher, or ENGL 1005 with a grade of C or higher.
Emphasizes academic inquiry and research in the humanities and social sciences. Explores issues from multiple perspectives. Teaches careful reasoning, argumentation, and rhetorical awareness of purpose, audience, and genre. Focuses on critically evaluating, effectively integrating, and properly documenting sources. May be delivered hybrid and/or online. Lab access fee of $7 for computers applies.

ENGL 201H Intermediate Writing Humanities/Social Sciences 3:3:0 Fall, Spring
"Prerequisite(s): Appropriate ACT test scores taken within the last three years or completion of ENGL 1010 or ENGL 101H with a grade of C- or higher, or ENGL 1005 with a grade of C or higher.
Emphasizes academic inquiry and research in the humanities and social sciences. Explores issues from multiple perspectives. Teaches careful reasoning, argumentation, and rhetorical awareness of purpose, audience, and genre. Focuses on critically evaluating, effectively integrating, and properly documenting sources. May be delivered hybrid and/or online. Lab access fee of $7 for computers applies.

ENGL 201H Intermediate Writing Humanities/Social Sciences 3:3:0 Fall, Spring
"Prerequisite(s): Appropriate ACT test scores taken within the last three years or completion of ENGL 1010 or ENGL 101H with a grade of C- or higher, or ENGL 1005 with a grade of C or higher.
Emphasizes academic inquiry and research in the humanities and social sciences. Explores issues from multiple perspectives. Teaches careful reasoning, argumentation, and rhetorical awareness of purpose, audience, and genre. Focuses on critically evaluating, effectively integrating, and properly documenting sources. May be delivered hybrid and/or online. Lab access fee of $7 for computers applies.
ENGL 2150 (Cross-listed with: CINE 2150)   HH   Critical Introduction to Cinema Studies 3:3:0   Spring

Studies film as an aesthetic and cultural medium. Teaches the fundamentals of film, including narrative form, mise en scene, cinematography, editing, sound, and non-narrative forms. Teaches film analysis, including ideological approaches, and considers film as a cultural institution. May be delivered hybrid.

ENGL 217G (Cross-listed with: CINE 217G, COMM 217G)   HH   Race Class and Gender in U S Cinema 3:3:0   Fall

* Prerequisite(s): ENGL 1010 or ENGH 1005

Races cultural awareness through aesthetic, critical, and interdisciplinary examination of the evolution of the representation of race, class, and gender in American cinema. Focuses on both Hollywood and independent minority filmmakers. Some films screened may carry an "R" rating.

ENGL 2200   HH   Introduction to Literature 3:3:0   Spring

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

Introduces literary appreciation. Teaches criticism and terminology as applied to various types of literature, including fiction, poetry, and drama. Uses discussion, lecture, films, videos, and tests.

ENGL 2210   HH   Introduction to Folklore 3:3:0   Spring

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

Introduces the study of folklore. Presents the dynamics of the traditional expressions of a variety of folk groups. Emphasizes folklore performance and its cultural context. Provides practical experience in folklore collection.

ENGL 2230   HH   Myths and Legends in Literature 3:3:0   Fall

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

Introduces students to myths and legends that are the foundation of literature. Uses discussion, storytelling, videos, journals, and portfolios.

ENGL 223H   HH   Myths and Legends in Literature 3:3:0   Fall

* Prerequisite(s): ENGL 1010 or ENGH 1005

Provides a thorough foundation for the study of classical mythology; explores common myth themes through guided research and projects in world myth; analyzes myth through a variety of theoretical perspectives. Focuses on lecture, discussion, written and oral presentations, myth analysis, exams, and papers.

ENGL 2250   HH   Creative Process and Imaginative Writing 3:3:0   Fall, Spring, Summer

* Prerequisite(s): ENGL 1010 or ENGH 1005 with a grade of C- or higher

Introduces students to the basic literary elements of writing short fiction, drama, creative non-fiction, poetry, or combinations of these. Uses readings from a wide range of contemporary authors, guest speakers, workshops, and student writing to enhance the techniques and aesthetics of creative writing. Lab access fee of $7 for computers applies.

ENGL 225H   HH   Creative Process and Imaginative Writing 3:3:0   Fall, Spring

* Prerequisite(s): ENGL 1010 or ENGH 1005 with a grade of C- or higher

Introduces students to the basic literary elements of writing short fiction, drama, creative nonfiction, poetry, or combinations of these. Uses readings from a wide range of contemporary authors, guest speakers, workshops, and student writing to enhance the techniques and aesthetics of creative writing. Smaller class size to facilitate increased student interaction and inquiry. Lab access fee of $7 for computers applies.

ENGL 2300   HH   Shakespeare 3:3:0   Fall

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

For General Education students and English majors. Introduces several Shakespeare plays with particular attention to analysis and critical review of Shakespeare's works. Teaches comprehension of Shakespeare's works and their continued cultural stature. Explores aspects of dramatic performance and a selection of Shakespeare's poetry. May include discussion, lectures, films, papers, examinations, and attending or performing in plays or scenes from plays. Completers should be able to interpret Shakespearean literature and explain the relationship of Shakespeare's works to the world of today.

ENGL 230H   HH   Shakespeare 3:3:0   Fall

* Prerequisite(s): ENGL 1010 or ENGH 1005

Introduces several Shakespeare plays with particular attention to analysis and critical evaluation of Shakespeare's works. Teaches comprehension of Shakespeare's works and their continued cultural stature. Explores aspects of dramatic performance and a selection of Shakespeare's poetry. May include discussion, lectures, films, papers, examinations, and attending or performing in plays or scenes from plays. Completers should be able to interpret Shakespearean literature and explain the relationship of Shakespeare's works to the world of today.

ENGL 2310   HH   Technical Communication 3:3:0   Fall, Spring, Summer

* Prerequisite(s): ENGL 1010 or ENGH 1005

Teaches basic technical writing skills used in a variety of professional settings. Emphasizes audience analysis, document design, and using precise language for a particular audience. Lab access fee of $12 for computers applies.

ENGL 2510   HH   American Literature before 1865 3:3:0   Fall, Spring, Summer

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

Surveys American essays, letters, biographies, fiction, and poetry up to 1865. Studies literature as a reaction to American and world events and to the general condition of the American people through discussion, lecture, videos, and writing.

ENGL 2520   HH   American Literature after 1865 3:3:0   Fall, Spring, Summer

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

Surveys American essays, letters, biographies, fiction, drama, and poetry from 1865 to the present. Studies literature as a reaction to American and world events and to the general condition of the American people through discussion, lecture, videos, and writing.

ENGL 2600   HH   Critical Introduction to Literature 3:3:0   Fall, Spring, Summer

* Prerequisite(s): Completion of ENGL 2010 with a grade of C- or higher.

Surveys contemporary critical, theoretical, and ideological approaches to literature (such as structuralist, poststructuralist, psychoanalytical, feminist / gender, Marxist, new historical, postcolonial, etc.). Introduces key literary terms and engages close reading techniques. Includes lectures, screenings, student presentations, analyses and written reports, exams, and a final essay in MLA format and documentation.

ENGL 2610   HH   British Literature before 1800 3:3:0   Fall, Spring, Summer

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

Presents a survey of British literature with emphasis on the most important works of the best writers from 450-1800 A.D. Introduces Old English, Middle English, Renaissance, and Neo-Classical British literature. Uses discussion, lecture, films, videos, and writing.

ENGL 2620   HH   British Literature after 1800 3:3:0   Fall, Spring, Summer

* Prerequisite(s) or Corequisite(s): ENGL 1010 or ENGH 1005

Introduces British Romanticism, Victorianism, Modernism, and post-Modemism. Emphasizes important works of the best writers from approximately 1800 to the present. May include discussion, lecture, videos, films, tests, and papers.

ENGL 2730   HH   Introduction to Gender Studies 3:3:0   On Sufficient Demand

* Prerequisite(s): ENGL 2010

Analyzes gender from an interdisciplinary model. Explores such issues as the definition of masculinity and femininity, the function of gender roles and stereotypes, and what it means to have sexed bodies and minds. Analyzes questions of gender through the different frameworks of literature, anthropology, sociology, history, biology, psychology, and philosophy.
ENGL 276R
Themes in Literature
3:3:0
Fall
* Prerequisite(s): ENGL 1010 or ENGH 1005
Analyzes specific themes/topics in literature (generic or other). Requires reading and study of representative works. Includes short papers, tests and presentations. Possible course themes are: horror, fantasy, nonfiction, detective fiction, and western American literature, among others. May be repeated for up to 6 credits toward graduation.

ENGL 281R
Internship
1 to 8:1:0 to 8:0
Fall, Spring, Summer
* Prerequisite(s): Approval of Cooperative Coordinator
Designed for English majors. Provides experience in the student's major. Students who receive credit for an internship must establish learning objectives with their Faculty Sponsor at the beginning of their internship and reflect on their learning through academic work (i.e., papers, journal, etc.). Students are required to submit an evaluation of their experience at the end of the semester. Credit is determined by the number of hours a student works during the semester. May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.

ENGL 290R
English Scholarly Forum
1:1:0
On Sufficient Demand
* Prerequisite(s): ENGL 2010
Requires attendance at academic campus events of student's choice (conferences, lectures, colloquia, symposia, workshops, reading groups, etc.) and composing reflective, written assignments. Includes informal meetings with instructor at the beginning and end of the course. May be taken three times for credit.

ENGL 299R
Independent Study
.5 to 3:0 to 3:0 to 12
On Sufficient Demand
Provides independent study as directed in reading and individual projects at the discretion and approval of the Dean and/or Department Chair. Limited to three credits toward graduation with an AS/AA degree.

ENGL 300
Professional Considerations for the English Major
1:1:0
Fall, Spring
* Prerequisite(s): Completion of ENGL 2010 with a grade of C- or higher and University Advanced Standing
Discusses various career choices for English majors. Familiarizes students with curricular emphases and department faculty. Emphasizes internships and other available activities. Features a regular rotation of English faculty guest speakers.

ENGL 3010
Rhetorical Theory
3:3:0
Fall, Spring
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing
Considers prominent theories of rhetoric and accompanying methods for the production of texts in various contexts, encouraging adopting, amending, and/ or developing hybrid theories of rhetoric.

ENGL 3020
Modern English Grammars
3:3:0
Fall, Spring, Summer
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing
Explores language structures, discovering connections between grammar (linguistic structure) and language uses (discourse and/or rhetoric). Includes the study of and practice in informed decision-making in the process of developing language structures (grammatical choices) appropriate to a particular rhetorical aim.

ENGL 3030
Writing in the Disciplines
3:3:0
On Sufficient Demand
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing
Focuses on analysis and production of discipline-specific texts. Teaches rhetorical knowledge and skills and emphasizes summarizing, paraphrasing, quoting, critical analysis, synthesizing ideas, and interrogating multiple perspectives. Includes written, oral, visual, and other modes of communication. Lab access fee of $7 for computers applies.

ENGL 3040
History of the English Language
3:3:0
Fall
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing
Focuses on the origins of our language and how it has grown and continues to change. Introduces historical origins of the English language and changes that produced our present speech in its many dialects, creoles, and pidgins. Combines linguistic and rhetorical histories.

ENGL 3050
Advanced Editing and Design for Print Media
3:3:0
Fall, Spring
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing: ENGL 2050 recommended
Refines student editing, design, and publishing skills. Provides students with the opportunity to take manuscripts from editing to press-ready. Teaches industry standards for current publishing tools. Includes projects such as designing books, marketing literature, and corporate identities. Covers design, typography, and pre-press issues as they relate to writing and editing documents. Recommended for students involved with student publications, including journals and campus newspaper.

ENGL 3060 (Cross-listed with: HUM 3060)
Visual Rhetoric
3:3:0
Fall
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing
Investigates the growing academic and cultural interest in the rhetorical nature of visual texts. Teaches critical thinking about the consumption and productions of images and multimodal texts. Explores visual grammars and other theories of visual rhetoric as articulated by contemporary image, language, and scholars of rhetoric. Encourages the development of theoretical and practical knowledge through reading, discussion, and analysis as well as the production of visual texts and written work.

ENGL 3070
Public Rhetorics
3:3:0
Fall, Spring
* Prerequisite(s): ENGL 2010 with a C- or higher and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 3010
Investigates the structure and nature of rhetorical identities and arguments in public discourse. Introduces genres of public discourse to examine their rhetorical construction and circulation to mass audiences. Explores and critiques theories of democratic deliberation. Studies texts in media such as advertising, blogs, film, social networking venues, television, and websites through specific theories of public rhetoric. Examines arguments regarding the complex nature of public ethos. Includes reading, discussion, analysis, research, and production of public rhetorics through a variety of media and methods.

ENGL 3085
Rhetorical Approaches to Popular Culture
3:3:0
Spring
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 3010
Explores popular culture as a contested site of meaning-making, identity-formation, and shared experiences. Reviews theoretical histories that construct the status of the popular or the mainstream versus the comparative labels of the “highbrow” and the “subcultural.” Analyzes how media access, socioeconomic context, cultural movements, and generational differences formulate taste preferences and different styles of engagement with popular texts. Focuses on the rhetorical practices of pop culture creation and consumption with an emphasis on personal and political ramifications. Examines texts that are industry-produced and texts created through the practices of fans, critics, and theorists.

ENGL 3090
Academic Writing for English Majors WE
3:3:0
Fall, Spring, Summer
* Prerequisite(s): ENGL 2600 with a grade of C- or higher and University Advanced Standing
* Corequisite(s): ENGL 3000 Recommended
Centers on scholarly research and writing in fields related to English Studies, drawing on students' areas of focus. Emphasizes analysis, rhetorical theories of writing, development, style, oral presentations, and primary and secondary research techniques. Prepares students to extend their abilities with researched writing in other upper-division courses and teaches students advanced scholarly attitudes toward researched writing. Lab access fee of $7 for computers applies.

ENGL 3110 (Cross-listed with: COMM 3110, THDA 3110)
Non Fiction Cinema History
3:2:3
On Sufficient Demand
* Prerequisite(s): ENGL 2150 and University Advanced Standing
Surveys the history of non-fiction/documentary film from 1896 to the present. Includes study of early pioneers from Flaherty's NANOOK OF THE NORTH to the current trend of reality television and popular documentaries. Some films screened may carry an “R” rating.
ENGL 314G (Cross-listed with: COMM 314G, THEA 314G)
Global Cinema History
3:2:3
*Prerequisite(s): (ENGL 2150 or THEA 1023) and University Advanced Standing

Studies the evolution of global film styles, movements, stars, and genres with a focus on international cinema chronologies outside the United States. Some films screened may be considered controversial and carry an "R" rating.

ENGL 3150 (Cross-listed with: CINE 3150, COMM 3150)
Cinema and Television Theory
3:3:0
Spring
*Prerequisite(s): (CINE 2150 or ENGL 2150) and University Advanced Standing

Examines major theoretical approaches to the screen arts. Explores how cinema and television reflect and are created by historical and contemporary cultural contexts. Includes the study of various approaches such as fan studies, spectatorship, stars, authorship, genre, long-form narrative and production. Includes lecture, film and media screenings, and critical discussions of assigned readings.

ENGL 3300
Collaborative Communication for Technology Professions
3:3:0
Fall, Spring
*Prerequisite(s): ENGL 2150 and University Advanced Standing

Teaches technical communication skills and methodologies in demand by business and industry. Provides collaborative experience in the development of a professional, team-oriented project, using suitable technology. Integrates textual and visual rhetorics through effective design practices. Emphasizes primary and secondary research as well as usability testing. Lab access fee of $12 for computers applies.

ENGL 3320
Grant and Proposal Writing
3:3:0
Fall
*Prerequisite(s): ENGL 2150 and University Advanced Standing

Introduces students to private and governmental funding sources. Demonstrates successful proposal and grant writing strategies. For interested upper-division students and Technical Writing emphases and minors. Lab access fee of $12 for computers applies.

ENGL 3340
Digital Document Design
3:3:0
Fall
*Prerequisite(s): ENGL 2150 and University Advanced Standing

Teaches web-based document design and other digital genres. Introduces HTML, CSS, and industry standard tools. Emphasizes rhetorical differences between digital and print documents and focuses on the collaborative and viral nature of web texts. Lab access fee of $12 for computers applies.

ENGL 3420
Intermediate Fiction Writing
3:3:0
Fall, Spring
*Prerequisite(s): [ENGL 2250 or ENGL 225H) and ENGL 2600 each with a C- or higher] and University Advanced Standing

Implements a variety of intermediate techniques for generating, writing, and revising stories for publication and public readings, along with readings in theory and fiction. Lab access fee of $7 for computers applies.

ENGL 3430
Play Writing for Creative Writers
3:3:0
Spring Even Year
*Prerequisite(s): [ENGL 2250 or ENGL 225H) and ENGL 2600 each with a C- or higher] and University Advanced Standing

Teaches the skills and processes of a variety of styles of playwriting presented through textual analysis of written plays and play attendance. Includes workshops, lectures, discussions, and a final revised portfolio of original dramatic works.

ENGL 3440
Intermediate Poetry Writing
3:3:0
Fall, Spring
*Prerequisite(s): [ENGL 2250 or ENGL 225H) and ENGL 2600 each with a C- or higher] and University Advanced Standing

Provides practices and techniques for generating, writing, and revising original poetry. Includes poetry readings, memorizations, and submission of original poetry to literary journals. Focuses on contemporary poetry and critical theories associated with contemporary poetry.

ENGL 3450
Intermediate Creative Nonfiction Writing
3:3:0
Fall, Spring
*Prerequisite(s): [ENGL 2250 or ENGL 225H) and ENGL 2600 each with a C- or higher] and University Advanced Standing

Provides intermediate instruction for writing nonfiction prose. Explores and provides practice in various categories of nonfiction, including, for example, narrative, memoir, interpretive reporting, found text, and experimental forms. Addresses the stylistic and compositional challenges of transforming experience into writing.

ENGL 3460
Wilderness and Environmental Writing
3:3:0
Fall Even Year
*Prerequisite(s): ENGL 2150 and University Advanced Standing

Introduces students to the literary conversation of appreciation and responsibility for our natural world and teaches them how to engage meaningfully in that conversation. Requires (1) extensive readings in literature of the natural world, including scientific, polemic, creative non-fiction, and fiction writing modes bearing on environmental stewardship and (2) a writing portfolio that includes polemic, creative non-fiction, fiction, and poetry. Includes discussion of assigned readings and workshops of student manuscripts. Requires overnight wilderness field trips; students with disabilities will be accommodated on field trips.

ENGL 3510
Early American Literature
3:3:0
Fall
*Prerequisite(s): ENGL 2150 and (ENGL 2510 or ENGL 2520), both with a grade of C- or higher and University Advanced Standing

Examines selected authors and themes in American literature from its beginnings through the 1820s. Identifies texts within their cultural and historical contexts. Explores multiple genres, including autobiography, essay, poetry, drama, and fiction.

ENGL 3520
Literature of the American Renaissance
3:3:0
Fall, Spring
*Prerequisite(s): ENGL 2150 and (ENGL 2510 or ENGL 2520), both with a grade of C- or higher and University Advanced Standing

Studies American literary works during the Romantic period, roughly 1830-1870. Includes study of authors such as Hawthorne, Melville, Poe, Emerson, Thoreau, Douglass, Jacobs, Stowe, Whitman, and Dickinson. Identifies the contribution of both canonical and lesser-known authors within cultural and historical contexts.

ENGL 3525
American Literary Realism and Naturalism
3:3:0
Spring
*Prerequisite(s): ENGL 2150 and (ENGL 2510 or ENGL 2520), both with a grade of C- or higher and University Advanced Standing

Studies literature associated with the American realist and naturalist movements between the Civil War and the early twentieth century, by authors such as Mark Twain, Henry James, Kate Chopin, Theodore Dreiser, and Edith Wharton. Explores aesthetic and philosophical issues encountered by authors who attempt to depict social and natural environments realistically.

ENGL 3530
Modern American Literature
3:3:0
Fall, Spring
*Prerequisite(s): ENGL 2150 and (ENGL 2510 or ENGL 2520), both with a grade of C- or higher and University Advanced Standing

Studies modern American literature (c. 1900-1945) in relation to intellectual and historical developments. Emphasizes important works by major writers responding to radical changes in America brought on by shifting demographics, artistic experimentation, and world war.

ENGL 3540
Contemporary American Literature
3:3:0
Fall, Spring
*Prerequisite(s): ENGL 2150 and (ENGL 2510 or ENGL 2520), both with a grade of C- or higher and University Advanced Standing

Studies significant authors, themes, and topics in American literature (c. 1945 to present) in relation to historical and intellectual developments and contemporary literary theory. Explores multiple genres, including fiction, poetry, drama, and film.
ENGL 357G
Native American Literature
3:3:0  Fall
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Surveys a wide range of Native American literature. Examines the cultures and identities of Native Americans through the study of literary texts including mythology and works by contemporary writers such as N. Scott Momaday, Leslie Marmon Silko, Louise Erdrich, and Sherman Alexie, among others.

ENGL 3610
Medieval Literature
3:3:0  Spring
* Prerequisite(s): ENGL 2010 and (ENGL 2610 or ENGL 2620), both with a grade of C- or higher and University Advanced Standing

Explores selected authors such as Defoe, Swift, Pope, Johnson, Thompson, Gray, Collins, Goldsmith, Montague, Burney, and others.

ENGL 3650
Romantic British Literature
3:3:0  Spring
* Prerequisite(s): ENGL 2010 and (ENGL 2610 or ENGL 2620), both with a grade of C- or higher and University Advanced Standing

Explores British poetry, fiction, and nonfiction of the Romantic era (approx. 1780-1830) by authors including Blake, Wordsworth, Coleridge, Byron, Keats, the Shelleys, and Austen. Examines historical and philosophical trends that shaped the era's literature and were shaped by it.

ENGL 3655
Victorian British Literature
3:3:0  Fall
* Prerequisite(s): ENGL 2010 and (ENGL 2610 or ENGL 2620), both with a grade of C- or higher and University Advanced Standing

Explores British poetry, drama, fiction, and nonfiction of the Victorian age (approx. 1830-1900) by authors including Dickens, Tennyson, Eliot, the Brownings and Rossetti, Hardy, and Wilde. Examines historical and philosophical trends that shaped the era's literature and were shaped by it.

ENGL 3660
Modern British Literature
3:3:0  Spring
* Prerequisite(s): ENGL 2010 and (ENGL 2610 or ENGL 2620), both with a grade of C- or higher and University Advanced Standing

Explores modern British literature (c. 1900-1945) in relation to intellectual and historical developments. Emphasizes the literature of empire and of the world wars, modernist experimental writing, and reactions against modernism.

ENGL 3670
Contemporary British Literature
3:3:0  Fall
* Prerequisite(s): ENGL 2010 and (ENGL 2610 or ENGL 2620), both with a grade of C- or higher and University Advanced Standing

Explores contemporary British literature (1945-present) in relation to intellectual and historical developments. Emphasizes postmodern and postcolonial writing alongside traditional forms that, together, characterize recent British literature.

ENGL 3710
Literature by Women
3:3:0  Spring
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Provides a substantive framework of important critical issues regarding literature by or about women. Applies feminist critical theory to fiction, poetry, personal essays, or drama written by women.

ENGL 373R
Literature of Cultures and Places
3:3:0  Fall, Spring
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Studies literature written in English by authors from outside the United States and Britain or by authors in the United States and Britain defined by regional or cultural traditions (e.g. Southern US, Welsh, urban working-class). May be repeated twice with different designations.

ENGL 374G
Literature of the Sacred
3:3:0  Fall
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Focuses on reading and interpreting primary texts of Hinduism, Buddhism, Judaism, Christianity, Islam, and others emphasizing resonances of these texts in later works of literature. Discusses texts from a literary standpoint within the genre of "religious writings."

ENGL 376G
World Literature
3:3:0  Spring
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Studies literature from outside of Britain and the United States. Focuses on texts selected by region, culture, time period, or author (or closely related group of authors).

ENGL 377G
Latina/o Literature in America
3:3:0  Spring
* Prerequisite(s): University Advanced Standing

Studies Latina/o literature written in and about the United States and North America through close readings of novels, poetry, and other media from a variety of national, ethnic, and cultural traditions and perspectives including Mexico, the Caribbean, and the Brazuca/o experience. Examines issues such as identity, language, culture, race, ethnicity, and national borders, alongside questions of style, form, symbolism, and narrative. Integrates active class discussions, film screenings, student presentations, examinations, and papers. All texts are either written in English or taught in translation.

ENGL 3780
Mormon Literature
3:3:0  Spring
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing

Surveys the foundations of Mormon literature as expressed through short fiction, novels, personal essays, drama, history and criticism.

ENGL 3790
Contemporary LGBTQ Literature
3:3:0  Fall Even Year
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Surveys literary, historical, critical, and cultural texts that reflect the diversity inherent among sexually marginal communities in the United States. Includes, but is not limited to novels, short stories, drama, poetry, film, and visual art.

ENGL 3820
History of Literary Criticism
3:3:0  Spring Odd Year
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Explores strategies and theories influencing the reading and writing of literary texts from classical antiquity to the present.
ENGL 3890
Contemporary Critical Approaches to Literature WE
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Completion of ENGL 2600 with a grade of C- or higher and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 3090
Provides in-depth study of one contemporary theoretical and critical approach to literature using primary texts. Explicates how interpretive techniques function within the discipline of English Studies. Required for English majors. Should be taken beginning of junior year.

ENGL 401R
Topics in Rhetoric
3:3:0 Fall, Spring
* Prerequisite(s): ENGL 2150 with a grade of C- or higher and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 3010
Examines advanced topics in rhetoric and writing. Studies writing's central role in education, communication, and culture. Explores discourse communities and genres. Analyzes how writing constructs meaning in academic, professional, media, and personal texts. Situates writing as an instrument for community engagement and service learning. May be repeated for a maximum of 6 credits toward graduation.

ENGL 4020
Multicultural Rhetorics
3:3:0 Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 3010
Investigates the history and structure of rhetorical identities and arguments in multicultural, multi-ethnic, disability, and/or feminist discourses. Examines and critiques public discourses centered around race, class, gender, sexuality, disability, and other issues. Uses specific rhetorical theories to examine various texts and popular media, such as advertisements, film, television, etc.

ENGL 412R
Studies in Literary Genres
3:3:0 Fall, Spring
* Prerequisite(s): [ENGL 2250 or ENGL 229H] and ENGL 2600 each with a C- or higher] and University Advanced Standing
Examines various literary genres, with a different focus each semester. May be repeated with different topics for a maximum of 9 credits toward graduation.

ENGL 414R
Special Topics in Cinema History
3:2:3 On Sufficient Demand
* Prerequisite(s): ENGL 2150 and University Advanced Standing
Focuses study on a specific U.S. or International period or movement. Representative topics may include German Expressionism, Italian Neorealism, New Hollywood Cinema, and etc. May be repeated for a maximum of 9 credits toward graduation. Some films screened may carry an "R" rating.

ENGL 416R (Cross-listed with: CINE 416R, THEA 416R)
Special Topics in Film Studies
3:3:0 On Sufficient Demand
* Prerequisite(s): (ENGL 2150 or CINE 2150 or THEA 1023) and University Advanced Standing
Covers cinema directors, genre, theory, and social change on a rotating basis. Explains course focus, defines terminology involved, then studies evolution and/or specific texts or contexts, and considers theoretical discourse. May be repeated for a maximum of 9 credits toward graduation. Some films screened may carry an "R" rating. Course fee of $40 for support applies.

ENGL 4210
Methods in Teaching Literacy I
3:3:0 Fall, Spring
* Prerequisite(s): [ENGL 2600 and (ENGL 3010 or ENGL 3020 or ENGL 3040)] and University Advanced Standing
Explores issues related to teaching English in secondary schools. Focuses on using the Common Core State Standards (CCSS) to design engaging units in each of the core strands: Reading, Writing, Speaking and Listening, and Language. Focuses on curriculum design, including teaching methods and assessment. Entails class discussion, field observations, and creation of teaching materials.

ENGL 4220
Methods in Teaching Literacy II
3:3:0 Fall, Spring
* Prerequisite(s): ENGL 4210 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): EDSC 4550
Emphasizes the teaching of reading and literature in the secondary English classroom. Presents strategies for teaching skills and concepts outlined in the Utah Core State Standards (UCSS). Explores issues and research related to adolescent literacy through reading and discussion. Requires students to create teaching materials, including unit and lesson plans, and participate in teaching demonstrations. Preparatory to student teaching for English Secondary Education students.

ENGL 4230
Methods in Teaching Literacy III Teaching the Conventions of Writing
3:3:0 Fall, Spring
* Prerequisite(s): ENGL 4210 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): EDSC 4550
Emphasizes developing a writing program in the secondary English classroom, including assigning and assessing student writing. Presents strategies for teaching writing to secondary students, as outlined in the Common Core State Standards (CCSS), which have been adopted by the Utah Office of Education. Includes designing lessons for each of the modes specified in the CCSS: Argument, Informative/Explanatory, and Narrative writing. Integrates the six-trait model, with specific focus on teaching Conventions. Entails class discussion, micro-teaching, and creation of teaching materials.

ENGL 4250
Adolescent Literature
3:3:0 Fall, Spring
* Prerequisite(s): ENGL 2150 and University Advanced Standing
Explores attitudes towards adolescence as a distinctive psychological, social and moral state, using contemporary and time-honored works from various cultures. Pays particular attention to contemporary adolescent issues, history of young adult literature, significant trends in young adult literature, and the role of young adult literature in the literacy development process.

ENGL 4340
Advanced Technical Communication
3:3:0 Spring Odd Year
* Prerequisite(s): ENGL 2150 with a grade of C- or higher and ENGL 2310 and University Advanced Standing
Introduces advanced theory to critically reflect upon workplace genres and values to situate technical communication into broader political and global contexts. Teaches user-centered document design, including initial proposals and research, drafting, collaboration, usability testing, and document management. Emphasizes designing documents for local and university clients.

ENGL 436R
Topics in Technical Communication
3:3:0 Spring Odd Year
* Prerequisite(s): ENGL 2150 with a grade of C- or higher and ENGL 2310 and University Advanced Standing
Examines key issues and theories in technical communication. May be taken twice with different topics. Lab access fee of $12 for computers applies.

ENGL 4420
Advanced Fiction Writing I
3:3:0 Fall
* Prerequisite(s): ENGL 3420 and University Advanced Standing
Applies a variety of advanced techniques for generating, writing, and revising fiction which includes readings in form, theory, and published works, with an emphasis on workshopping and writing for publication and public readings. Lab access fee of $7 for computers applies.

ENGL 4425
Advanced Fiction Writing II
3:3:0 Spring
* Prerequisite(s): ENGL 4420 and University Advanced Standing
Applies a variety of advanced techniques for writing and especially revising fiction which includes readings in form, theory, and published works, with an emphasis on workshopping, revising, and preparing for publication, public readings, and graduate school.

ENGL 4440
Advanced Poetry Writing I
3:3:0 Fall
* Prerequisite(s): ENGL 3440 and University Advanced Standing
Provides further practices and techniques for generating, writing, and revising original poetry. Includes poetry readings, memorizations, workshopping and submission of original poetry to literary journals. Focuses on contemporary poetry and critical theories associated with contemporary poetry.
ENGL 4445  Advanced Poetry Writing II  
3:3:0  Spring  
* Prerequisite(s): ENGL 4440 and University Advanced Standing  

Puts into practice a variety of techniques for writing and revising original poetry. Includes poetry readings, memorizations, workshops, and submission of original poetry to literary journals. Focuses on contemporary poetry and critical theories associated with contemporary poetry. Includes workshop methodology.  

ENGL 4450  Advanced Creative Nonfiction Writing I  
3:3:0  Fall  
* Prerequisite(s): ENGL 3450 and University Advanced Standing  

Provides advanced instruction for writing nonfiction prose. Explores and provides practice in various categories of nonfiction, including, for example, narrative, memoir, interpretive reporting, found text, and experimental forms. Addresses the stylistic and compositional challenges of transforming experience into writing.  

ENGL 4455  Advanced Creative Nonfiction Writing II  
3:3:0  Spring  
* Prerequisite(s): ENGL 4450 and University Advanced Standing  

Provides advanced instruction in revising, editing, and preparing Creative Nonfiction manuscripts for submissions to well-selected quality venues. Provides practice in finishing work previously shaped in ENGL 3450 and ENGL 4450. Addresses challenges of style, balance, compositional complexity, tradition, and experimentation.  

ENGL 4570  Studies in the American Novel  
3:3:0  Fall Odd Year  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Explores formal and thematic developments in the American novel. Includes historical, regional, cultural, and theoretical perspectives.  

ENGL 4620  Chaucer  
3:3:0  Spring Even Year  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Studies selected works by Chaucer, including The Canterbury Tales and other poetry. Considers the cultural and historical context of the Middle Ages.  

ENGL 463R  Topics in Shakespeare  
3:3:0  Fall, Spring  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Examines various topics related to Shakespeare’s drama and poetry. Discusses relevant cultural and historical aspects of his times. May be repeated for a maximum of 6 credits for graduation with different topics.  

ENGL 4640  Milton  
3:3:0  Fall Even Year  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Surveys John Milton's major prose and poetry, including an intensive study of "Paradise Lost," placed in context with the important social, political, and religious trends of his time.  

ENGL 471R  Eminent Authors  
3:3:0  Fall, Spring  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Introduces important works of eminent authors. Emphasizes forms of literary expression and their place in the historical development of world literature. Examines relevant cultural and historical aspects of the authors’ milieu. May be repeated twice with different topics.  

ENGL 473R  Topics in Gender Studies  
3:3:0  On Sufficient Demand  
* Prerequisite(s): ENGL 2010, ENGL 2600, and University Advanced Standing  

Focuses student reading, research, and discussion on specific areas of concentration within the field of gender studies. Analyzes how gender affects and is affected by culture, ideology, socio-economic factors, history, etc. May be repeated for up to 6 credits toward graduation.  

ENGL 474R  Topics in Folklore  
3:3:0  On Sufficient Demand  
* Prerequisite(s): ENGL 2210 or instructor/advisor approval and University Advanced Standing  

Studies one folk genre, one folk group, or one theme which crosses genres and/or groups. Students will collect folklore related to topic under discussion. Uses discussion, readings, folk events, and students' writings. May be repeated twice with different topics.  

ENGL 476G  Multi-ethnic Literature in America  
3:3:0  Fall Even Year  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Surveys multi-ethnic literature, reflecting the rich diversity inherent in the American experience. Includes but is not limited to works by Native American, Hispanic American, Asian American, and African American authors.  

ENGL 481R  Internship  
1 to 8:1 to 8:0  Fall, Spring, Summer  
* Prerequisite(s): Departmental approval, senior status, and University Advanced Standing  

For senior English majors and minors. Internships are intended to offer students opportunities to work with instructors and other professionals on task related to the field of English. Students who receive credit for an internship must establish learning objectives with their Faculty Sponsor at the beginning of their internship and reflect on their learning through academic work (i.e., papers, journal, etc.). Students are required to submit an evaluation of their experience at the end of the semester. May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.  

ENGL 486R  Topics in Literature  
3:3:0  Fall, Spring  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Studies topics in literature such as ethics, the environment, war, civil rights, families, marriage, death, politics, adolescence, and immigrant narratives.  

ENGL 488H  English Honors Seminar  
3:3:0  On Sufficient Demand  
* Prerequisite(s): ENGL 3090 and ENGL 3890) and University Advanced Standing  

Emphasizes rigorous analysis and synthesis of topics in British and American literature, rhetoric, and writing, with specific content varying by semester. Uses a seminar approach to enable significant participation by students through discussion, presentations, and written analyses.  

ENGL 490R  Directed Readings  
1 to 3:3 to 9  Fall, Spring, Summer  
* Prerequisite(s): Department Chair, Instructor Approval, and University Advanced Standing  

Reading and writing assignments designed in consultation with a faculty member to meet special needs or interests not available through regular course work. May be repeated two times for a total of up to 9 credits.  

ENGL 4950  Senior Seminar  
3:3:0  Fall, Spring  
* Prerequisite(s): ENGL 3000, ENGL 3090, and ENGL 3890, all with a grade of C- or higher and University Advanced Standing. Senior Standing recommended.  

Explores the value and relevance of an English degree. Professionalizes students by assisting them with career or graduate school preparation. Offers students the opportunity to reflect on their major and to optimize writing or graduate school preparation. Offers students the opportunity to reflect on their major and to optimize writing or graduate school preparation. Offers students the opportunity to reflect on their major and to optimize writing or graduate school preparation. Offers students the opportunity to reflect on their major and to optimize writing or graduate school preparation. Offers students the opportunity to reflect on their major and to optimize writing or graduate school preparation.  

ENGL 498H  Honors Thesis Preparation  
3:3:0  On Sufficient Demand  
* Prerequisite(s): University Advanced Standing  

Serves as the first half of the thesis experience for Departmental Honors in English. Reviews and improves research methodologies. Requires that students initiate collaboration with one or more instructors in a directed research and writing project. Explores and develops thesis topic in consultation with faculty. Builds on skills and knowledge gained in earlier courses, including research skills in primary and secondary sources, critical thinking, and literary analysis.
Course Descriptions

ENGL 499H
Honors Thesis
3:3:0  On Sufficient Demand
* Prerequisite(s): ENGL 498H and University Advanced Standing

Serves as the second half of the thesis experience for English Honors. Operates as an independent study. Continues the research begun in ENGL 498H. Requires students to write a high-quality, publishable/presentable senior thesis. Requires defense of the thesis and its method before a committee of three faculty.

ENGL 5340
Technical Communication Theory and Practice
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into a Graduate Program or Instructor Approval

Emphasizes the application of technical writing theory through composing a variety of documents commonly used by professionals in technical fields, which may include life sciences, engineering, and pharmacology. Builds off previous work in technical writing classes and/or industry experience to foster a rhetorical foundation for ethical and legal decision making in bureaucratic and global contexts. Stresses critical analysis of successful documents and their place within networks of relevant stakeholders; compliance expectations, and historical restraints. Places further emphasis on managing complex documents and satisfying the needs of diverse audiences. Topics may include: regulatory affairs, environmental hazards, and protocol specification.

Engineering (ENGR)

ENGR 1000
Introduction to Engineering
3:3:0  Fall, Spring
* Prerequisite(s) or Corequisite(s): MATH 1060 or higher

Introduces engineering-problem-solving techniques, design processes, modeling of simple engineering systems using CAD, and systems analysis in Excel. Emphasizes engineering design procedures by incorporating group projects and presentations. Course Lab fee of $11 for computers applies. Lab access fee of $45 for computers applies.

ENGR 1020
Survey of Engineering
1:1:0  Fall, Spring

Introduces the various areas of engineering to pre-engineering majors and others interested in learning more about the contributions engineers make to our modern society. Includes a brief history of engineering and discussions about what engineers really do. Discusses professional ethics, responsibilities, and career opportunities. Includes lectures, guest speakers, and in-class exercises. Lab access fee of $45 for computers applies.

ENGR 1030
Engineering Programming
3:3:0  Fall, Spring
* Prerequisite(s) or Corequisite(s): MATH 1210

Involves modeling and analysis of electro-mechanical systems using projects. Applies scientific principles to solve and model engineering problems. Involves developing and writing programs to gather data, guide, and control electro-mechanical devices to achieve predefined objectives. Course fee of $11 for supplies/materials applies. Lab access fee of $45 for computers applies.

ENGR 1070
Advanced Statics
3:3:0  Fall, Spring
* Prerequisite(s): PHYS 2210

Teaches principles of engineering mechanics as applied to bodies at rest. Discusses the concepts of position and force vectors, free body diagrams, equilibrium, center of gravity, centroids, distributed loading, friction, area and mass moments of inertia. Applies principles learned in the analysis of trusses, frames and machines. Lab access fee of $45 for computers applies. Canvas Course Mats $78/McGraw applies.

ENGR 2030
Engineering Dynamics
3:3:0  Fall, Spring
* Prerequisite(s): ENGR 2010, MATH 1220, and PHYS 2210

Teaches principles of engineering mechanics as applied to bodies in motion. Studies kinematics and kinetics of particles and rigid bodies. Develops the concepts of force and acceleration, work, energy, impulse, momentum, impact, and vibration. Utilizes theory and methodology developed in the solution of practical engineering problems. Lab access fee of $45 for computers applies. Canvas Course Mats of $78/McGraw applies.

ENGR 2140
Mechanics of Materials
3:3:0  Fall, Spring
* Prerequisite(s): ENGR 2010, MATH 1220, and PHYS 2210

Studies behavior of materials under axial, torsional, flexural, transverse shear and combined loading conditions. Analyzes nature of stress and strain for ductile and brittle materials, stress and strain diagrams, stress concentration, and failure of materials. Includes analysis of repeated and dynamic loading, and basic design techniques related to above topics. Lab access fee of $45 for computers applies.

ENGR 2160
Introduction to Materials Science and Engineering
3:3:0  Fall, Spring
* Prerequisite(s): CHEM 1210

Introduces students to properties of materials from macro and micro point of view. Includes failure analysis of materials, altering properties of materials, and fracture mechanics. Introduces properties of solid materials and their behavior as applied to engineering. Lab access fee of $45 applies.

ENGR 2300
Engineering Thermodynamics
3:3:0  Fall
* Prerequisite(s): MATH 1220, PHYS 2210

ENGR 2450
Computational Methods for Engineering Analysis
3:3:0  Fall, Spring
* Prerequisite(s) or Corequisite(s): MATH 2250

Discusses computational and symbolic methods for the solution of complex engineering problems. Discusses computer representation of numbers and algorithm error analysis. Covers the solution of algebraic and differential equations. Includes the use of modern software tools. Lab access fee of $45 for computers applies.

ENGR 295R
Special Topics
1 to 3:1 to 3:0  On Sufficient Demand
* Prerequisite(s): Permission of Department Chair

Presents various engineering topics. Examines current technology, techniques, processes and equipment. Includes oral and written reports. May be repeated for a maximum of 3 credits toward graduation.

Environmental Studies (ENST)

ENST 3000
Introduction to Environmental Studies
3:3:0  Fall
* Prerequisite(s): University Advanced Standing

Explores the complex relationships of culture, technology, and nature within an interdisciplinary framework of the natural sciences, social sciences, business, and humanities. Addresses the integration of humanity and nature in the age of globalization.

ENST 3520 (Cross-listed with: SOC 3520)
Environmental Sociology
3:3:0  On Sufficient Demand
* Prerequisite(s): SOC 1010 and ENGL 2010 with a C+ grade or higher and University Advanced Standing

Explores in detail several different approaches to understanding the social causes of and solutions to environmental degradation. Discusses the development of a wide variety of theory-based critiques of various social institutions (e.g., economic, political, religious) and how these institutions’ values can create and perpetuate unsustainable practices.
Entrepreneurship (ENTR)

ENTR 2500
Creativity and Entrepreneurial Thinking
3:3:0  Fall, Spring, Summer
Introduces the concepts of innovation and entrepreneurial creativity. Draws upon the inspired thinking and entrepreneurial pursuits of leaders in a variety of disciplines in order to understand the process of innovation and appreciate the role of creativity in making innovation possible. Includes topics such as the customer/problem/solution framework, design thinking, prototyping, intellectual property, creative idea development, lead user research methodology, peer feedback, new venture financing, and the lean start-up.

ENTR 3170
Entrepreneurship
3:3:0  Fall, Spring, Summer
* Prerequisite(s): (ENGL 1010 or ENGH 1005) and University Advanced Standing
Provides an overview of the practice of entrepreneurship and focuses on the role of the entrepreneur in identifying, evaluating and developing opportunities. Considers the application of knowledge of the technical, market, financial and human aspects of a business as they relate to the start-up and development of business opportunities. Lab access fee of $30 for computers applies.

ENTR 3180
Developing Small Business
3:3:0  Fall, Spring
* Prerequisite(s): (ENGL 1010 or ENGH 1005) and University Advanced Standing
Provides a practical and theoretical foundation for managing SMEs (small and medium enterprises). Emphasizes identifying, evaluating and developing opportunities for growth. Covers the basic elements of the business focusing on best practices in the technical, market, financial, and human resource aspects of existing small business as well as the interaction between these elements. Covers legal aspects of operating a business.

ENTR 3190
Early-stage Financing
3:3:0  Fall
* Prerequisite(s): University Advanced Standing
Provides non-business students an overview of financial modeling for entrepreneurship and small business, as well as the sources and processes involved in financing new ventures. Course teaches financial management, proforma financial statements, cash flow, bootstrapping, and debt and equity financing in an entrepreneurial environment.

ENTR 3220
Entrepreneurship Law
3:3:0  Fall
* Prerequisite(s): (ENGL 1010 or ENGH 1005) and University Advanced Standing
For entrepreneurship students and others desiring a to start a business. Presents current U.S. legal framework as they concern start-ups and new businesses. Topics include the American legal system, constitutional law, statutory law, common law, and administrative law and alternatives to courts. Discusses crimes, torts, negligence, contracts, negotiable instruments, and contractual relationships.

ENTR 4200
Innovative Opportunity Development
3:3:0  Fall, Spring
* Prerequisite(s): ENTR 3170 and University Advanced Standing
Focuses on the development of both (a) the key value proposition of a product/service offering, and (b) the business entity that provides that offering. Covers the use of client-centered development and design thinking to create, modify and validate business solutions. Emphasizes client feedback from concept through prototype development. Lab access fee of $30 for computers applies.

ENTR 4210
Career Development for Entrepreneurs
3:3:0  Spring
* Prerequisite(s): ENTR 3170 and University Advanced Standing
Considers the personal and interpersonal development of entrepreneurs and other business professionals. Addresses issues and provides specific guidance in areas such as business and personal financial strategies, networking, human resource management, and professional self-image.

ENTR 4300
The Art of the Pitch
3:3:0  Spring
* Prerequisite(s): ENTR 2500 or ENTR 3170 and University Advanced Standing
Teaches entrepreneurial strategic communications skills to help the entrepreneur prepare for and present business ideas to prospective investors, partners, employees and customers. Focuses on skill development in written, visual, verbal and vocal communications to pitch business ideas. Develops confidence and the ability to handle questions regarding presentations. May be delivered hybrid. Lab access fee of $30 for computers applies.

ENTR 4455
New Venture Consulting
3:3:0  Fall
* Prerequisite(s): ENTR 3190 with B- or better and University Advanced Standing
Integrates the identification, evaluation, and/or development of the small- and medium-sized business opportunities of community-based entrepreneurs. Makes use of an engaged learning opportunity for business students interested in learning how consultants work by consulting with and assisting entrepreneurs. Includes projects that cover and examine all functional areas of business and the interaction between them. Covers consulting processes and strategies as well as provide tools and techniques for developing business models and assessing opportunities.

ENTR 4500
Venture Capitalist Skills
3:3:0  Fall
* Prerequisite(s): ENTR 3190 with B- or better and University Advanced Standing
Develops an in-depth knowledge about the capital raising process. Applies principles of valuation and selection routines for choosing portfolio firms. Assesses candidate startups with quantitative techniques for evaluating firm performance. Teaches analysis of and practices negotiation with other firms on the major aspects of term sheets. Prepares students to create net-positive deals out of competing term sheets that have been submitted to the startup firm.

ENTR 493R
Entrepreneurship Lecture Series
1:1:0
* Prerequisite(s): University Advanced Standing
Presents lectures by guest speakers on current entrepreneurship issues and topics. Speakers and topics vary each semester. May apply a maximum of 3 credits toward graduation. Lab access fee of $30 for computers applies.
Course Descriptions

**Environmental Management (ENVT)**

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
<th>Terms</th>
<th>Prerequisites</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVT 1110</td>
<td>Introduction to Environmental Management</td>
<td>3:3:0</td>
<td>Fall, Spring, Summer</td>
<td></td>
<td>Surveys environmental issues and the impact of people on the environment. Covers water, air, and soil pollution. Discusses pollution prevention and remediation methods. For majors and any who have an interest in environmental issues.</td>
</tr>
<tr>
<td>ENVT 1200</td>
<td>Environmental Worker Safety</td>
<td>3:3:0</td>
<td>Fall</td>
<td></td>
<td>Discusses safety laws, training requirements, and the use of personal protective equipment. Covers management of a safety program and development of a safety culture.</td>
</tr>
<tr>
<td>ENVT 1210</td>
<td>Introduction to Water Reclamation</td>
<td>3:3:0</td>
<td>Fall Even Year</td>
<td></td>
<td>Covers the basic processes used to treat wastewater including primary treatment, biological treatment, and chemical treatment processes. Offers excellent preparation for the state license exam.</td>
</tr>
<tr>
<td>ENVT 1270</td>
<td>Environmental Microbiology</td>
<td>3:3:0</td>
<td>Spring Even Year</td>
<td>* Prerequisite(s): MICR 2060 recommended</td>
<td>For water managers, public health workers, and environmental managers. Discusses the role of microorganisms in water treatment, wastewater treatment, agriculture, environmental change, and others.</td>
</tr>
<tr>
<td>ENVT 1300</td>
<td>Environmental Lab and Sampling</td>
<td>3:2:3</td>
<td>Spring Odd Year</td>
<td></td>
<td>Studies basic laboratory techniques used by labs working on environmental projects. Covers safety, pH, dissolved oxygen, BOD, turbidity, organics, and others. Includes opportunities for undergraduate research. Course Lab fee of $38 for supplies/materials/lab applies.</td>
</tr>
<tr>
<td>ENVT 1360</td>
<td>Introduction to Water Treatment</td>
<td>3:3:0</td>
<td>Spring Odd Year</td>
<td></td>
<td>Covers coagulation, sedimentation, filtration, water sources, sampling, disinfection, and regulations. Introduces the equipment used to treat water. Discusses the prevention of disease through effective treatment.</td>
</tr>
<tr>
<td>ENVT 1510</td>
<td>Hazardous Materials Emergency Response</td>
<td>3:3:0</td>
<td>Spring</td>
<td></td>
<td>Meets the requirements for the OSHA 40 hour training. Includes personal protection, identifying hazardous materials, spill control, and incident management. Completers may obtain OSHA certification for handling hazardous materials. Course fee of $28 for materials applies.</td>
</tr>
<tr>
<td>ENVT 2560</td>
<td>Environmental Health</td>
<td>3:3:0</td>
<td>Fall, Spring</td>
<td>* Prerequisite(s): BIOL 1010 and CHEM 1110 recommended</td>
<td>Presents how environmental protection and proper sanitation can protect the public. Covers control of infectious and noninfectious diseases, safe water supplies, housing safety, radiation hazards, and air pollution.</td>
</tr>
<tr>
<td>ENVT 2710</td>
<td>Environmental Careers</td>
<td>1:1:0</td>
<td>Fall, Spring</td>
<td></td>
<td>For all students interested in environmental careers. Explores the career opportunities in environmental areas. Covers resumes, letters of inquiry, networking, and other methods of job seeking.</td>
</tr>
<tr>
<td>ENVT 2730</td>
<td>Introduction to Soils</td>
<td>4:3:2</td>
<td>Fall Odd Year</td>
<td>* Prerequisite(s): ENGL 1010 or ENGL 1005</td>
<td>An introductory course for majors and non-majors. Covers basic topics such as soil classification, soil-water relations, fertility, soil strength, and soil conservation. Offers important background information for those involved in pollution prevention and remediation, environmental monitoring, and home gardening.</td>
</tr>
<tr>
<td>ENVT 282R</td>
<td>Environmental Internship</td>
<td>1 to 5:1 to 5:0</td>
<td>Fall, Spring, Summer</td>
<td>* Prerequisite(s): Instructor permission</td>
<td>Allows students practical experience working at an environmentally related job. May be repeated for a maximum of five credits toward graduation. May be graded credit/no credit.</td>
</tr>
<tr>
<td>ENVT 3010</td>
<td>Environmental Toxicology</td>
<td>3:3:0</td>
<td>Fall Even Year</td>
<td>* Prerequisite(s): BIOL 1010 and CHEM 1110 recommended</td>
<td>For environmental managers and safety managers. Discusses safe levels of exposure, safe industrial practices and regulations. Reviews standards for toxic substances. Increases awareness of toxins commonly found on job sites.</td>
</tr>
<tr>
<td>ENVT 3280</td>
<td>Environmental Law</td>
<td>3:3:0</td>
<td>Spring</td>
<td>* Prerequisite(s): ENGL 1010 or ENGL 1005 (ENGL 2010 recommended), and University Advanced Standing</td>
<td>Covers the Clean Water Act, the Safe Drinking Water Act, and the Clean Air Act. Reviews the Toxics Substances Control Act, the Resource Conservation and Recovery Act, the Superfund law, DOT regulations, and OSHA regulations.</td>
</tr>
<tr>
<td>ENVT 3290</td>
<td>Environmental Permits and Reports</td>
<td>3:3:0</td>
<td>On Sufficient Demand</td>
<td>* Prerequisite(s): ENGL 1010 recommended</td>
<td>For students interested in becoming environmental managers. Covers the permits and reports that are required by the EPA, OSHA, state and local agencies that relate to air, water, and hazardous materials. Includes the preparation of sample permit applications and monthly operational reports.</td>
</tr>
<tr>
<td>ENVT 3320</td>
<td>Hydraulics of Water</td>
<td>3:3:0</td>
<td>Spring Even Year</td>
<td>* Prerequisite(s): MAT 1010 and University Advanced Standing</td>
<td>Prepares students to analyze the flow of water. Includes the continuity equation, Hazen-Williams formula, and the Bernoulli Theorem. Completers will be better able to interact with engineers and operate water equipment in a professional manner.</td>
</tr>
<tr>
<td>ENVT 3330</td>
<td>Water Resources Management</td>
<td>3:3:0</td>
<td>Fall Even Year</td>
<td>* Prerequisite(s): University Advanced Standing</td>
<td>Examines the broad issues that affect water quality and supply. Covers watershed management, limnology, stormwater management, and wetlands. Discusses the biological and physical processes that occur and the legal constraints that affect management decisions.</td>
</tr>
<tr>
<td>ENVT 3530</td>
<td>Environmental Management Systems</td>
<td>3:3:0</td>
<td>Spring</td>
<td>* Prerequisite(s): ENGL 1010 or ENGL 1005 (ENGL 2010 recommended), and University Advanced Standing</td>
<td>For those interested in the interaction between industry and the environment. Covers the systems and organization necessary to effectively manage environmental issues. Discusses the ISO 14000 standard and its effect upon management practices.</td>
</tr>
<tr>
<td>ENVT 3550</td>
<td>Site Investigation</td>
<td>3:3:0</td>
<td>Spring Even Year</td>
<td>* Prerequisite(s): University Advanced Standing; CHEM 1110 recommended</td>
<td>Covers the investigation and preliminary cleanup of a contaminated site. Includes planning, training, site characterization, sampling, and site control. Completers should have a basic understanding of the process used to remediate an environmentally damaged site.</td>
</tr>
<tr>
<td>ENVT 3600</td>
<td>Appropriate Technology and Sustainable Development for the Developing World</td>
<td>3:3:0</td>
<td>On Sufficient Demand</td>
<td>* Prerequisite(s): ENGL 2010 and University Advanced Standing</td>
<td>Reviews the origins of poverty and the current conditions of people in developing countries. Offers development solutions being pursued around the world. Empowers students to play an active role in international poverty reduction by introducing international development and its challenges. Teaches students how to determine appropriate technologies based on design, physical, and social considerations.</td>
</tr>
</tbody>
</table>
ENV 3630 Introduction to Geographic Information Systems
4:3:2 On Sufficient Demand
* Prerequisite(s): University Advanced Standing
Introduces the operation of Geographic Information Systems (GIS). Focuses on GIS software and basic theory of geographic information science. Offers valuable preparation for careers in geography, planning, surveying, marketing, environmental technology, biology, engineering, and other related fields. Lab access fee of $30 for computers applies.

ENV 3700 Current Topics in Environmental Management
3:3:0 Fall
* Prerequisite(s): University Advanced Standing; ENV 3280 recommended
Studies local environmental issues, new technologies, and the challenges faced by environmental managers. Issues discussed will vary with the semester. Prepares students for a thoughtful discussion of environmental issues.

ENV 3750 Land Use Planning
3:3:0 Spring Odd Year
* Prerequisite(s): University Advanced Standing; ENV 3280 recommended
Covers key issues in land use planning and how they affect the environment. Includes multiple use concepts, focused uses, zoning, mapping, and the political processes used in planning. Discusses the importance of strategic planning and public relations.

ENV 3770 Natural Resources Management
3:3:0 Fall Odd Year
* Prerequisite(s): University Advanced Standing; BIOL 1010 recommended
For students in the Environmental Management program and others interested in natural resource issues. Introduces the management and conservation of natural resources. Discusses forestry, range management, wildlife management, and outdoor recreation.

ENV 3790 Hydrology I
4:3:3 Fall
* Prerequisite(s): (MATH 1050 or MATH 1055), GEO 1010 and GEO 1015, and University Advanced Standing
Teaches how to solve textbook problems by developing skills in mathematics and understanding of hydrology. Uses hydrology to solve the real problems of real people. Requires that each student carry out a service learning project in the areas of water development, water conservation or water quality. Course fee of $21 applies.

ENV 3800 (Cross-listed with: CHEM 3800, PHYS 3800) Energy Use on Earth
3:3:0 Fall
* Prerequisite(s): (PHYS 1010 or PHSC 1000 or CHEM 1010 or GEO 1010 or GEO 2040 or METO 1010) and (MATH 1050 or MATH 1055) and University Advanced Standing
Covers the science of energy production and consumption. Quantitatively analyzes various methods of energy production, distribution, and end use in all sectors of our society, including transportation, residential living, and industry. Examines the impacts of our energy consumption on the environment and prospects for alternative energy sources. Intended for science majors interested in energy use in society or in an energy related career, and for students in other majors who feel that a technical understanding of energy use will help them to understand and mitigate its impact in our society.

ENV 3850 Environmental Policy
3:3:0 Fall
* Prerequisite(s): ENV 3790 and University Advanced Standing (recommended)
For upper-division students with an interest in environmental policy. Discusses the process by which policies are made and the factors that influence policy formation. Includes political factors, economics, international issues, public awareness and others.

ENV 4790 Hydrology II
4:3:3 Spring
* Prerequisite(s): ENV 3790 and University Advanced Standing
Continuation of ENV 3790 with an emphasis on contaminant hydrology and computer modeling. Requires students to prepare a case study in the area of contaminant hydrology. Requires that each student carry out a service learning project in the areas of water development, water conservation or water quality. Course fee of $21 applies.

ENVT 3790 (Cross-listed with: CHEM 3800, PHYS 3800) Energy Use on Earth
3:3:0 Fall
* Prerequisite(s): (PHYS 1010 or PHSC 1000 or CHEM 1010 or GEO 1010 or GEO 2040 or METO 1010) and (MATH 1050 or MATH 1055) and University Advanced Standing
Covers the science of energy production and consumption. Quantitatively analyzes various methods of energy production, distribution, and end use in all sectors of our society, including transportation, residential living, and industry. Examines the impacts of our energy consumption on the environment and prospects for alternative energy sources. Intended for science majors interested in energy use in society or in an energy related career, and for students in other majors who feel that a technical understanding of energy use will help them to understand and mitigate its impact in our society.

ENVT 3850 Environmental Policy
3:3:0 Fall
* Prerequisite(s): ENVT 3790 and University Advanced Standing
For upper-division students with an interest in environmental policy. Discusses the process by which policies are made and the factors that influence policy formation. Includes political factors, economics, international issues, public awareness and others.

Emergency Services
Emergency Care (ESEC)

ESEC 1013 Emergency Medical Response
3:2:3 Fall, Spring, Summer
Focuses on assessment and care for patients of all ages with a variety of medical conditions and traumatic injuries prior to the arrival of professional emergency care providers. Includes introduction to emergency medical services systems, roles and responsibilities of Emergency Medical Responders, anatomy and physiology, medical emergencies, trauma, and special considerations for working in the prehospital setting.

Emerg Serv Aircraft
Resc FF (ESAF)

ESAF 2100 Airport Firefighter
3:3:0 On Sufficient Demand
Explores the theories and fundamentals associated with airport rescue fire fighting. Addresses safety, operations and agents associated with aircraft rescue and firefighting procedures. Provides an overview of communications, apparatus, tools and equipment specific to the aerospace emergency service delivery.

ESAF 2110 Aircraft Related Mass Casualty Incidents
3:3:0 On Sufficient Demand
Involves the planning, response, mitigation and management of a mass casualty incident resulting from a crashed aircraft. Includes issues relating to medical treatment, triage and transportation. Examines how the command structure functions as well as how operations personnel work on the scene of mass casualty incident.

ESAF 2120 Aircraft Mishaps
3:3:0 On Sufficient Demand
Teaches how to locate and use past aircraft accident and mishap data from various government agencies in order to develop relevant lesson plans and training courses for emergency responders. Examines how to research and interpret aircraft mishap data to strengthen emergency service agencies involved in aircraft rescue firefighting. Includes developing or reviewing relevant guidelines, protocols, procedures, and training evolutions based on current mishaps and findings.

ESAF 2140 Airport Operations for the Emergency Responder
3:3:0 On Sufficient Demand
Provides an understanding of ground operations, communications, layout, movements and functions in order to operate effectively within the boundaries of an airport. Discusses the complex, unfamiliar setting responders face associated with daily operations of an airport.

<th>Notes</th>
</tr>
</thead>
<tbody>
<tr>
<td>ESEC 1140</td>
<td>Emergency Medical Technician Basic</td>
<td>Fall, Spring, Summer</td>
<td>Prepares students for certification as an EMT-Basic through the Utah Bureau of EMS. Includes CPR, automatic defibrillation, patient assessment and treatment, legal issues, airway support, medical and trauma emergencies, emergency childbirth, pediatric emergencies and patient movement/transport. Course fee of $233 applies.</td>
</tr>
<tr>
<td>ESEC 114A</td>
<td>Emergency Medical Technician-Part I</td>
<td>3:3:0 Fall, Spring, Summer</td>
<td>Applies fundamental knowledge of the EMS system, safety and well-being of the EMT, medical and legal and ethical issues to the provision of emergency care. Prepares students for certification as an EMT-Basic through the Utah Bureau of EMS. First of three courses required for EMT-Basic certification. May be delivered online.</td>
</tr>
<tr>
<td>ESEC 114B</td>
<td>Emergency Medical Technician-Part II</td>
<td>4:4:0 Fall, Spring, Summer</td>
<td>Provides background information and knowledge about EMT kinesthetic skills, including medical assessments, trauma assessment, pharmacology, special patient populations, and EMS operations.</td>
</tr>
<tr>
<td>ESEC 114C</td>
<td>Emergency Medical Technician-Part III</td>
<td>2:0:8 Fall, Spring, Summer</td>
<td>Demonstrates mastery of kinesthetic skills, including medical assessments, trauma assessment, pharmacology, special patient populations, and EMS operations.</td>
</tr>
<tr>
<td>ESEC 3060</td>
<td>Emergency Medical Technician-Advanced</td>
<td>9:7:6 Fall, Spring</td>
<td>Prepares students for certification as an EMT-Advanced through the Utah Bureau of EMS. Includes Life span development, advanced airway management, intravenous access, medication administration, cardiac rhythm interpretation and other advanced medical skills. Course lab fee of $87 for supplies applies. Course fee of $117 for certification materials applies.</td>
</tr>
<tr>
<td>ESEC 3210</td>
<td>Paramedic I-Operations</td>
<td>3:3:0 Fall, Spring, Summer</td>
<td>Reinforces concepts and clinical skills previously learned at the EMT level. Introduces advanced concepts in EMS Systems, illness and injury prevention, medical-legal issues, anatomy, physiology, pathophysiology, scene leadership and incident management for the paramedic. Course fee of $385 applies.</td>
</tr>

</table>
Course Descriptions

ESEC 4150
Critical Care Emergency Medical Transport Program
6:4:6 On Sufficient Demand
* Prerequisite(s): Department Approval and University Advanced Standing

Brings paramedics and nurses together in an effort to bridge the gap between pre-hospital and hospital care. Prepares specialized care providers to have an understanding of both aspects of patient care, and to use that understanding to provide a higher level of care to critical patients during transport. Designed to prepare paramedics and nurses to function as members of a critical care transport team. Offers an understanding of the special needs of critical patients during transport, become familiar with the purpose and mechanisms of hospital procedures and equipment, and develop the skills to maintain the stability of hospital equipment and procedures during transport.

ESEC 4210
Paramedic VI-Research
2:2:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
  * Prerequisite(s) or Corequisite(s): ESEC 3240, ESEC 3245

Provides opportunity to apply previously learned knowledge and skills in on-line scenario activities, research current EMS trends, as well as recognition assignments for clinical site preceptors.

ESEC 4220
Paramedic VII-Clinical Internship Hospital and Field Phase I and II
4:0:12 Fall, Spring, Summer
  * Prerequisite(s): ESEC 3250, ESEC 3255 and University Advanced Standing

Provides the paramedic student with an opportunity to apply previously learned knowledge and skills while in a supervised clinical setting. Rotations include: Emergency Departments, Medical/Surgical Intensive Care Units, Labor and Delivery, Psychiatric, and Prehospital experiences with field-based internships. Course fee of $57 applies. Course lab fee of $18 applies.

ESEC 4230
Paramedic VIII-Practical Preparation and Testing
3:3:0 Fall, Spring, Summer
  * Prerequisite(s): ESEC 3210, ESEC 3220, ESEC 3225, ESEC 3230, ESEC 3235, ESEC 3240, ESEC 3245, ESEC 3250, ESEC 3255, and University Advanced Standing
  * Prerequisite(s) or Corequisite(s): ESEC 4210, ESEC 4220

Provides practical and small group lecture activities using current assessment and treatment techniques for cardiac, multiple system trauma, medical, and pediatric victims. Reinforces patient priority assessment and management concepts needed for successful patient outcomes. National Registry psychomotor preparation and testing included. Course fee of $139 applies.

ESEC 4240
Paramedic Capstone
3:0:9 Fall, Spring, Summer
  * Prerequisite(s): ESEC 3210, ESEC 3220, ESEC 3225, ESEC 3230, ESEC 3235, ESEC 3240, ESEC 3245, ESEC 3250, ESEC 3255, and University Advanced Standing
  * Prerequisite(s) or Corequisite(s): ESEC 4210, ESEC 4220, ESEC 4230

Provides opportunity to practice as a paramedic providing pre-hospital care for emergent and non-emergent patients. Integrates knowledge, behavior and skills from previous courses, labs and internships. Prepares students for national certification exam.

Emergency Services (ES)

ES 1150
Community Emergency Preparedness
3:3:0 Fall, Spring, Summer
Examines emergency and crisis preparedness for the individual, family, and community as practiced at the state, national and international levels. Explores prevention and disaster recovery strategies against all hazards threats to home, neighborhood and community whether natural or human caused. May be delivered online. Course fee of $51 for equipment/supplies applies.

ES 1160
Responders Role in Emergencies and Disasters
3:3:0 On Sufficient Demand
  * Prerequisite(s) or Corequisite(s): (ENGL 1010 or ENGH 1005) or department permission

Prepares emergency services students to respond effectively in both day-to-day emergency circumstances as well as extreme disasters. Examines the theory and skills to effectively handle emergency operations and deal with people in the context of emergencies. This course will be offered as a hybrid or online course.

ES 1170
Citizen Role in Emergencies and Disasters
3:3:0 On Sufficient Demand
  * Prerequisite(s): ENGL 1010 or ENGH 1005 recommended

Designed for students of emergency management and volunteer private agencies. Discusses disaster preparedness, planning, and mitigation. Extends the discussion of the public role in emergencies and disasters to disaster response and recovery. Describes the variety of actions taken by individuals, private and voluntary organizations, first responders, and government agencies in response to a disaster and to assist in recovery.

ES 2130
Terrorism and the Emergency Services
3:3:0 Fall, Spring, Summer
  * Prerequisite(s): ENGL 1010 or ENGH 1005

Deals with the threats associated with terrorism as they relate to emergency service response. Examines past acts of terror along with present and future threats and their connection to emergency services planning and response. Identifies various aspects of security and control in correlation to the emergency response operations.

ES 2210
Community Mitigation Response and Recovery
3:0:0 On Sufficient Demand
  * Prerequisite(s): ENGL1010 recommended

Provides an introduction to emergency management for community members, emergency service volunteers, and future disaster relief workers. Prepares them with the knowledge and the skills to allow them to work in emergency services in government or non-profit agencies. Introduces emergency management principles, doctrines and authorities, emergency management functions and capabilities, and the integrated emergency management system. Addresses the coordination of various systems, networks, and agreements among various governmental and other organizations under the National Incident Management System (NIMS).

ES 2220
Resiliency and Vulnerability in Crises
3:3:0 On Sufficient Demand
  * Prerequisite(s): ENGL 1010 or ENGH 1005 recommended

Expands the knowledge of disasters so that students of emergency management, volunteers, and community members understand the nature of multiple hazards, both man-made and natural, and are aware of their impact on vulnerable populations. Presents risk management tools to assist in mitigating, planning and preparing for disasters.

ES 2230
Non-profit Organizations and Volunteerism
3:3:0 On Sufficient Demand
  * Prerequisite(s): ENGL1010 recommended

Improves participant abilities to deal with a broad range of issues in the management of volunteers. Covers publicity and recruitment, skill development and maintenance, and motivation strategies to promote continued involvement and quality performance. Addresses the planning and operations of an effective donations management system, and explores the coordination of state and local government and representatives of Voluntary Organizations Active in Disaster (VOAD) when working with undesignated and spontaneous volunteers during a disaster.

ES 290R
Special Topics in Emergency Services
1 to 3:1 to 3:0 On Sufficient Demand

Provides students the opportunity to study special topics in emergency services. Requires students to identify emergency service topics and evaluate their application to emergency services. Calls for the creation of a research paper, presentation, academic report, or a significant project. May be repeated for a maximum of 6 credits toward graduation.
Emergency Services Firefighting (ESFF)

ESFF 1000 Introduction to Emergency Services and Ability Testing
4:4:0 Fall, Spring, Summer
Explores career opportunities and job requirements of fire and rescue emergency services. Discusses the various duties within emergency services, including structural fire fighting, wildland firefighting, technical rescue, hazardous materials control, fire protection, fire investigations, and incident command. Explains the employment testing and selection processes of federal, state, municipal, and industrial emergency service organizations. Develops basic emergency skills in hazard recognition, response organization, and fire extinguisher use. Course fee of $30 for computers applies.

ESFF 100A Introduction to Emergency Services
3:3:0 On Sufficient Demand
Explores career opportunities and job requirements of fire and rescue emergencies. Discusses the various duties within emergency services, including structural fire fighting, wildland firefighting, technical rescue, hazardous materials control, fire protection, fire investigations, and incident command. Explains the employment testing and selection processes of federal, state, municipal, and industrial emergency service organizations. Develops basic emergency skills in hazard recognition, response organization, and fire extinguisher use.

ESFF 100B Firefighter Physical Ability Testing
1:1:0 On Sufficient Demand
Provides aspiring firefighters with information needed to pass various physical ability tests. Explores the background and development of tests, including the role the Candidate Physical Ability Test plays in the Wellness Fitness Initiative. Outlines principles of designing and implementing an effective training program.

ESFF 1010 Firefighting Fundamentals I
3:3:0 On Sufficient Demand
* Corequisite(s): ESFF 1210
Discusses the history and background of the fire service. Teaches terms, definitions, and concepts of NFPA 1001 Professional Qualifications for Firefighters Level I. Includes fire behavior, ventilation rescue, forcible entry, ladders, ropes and knots, self-contained breathing apparatus, firestreams, fire hose, salvage, overhaul, fire suppression techniques, communications, fire sprinklers, and fire inspection. Course fee of $20 for state services & testing applies.

ESFF 1120 Principles of Fire and Emergency Services Safety and Survival
3:3:0 Fall, Spring, Summer
Introduces the basic principles and history related to the national firefighter life safety initiatives. Focuses on the need for cultural and behavior change throughout the emergency services.

ESFF 1210 Firefighting Skills I
4:0:12 On Sufficient Demand
* Corequisite(s): ESFF 1010
Teaches basic manipulative skills according to NFPA 1001 Firefighter Professional Standards, Level I. Includes using forcible entry tools, using self-contained breathing apparatus, tying knots and using ropes, handling salvage covers, utilizing hose nozzles and appliances, manipulating ladders, ventilation practices, search for and removal of victims, sprinkler operations, initiating emergency response, and safety procedures. Students are required to furnish their own approved firefighters safety clothing as follows: gloves, boots, helmet, and hood. Course fee of $95 for specialized clothing and materials applies.

ESFF 1220 Firefighting Fundamentals and Skills II
3:1:6 On Sufficient Demand
* Prerequisite(s): ESFF 1010 or Departmental approval
Teaches intermediate skills as described in NFPA 1001 Level II. Builds upon the basic skills taught in ESFF 1010 and introduces new skills and knowledge in water supplies, portable extinguisher practices, inspection techniques, and rescue operations. Course fee of $100 for specialized clothing and materials applies.

ESFF 1340 Hazardous Materials First Responder
3:3:0 On Sufficient Demand
* Prerequisite(s) or Corequisite(s): ESFF 1000 or Departmental approval
For first year Fire Science students. Addresses the Hazardous Materials First Responder requirements of NFPA 472 and 29 CFR 1910.120. Includes definitions and classes of hazardous materials; physiological and toxicological considerations; DOT, UN and NFPA 704 labeling and placarding systems; container types and container identification. Completers should be able to conduct an incident size-up using the North American Emergency Response Guide, use personal protective equipment and conduct a decontamination procedure. Completers should be prepared to certify at both the Hazardous Materials Awareness and Operations levels. Course fee of $119 for materials, state services & testing applies.

ESFF 1360 Recruit Candidate Academy Internship
3:3:0 Fall, Spring, Summer
* Prerequisite(s): ESFF 1330, ESFF 1340, instructor's recommendation, and internship coordinator's approval.
For students who have completed the Recruit Candidate Academy courses and desire an opportunity to apply the knowledge, skills, and abilities learned in a realistic environment. Student interns will experience the fire service as a fully integrated member of a fire company in a career fire department. Additionally, the internship will emphasize the student's work ethic, attitude, and ability to adapt to highly stressful and sometimes dangerous situations. May be graded credit/no credit. Course lab fee of $200 for specialized clothing and materials applies.

ESFF 1370 Fundamentals of Apparatus Operation
3:3:0 On Sufficient Demand
Provides basic information on driving and operating a variety of fire apparatus by meeting the knowledge requirements as listed in NFPA 1000 Professional Qualifications for Fire Apparatus Driver Operator. Includes fire pump operation, emergency driving techniques, regulations and laws, fire ground operations, apparatus maintenance and testing procedures.

ESFF 1380 Fire Apparatus Skill
3:0:9 On Sufficient Demand
* Prerequisite(s): ESFF 1220 or ESFF 1330
Teaches manipulative skills as described in Firefighter Professional Qualification Standard NFPA 1002. Includes fire apparatus operation, defensive driving, emergency driving techniques, and equipment care and maintenance. Emphasizes hands-on lab activities. Course fee of $55 for transportation, state services & testing applies.

ESFF 2100 Introduction to Emergency Services Leadership
3:3:0 Fall, Spring, Summer
* Prerequisite(s): ENGL 1010 or ENGH 1005
Explores the aspiring and current emergency services learner's desire to serve and relates it to the theoretical constructs and characteristics of servant leadership. Discusses the roles and responsibilities of leadership/followership, internal and external, associated with the emergency services. Develops basic leadership/followership traits, based upon the theory of servant leadership.

ESFF 2410 Hazardous Materials Technician Fundamentals
3:3:0 On Sufficient Demand
* Prerequisite(s): ESFF 1340
Teaches the knowledge requirements of NFPA 471, 472, and CFR 1910.120 regulation for a Hazardous Materials Technician. Includes emergency response plans, classification of materials, ICS roles, personnel protective equipment needs, masks, containment and confinement concepts, decon requirements, termination concepts, toxicological and chemical terms and definitions.

ESFF 2420 Hazardous Materials Technician Skills
2:0:6 On Sufficient Demand
* Prerequisite(s): ESFF 2410
Presents the manipulative skill requirements of NFPA 471, 472, and CFR 1910.120 regulation for a Hazardous Materials Technician. Teaches handling simulated incidents, classifying materials, performing in ICS roles, using personnel protective equipment, containment and confinement operations, setting up and operating decon, diking, plugging, and patching operations. Course fee of $55 for specialized clothing, state services & testing applies.
ESFF 2430
Hazardous Materials Chemistry
3:2:3 On Sufficient Demand
Presents in-depth chemical information for hazardous materials responders. Teaches basic knowledge of how to evaluate potential hazards and behaviors of hazardous materials. Provides the underlying reasons for chemical reactions of hazardous materials. Includes decision-making abilities, safe operations, and handling. Course fee of $40 for specialized clothing, materials, and applications.

ESFF 250A
Firefighter Recruit Candidate Academy I
8:6:6 Fall, Spring
* Prerequisite(s): Matriculated into the Recruit Candidate Academy or Department approval
Addresses the first part of the cognitive and psychomotor requirements of Firefighter I and Firefighter II certification. Includes basic firefighting topics and related skills, including fire behavior, building construction, personal protective equipment, tools, appliances, firefighter safety, forcible entry, and apparatus. Prepares students to certify at the Fire Fighter I and Fire Fighter II levels.

ESFF 250B
Firefighter Recruit Candidate Academy II
8:6:6 Fall, Spring
* Prerequisite(s): Matriculated into the Recruit Candidate Academy or Department approval
Addresses the second part of the cognitive and psychomotor requirements of Firefighter I, Firefighter II, and Hazardous Materials Awareness and Operations certification. Includes basic firefighting topics and related skills. Addresses the Hazardous Materials First Responder requirements of NFPA 472 and 29 CFR 1910.120. Includes definitions, classes of hazardous materials, physiological and toxicological considerations, and labeling and placarding systems. Prepares students to certify at the Fire Fighter I, Fire Fighter II, and Hazardous Materials Awareness and Operations levels.

ESFF 2700
Technical Rescue Principles
3:2:3 On Sufficient Demand
For those with limited fire and emergency services training. Addresses the prerequisite knowledge and skills for technical rescue job performance. Applies the Incident Command System to the management of technical rescue operations, resources and hazards. Includes search and rescue techniques, victim care and extrication, and the use of ropes and rigging. Course fee of $70 for equipment, materials applies.

ESFF 2710
Environmental Rescue
3:2:3 On Sufficient Demand
* Prerequisite(s): ESFF 1220
Includes analysis and simulation of problems such as wilderness search and rescue, still and swift water rescue, avalanche and mountain rescue. Discusses disaster planning and management as well as rescues from the work place and industrial settings. Course fee of $70 for specialized clothing, materials, and transportation applies.

ESFF 2730
Rope Rescue
3:2:3 On Sufficient Demand
* Prerequisite(s): ESFF 1330 and ESFF 1340; or departmental approval
Designed to meet the rope rescue job performance requirements of NFPA 1006, Standard for Rescue Technician Professional Qualifications. Addresses various types and configurations of rope rescue systems. Includes compound mechanical advantage systems, rescue suspension systems, high-angle and vertical victim rescue systems, construction and operation of highline systems, and ascent/decent procedures. Course fee of $70 for equipment, materials applies.

ESFF 281R
Emergency Services Internship
1 to 8:1 to 8:0 Fall, Spring, Summer
* Prerequisite(s): ESFF 1000 or sufficient emergency services work experience, or instructor approval.
Designed for Emergency Services majors. Provides paid, on-the-job work experience. Work experience and the correlated class are coordinated by the Coordinator and director who must approve enrollment. Includes student, employer, and coordinator evaluations, on-site work visits, written assignments, and oral presentations. Gives experience in writing and completing individualized work objectives that improve present work performance. May be repeated for a maximum of 8 credits towards graduation. May be graded credit/no credit.

Emergency Services
Fire Officer (ESFO)

ESFO 1100
Fire Behavior and Combustion
3:3:0 Fall
Explores the theories and fundamentals of how and why fires start, spread and how they are controlled. Addresses the fire problem in America, background of research, and how to approach the study of fire. Provides an overview of various flames, smoldering, and spontaneous combustion.

ESFO 1110
Fire Prevention
3:3:0 Fall
Provides fundamental information regarding the history and philosophy of fire prevention. Introduces the organization and operation of a fire prevention bureau. Covers the use of fire codes, identification and correction of fire hazards. Discusses the relationships of fire prevention with built-in fire protection systems, fire investigation, and fire and life-safety education.

ESFO 1350
Fire Protection Hydraulics and Water Supply
3:3:0 On Sufficient Demand
Introduces basic mathematical operations, including fractions, decimals, percentages, measurements, statistics, graphs, formulas and equations. Completers should be able to apply mathematical skills in solving basic fire service hydraulic and water supply problems.

ESFO 2020
Incident Command
3:3:0 On Sufficient Demand
* Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.
Presents the basic principles of managing an emergency scene through the utilization of an incident command system for simple single unit, to complex multi unit response. Requires use of personnel, equipment, and additional resources to manage an incident by completing a size-up, analyze, develop and implement an action plan, maintain on scene accountability of personnel and resources by following IMS principles. Meets the incident command requirements for Fire Officer I, Fire Officer II, NFPA 1021, Presidential Directive #5, and NIMS compliance.

ESFO 2030
Fire Inspector I
3:3:0 On Sufficient Demand
* Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.
For Fire Science and Building Inspection Technology students. Addresses the principles of fire inspection and application of the International Fire Code. Topics include identification of fire hazards, fire prevention measures, inspection techniques, and pre-fire planning. Includes classroom discussion and actual inspections of both under-construction and occupied buildings. Successful completers should be prepared to attain Fire Inspector I certification. Course fee of $80 for state services & testing, materials applies.

ESFO 2050
Fire Protection and Detection Systems
3:3:0 Spring
* Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.
Teaches students to become familiar with the various types of fire protection and detection systems. Explains how each type of system functions, where such systems are required by code and how the various systems are serviced and maintained. Course fee of $17 for materials applies.

ESFO 2080
Building Construction for the Fire Services
3:3:0 Spring
* Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.
For second year Fire Science students. Explores components of building construction that relate to fire and life safety. Explains construction and design factors to be considered during fire inspections, pre-fire planning and fire fighting operations. Emphasis is placed on firefighter safety.

ESFO 2100
Fire Officer I Supervision and Leadership
3:3:0 On Sufficient Demand
* Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.
For second year Fire Science students and experienced firefighters. Addresses the NFPA requirements for Fire Officer I. Discusses human resource management, community and government relations, application of fire department policies, fire investigation procedures, emergency service delivery and safety considerations. Completers should be prepared to certify as Fire Officer I. Course fee of $40 for state services & testing applies.
Course Descriptions

ESFO 2110
Fire Instructor I and II
3:3:0 * Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.

Teaches the NFPA 1041 requirements for Instructor I and II. Includes job factors that influence teaching, developing behavior objectives and lesson plans, organizing the learning environment, methods of instruction, training aids, and principles of testing and evaluations. Lab activities include classroom presentations, preparing audiovisuals, and developing objectives. Course fee of $83 for state services & testing, materials applies.

ESFO 211A
Fire Service Instructor I
1:1:0 * Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.

For second year Fire Science students. Addresses the knowledge and skills required to deliver a training lesson from a prepared outline and instructor's guide. Includes psychology of learning, instructional techniques, instructional media, evaluation techniques, and legal considerations. Completers should be prepared to instruct a fire service audience and certify as Fire Service Instructor I. Course fee of $43 for state services & testing, materials applies.

ESFO 211B
Fire Service Instructor II
2:2:0 * Prerequisite(s): ESFO 211A or Departmental Permission

For those who have already completed ESFO 211A or attained Fire Service Instructor I certification. Explores job factors that influence teaching, developing behavior objectives and lesson plans, organizing the learning environment, methods of instruction, training aids, and principles of testing and evaluations. Completers should be able to prepare and conduct classroom presentations, prepare audiovisual materials and equipment, and be prepared to certify as Fire Service Instructor II. Course fee of $40 for state services & testing applies.

ESFO 2200
Fire Officer II
3:3:0 * Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.

Addresses the administrative skills and abilities required for Fire Officer II certification. Includes occupational health and safety concepts, injury prevention, risk management, application of departmental policies and procedures, preparation of budget requests, preparation of news releases, and preparation and maintenance of departmental records and reports.

ESFO 2310
Fire Investigator I
3:3:0 * Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.

Presents basic requirements for fire investigators as found in NFPA 1033. Includes scene examination, documenting the scene, evidence collection and preservation, interviewing techniques, post incident investigation and presenting investigation findings.

ESFO 2320
Fire Investigator II
3:3:0 * Prerequisite(s): ESFO 2310 or Departmental Approval

Presents advanced skills for fire investigators. Explores all aspects of the investigative process, scene documentation, advance collection tools and evidence preservation, advanced investigative techniques, case preparation, presenting findings in a legal/court proceeding.

ESFO 2330
Public Fire Education I
2:2:0 * Prerequisite(s): ESFF 1000 or sufficient emergency services work experiences.

Teaches professional qualifications of NFPA 1035. Identifies fire risks and problems in a community. Teaches selecting, designing, and implementing fire prevention and education programs.

ESFO 2400
Fire Officer Work Experience
3:3:0 * Prerequisite(s): ESFO 2020 and ESFO 2200

Provides an opportunity for students to complete the Fire Officer II work place performance requirements of NFPA 1021, Standard for Fire Officer Professional Qualifications. Under the supervision of an experienced fire officer, requires meeting performance objectives in areas of human resource management, community relations, governmental relations, inspection procedures, investigation procedures, emergency service operations, emergency services planning and personnel safety procedures, through a non-paid work experience.

ESLF 0820
Beginning Reading and Writing Level I
5:5:0 Fall, Spring, Summer * Prerequisite(s): Department Approval

For beginning ESL students, with little or no previous English experience. Teaches basic reading, writing, spelling, listening, and speaking skills. Explores vocabulary, sentence structure, paragraph writing, and basic reading comprehension. Includes weekly use of the ELL computer lab to practice reading and writing skills.

ESLF 0821
Beginning Reading Level I
4:4:0 Fall, Spring, Summer

For students whose native language is other than English. Focuses on reading skills, specifically essential phonetic skills needed to decode English words and sounds. Studies comprehension of main ideas of short academic texts, examines plots from simple novels, and develops acquisition of basic interpersonal vocabulary though context cues and English dictionary usage. Encourages reading for pleasure and for information.

ESLF 0825
Beginning Vocabulary Level I
4:4:0 Fall, Spring, Summer * Prerequisite(s): Department Approval

For beginning ESL students, with little or no previous English experience. Teaches a 1000-word vocabulary necessary for English survival. Explores vocabulary in context around relevant themes, focusing on communicative practice.

ESLF 0830
Beginning Writing Level I
5:5:0 Fall, Spring, Summer

For students whose native language is other than English. Introduces English writing conventions including idea development, organization, grammar usage, and editing. Explains construction of simple and compound sentences into short paragraphs. Includes weekly use of the ELL computer classroom where beginning writing skills are emphasized and practiced.

ESLF 0840
Beginning Grammar Level I
5:5:0 Fall, Spring, Summer * Prerequisite(s): Departmental Approval

For students whose native language is other than English with little or no English experience. Focuses on helping students recognize beginning grammar structures and correctly incorporate them into their speech and writing. Introduces correct word order, simple verb tenses, irregular and helping verbs, question formation, adverbs of frequency, pronouns and articles.

English as a Second Lang (ESL)

ESLF 0100
Basic English Language Immersion
12:12:0 Fall, Spring, Summer * Prerequisite(s): Department Approval

For beginning ESL students, with little or no previous English experience. Integrates essential language tools and skills-reading, writing, listening, speaking, and vocabulary-needed to perform basic communicative tasks. Emphasizes building a learning community within the classroom. Includes lecture, discussion, collaborative class work, and outside experience with native English speakers.

ESLF 0810
Beginning Listening/Speaking Level I
4:4:0 Fall, Spring, Summer * Prerequisite(s): Department Approval

For students whose native language is other than English with little or no previous English learning experience. Explores use of simple statements, questions, and commands. Develops vocabulary on concrete topics. Provides listening opportunities in a variety of contexts. Introduces concepts of pronunciation, intonation, and stress. Includes weekly use of the ELL Language Lab where beginning listening skills are emphasized. Focuses on communicative interaction with classmates and authentic conversation practice with native English speakers.

Course Descriptions

ESL 1310 High-Intermediate Listening/Speaking Level V
4:4:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Explores listening strategies for academic news programs and academic lectures. Emphasizes active participation in academic and social conversations. Develops ability to give academic presentations. Studies high-intermediate concepts of pronunciation, intonation, stress, and reductions. Includes weekly use of the UVU Language Lab where high-intermediate listening skills are emphasized and practiced.

ESL 1311 High-Intermediate Pronunciation Level V
1:1:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For high-intermediate ESL speakers with previous English experience. Introduces and reviews phonetic alphabet for corresponding English alphabet sounds. Focuses on pronunciation of individual sounds along with how to produce naturally sounding syllables, words, and sentences through intonation, stress, linking, and reductions.

ESL 1320 High-Intermediate Reading Level V
4:4:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Studies comprehension of main ideas and supporting details of academic texts, making inferences and expanding vocabulary through context and English dictionary usage. Encourages students to read for pleasure and increase fluency through extensive reading outside of class. Develops critical reading and thinking skills.

ESL 1330 High-Intermediate Writing Level V
5:5:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Studies high-intermediate English writing conventions including pre-writing techniques and idea development, organization of written papers according to genre expectations, and editing and revising work for grammatical accuracy. Focuses on writing 5+ paragraph essays, and letters or articles from 2-5 pages in length. Includes weekly use of the ELL computer lab where high-intermediate writing skills are emphasized and practiced.

ESL 1340 High-Intermediate Grammar Level V
5:5:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Studies high-intermediate English grammar usage in written and verbal speech. Focuses on higher level verb tenses and their related structures, use of nouns and adjective clauses, passive voice and definite/indefinite articles. Expands use of modal auxiliaries, conditionals, and verb complementation using gerunds and infinitives.

ESL 2111 Advanced Pronunciation
1:1:0 Fall, Spring, Summer
* Prerequisite(s): Departmental Approval
For advanced ESL speakers with previous English experience. Reviews International Phonetic Alphabet for corresponding English alphabet sounds. Focuses on pronunciation of individual sounds along with how to produce naturally sounding syllables, words, and sentences through intonation, stress, rhythm, linking and reductions.

ESL 211G Advanced Listening Speaking
4:4:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Studies advanced English usage, correct speech and writing forms and patterns related to tense, time, parts of speech, modifiers, clauses, phrases, conditionals, active/passive voice, and modals. Emphasizes grammatical fluency in English speech and writing. Satisfies AAS Humanities requirements.

ESL 2120 Advanced Reading Vocabulary
4:4:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Emphasizes comprehension and identification of stated main ideas and supporting details, inferences, skimming, scanning, recognizing patterns of organization and author’s purpose, interpreting literature, and using advanced level vocabulary. Includes lectures, group discussions, lab activities, and multimedia. Satisfies AA/AS Humanities requirements.

ESL 2121G Advanced Listening Speaking
4:4:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Explores American culture through an in-depth critical analysis of American fundamental values and beliefs while eliciting critical reflection upon the learners’ own native cultures. Provides a variety of speaking opportunities from informal discussions to public speaking. Emphasizes listening in advanced academic situations such as lecture note-taking and summarizing audio news excerpts. Develops academic vocabulary, increases fluency, reduces grammatical errors, and incorporates advanced features of pronunciation, stress and linking. Involves the UVU Language Lab.

ESL 2130 Advanced Composition
5:5:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For international students whose native language is other than English. Using the English language, emphasizes development of composition in essay organization, outlining, essay writing, editing and punctuation, and research paper writing. Includes lectures, small and large group activities, peer editing, and lab activities. Satisfies AAS Humanities requirements.

ESL 2140 Advanced Grammar
5:5:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval
For students whose native language is other than English. Studies advanced English usage, correct speech and writing forms and patterns related to tense, time, parts of speech, modifiers, clauses, phrases, conditionals, active/passive voice, and modals. Emphasizes grammatical fluency in English speech and writing. Satisfies AAS Humanities requirements.

ESL 2150 Academic Skills--TOEFL
5:5:0 Fall, Spring, Summer
* Prerequisite(s): ESL 1310, ESL 1320, ESL 1330, ESL 1340 and ESL Compass Test with a score of 81
Focuses on the integration of all four language skills. Prepares students to pass the TOEFL test. Provides ample opportunities to practice integrated speaking, reading, writing and listening tasks commonly encountered in academic settings.

ESL 2160 Aviation English--Advanced Listening and Speaking
3:3:0
* Prerequisite(s): Department Approval
Prepares non-native English speakers to achieve operational English language proficiency in radiotelephony communication within the field of Aviation Science. Focuses primarily on pilot-controller communication in the English language. Provides opportunities to improve speaking, pronunciation, and overall English fluency in both routine and non-routine procedures using standard aviation phraseology and plain language. Provides opportunities to improve listening and comprehension skills through authentic pilot-controller radio recordings and dialogues. Builds vocabulary in both standard phraseology and non-routine domains. Addresses communication skills in the language skill areas of pronunciation, grammatical structures, vocabulary, fluency, and comprehension.

Emergency Services Management (ESMG)

ESMG 310G Introduction to Homeland Security
3:3:0 Fall, Spring, Summer
* Prerequisite(s): ENGL 1010 or ENGH 1005 and University Advanced Standing
Introduces student to global and intercultural issues regarding homeland security at the national, regional, state and local levels. Discusses the history of homeland security, including its political history, and evolution, particularly as it relates to terrorism. Addresses demands state and local authorities must meet when dealing with national programs and requirements which affect funding and operations on the state and local level during natural or man-made disasters and emergencies.

ESMG 3150 Principles of Management for the Emergency Services
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Examines critical skills used in the management of emergency services operations. Proposes possible applications of the skills using real-life examples. Emphasizes the development process and analytical skills necessary to assess problems in the workplace and select appropriate solutions.
ESMG 3200 Health and Safety Program Management 3:3:0 Fall
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Teaches development, management, and evaluation of departmental safety programs. Includes compilation of accident and injury data from local jurisdictions. Develops programs that target safety concerns identified from research. Students will develop a plan to track effectiveness of safety programs to reduce personal injuries and property damage resulting from accidents within their department.

ESMG 3250 Managing Emergency Medical Services 3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Teaches action planning procedures for emergency incidents requiring multiple agency operations. Includes determining resources, assigning and placement of resources to mitigate incidents requiring multi-agency responses. Studies coordination of changing roles and responsibilities of fire service based EMS providers with the requirements set forth by local ordinances, state statutes, and federal laws. Presents personnel, resource management, and quality improvement techniques.

ESMG 3300 Master Planning for Public Emergency Services 3:3:0 Fall
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Prepares students for developing long-range plans, given current organization status and local resources, emphasizing the attainment of both organizational, and community needs. Teaches planning for growth and for major disasters. Integrates resources and budgets while mitigating the impacts on a community. Develops and evaluates projected training requirements.

ESMG 3350 Analytical Research Approaches to Public Emergency Services 3:3:0 Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Explores basic research designs, the use of selective analytical tools, and common issues faced by public emergency services managers. Examines tools and techniques using research methods to facilitate the decision making process in public emergency services organizations.

ESMG 3400 Critical Infrastructure Protection 3:3:0 Fall, Summer
* Prerequisite(s): ESMG 310G and University Advanced Standing
Introduces critical infrastructure and key resources (CI/KR) and explores the interdependencies between government and private industry in sustaining and protecting critical infrastructure. Provides an overview of the elements and processes to develop and sustain successful critical infrastructure partnerships and to protect critical infrastructure and key resources.

ESMG 3600 (Cross-listed with: CJ 3600) Psychology of Emergency Services 3:3:0 Fall, Spring, Summer
* Prerequisite(s): ENGL 2010 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Examines the general psychological aspects of police, fire, and emergency medical services responders including dimensions of personality, family, organizational, cultural and diversity issues. Examines models of emergency and crisis decision making. Analyzes stress, anxiety, and trauma theories and clinical issues and examines current interventions being used for related disorders and building resilience.

ESMG 3710 Comparative Approaches to Homeland Security 3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
Discusses shared terrorism threats as well as policies and strategies employed by a range of democratic countries to cope with terrorism and other homeland security-related threats. Examines issue areas such as bio-threats, health system preparedness, airport security and anti-radicalization policies across a number of countries. Reviews the practices of other countries and translates those practices into policies applicable in the United States. Prepares students to engage with their international partners at the local, state, or federal levels as Homeland Security becomes an increasingly global undertaking requiring greater international outreach.

ESMG 4000 Advanced Emergency Services Leadership 4:4:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
Explores advanced leadership topics as they relate to the first responder. Discusses leadership theories used in both emergency and non-emergency environments and develops skills necessary to lead small and large organizations under the unique atmosphere of time, pressure, and consequence. Provides an understanding of the role an emergency services leader plays in a paramilitary environment.

ESMG 4150 Humanitarian Services and Disaster Relief 3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Examines both theoretical and applied aspects of complex humanitarian emergencies and reviews disasters in the context of humanitarian relief. Explores the needs of displaced persons and the systems and practices currently in place to meet these needs. Reviews the principles of preparedness, resilience, and sustainability in terms of short-term response to disasters and long-term community recovery.

ESMG 4200 Disaster Response and the Public 3:3:0 Fall
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G or department approval
Prepares emergency services students to respond effectively to public information needs in both day-to-day emergency circumstances as well as in more extreme disaster conditions. Explores the theory and develops skills to effectively respond in crisis situations. Presents case studies in crisis response that demonstrate how information can help the public prepare, respond, and recover from disasters. This course will be offered as a hybrid or online course.

ESMG 425G Crisis and Disaster Management 3:3:0 Fall, Spring
* Prerequisite(s): ENGL 1010, ENGH 1005, ESMG 310G, or departmental permission. University Advanced Standing
Deals with the operations side of humanitarian action. Establishes principles that can be used in local, national, and international relief efforts. Applies best practices from emergency management to the field of humanitarian services and disaster relief. Meets the global and international requirements to foster greater understanding of, interaction with, and appreciation for, cultures that reflect the diversity present within the local and campus communities, up to the larger state and global context.

ESMG 4300 Disaster Recovery and Mitigation 3:3:0 Spring
* Prerequisite(s): University Advanced Standing
Focuses on how planning and policy processes and interventions can help reduce disaster vulnerabilities and increase resilience through effective recovery and mitigation strategies. Explores how demographic changes, human settlement patterns, land-use decisions, and political and social policy dynamics have increased vulnerability to natural and man-made disasters.

ESMG 4400 Legal Considerations for the Emergency Services 3:3:0 Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Examines regulatory, political, and social aspects of government’s role in emergency services agencies, including regulatory issues, emergency services operations, employment, personnel issues, roles, legislative issues, and political influence.
Course Descriptions

3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 2010
Introduces students to an emergency response approach to understanding hazards and disasters grounded in social vulnerability analysis. Examines historical, geographical, social, and cultural factors and conditions that put people differentially at risk before, during, and after disasters. Utilizes a multi-disciplinary approach. Focuses on global, national, regional, and local patterns of development. Explores how vulnerable social groups are affected by and cope with hazardous conditions and events, and strategies for community-based mitigation engaging those most at risk.

ESMG 4500 Customer Service and Marketing for the Emergency Services
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Explores the principles and importance of customer oriented service delivery within the emergency services. Looks at current practices and delves into emerging needs and solutions for marketing and public relations. Includes research and critical thinking strategies for local, national, and global perspectives on customer service.

ESMG 4550 Principles of Disaster and Emergency Management
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Introduces the student to the need for and creation of comprehensive emergency planning operations. Explores risk assessment techniques and critical analysis strategies for communities and governmental agencies. Teaches the components of a comprehensive emergency plan and presents the National Incident Management System (NIMS), mandated by presidential directive.

ESMG 4600 Public Administration for the Emergency Services
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
For Public Emergency Services Management students. Examines the relationship between the emergency management function in government and the professional field of public administration. Topics include public policy making, implementation and analysis, disaster analysis, problem solving and solution formulation.

ESMG 4650 Emergency Services Capstone
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Public Emergency Services Management capstone course. Examines cutting-edge issues under the guidance of top professionals. Includes interviews with local and state officials to identify potential critical issues. Discusses personal leadership philosophy and strategies for decision making.

ESMG 481R Emergency Services Internship
1 to 8:1 to 8:0 Fall, Spring, Summer
* Prerequisite(s): ENGL 2010, (ESFF 1000 or sufficient emergency services experience), and University Advanced Standing
For upper-division students working toward a Bachelor of Science Degree in Emergency Services Management. Provides a transition from school to work where learned theory is applied to actual practice through meaningful on-the-job experience. May be repeated for a maximum of 16 credits toward graduation. May be graded credit/no credit.

ESMG 489R Special Topics in Emergency Management
1 to 6:1 to 6:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): ESMG 310G
Provides students the opportunity to study special leadership topics in Emergency Management. Requires students to identify standard leadership topics and evaluate their application to Emergency Services. Calls for the creation of a significant research paper that is characteristic of the Emergency Leadership discipline and worthy of communication to a broader audience. May be repeated for a maximum of 5 credits toward graduation.

ESMG 491R Topics in Cardiology and Medical Trends
1 to 3:1 to 3:0 Fall
* Prerequisite(s): ENGL 2010, (ESFF 1000 or departmental approval), and University Advanced Standing
Surveys a specific topic in cardiology and medical trends related to Emergency Medicine. Topic varies each semester. May be repeated for a maximum of 6 credits toward graduation.

ESMG 492R Topics in Trauma and Pharmacology
1 to 3:1 to 3:0 Spring
* Prerequisite(s): ENGL 2010, (ESFF 1000 or departmental approval), and University Advanced Standing
Surveys a specific topic in trauma and pharmacological trends. Topic varies each semester. May be repeated for a maximum of 6 credits toward graduation.

ESMG 493R Topics in Medical Litigation
1 to 4:1 to 4:0 Summer
* Prerequisite(s): ENGL 2010, (ESFF 1000 or departmental approval), and University Advanced Standing
Surveys a specific topic in medical litigation. Topic varies each semester. May be repeated for a maximum of 4 credits toward graduation.

ESMG 6100 Psychology and the Emergency Services Responder
3:3:0
* Prerequisite(s): Acceptance into the Masters of Public Services Program
Examines the psychological impact the emergency services profession has on the responder. Explains the effects of emergency response and bureaucracy on the psyche of the responder. Identifies the need for post-traumatic growth.

ESMG 6110 Disasters/Vulnerability/and Impacts
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Masters of Public Services Program
Evaluates the impact of natural and manmade disasters locally, nationally, and internationally. Analyzes historical disaster case studies in order to examine the aggregate costs of disasters.

ESMG 6120 Emergency Planning and Response
3:3:0
* Prerequisite(s): Acceptance into the Masters of Public Services Program
Examines the need for emergency planning and response criteria associated with emergency services delivery. Teaches how to generate a community wide emergency planning and response matrix. Identifies systems thinking within an emergency framework.

ESMG 6130 Social Vulnerability in Emergencies
3:3:0
* Prerequisite(s): Acceptance into the Masters of Public Services Program
Appraises social vulnerabilities within a community. Examines the sociological aspects of emergency response. Compares sociological and economic factors to resiliency.

ESMG 6140 Homeland Security Fundamentals
3:3:0 Fall, Spring
* Prerequisite(s): Acceptance into the Masters of Public Service program
Explains the history, formation, and growth of the Department of Homeland Security (DHS) since September 11, 2001. Estimates impact homeland security has on local emergency service agencies. Appraises the current state of national and international homeland security operations. Evaluates the existing DHS structure and its ability to meet the organization's strategic mission.

Emergency Services Wildland FF (ESWF)

ESWF 1310 S131 Wildland Firefighter Type I
.5:.5:0 On Sufficient Demand
* Prerequisite(s): Departmental approval
Meets the training needs of a Type 1 Wildland Firefighter (FFT1). Presents several tactical decision scenarios designed to facilitate learning the objectives and class discussion. Introduces the student to the Fireline Handbook and provides an overview of its application.

ESWF 1330 Look Up Look Down Look Around
.5:.5:0 On Sufficient Demand
* Prerequisite(s): Meet NWCG pre-qualifications or departmental approval
Examines the wildland fire environment and the indicators firefighters should observe on the fire line in order to anticipate fire behavior.
ESWF 1400
Wildland Firefighting Fundamentals
4:3:3
Fall, Spring
Designed to meet the Wildland Firefighter I knowledge and skill requirements of NFPA 1002. Introduces the wildland fire environment. Teaches students to recognize the "true" wildland fire environment and how to use it to advantage. Includes examination of Incident Command System basics. Teaches basic fire suppression techniques and fire behavior. Labs are provided for skills development.

ESWF 1410
Wildland Firefighter Internship I
5:5:0
Summer
* Prerequisite(s): ESWF 1400 or departmental approval
Provides experience in fighting fires at wildfire and urban interface incidents. Studies wildland fire behavior, fire weather, and fire mitigation. Teaches basic incident command, communications, strategy, and tactics. Includes developing water sources, learning engine tactics, understanding procedures for aircraft, firing and felling operations. Completers should develop skills beyond the entry level firefighter. May be graded credit/no credit. Course fee of $118 for materials, specialized clothing, equipment, and application. 

ESWF 1420
Wildland Firefighter Internship II
5:5:0
Summer
* Prerequisite(s): ESWF 1410
Provides experience in fighting fires at wildfire and urban interface incidents. Studies wildland fire behavior, fire weather, and fire mitigation. Teaches basic incident command, communications, strategy, and tactics. Includes developing water sources, learning engine tactics, understanding procedures for aircraft, firing and felling operations. Completers should develop skills beyond the entry level firefighter. May be graded credit/no credit. Course fee of $118 for materials, specialized clothing, equipment, and application.

ESWF 2010
Basic Incident Command System for Initial Response
1:1:0
On Sufficient Demand
* Prerequisite(s): Meet NWCG prequalifications or departmental approval
Introduces the principles of the Incident Command System (ICS) associated with incident-related performance. Includes leadership and management, delegation of authority, management by objectives, functional areas and positions, briefings, organizational flexibility, transitions and transfers. Built upon the same lesson objectives and content as the NWCG I-200 course.

ESWF 2110
S211 Portable Pumps and Water Use
1.5:1:5:0
On Sufficient Demand
* Prerequisite(s): Departmental approval
Covers three skill areas: supply, delivery, and application of water. Includes correct water use, basic hydraulics, and equipment care. Requires set up, operation, and maintenance of pump equipment in the field exercise. Meets and/or exceeds NWCG standards for S-211.

ESWF 2150
S215 Fire Operations in the Wildland Urban Interface
2:2:0
On Sufficient Demand
* Prerequisite(s): Departmental approval
Designed to assist structure and wildland firefighters who will be making tactical decisions when confronting wildland fire that threatens life, property, and improvements in the wildland/urban interface. Includes interface awareness, size-up, initial strategy and incident action plan, structure triage, structure protection tactics, incident action plan assessment and update, follow up and public relations, and firefighter safety in the interface. Meets and/or exceeds NWCG standards for S-215.

ESWF 2301
S230 Crew Boss Single Resource
2:2:0
On Sufficient Demand
* Prerequisite(s): Departmental approval
Designed to produce proficiency in the single resource boss position from initial dispatch through demobilization to the home unit. Introduces operational leadership, preparation and mobilization, assignment preparation, risk management, entrapment avoidance, safety and tactics, offline duties, demobilization, and post incident responsibilities. Meets or exceeds requirements for NWCG S230 Crew Boss Single Resource.

ESWF 2340
Firing Operations
2:2:0
On Sufficient Demand
* Prerequisite(s): Department Approval
Introduces the roles and responsibilities of a Firing Boss, Single Resource (FIRB), and outlines duties of other personnel who may engage firing operations. Discusses and illustrates common firing devices and techniques. Demonstrates a real ignition or the use of an actual firing device. Meets or exceeds the requirements of NWCG S219 Firing Operations.

ESWF 2430
Wildland Firefighter Internship III
5:5:0
Summer
* Prerequisite(s): ESWF 1420 and departmental approval
Increases the level of leadership training and responsibility for individual firefighters. Includes work on Advanced Firefighter/Squad Boss Task book. Teaches and improves upon the following skills: firefighter safety, supervision, communication, situational awareness and other fire suppression skills needed to advance to the Squad boss level. Offers valuable experience in wildland fire suppression techniques as well as safety and organizational skills. May be graded credit/no credit.

ESWF 2600
S260 Interagency Incident Business Management
1:1:0
On Sufficient Demand
* Prerequisite(s): Meet NWCG Prequalifications or departmental approval
Studies the human resources aspect of emergency services in depth. Concentrates on the personnel issues associated with day to day emergency service organizational management. Includes topics of ethical conduct, recruitment, resources, and financial management.

ESWF 2700
S270 Basic Air Operations
1:1:0
On Sufficient Demand
* Prerequisite(s): Departmental approval
Introduces aircraft types and capabilities, aviation management and safety for flying in and working with agency aircraft, tactical and logistical uses of aircraft, and requirements for helicopter take-off and landing areas. Addresses regulations, procedures and policies that primarily govern federal agency and ICS operations. Meets and/or exceeds NWCG standards for S270 Basic Air Operations.

ESWF 2800
L280 Followership to Leadership
1:1:0
On Sufficient Demand
* Prerequisite(s): Departmental approval
Provides a self-assessment opportunity for individuals preparing to step into a leadership role. Includes leadership values and principles, transition challenges for new leaders, situational leadership, team cohesion factors, ethical decision-making, and after action review techniques. Meets or exceeds the requirements for NWCG L280 Followership to Leadership.

ESWF 2900
S290 Intermediate Wildland Fire Behavior
2:2:0
On Sufficient Demand
* Prerequisite(s): Departmental approval
Designed to prepare the prospective fireline supervisor to undertake safe and effective fire management operations. Second course in a series that collectively serves to develop fire behavior prediction knowledge and skills. Meets or exceeds the requirements of WFCG S290 Intermediate Wildland Fire Behavior.
ESWF 3000
S300 Incident Commander Extended Attack
1:1:0 On Sufficient Demand
* Prerequisite(s): Meet NWCG prequalifications or departmental approval and University Advanced Standing

Designed to meet the training needs of the Incident Commander Type 3 (ICT3). Focuses on the leadership and command as they relate to the ICT3 position. Includes multiple tactical decision games for students to practice new knowledge. Covers foundation skills, situational awareness, command and control, managing the incident, transitional activities, post-fire activities and a final simulation.

ESWF 3020
I300 Intermediate Incident Command System
1:1:0 On Sufficient Demand
* Prerequisite(s): Departmental approval and University Advanced Standing

Provides description and detail of the Incident Command System (ICS) organization and operations in supervisory roles on expanding or Type 3 incidents. Includes: ICS fundamentals review, incident/event assessment and agency guidance in establishing incident objectives, Unified Command, incident resource management, planning process, demobilization, transfer of command, and incident close out. Meets or exceeds the requirements of NWCG I300 and ICS300 Intermediate Incident Command System.

ESWF 3300
S330 Task Force Strike Team Leader
1.5:1.5:0 On Sufficient Demand
* Prerequisite(s): Meet NWCG prequalifications or departmental approval and University Advanced Standing

Teaches the application of risk management processes found in the Incident Response Pocket Guide (IRPG) to various incidents. Includes scenarios and exercises that assess the application of tactics specific to wildland fire suppression.

ESWF 3301
RX301 Prescribed Fire Implementation
2:2:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval and University Advanced Standing

Introduces the tools and techniques used to perform in the role of a Prescribed Fire Burn Boss. Describes the duties and responsibilities associated with the position of the Prescribed Fire Burn Boss including evaluation and implementation of a prescribed fire plan. Meets or exceeds the requirements of NWCG RX 301- Prescribed Fire Implementation.

ESWF 3341
RX341 Prescribed Fire Plan Preparation
2:2:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval and University Advanced Standing

Focusses on the skills/knowledge to prepare a prescribed fire plan for technical review and approval in accordance with the Interagency Prescribed Fire Planning and Implementation Procedures Guide, PMS 484. Meets or exceeds the requirements of NWCG RX-341 Prescribed Fire Plan Preparation.

ESWF 3360
S336 Tactical Decision Making in Wildland Fire
1:1:0 On Sufficient Demand
* Prerequisite(s): Departmental approval and University Advanced Standing

Meets training requirements in the Operations section of the Incident Command System. Includes examples and exercises specific to wildland fire suppression. Meets or exceeds requirements for NWCG S336 Tactical Decision Making in Wildland Fire.

ESWF 3380
L380 Fireline/Fire Service Leadership
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval and University Advanced Standing

Provides leadership development training for wildland/ fire service supervisors. Focuses on application of leadership styles and team building. Designed for incident personnel with supervisory responsibilities. Meets or exceeds the requirements of NWCG L-380 Fireline/Fire Service Leadership.

ESWF 3381
L381 Incident Leadership
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Department Approval and University Advanced Standing

Focuses on leadership development training, recommended for command-level incident response personnel who will function in an ALL-RISK environment. Provides future leaders of divisions, groups, and Type 3 incidents with the leadership tools to effectively exert command and control over a quickly assembled team in a time constrained and rapidly changing incident environment. Meets or exceeds the requirements of NWCG L-381 Incident Leadership.

ESWF 3390
S339 Division or Group Supervisor
1:1:0 On Sufficient Demand
* Prerequisite(s): Departmental approval and University Advanced Standing

Prepares students to perform in the role of division/ group supervisor. Includes division/group management, organizational interaction, division operations, and all-hazard operations. May include tactical decision games. Meets or exceeds the requirements of NWCG S-339, Division / Group Supervisor.

ESWF 4390
S390 Introduction to Wildland Fire Behavior Calculations
2:2:0 On Sufficient Demand
* Prerequisite(s): Departmental approval and University Advanced Standing

Introduces fire behavior calculations by manual methods, using nomograms and the Fire Behavior Handbook. Covers the determinants of fire behavior though studying inputs (weather, slope, fuels, and fuel moisture). Teaches how to interpret fire behavior outputs, documentation processes, and fire behavior briefing components. Meets or exceeds the requirements of NWCG S390 Introduction to Wildland Fire Behavior Calculations.

Exercise Science (EXSC)

EXSC 2500
Sport Medicine
3:3:0 Fall, Spring, Summer
* Prerequisite(s): EXSC Majors: ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), all with a C- or higher and (MATH 1050 or MATH 1055). PETE Majors: ZOOL 1090
* Prerequisite(s) or Corequisite(s): ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 2700 all with a C- or higher and (MATH 1050 or MATH 1055). PETE Majors: PETE 2700 both with a C- or higher and (MATH 1050 or MATH 1055).

Explores the field of Sports Medicine. Provides instruction on injury management, including record keeping, assessment, and steps to recovery. Teaches an understanding of different tissues' response to injury. Investigates different imaging techniques used in assessment. Examines surgical considerations for specific injuries.

EXSC 270G
Foundations of Exercise Science
3:3:0 Fall, Spring, Summer
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L) all with a C- or higher, and (MATH 1050 or MATH 1055).

Introduces the study of the Exercise Sciences and discusses the global influence on the development of the field. Studies the national and international history and philosophy of the field of Exercise and sport science. Analyzes problems in areas covered under the umbrella of Exercise Science and Physical Education. Explores related career and employment opportunities in this area.

EXSC 3270
Exercise Testing
2:2:0 Fall, Spring, Summer
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), all with a C- or higher, and (MATH 1050 or MATH 1055), and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), and EXSC 270G

Teaches key concepts related to exercise testing and program design for healthy populations and populations with controlled disease. Explores concepts in team, group, and individualized assessment and programming. Emphasizes principles in anatomy, exercise physiology, behavior modification, motivation, health promotion, fitness assessment and prescription. Encourages students to sit for certification exams upon course completion. Course fee of $20 for supplies.
**EXSC 3280**
**Exercise Prescription**

2:2:0  
**Summer**

* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing

* Prerequisite(s) or Corequisite(s): ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), and EXSC 270G

Emphasizes knowledge and skills related to safe and effective exercise prescription. Incorporates ACSM guidelines for exercise prescription based on the 5 components of health related fitness; cardiorespiratory endurance, body composition, muscle strength, muscle endurance, flexibility.

**EXSC 3400**
**Statistical Analysis in Exercise Science**

3:3:0  
**Fall, Spring, Summer**

* Prerequisite(s): (MATH 1050 or higher) and University Advanced Standing

Provides an introduction to statistics, as well as the role of statistics in experimental design that is necessary to evaluate data collected from measurements commonly used in exercise science, health, physical education and recreation.

**EXSC 3500**
**Kinesiology**

3:3:0  
**Fall, Spring, Summer**

* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), all with a C- or higher and MATH 1050 or MATH 1055. PETE Majors: ZOOL 1090 and PETE 2700 both with a C- or higher and MATH 1050 or MATH 1055. REC Majors: ZOOL 1090 and REC 2200 both with a C- or higher and STAT 1040 or STAT 1045 or MATH 1050 or MATH 1055. All: University Advanced Standing

* Prerequisite(s) or Corequisite(s): ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), and EXSC 270G

Studies human movement. Includes the structure of the human body and fundamental mechanics. Emphasizes kinesiological and mechanical analysis.

**EXSC 3550**
**Motor Learning and Control**

3:2:2  
**Fall, Spring, Summer**

* Prerequisite(s): EXSC Majors: ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), and Pre or Co-requisite all with a C- or higher and (MATH 1050 or MATH 1055). PETE Majors: ZOOL 1090 and Pre or Co-requisite PETE 2700 both with a C- or higher and (MATH 1050 or MATH 1055). REC Majors: ZOOL 1090 and Pre or Co-requisite REC 2200 both with a C- or higher and (STAT 1040 or STAT 1045 or MATH 1050 or MATH 1055). All: University Advanced Standing

* Prerequisite(s) or Corequisite(s): ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G

Examines motor and cognitive characteristics of individuals involved in learning or performing motor skills. Examines conditions that influence learning. Analyzes how humans learn complex movement skills and control voluntary, coordinated movement. Analyzes the basic psychological processes involved in learning and control of movement and their effect on instruction and practice conditions for the learner. Studies motor development and its effect on skill acquisition. Course fee of $14 applies.

**EXSC 3700 (Cross-listed with: ZOOL 3700)**
**Exercise Physiology**

3:3:0  
**Fall, Spring, Summer**

* Prerequisite(s): EXSC Majors: ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), and EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055). PETE Majors: PETE 2700 and ZOOL 1090 with a C- or higher and (MATH 1050 or MATH 1055). All: University Advanced Standing

* Prerequisite(s) or Corequisite(s): ZOOL 2420 (or 242H), ZOOL 2425 (or 242L)

Studies acute and chronic physiological responses to exercise, as well as nutritional and environmental effects on these responses. Requires separate weekly laboratory. Canvas Course Mats $78/McGraw applies.

**EXSC 3705 (Cross-listed with: ZOOL 3705)**
**Exercise Physiology Laboratory**

1:0:3  
**Fall, Spring, Summer**

* Prerequisite(s): University Advanced Standing

* Corequisite(s): EXSC 3700

Studies acute and chronic physiological responses to exercise, as well as nutritional and environmental effects on these responses. The laboratory is designed to offer the hands-on experience where students will experience the physiological responses to different stressors in the lab setting. The labs are arranged to be conducted as similar material is being discussed in class. Course Lab fee of $26 for materials applies.

**EXSC 3730**
**Biomechanics**

3:3:0  
**Fall, Spring**

* Prerequisite(s): EXSC Majors: ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), and all with a C- or higher and (MATH 1050 or MATH 1055). PETE Majors: ZOOL 1090 and Pre or Co-requisite PETE 2700 both with a C- or higher and (MATH 1050 or MATH 1055). PETE Majors: ZOOL 1090 and Pre or Co-requisite REC 2200 both with a C- or higher and (STAT 1040 or STAT 1045 or MATH 1050 or MATH 1055). All: University Advanced Standing

* Prerequisite(s) or Corequisite(s): ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G, and EXSC 3500

Emphasizes the application of engineering principles and technology in sports performance through interdisciplinary methodologies. Includes human gait analysis, locomotion, trunk biomechanics, computer modeling, and tissue biomechanics. Course fee of $20 for equipment, supplies, and lab applies.

**EXSC 3750**
**Psychosocial Aspects of Human Performance**

2:2:0  
**Fall, Spring, Summer**

* Prerequisite(s): University Advanced Standing

* Prerequisite(s) or Corequisite(s): ZOOL 1090 or ZOOL 2320 (or 232H) and ZOOL 2325 (or 232L)

Provides students with the necessary skills and understanding to adequately deal with the psychological and social aspects of human and sport performance. Develops techniques and psychological skills to enhance performance and establish a learning and social environment that would enhance the effectiveness of coaches and maximize the skill and personal growth of athletes.

**EXSC 3850**
**Ethical Concerns in Exercise Science**

3:3:0  
**Fall, Spring**

* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), and Pre or Co-requisite EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055) and University Advanced Standing

Surveys applied concepts of ethical codes and legal liability. Explores systems used by community and adventure education programs for aspects protective of participants, staff, and institutions.

**EXSC 4000**
**Clinical Exercise Physiology**

3:2:3  
**Fall, Spring, Summer**

* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G, and EXSC 3270 all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing

Emphasizes information and skills related to exercise testing and prescription in healthy and clinical populations. Teaches American College of Sports Medicine (ACSM) exercise testing guidelines.

**EXSC 4050**
**Obesity Physiology and Physical Activity**

3:3:0  
**Fall, Spring**

* Prerequisite(s): EXSC 270G and University Advanced Standing

* Prerequisite(s) or Corequisite(s): ZOOL 2420 and ZOOL 2425

Provides a broad understanding of the negative health impacts of obesity on physiology. Focuses on exercise modalities that are safe and appropriate as means to treat and ameliorate the negative health consequences of obesity.

**EXSC 4100**
**Fitness Across the Lifespan**

3:3:0  
**Fall, Spring**

* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), and Pre or Co-requisite EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing

Addresses key issues relative to fitness across the lifespan; including, fitness in youth, adult fitness, aging, physical activity program design and implementation, attrition, behavior modification, and the role of exercise in disease prevention and/or management. Canvas Course Mats of $58/Human Kinetics applies.

**EXSC 4200**
**Exercise Metabolism**

3:3:0  
**Fall, Spring**

* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), and Pre or Co-requisite EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing

Examines how exercise affects the functioning of human and animal organisms at the molecular level. Focuses on the tools of basic principles of biochemistry and teaches how to use the tools to understand how exercise affects metabolism. Studies how to use biochemical tests to assess an exercising person's health and performance.
## Course Descriptions

### EXSC 4300  
**Research Methods in Exercise Science and Outdoor Recreation**  
**3:3:0** Fall, Spring, Summer  
* Prerequisite(s): EXSC Majors: ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), and Pre or Co-requisite EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055).  
ReC Majors: ZOOL 1090 and Pre or Co-requisite REC 2200 both with a C- or higher and (STAT 1040 or STAT 1045 or MATH 1050 or MATH 1055). All: University Advanced Standing.  
Introduces students to key research in their field. Emphasizes analytical and interpretive skills. Develops scientific writing skills. Promotes design and utilization of comprehensive research methodologies commonly applied in Exercise Science and Outdoor Recreation.

### EXSC 4400  
**Physical Activity Promotion in the Community**  
**3:3:0** Fall, Spring  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
Emphasizes concepts related to physical activity promotion in the community. Critically reviews literature associated with physical activity programming in communities including barriers to physical activity participation, behavioral change theory, and social, environmental, and biological factors that influence physical activity behavior. Promotes application of concepts developed in class through introductory supervised field experience.

### EXSC 4500  
**Advanced Sports Nutrition**  
**3:3:0** Fall, Spring  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G and Pre or Co-requisite EXSC 3700 and 3705 all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
Designed to provide exercise science students a comprehensive understanding of basic nutritional principles as they relate to sports. Canvas Course Mats $57/ManK applies.

### EXSC 4550  
**Principles of Strength and Conditioning**  
**3:2:3** Fall, Spring  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G, EXSC 3500 and EXSC 3700 and EXSC 3705 all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
Emphasizes knowledge of physiological principles and training techniques used in strength and conditioning. Teaches guidelines from the National Strength and Conditioning Association (NSCA). Prepares students for several sections of the NSCA Certified Strength and Conditioning Specialist exam.

### EXSC 4600  
**Advanced Biomechanics**  
**3:3:0** Fall, Spring  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
* Prerequisite(s) or Corequisite(s): EXSC 3730  
Teaches the application of mechanical principles to the development of motor skills. Includes research and technology utilized in the field of biomechanics.

### EXSC 4700  
**Advanced Gross Motor Assessment**  
**3:3:0** Fall, Spring  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G, EXSC 2500 and EXSC 3500 all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
Provides the students with advanced instruction on and the development of knowledge, skills and abilities to be able to safely and effectively evaluate and interpret / qualify gross motor function. Includes but is not limited to surface anatomy, boney and soft tissue palpation, Range of Motion (ROM), muscular strength, neurologic enervation and stress tests of supportive structures.

### EXSC 481R  
**Internship in Exercise Science**  
**1 to 8:1 to 8:0** Fall, Spring, Summer  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
Provides students with hands-on professional experience in the field of exercise science. May be repeated for a maximum of 8 credits toward graduation. Graded credit/no credit.

### EXSC 489R  
**Undergraduate Research for Exercise Science**  
**1 to 4:0:5 to 20** Fall, Spring, Summer  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
* Prerequisite(s) or Corequisite(s): EXSC Majors: ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G, EXSC 2500 and EXSC 3500 all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
Provides students with the opportunity to conduct research under the mentorship of a faculty member. Students will put in practice the theoretical knowledge gained in prior major courses. Students will create a significant intellectual or creative product that is characteristic of the Exercise Science discipline and worthy of communication to a broader audience. May be repeated for a maximum of 8 credits toward graduation.

### EXSC 4950  
**Senior Seminar**  
**2:2:0** Fall, Spring  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
* Prerequisite(s): ENGL 1010, ENGL 101H, or ENGH 1005  
Explores the ethical and legal responsibilities of the helping professional in various types of family intervention, including counseling, education, and case management. Examines the broad scope of these ethical and legal concerns and how they are applied in a variety of settings.

## Facilities Management (FAC)

### FAC 1010  
**Survey of Facilities Management**  
**3:3:0** Fall, Spring  
* Prerequisite(s): ZOOL 2320 (or 232H), ZOOL 2325 (or 232L), ZOOL 2420 (or 242H), ZOOL 2425 (or 242L), EXSC 270G all with a C- or higher and (MATH 1050 or MATH 1055), and University Advanced Standing  
Orients Facilities Management (FAC) majors with core responsibilities in the industry. Uses case studies and theory to gain experience with problem solving and resource management.

### FAC 1020  
**Space Planning and Management**  
**3:3:0** On Sufficient Demand  
* Prerequisite(s): ENGL1010 or ENGH 1005  
Focuses on the forecasting, growth, planning, allocation, and management of occupied space. Discusses the role of the facilities manager in planning and managing growth.

## Family Science (FAMS)

### FAMS 101G  
**Contemporary Families**  
**3:3:0**  
Expands students’ awareness of variations within families due to form, culture, and other factors. Focuses on areas of kinship, family organization, traditions, interpersonal relationships, parenting practices, values and beliefs, and prejudice. Canvas Course Mats $66/McGraw applies.

### FAMS 1100  
**Life Span Development in the Family**  
**3:3:0**  
Studies issues surrounding physical, cognitive, social, and emotional development of the individual within the context of family across the lifespan. Emphasizes how the context of family influences development of the individual.

### FAMS 1150  
**Marriage and Relationship Skills**  
**3:3:0** Fall, Spring, Summer  
Guides students in building a lasting intimate relationship of their own and in understanding and teaching relationship maintenance and improvement strategies based on large-scale scientifically derived marriage and relationship principles. Utilizes cutting edge research on factors and issues related to relationship success and outcome including whom and when to marry and how to build stable and happy relationships over time. Stresses increased understanding of desirable relationship outcomes and how to achieve them.

### FAMS 2705  
**Ethics for Family Interventions**  
**3:3:0** Fall, Spring, Summer  
* Prerequisite(s): ENGL 1010, ENGL 101H, or ENGH 1005  
Explores the ethical and legal responsibilities of the helping professional in various types of family intervention, including counseling, education, and case management. Examines the broad scope of these ethical and legal concerns and how they are applied in a variety of settings.
FAMS 2800
Teaching Human Sexuality
3:3:0 Fall, Spring, Summer
* Prerequisite(s): (ENGL 1010, ENGL 101H, or ENGH 1005 with a C+ or higher)
Introduces basic concepts of human sexuality and effective methods to teach these topics to adults, adolescents, and children. Discusses gender roles, sexual orientation, sexual dysfunction, and sexually transmitted disease. Examines sexuality from the perspective of ethics, religion, the law, and education. Requires students to assess their own sexual attitudes and acquire information that should enable them to make responsible sexuality decisions. Educates students in how to teach human sexuality effectively regardless of any biases or individual beliefs. Note: Due to Utah State Laws regarding sexuality education, students registering for FAMS 2800 must be 18 years of age or a high school graduate.

FAMS 3000 (Cross-listed with: SW 3000)
Social Work Practice I
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Admission to the BSW program or declared major in Family Science and University Advanced Standing
Introduces the basic knowledge, values, and skills needed for generalist social work practice. Focuses on working with individuals using the planned change process within the strengths perspective. Assists students in understanding the social and environmental conditions that negatively affect clients and empowering clients to take steps to enhance their own well-being. Provides content on the evaluation of social work practice.

FAMS 3010 (Cross-listed with: BESC 3010)
Statistics for the Behavioral Sciences
4:4:0 Fall, Spring, Summer
* Prerequisite(s): MAT 1000 or higher and University Advanced Standing
Introduces use of statistics for research purposes. Teaches descriptive and inferential statistics. Includes central tendency, variability, correlation and regression, probability (particularly probability distributions), and various inferential techniques such as t-test for independent and dependent samples, one-way and two-way analysis of variance, post-hoc tests, and non-parametric statistics. May be delivered hybrid and/or online.

FAMS 3020
Research Methods for Family Science
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
Surveys the most common research designs in the social sciences. Highlights experiments, quasi-experiments, correlational designs, survey research, single case, and the philosophy of qualitative methods. Includes the design of a study, original data collection, data analysis, presentation of results.

FAMS 3100
Career and Graduate School Preparation
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing
Focuses on the development of skills necessary to prepare for employment and/or graduate school in the field of family studies. Includes individual writing, cover letters, basic interview skills, preparation of application packages, and networking skills used with school and community resources to find employment and/or graduate school opportunities.

FAMS 3250
Applied Parenting
3:3:0 Fall, Spring, Summer
* Prerequisite(s): (ENGL 2010 with a C+ grade or higher) and University Advanced Standing
Exposes students to classical and contemporary parenting theory, research, and practice. Focuses on the application of the guidance of children. Includes the study of parenting concepts, challenges, risks, and alternatives while considering the social, physical, emotional, intellectual, and spiritual environments of the child.

FAMS 3410 (Cross-listed with: COMM 3410)
Fundamentals of Mediation and Negotiation
3:3:0 Fall, Spring, Summer
* Prerequisite(s): (FAMS 101G or PSY 1010 or SOC 1010 or SW 1010 or COMM 1050) and University Advanced Standing
Prepares students to practice conflict resolution. Teaches effective communication, listening, and empathy to understand the perspectives of different parties. Focuses on developing skills and strategies for resolving disputes and differences. Builds on the fundamentals learned in the basic course, improves knowledge of both processes, and sharpens practical skills and effectiveness as a mediator or negotiator. Uses an interactive-workshop format that blends theory with simulated class role-play.

FAMS 3800
Early Development in Families
3:3:0 Fall, Spring, Summer
* Prerequisite(s): (ENGL 2010 with a C+ or higher) and University Advanced Standing
Studies physical, social, emotional, and cognitive development from conception through adolescence. Emphasizes normal child development within family, social, and cultural contexts.

FAMS 3850
Adult Development and Aging
3:3:0 Fall, Spring, Summer
* Prerequisite(s): (ENGL 2010 with C+ or higher) and University Advanced Standing
Explores the dynamic process of adult development from emerging adulthood to death. Focuses on current adult developmental research and theory and the development of adults within and without the family system. Includes the examination of physical, familial, emotional, and social development.

FAMS 4040
Secondary Data Analysis
3:3:0
* Prerequisite(s): BESC 3010; BESC 3020; (ENGL 2010 or 2020 with a C+ or higher) and University Advanced Standing
Focuses on research in the academic discipline of Family Studies. Teaches how to use the tools of research as a problem solving resource in real-life and applied settings. Includes how to form a research question or hypothesis, develop a proposal, create measurement, and apply for IRB approval. Requires completion of a research project.

FAMS 4200 (Cross-listed with: COMM 4200)
Advanced Mediation and Negotiation
3:3:0 Fall
* Prerequisite(s): (ENGL 2010 with a C+ or higher) and (FAMS 3410 or COMM 3410 or BESC 3420 or COMM 3420) and University Advanced Standing
Prepares students to perform at an advanced level in the processes of mediation and negotiation. Builds on the fundamentals learned in the basic course, improves knowledge of both processes, and sharpens practical skills and effectiveness as a mediator or negotiator. Uses an interactive-workshop format that blends theory with simulated class role-play. A certification with the Utah State Office of Mediation's office may be offered to those who pass the course and complete 10 hours of mediation and negotiation at the conclusion of the semester.

FAMS 4300
Family Dispute Resolution
3:3:0
* Prerequisite(s): FAMS 3410 or COMM 3410 or instructor approval; and University Advanced Standing
Builds on fundamentals learned in the basic mediation course. Reviews research and theories on family dynamics and conflicts. Examines the most effective mediation approaches, techniques, and skills for resolving family disputes. Presents information on specialized family mediation situations such as family mediation divorce, parent/teen, adoption, elder care. Prepares students to effectively participate in family mediations by utilizing an interactive workshop format with role-play, observation, and actual mediations.

FAMS 4400
Family Policy
3:3:0
* Prerequisite(s): (FAMS 101G or PSY 1010 or SOC 1010) and (ENGL 2010 with a C+ grade or higher) and University Advanced Standing
Creates an understanding of the role of family professionals as advocates for the institution of the family. Covers family theories and research methods which aid in critically analyzing current policy development and implementation patterns in Utah and the United States. Utilizes the developmental theory in support of advocacy for family members in all their diverse structures, ages, and life stages.
FAMS 4500 Family Life Education Methodology 3:3:0 Fall, Spring, Summer
* Prerequisite(s): (FAMS 101G) and (ENGL 2010 with a C+ grade or higher) and University Advanced Standing

Explores the field of family life education. Includes the history, development, and theory of family life education, as well as discusses the types of family life education programs. Develops the knowledge and practical skills that are required to identify needs, design programs, teach family life education, facilitate groups, and evaluate participants and programs in a wide variety of settings with a broad range of populations. Develops an appreciation for the impact of diversity in family life education which includes an awareness of multicultural factors, family structure, culture, economics, gender, race, religion, disability, ageism, and sexual orientation.

FAMS 4600 Relationship Education Certification 3:3:0
* Prerequisite(s): FAMS 101G and (ENGL 2010 or 2020 with a C+ or higher) and University Advanced Standing. FAMS 4500 is strongly encouraged but not required.

Certifies students in the Prevention and Relationship Enhancement Program and other relationship curricula.

FAMS 4660 Family Financial and Resource Management 3:3:0 Fall, Spring
* Prerequisite(s): FAMS 101G strongly recommended; University Advanced Standing

Introduces students to the fundamentals of family financial management. Focuses on norms, roles, values, and traditions of financial management in family systems. Evaluates emotional, subjective, and unstructured patterns, which contribute to financial mismanagement. Considers personal and social influences, including, marketing, holidays, spending pressure, goal definition, and debt accumulation.

FAMS 4670 Family Dynamics and Systems 3:3:0 Fall, Spring
* Prerequisite(s): (FAMS 101G) and (ENGL 2010 with a C+ grade or higher) and University Advanced Standing

Introduces the fundamentals of family dynamics and systems as they relate to family structure and function. Focuses on historical development, theoretical underpinnings, and applied utility of dynamics and systems. Includes boundary management, infraction, and renewal in contemporary family systems.

FAMS 4680 Family Theory 3:3:0
* Prerequisite(s): FAMS 101G and (ENGL 2010 or 2020 with a C+ or higher)

Explores the development and application of the major family theories and their tenets. Discusses the effectiveness of these theoretical approaches to family.
FIN 3020
Family Financial Management and Development
3:3:0  On Sufficient Demand
* Prerequisite(s): MAT 1030 or higher and University Advanced Standing

Personal and family financial management and development for non PFP Majors. Focuses on norms, roles, values, and traditions for the management of family resources. Examines the interactions and best practices of individuals and family members in processing financial management issues such as goal definitions, budgeting, debt management, and related functions.

FIN 3060
Introduction to the PFP Profession
3:3:0  Fall, Spring, Summer
* Prerequisite(s): MATH 1050 or MATH 1055 or MATH 1090 and University Advanced Standing

Introduces the processes appropriate for entry into the personal financial planning (PFP) profession. Provides an overview of the skills and knowledge sets required to be a PFP professional including an outline of business models and practice management issues within the industry. Includes a review of basic PFP process such as the time value of money, cash and debt management, personal financial statement analysis, education funding, and related issues.

FIN 3100
Principles of Finance
3:3:0  Fall, Spring, Summer
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

For bachelor's degree business management majors. Examines financial management in the business environment; time value of money; fundamentals of security valuation; the capital asset pricing model and capital budgeting. Introduces finance terminology and quantitative techniques used in financial analysis. Covers financial ratios and financial statement analysis, cost of capital, working capital policies, dividend policy, and a brief overview of international finance. Lab access fee of $30 for computers applies. Canvas Course Mats $78/Cengage applies.

FIN 3150
Financial Management
3:3:0  Fall, Spring
* Prerequisite(s): FIN 3100 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): MGMT 3345

Examines financial aspects of firm decisions; presents theoretical underpinnings for financial management, together with quantitative techniques used to analyze financial questions. Covers financial analysis and planning; valuation methods; determination of required return; effect of capital structure decisions; funding alternatives; and corporate risk management. Requires analysis of a capital budgeting problem, including a written paper, quantitative analysis and presentation. Lab access fee of $30 for computers applies.

FIN 3160
Financial Management for Accounting Majors
3:3:0  On Sufficient Demand
* Prerequisite(s): FIN 3100, MATH 1050, MATH 1055, or MATH 1090, and University Advanced Standing

Prepares accounting majors with the information and skills necessary to prepare for the certified management accounting (CMA) accreditation process. Includes coverage of financial statement analysis, evaluation of profitability, managing financial risk, management of capital issues, and other financial decision making processes.

FIN 3170
Financial Statement Analysis
3:3:0  Fall, Spring
* Prerequisite(s): FIN 3100 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): MGMT 3345

Coverage of financial statement analysis, evaluation of profitability, managing financial risk, management of capital issues, and other financial decision making processes.

FIN 3200
Financial Counseling
3:3:0  Fall, Spring
* Prerequisite(s): FIN 3060 and University Advanced Standing.

Prepares students to be effective financial counseling practitioners. Trains students to begin their role as effective financial counselors and planners. Develops counselor and client relationships skills as well as communication techniques to help identify and assist clients in an integrated financial planning environment. Provides an overview of the learning process needed to recognize the financial issues and concerns of many individuals and families and how to appropriately recommend solutions to help clients help themselves, while focusing on counselor sincerity and effectiveness in client reality.

FIN 3210
Retirement Planning
3:3:0  Fall, Spring
* Prerequisite(s): FIN 3060, Matriculation into the Woodbury School of Business, University Advanced Standing, and For PFP Majors Only

Examines the topics of retirement planning and retirement plans from both employer and individual client settings. Uses a case study approach to apply and integrate the material. Emphasizes the evaluation of financial alternatives. Provides learning activities that will facilitate student growth and development in written and oral communication skills.

FIN 3220
Risk Management and Insurance
3:3:0  Fall, Spring
* Prerequisite(s): FIN 3060, University Advanced Standing, and For PFP Majors Only.

Examines risk management and insurance planning for individual clients as well as employers of small corporations. Teaches the development of risk management and insurance plans with economic and behavioral theory. Uses a case study approach to apply and integrate the material. Emphasizes evaluation of financial alternatives. Provides learning activities that facilitate growth and development in written and oral communication skills.

FIN 3300
Tax Planning for Personal Financial Planners
3:3:0  Fall, Spring
* Prerequisite(s): FIN 3060, Matriculation into WSB, University Advanced Standing, and for PFP majors only

Examines the topic of income tax planning and forecasting for individual clients and small business owners. Uses a case study approach to integrate the material and apply it to personal financial planning situations. Emphasizes the evaluation of financial alternatives. Provides learning activities that will facilitate student growth and development in written and oral communication skills. Works with local practitioners to provide an engaged learning experience.

FIN 3400
Investment Management
3:3:0  Fall, Spring, Summer
* Prerequisite(s): FIN 3100 and University Advanced Standing

Overviews the field of investments. Introduces stocks, bonds, put and call options, commodity and financial futures. Emphasizes both theory and practical aspects of investment management. Includes security valuation, market hypothesis, capital asset pricing, strategies of portfolio construction, performance measures, and risk/return relationships. Lab access fee of $30 for computers applies.

FIN 4020
Enterprise Risk Management
3:3:0  Fall, Spring, Summer
* Prerequisite(s): FIN 3100, MGMT 2340, and University Advanced Standing

Introduces the risks and exposures to loss which affect businesses and non-profit entities. Includes pure, financial, operational, and strategic risk. Emphasizes data collection, analysis, and evaluation methods. Provides an in-depth examination of risk management program objectives and goals. Provides the tools for identification and treatment.
Course Descriptions

FIN 4030 Foundations of Risk Management and Insurance
3:3:0 Fall, Spring, Summer
* Prerequisite(s): FIN 300, MGMT 2340, and University Advanced Standing
Introduces fundamental risk management and insurance principles as essential components of global business operations and personal risk management. Provides an in-depth examination of risk identification, risk analysis, global risk exposures, insurance company operations, legal principles, loss prevention and safety concepts, and the social and economic relevance of risk management and insurance.

FIN 4040 Business Law for Insurance Professionals
3:3:0 Fall, Spring, Summer
* Prerequisite(s): FIN 300, MGMT 2340, and University Advanced Standing
Introduces the fundamentals of insurance law. Provides an in-depth examination of the definition of insurance, risk and the nature of the insurance relationship, insurable interests, indemnity, fortiety, and subrogation. Studies the coordination of benefits, interpretation of policies, rights at variance with policy provisions, contract formation, warranties, misrepresentation and concealment, conditions, agents and brokers, insurance regulation, and introduction to insurance coverage.

FIN 4050 Commercial Property Risk Management and Insurance
3:3:0 Fall, Spring, Summer
* Prerequisite(s): FIN 300, MGMT 2340, and University Advanced Standing
Introduces commercial property risk management, with an emphasis on risk control, risk financing and using insurance as an essential component of an enterprise risk management program. Provides an in-depth examination of risk assessment, loss prevention, and the treatment of risk and insurance in the areas of commercial property, loss of business income, cyber risk, and equipment breakdown.

FIN 4060 Commercial Liability Risk Management and Insurance
3:3:0 Fall, Spring, Summer
* Prerequisite(s): FIN 300, MGMT 2340, and University Advanced Standing
Introduces business liability exposures to risk and loss arising from negligence and/or other legal doctrines. Examines insurance as an essential component of an enterprise risk management program. Provides an in-depth examination of risk assessment, loss prevention, and treatment of risk in the areas of general liability, business auto, worker's compensation, cyber risk, and management and professional liability.

FIN 4100 Management of Financial Institutions
3:3:0 Spring
* Prerequisite(s): FIN 3100 and University Advanced Standing
Studies the U.S. financial system and its primary institutions and markets. Includes the role of the Federal Reserve System, American and international financial markets. Explores the impact of monetary policy on financial institutions and financial intermediation. Presents the term structure of interest rates, money, capital and mortgage markets, and management of thrift institutions and insurance companies. Lab access fee of $30 for computers applies.

FIN 4160 Portfolio Management
3:3:0 Spring
* Prerequisite(s): FIN 3400 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): MGM 3345
Examine portfolio theory and applied techniques used in selecting appropriate securities and managing the risk and return of a portfolio, with a focus on meeting investment objectives. Considers both stock and bond portfolios, and includes discussion of market efficiency, diversification, measurement of risk and performance, bond duration and portfolio immunization, advanced bond pricing principles, bond swaps, term structure of interest rates, asset allocation, and portfolio hedging strategies.

FIN 4170 Derivative Securities
3:3:0 Fall
* Prerequisite(s): FIN 3100 and University Advanced Standing
* Prerequisite(s): FIN 3100 and University Advanced Standing
Covers characteristics and institutional information about derivative securities, including forward and futures, options and swaps. Examines pricing models for these securities, risk inherent in derivative investments, and the role of derivatives in risk management. May include discussion of real options and other topics dealing with financial engineering.

FIN 4180 International Finance Management
3:3:0 Fall, Spring, Summer
* Prerequisite(s): FIN 3100 and University Advanced Standing
Examines financial aspects of firms operating in an international business environment. Includes currency valuation and forecasting; international flow of funds; foreign and international capital markets; valuation of multinational enterprises; and the effect of decisions about structure of the business and its transactions on firm value; and management of currency, political, and other risks arising from multinational operations. Lab access fee of $30 for computers applies.

FIN 4190 Applied Asset Diversification and Management
3:3:0 Fall, Spring
* Prerequisite(s): FIN 3400 and University Advanced Standing
Teaches a wide variety of investment asset classes including performance measurement, analysis of portfolio investment assets, quantitative analyses of investment portfolios. Discusses complex investment concepts through simplification and modeling of these issues to help clients better understand the benefits of these investment concepts.

FIN 4200 Financial Counseling Practicum
3:3:0 Fall, Spring
* Prerequisite(s): FIN 3060, FIN 3200, Departmental Approval, Matriculation into WSB, and University Advanced Standing
Examines financial counseling with an engaged and practical focus. Uses actual client data in a supervised environment to integrate the material and core learning objectives, then apply them to financial counseling situations. Emphasizes the evaluation of credit and debt management, housing decisions and budgeting and forecasting. Provides learning activities designed to facilitate student growth and development in written, oral and presentation skills. Works with local practitioners to provide an engaged learning experience.

FIN 4210 Estate Planning Fundamentals
3:3:0 Fall, Spring
* Prerequisite(s): FIN 3060, Matriculation into the Woodbury School of Business, University Advanced Standing, and For PFP Majors Only.
Teaches gift, estate, and generation skipping transfer taxation, including financial and estate planning applications. Applies gift, estate, and generation skipping transfer taxation rules to personal financial planning scenarios. Studies financial regulations and taxation policy. May be delivered hybrid.

FIN 4250 Personal Financial Planning Practicum
3:3:1 On Sufficient Demand
* Prerequisite(s): FIN 3200, FIN 3210, FIN 3220, FIN 4210, FIN 3400, ACC 3400, and University Advanced Standing
Examines practice management in various financial planning firms. Teaches the basics of practice management with an understanding of the core areas of personal financial planning. Uses a case study approach to apply and integrate the material and evaluate financial alternatives. Emphasizes the benefits and drawbacks of various management methods. Provides learning activities that will facilitate student growth and development in written and oral communication skills.
FIN 4270
Wealth Management Seminar
3:0 Fall, Spring
* Prerequisite(s): FIN 3060, Matriculation into the Woodbury School of Business, University Advanced Standing, and For PFP Majors Only.

Introduces investment theory, literature and theories which describe the unique process of household investment decision making, and an introduction to quantitative investment analysis and the instruments used to construct an efficient household portfolio. Uses quantitative and theoretical material which will require a basic knowledge of economics and finance, and the ability to work with spreadsheets. Applies practical concepts to prepare students to work as wealth managers in financial planning firms.

FIN 4290
Technological Applications in Personal Financial Planning
3:0 Fall, Spring
* Prerequisite(s): FIN 3060, WSB matriculation, University Advanced Standing, and For PFP Majors Only.

Introduces various financial planning software packages. Includes both goal based and cash flow based financial planning software, client relationship management software, investment research software, portfolio management software, and office support software. Provides access to a variety of premier software companies in the U.S. and Canada. Certification in core software packages is required. Includes training material and standards as outlined by software companies.

FIN 4310
Real Estate Investment and Securities
3:0 Fall
* Prerequisite(s): FIN 3100 and University Advanced Standing

Examines real estate investments and debt and equity capital markets linked to real estate assets. Focuses primarily on real estate investments and valuation of debt and equity securities, including commercial and residential mortgages, real estate investment trusts, and mortgage-backed securities, and some related instruments such as CDOs. Examines the process of securitization and the secondary markets for real estate securities, together with the role of financial institutions in this sector. Provides an overview of real estate investment, measurement of prices, and fundamental determinants of value with particular attention given to the effect of interest rate risk, default risk, and the embedded prepayment options on the value of mortgages and mortgage-backed securities.

FIN 457R
Advanced Topics in Finance
3:0 Fall, Spring
* Prerequisite(s): FIN 3100, Instructor Approval, and University Advanced Standing

Uses case method, examination of current academic and professional literature and/or student research to explore selected finance topics in considerable detail. Emphasizes student analysis, exposition and presentation of information. May be repeated four times for a maximum of 12 credits toward graduation.

FIN 4700
CFA Examination Preparation
3:0 Fall, Spring
* Prerequisite(s): FIN 3060, FIN 3210, FIN 3220, FIN 3300, FIN 3400, FIN 4210, and University Advanced Standing
* Prerequisite(s) or Corequisite(s): FIN 4800

Prepares personal financial planning students completing his/her bachelor of science degree who are planning to take the Certified Financial Planner accreditation exam. Provides review of the concepts and issues individuals need to be successful. Uses Dalton Education materials.

FIN 4800
Personal Financial Planning Capstone
3:0 Fall, Spring
* Prerequisite(s): FIN 3060, FIN 3210, FIN 4210, FIN 3400, University Advanced Standing, and For PFP Majors Only.

Develops the concept of a comprehensive plan. Reviews each of the major aspects of financial planning in the context of a comprehensive case. Analyzes the financial planning profession and the various types of financial planning models. Provides an overview of software applications as well as interview skills, data gathering, working with clients, presentation skills, and the creation of a comprehensive financial plan.

FIN 481R
Personal Financial Planning Internship
2 to 8:2 to 8:0 Fall, Spring, Summer
* Prerequisite(s): Departmental Approval and University Advanced Standing

Provides supervised, practical, and professional experience for students preparing for careers in Personal Financial Planning. May be repeated for a maximum of 8 credit hours. May be graded Credit/No Credit.

FIN 482R
Internship
2 to 8:2 to 8:0 Fall, Spring, Summer
* Prerequisite(s): FIN 4800

For upper-division students in Finance. Provides a transition from school to work where learned theory is applied to actual practice through meaningful on-the-job paid experience commensurate with upper-division classroom instruction. Includes student, employer, and coordinator evaluations, on-site work visits, written assignments, and oral presentations. Completers should obtain experience in establishing and accomplishing individualized work objectives that improve work performance. May be repeated for 6 credits toward graduation. May be graded credit/no credit.

FIN 483R
Colloquium in PFP Professionalism
1:1:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and For PFP Majors Only.

Prepares PFP Program students for internships and other professional development activities. Features industry professionals who interact with students and discuss opportunities within the industry and their specific professional practices. Covers special topics such as business etiquette, dressing for success, preparing professional resumes, correspondence, etc. May allow students to experience extended personal interaction with visiting professionals by hosting them, providing transportation to/from the airport, escorting them to local points of interest, and more. May be repeated for a maximum of 3 credits toward graduation.

FIN 5130
Financial Statement Analysis and Modeling
3:0 Fall
* Prerequisite(s): FIN 3100

Explains the relationships among the three primary financial statements including income statement, balance sheet, and cash flow statements. Analyzes companies in three primary sectors and does reviews and valuations of these companies. Describes basic merger, acquisition, and initial public offering valuation concepts.

FIN 5160
International Financial Management
3:0 Fall, Spring
* Prerequisite(s): FIN 3100

Translates financial topics within an international perspective. Teaches international corporate finance transactions and the impact of currency implications on company financial translations. Provides a global context for cultural differences of financial concepts and practices in varied countries. Provides additional financial perspectives about international business transactions within the context of earlier financial courses.

FIN 5170
Investment Analysis and Portfolio Analysis
3:0 Fall, Spring
* Prerequisite(s): FIN 3100

Provides an introduction to the global securities market and its role in capital formation, wealth-creation, economic development, risk mitigation, wealth management, and other finance-related goals.

FIN 5180
CFA Examination Preparation
3:0 Fall, Spring, Summer
* Prerequisite(s): Permission of instructor or department chair

Prepares participants to sit for the Chartered Financial Analysis (CFA) Level 1 section of the exam. Requires students to work through a modular process covering outlined topics required for the exam including ethics, quantitative methods, economics, corporate finance, financial reporting/analysis, security analysis, and portfolio management.
FIN 6100 Research Methods  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Admission to Masters FPA Program  
Describes graduate level research methods, processes, and skills appropriate to the analysis of applied business projects. Reviews scientific methods analysis, research design, measurement and scaling, testing reliability and validity, communication of research results, and other relevant concepts.

FIN 6130 Financial Statement Analysis and Modeling  
3:3:0 Fall, Spring  
* Prerequisite(s): Acceptance in MBA Program  
Develops fluency with the three primary financial statements including income statement, balance sheet, and cash flow statement. Projects statements for companies in three primary sectors and conducts a full enterprise valuation for projected companies. Conducts a mock merger, acquisition, and initial public offering valuation.

FIN 6140 Regulatory Policy in the Financial Services Industry  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Admission to Masters of Financial Planning and Analytics Program  
Describes the functions and purposes of regulatory policy within the financial services industry. Outlines alternative philosophies which influence regulatory policy development including implementation of public policy for these purposes. Reviews varied government, industry, and other agencies responsible for regulatory policy in the financial service industry.

FIN 6150 Financial Management  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance in the MBA program  
Discusses corporate financial management cases and analyses dealing with problems of working capital management, capital budgeting, cost of capital evaluation, and corporate restructuring. Canvas Course Mats $78/ Cengage applies.

FIN 6160 International Financial Management  
3:3:0 Fall, Spring  
* Prerequisite(s): Acceptance into MBA Program  
Translates financial topics into an international perspective. Focuses on international corporate finance transactions and the currency implications of financial statement translations. Provides a global context for cultural differences of financial concepts and practices around the world. Offers a financial perspective treating international business.

FIN 6170 Investment Analysis and Portfolio Analysis  
3:3:0 Fall, Spring  
Provides an introduction to the global securities market and its role in capital formation, wealth-creation, economic development, risk mitigation, wealth management, and other finance-related goals. Utilizes extensive use of Bloomberg Terminals in the development of company and industry analyses. Canvas Course Mats $78/ Cengage applies.

FIN 6180 Asset Protection and Trust Planning  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance in Masters of FPA Program  
Describes a variety of processes for evaluating asset values and pairing those processes with client's requirements. Reviews alternative trust types, policies for achieving varied client objectives, and evaluating trust effectiveness.

FIN 6200 Behavioral Finance Seminar  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Admission to the Masters in Financial Planning and Analytics Program  
Describes complementary approaches to traditional finance theory which assumes investors and managers always use rational decision processes. Presents alternative perspectives using behavioral finance theory which assumes investors and finance professionals use cognitive processes in decision making and the implications for these behavioral finance concepts in investment and corporate decision making activities.

FIN 6210 Retirement Planning  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Admission to the Masters in Financial Planning and Analytics Program  
Examines topics of retirement planning and retirement plans at the graduate level from both employer and individual client perspectives. Uses case study approach to apply and integrate the material. Emphasizes the evaluation of financial alternatives. Provides learning activities that will facilitate student growth and development in written and oral communication skills.

FIN 6250 Retirement Income Planning  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance in the Masters of FPA Program  
Describes the special issues related to managing and sustaining retirement income for people depending on that source for livelihood. Evaluates alternative sources of income for retired individuals including social security, pensions, 401K, and other sources. Describes varied strategies for sustaining value, evaluating withdrawals from principal, reviews of sustainability, and other related concepts.

FIN 6260 Estate Planning  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance in Masters FPA Program  
Describes elements of estate planning including gift, estate, generation skipping, tax implications and other relevant issues financial planners need to identify client needs. Identifies planning concepts, tools, and varied processes important to meet needs of individual clients.

FIN 6270 Wealth Management  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance into Masters of FPA Program  
Introduces investment theory, literature and theories relating to the unique processes of household investment decision making. Implements quantitative investment analyses and the instruments appropriate to the development of an efficient household portfolio. Teaches quantitative and theoretical concepts requiring a basic knowledge of economics, finance, and the ability to work with spreadsheets. Applies practical concepts to prepare students to work as wealth managers in financial planning firms.

FIN 6290 Advanced Technology Applications in PFP  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance in the Masters of FPA Program  
Introduces various financial planning software packages. Includes both goal based and cash flow based financial planning software, client relationship management software, investment research software, portfolio management software, and office support software. Provides access to a variety of premier software companies in the U.S. and Canada. Describes training material and standards as outlined by software companies. Requires certification in core software packages.

FIN 6300 Income Tax Planning  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance into the Masters of FPA Program  
Examines the topic of income tax planning and forecasting for individual clients and small business owners. Executes a case study approach to integrate material and apply it within a personal financial planning context. Implements materials to facilitate student growth and development in written and oral communication skills. Organizes activities with local practitioners to provide an engaged learning experience.

FIN 6340 Analytics and Advanced Statistics  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance in the Masters of FPA Program  
Describes processes and methods that statisticians use to analyze business, financial, and related issues. Teaches how to determine types of data required to address specific problems, how to gather, analyze, and report that information to suggest solutions to identified problems. Evaluates the effectiveness of varied statistical processes in applying those techniques to address specific types of issues. Practices the application of statistical methods to the evaluation of identified problems.

FIN 6400 Client Relationships Management  
3:3:0 Fall, Spring, Summer  
* Prerequisite(s): Acceptance into Masters of FPA Program  
Outlines processes for developing and sustaining client relationships to manage a professional financial planning operation. Reviews alternative electronic applications designed to support client relationships. Evaluates the effectiveness of alternative client management systems including both strengths and challenges of such systems.
**FIN 6450**  
Planning for Financial Planning Business Owners  
3:3:0  
*Prerequisite(s): Acceptance into the Masters of FPA Program*

Reviews varied business organizations, structures, processes, and other related activities necessary to the effective management of a financial planning business. Evaluates client management, financial planning software, business and tax accounting software, and other needed technology support. Teaches professional development activities for planning professionals and staff. Analyzes marketing, human resources, and other business function processes. Integrates best business practices.

**FIN 657R**  
Special Topics in Financial Planning  
3:3:0  
*Prerequisite(s): Admission to the Masters FPA*

Reviews special topics such as new tax laws, revisions of charitable giving procedures, developing specialized trusts, changes in financial industry regulatory processes, and other related topics. May be repeated for a maximum of 6 credits toward graduation.

**FIN 6700**  
CFP Exam Preparation  
3:3:0  
*Prerequisite(s): FIN 6210, FIN 6300, and FIN 6260  
*Corequisite(s): FIN 6800*

 Prepares personal financial planning students completing master's degree who are planning to take the Certified Financial Planner accreditation exam. Provides review of the concepts and issues individuals need to be successful.

**FIN 6800**  
PFP Capstone  
3:3:0  
*Prerequisite(s): Acceptance into Masters of FPA*

Develops the concept of a comprehensive plan. Reviews each of the major aspects of financial planning in the context of a comprehensive case. Analyzes the financial planning profession and the various types of financial planning models. Provides an overview of software applications as well as interview skills, data gathering, working with clients, presentation skills, and the creation of a comprehensive financial plan.

**FIN 6810**  
CFA Exam Preparation  
3:3:0  
*Prerequisite(s): Admission to Masters of FPA Program and instructor approval*

Prepares participants to sit for the Chartered Financial Analysis (CFA) Level 1 section of the exam. Requires students to work through a modular process covering outlined topics required for the exam including ethics, quantitative methods, economics, corporate finance, financial reporting/analysis, security analysis, and portfolio management.

---

**French (FREN)**

**FREN 1010**  
Beginning French I  
4:4:1  
*Prerequisite(s): Students need equivalent knowledge of FREN 1010*

Emphasizes understanding, speaking, reading and writing skills. Basic language usage and cultural understanding are acquired through an activity-based approach. Lab access fee of $10 applies.

**FREN 1020**  
Beginning French II  
4:4:1  
*Prerequisite(s): Students need equivalent knowledge of FREN 1010*

Completes the first year of study. Includes the remaining grammar, language concepts, and culture, and introduces students to literature in French. Lab access fee of $10 applies.

**FREN 115R**  
French Conversation I  
1:1:0  
*Prerequisite(s): FREN 1020*

Offers novice French speakers opportunities to enhance their speaking proficiency in the target language by focusing on oral and written production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, and sharpen listening comprehension for natural conversational flow. Contrasts with all other first year courses which must strive to produce mastery of the whole range of language acquisition components, including writing, grammar, etc. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of speech opportunities and defusing concern for such matters as spelling, etc. Increases mastery of lexical items through increased frequency of oral usage. May be repeated for a maximum of 3 credits toward graduation.

**FREN 1500**  
French Travel Study  
3:1:6  
*Prerequisite(s): FREN 1020*

Introduces students to a French-speaking foreign country for a minimum of 10 days of intensive language and culture study. Course entails several meetings prior to departure and at least one after the return home to facilitate observation and analysis of data to be gathered on the tour. An organized presentation of that data will be contained in a multimedia project due no later than one month after tour.

**FREN 2010**  
Intermediate French I  
4:4:1  
*Prerequisite(s): Students need equivalent knowledge of FREN 1020*

Reviews grammar, reading, writing, and conversation skills learned throughout the first year. Introduces readings and discussions on the history, culture, and literature of the French world. Lab access fee of $10 applies.

---

**FREN 202G**  
Intermediate French II  
4:4:0  
*Prerequisite(s): Students need equivalent knowledge of FREN 1020*

Emphasizes reading, writing, and conversational skills through socio-cultural studies in history, literature and art. Lab access fee of $10 applies.

**FREN 2050**  
Advanced French Grammar and Composition  
3:3:0  
*Prerequisite(s): FREN 202G or equivalent*

Explores grammar of French focusing on areas typically difficult for English speakers. Provides extensive instruction in, and opportunity for the students’ improvement in language production, both oral and written. Completers should improve considerably their ability to express themselves in the foreign language both orally and in written form.

**FREN 215R**  
French Conversation II  
1:1:0  
*Prerequisite(s): Students should have equivalent knowledge of FREN 1020*

Offers lower division / novice speakers opportunities to enhance their speaking proficiency in the target language by focusing on oral and written production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, sharpen listening comprehension, and develop conversational strategies such as circumlocution and managing a conversation with useful expressions for starting a conversation, gaining time to think, helping the other speaker, seeking agreement, etc. Contrasts with all other first year courses which must strive to produce mastery of the whole range of language acquisition components, including writing, grammar, etc. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of speech opportunities and defusing concern for such matters as spelling, etc. Increases mastery of lexical items through increased frequency of oral usage. May be repeated for a maximum of 3 credits toward graduation.

**FREN 3030**  
French Composition and Conversation  
3:3:0  
*Prerequisite(s): (FREN 202G or instructor approval) and University Advanced Standing*

Advances mastery of French grammar while emphasizing production skills of speaking and writing. Expands reading and listening skills to a lesser degree. Reviews and extends lexical depth. Allows students without experience living in a French immersion setting to advance in their communication skills to where they may participate more comfortably in future upper division courses with other students who do have immersion experience. Offers a variety of topics presented in a variety of media as content basis for real communicative practice in French. Conducts all course work primarily in French.
Course Descriptions

FREN 3040
Introduction to Literary Genres in French
3:3:0 Spring
* Prerequisite(s): (FREN 202G or equivalent) and University Advanced Standing
Exploring different literary genres in the French language throughout the centuries. Provides extensive opportunity for improvement in oral and reading/writing development of language skills, as well as new ways of thinking about literature in cultural contexts. Completers should considerably improve their ability to express themselves in the foreign language. Taught entirely in French.

FREN 3050
Advanced French
3:3:0 Fall, Spring
* Prerequisite(s): It is recommended that students take FR 202G prior to enrolling in FR 3050. If you have advanced study of French, you may also contact the French Program Director for a placement test.
Building upon lower-division courses, continues to emphasize reading, writing, and conversational skills through studies in literary and other texts, including films dealing with Francophone cultures. Includes an in-depth review of grammar. Lab access fee of $10 applies.

FREN 3116
Adventure and Discovery-Journeys through the French and Francophone Worlds
3:3:0 Fall
* Prerequisite(s): Pass French AP Exam with minimum score of 3.
This course is part of the French Bridge Program in the State of Utah, open only to high school students in the Bridge Program. Not to be taught on main campus, and not open to students who are not enrolled in a participating high school. Explores themes of discovery, adventure, and journey in the French and Francophone world through the prism of the fine arts, history, music, texts, films, and other areas. Taught in French.

FREN 3117
Francophonie-Past/Present/Future
3:3:0 Fall, Spring
* Prerequisite(s): Pass French AP Exam with minimum score of 3.
This course is part of the French Bridge Program in the State of Utah, open only to high school students in the Bridge Program. Not to be taught on main campus, and not open to students who are not enrolled in a participating high school. Explores themes such as coming of age, rite of passage, and education as encountered in cultural artifacts and literatures from France and the Francophone world. Taught in French.

FREN 3118
Paris City of Lights
3:3:0 Fall
* Prerequisite(s): Pass French AP Exam with a minimum score of 3.
This course is part of the French Bridge Program in the State of Utah, open only to high school students in the Bridge Program. Not to be taught on main campus, and not open to students who are not enrolled in a participating high school. Explores the City of Lights through the prism of important themes, including, but not limited to, the arts, history, commerce, technology, sports, etc. Examines course themes through a variety of approaches, such as project based instruction, class discussion, and reaction papers. Taught in French.

FREN 3200
Business French
3:3:0 LH Business French
* Prerequisite(s): (FREN 3050 or equivalent knowledge) and University Advanced Standing
For those who plan to pursue careers in international business or related fields, learn French business language, understand French corporate culture, or plan to major or minor in French. Teaches French business terminology and prepares students to take the Chambre de Commerce et d'Industrie de Paris exam. Explores technological, personal, and professional aspects of business. Will be taught entirely in the French language. Lab access fee of $10 applies.

FREN 351G
Culture and Civilization to 1700
3:3:0 Fall Even Year
* Prerequisite(s): FREN 3050 and University Advanced Standing
Explores chronologically to 1700 the formation and development of French speaking societies and cultures. Traces the ethnic development and linguistic history of these societies and peoples, as well as examines manifestations of their aesthetic endeavors. Presentations and class instruction conducted entirely in French.

FREN 352G
Culture and Civilization from 1700
3:3:0 Spring Odd Year
* Prerequisite(s): FREN 3050 and University Advanced Standing
Explores chronologically to 1700 the formation and development of French speaking societies and cultures. Traces the ethnic development and linguistic history of these societies and peoples, as well as examines manifestations of their aesthetic endeavors. Presentations and class instruction conducted entirely in French.

FREN 353G
Contemporary French Civilization and Culture
3:3:1 On Sufficient Demand
* Prerequisite(s): (FREN 3050 or equivalent) and University Advanced Standing
Examines contemporary French culture topics (family, education, love and the couple, religion, social challenges, governmental functions, etc.) through studying a variety of French sources: readings, film, lecture, individual research, etc. Analyzes topics through active class discussion in French. Integrates new cultural perspectives in papers and assignments researched and written in French. Conducted entirely in French.

FREN 3610
French Literature to 1700
3:3:0 Fall Odd Year
* Prerequisite(s): (FREN 3050 or equivalent knowledge) and University Advanced Standing
Introduces chronologically to 1700 representative French authors. Emphasizes literary analysis and criticism. Completers should develop knowledge of literary history, acquire skills in interpreting literary texts, and deepen understanding of the French language. Presentations and class instruction conducted entirely in French.

FREN 3620
French Literature from 1700
3:3:0 Spring Even Year
* Prerequisite(s): (FREN 3050 or equivalent knowledge) and University Advanced Standing
Introduces chronologically from 1700 representative French authors. Emphasizes literary analysis and criticism. Completers should develop knowledge of literary history, acquire skills in interpreting literary texts, and deepen understanding of the French language. Presentations and class instruction conducted entirely in French.

FREN 4050
Special Topics in Grammar Usage and Style
3:3:0 Fall Odd Year
* Prerequisite(s): FREN 3050 and University Advanced Standing
Focuses on understanding French grammar in context. Uses various literary texts and other print materials in an effort to underscore the grammar concepts studied.

FREN 4100
Teaching French Grammar
3:3:0 Fall Even Year
* Prerequisite(s): FREN 4050, instructor approval, and University Advanced Standing
Focuses on the fundamental concepts and practices of teaching French grammar in context. Prepares students to teach French language in secondary school settings. Requires a portfolio of best teaching practices as related to grammar instruction.

FREN 4200
Advanced Business French
3:3:0 Spring
* Prerequisite(s): (FREN 3200 or equivalent knowledge) and University Advanced Standing
For those taking the exam leading to the Diplome de francais des affaires (DFA 2) awarded by the Chambre de Commerce et d'Industrie de Paris. Emphasizes case studies, marketing, resumes, cover letters, job interviews, computers, and the Internet. Taught entirely in French.

FREN 4500
Advanced Writing in French
3:2:3 Spring Odd Year
* Prerequisite(s): [(FREN 3030 and FREN 3040) or FREN 3050] and University Advanced Standing
Increases students' accuracy, clarity and use of appropriate registers when writing in French. Informs them of the significant roles played by form, content and intentionality of discourse in their writing, and improves their skills in addressing the requirements of those various roles.
FREN 4900
French Capstone Seminar
3:3:0 Spring Even Year
* Prerequisite(s): (FREN 202G or instructor approval) and University Advanced Standing

Provides the opportunity to showcase language abilities through various oral and written assignments. Culminates in a final research project in the target language. Requires a selected subject to explore for the capstone project. Possible research areas include literary, film, and gender studies.

FREN 490R
Special Topics in French
3:3:0 On Sufficient Demand
* Prerequisite(s): (FREN 202G or instructor approval) and University Advanced Standing

Studies topic in detail not offered in other courses. Addresses key aspects of the topic. Engages students in critical analysis and discourse. Develops language skills requisite to such analysis and specific to the topic. Possible topics include French Film, Translation and Interpretation, Francophone Literature, Women's Texts, Courtly Love. Conducted entirely in French. May be repeated for up to 9 credit hours towards graduation.

Forensic Science (FSCI)

FSCI 3300
Forensic Photography
3:3:0 Fall, Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Explains the basic concepts of Forensic Photography while exploring the fundamental skills for the selection and use of photography equipment. Identifies the basic principles and fundamentals of using photography with regard to crime scenes, forensic evidence, and identification photography. Illustrates skills utilizing a DSLR camera with various types of lighting, camera settings, and common camera accessories. Explains techniques involving surveillance, impression, close up, alternate light sources, infrared photography, and the legal aspects of forensic photography as it pertains to criminal investigations. Course fee of $155 applies.

FSCI 3400
Criminalistics
3:3:1 Fall, Spring
* Prerequisite(s): CJ 1350 with a C+ or higher and University Advanced Standing

Emphasizes the learning and proper use of technical vocabulary used in forensic science. Introduces basic photography and presentation techniques as they relate to the field of forensics. Teaches laws pertaining to making photographic copies and the legal steps required for altered photographs to be accepted in the criminal court system. Introduces basic laboratory measurement and statistical techniques. Uses stereo and compound light microscopes to visually examine physical evidence. Discusses the scientific theory and analytical procedures for analyzing refractive index of glass, species identification of hair, bullet rifling, DNA and the calculation of Post Mortem Interval. Course Lab fee of $142 for materials applies.

FSCI 3500
Footwear and Tire Mark Evidence and Examination
3:3:0 Fall, Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Provides the history of footwear and tire impression evidence and introduces the examination of impression evidence. Explains crime scene protection and searching procedures for impression evidence. Identifies and lists the basic equipment needed for footwear and tire impression recovery at a crime scene. Identifies applicable chemical formulas and instructs in the preparation of chemical reagents used to visualize impression evidence. Teaches the recovery of footwear and tire evidence through photography, lifting, and casting. Includes the methodology of footwear and tire identification by image comparison techniques. Course fee of $128 for materials applies.

FSCI 3540
Forensic Trace Analysis I
3:2:3 Fall
* Prerequisite(s): FSCI 3400 with a C+ or higher, CHEM 1220/1225 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): CHEM 2310 and CHEM 2315

Emphasizes the learning and proper use of technical vocabulary as it relates to forensic trace evidence. Teaches theory of techniques and operation of spectroscopic instruments. Performs spectroscopic analyses of various types of physical evidence. Uses stereo and compound light microscopes to prepare small samples for examination. Teaches forensic comparison analysis and technical report writing. Lab access fee of $30 for computers applies. Course fee of $135 for materials applies.

FSCI 3550
Forensic Trace Analysis II
3:2:3 On Sufficient Demand
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Teaches theory of chromatographic/mass spectrometry techniques and operation of their analytical instruments. Teaches proper use of technical vocabulary related to forensic analysis. Performs chromatographic and mass spectrum analyses of physical evidence commonly found in criminal investigations. Teaches sample preparation, forensic comparison analysis and technical report writing. Lab access fee of $30 for computers applies.

FSCI 3500
Footwear and Tire Mark Evidence and Examination
3:3:0 Fall, Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Provides the history of footwear and tire impression evidence and introduces the examination of impression evidence. Explains crime scene protection and searching procedures for impression evidence. Identifies and lists the basic equipment needed for footwear and tire impression recovery at a crime scene. Identifies applicable chemical formulas and instructs in the preparation of chemical reagents used to visualize impression evidence. Teaches the recovery of footwear and tire evidence through photography, lifting, and casting. Includes the methodology of footwear and tire identification by image comparison techniques. Course fee of $128 for materials applies.

FSCI 3700
Fingerprint Processing
3:3:0 Fall, Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Teaches professional conduct in fingerprint processing. Explains the differences in latent fingerprints as they relate to the physical condition in which they are found. Describes and utilizes the equipment needed for fingerprint development, lifting, and comparison. Course fee of $143 for materials applies. Lab access fee of $30 applies.

FSCI 3720
Fingerprint Examination
3:3:0 Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Presents the history of fingerprint examination. Teaches recent technical advances in fingerprint development and examination. Describes the theory and make-up of fingerprints, palm prints, and footprints. Explores charting and comparison techniques. Teaches criteria used to determine successful identification versus non-identification. Lab access fee of $30 computers applies. Course fee of $30 materials applies.

FSCI 3780
Bloodstain Pattern Analysis
3:3:0 Fall, Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Teaches the basics of handling blood evidence typically encountered at a crime scene. Explains terminology and the techniques of documentation as it relates to the analysis of bloodstain patterns. Presents the physical properties of blood as they apply to forensic investigation. Identifies characteristic patterns and computer applications to interpret the impact patterns of scattered blood. Illustrates the concepts of motion, directionality, area of convergence, and the area of origin of impact bloodstain patterns. Teaches traditional and modern techniques in crime scene reconstruction for documenting and reconstructing the crime scene. Describes guidelines for presenting bloodstain evidence at trial. Course lab fee of $75 for materials applies.

FSCI 3820
Crime Scene Investigation Techniques I
3:3:0 Fall, Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing

Explains the fundamental goals of crime scene investigation and the importance of physical evidence. Teaches fundamental crime scene documentation skills including note taking, sketching, and photography. Teaches evidence identification, collection, and packaging procedures. Provides experience in evidence identification, documentation, collection, and packaging procedures. Course Lab fee of $145 applies
Course Descriptions

FSCI 3830
Crime Scene Investigation Techniques II
3:3:0 Fall, Spring
* Prerequisite(s): FSCI 3820, FSCI 3780, and University Advanced Standing
Teaches computer-based crime scene measurement and diagram tools utilized to properly document crime scenes including clandestine human graves, scattered human remains, and under water, fire, and arson scenes. Provides instruction in proper approach, documentation, and analysis of complex crimes scenes. Teaches crime scene reconstruction techniques in bloodstain patterns and shotting incident scenes. Course fee of $155 for materials applies. Course fee of $30 applies.

FSCI 3850
Marijuana Identification Certificate
3:2:2 Summer
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher or Instructor Approval) and University Advanced Standing
Teaches the botanical and chemical methodology required for the legal identification of marijuana. Identifies the microscopic morphological features of the plant material. Uses thin layer chromatography to detect hallucinogenic chemicals. Uses the Duquenois-Levine Test to detect the cannabinoid family of chemicals and how to recognize false-positive results. Teaches the methodology to detect marijuana residues in charred debris. Interprets data, writes a marijuana analysis report and presents results in a Moot Court. Course fee of $155 for materials applies.

FSCI 3860
Forensic Microscopy
3:2:3 Fall, Spring
* Prerequisite(s): (CJ 1350 or FSCI 3400 with a C+ or higher) and University Advanced Standing
Lays the foundation of forensic microscopy. Explains the theory of the microscope: light and lenses. Describes the major variants of the compound microscope including the stereo, polarized light and comparison varieties. Explains the function and purpose of the illuminator, sub-stage condenser, objective, and ocular. Establishes acceptable performance criteria and image quality as it relates to compromises among resolution, magnification, and visibility. Presents the use of specialized contrast enhancement methods and illumination techniques. Explains the theory and use of the polarized light microscope in the examination of anisotropic, birefringent, and optical properties of crystalline materials. Describes the use of the microscope as a quantitative measuring tool. Introduces instrument systems calibration methods for both the microscope as well as imaging software. Describes the collection and examination of micro-traces and the use of micro-trace catalogs. Examination and discussion of firearms, bullet, tool marks, hair and fiber characteristics. Lab access fee of $30 for computers applies. Course fee of $152 for materials applies.

FSCI 3880
Expert Witness Professional Practices
3:3:0 Spring
* Prerequisite(s): (CJ 1330 and CJ 2350 each with a C+ or higher) and University Advanced Standing
Stresses the importance of background checks, polygraph tests and personal integrity. Teaches Professional Competence: training, degrees and certifications, publications, affiliations, testimony track record, continuing education. Describes the duties and the special privileges of opinion testimony afforded to expert witnesses. Explains the Rules of Evidence and statistical reliability as they pertain to scientific data and findings. Presents guidelines for case review and report writing. Discusses trial strategy, testimony, presentations, and dangers that confront the expert witness at court. Discusses cross-examination strategies. Teaches professional business practices including personal organization, contracts for hiring the expert for professional services, consultation, correspondence, record keeping, fee setting, and fee collection.

FSCI 4000
Firearms Examination
3:3:0 Fall
* Prerequisite(s): (CJ 1350 and FSCI 3400 with a C+ or higher) and University Advanced Standing
* Prerequisite(s) or Corequisite(s): FSCI 3860
Identifies modern firearms and ammunition while teaching how they operate and are manufactured. Explains how to collect, preserve, transport, and safely handle firearms and ammunition. Discusses the procedures of firing and the recovery of test bullets. Teaches the procedures of serial number restoration, gun shot residue tests, distance determinations, microscopic and chemical examinations. Includes how to interpret data, write reports of findings, and present results in a court of law. Course fee of $65 applies.

FSCI 4100
Forensic Pathology
3:3:0 Fall
* Prerequisite(s): FSCI 3300, FSCI 3830 and University Advanced Standing
Current Topics in Forensic Science
1 to 3:1 to 3:0 On Sufficient Demand
* Prerequisite(s): Department Approval and University Advanced Standing
Explores current topics in forensic science. Requires a special topic related to the area of study. May be repeated for a maximum of 9 credits toward graduation.

FSCI 4191R
Directed Reading and Special Projects
On Sufficient Demand
* Prerequisite(s): Department Approval and University Advanced Standing
Offers independent study as directed in theoretical, experimental, or practical discipline emphasis in an area not covered by regular courses. May be Graded Credit/No Credit. May be repeated for a maximum of 9 credits toward graduation.

FSCI 443R
Directed Research in Forensic Science
2 to 7:1 to 15 Fall, Spring, Summer
* Prerequisite(s): Instructor Approval and University Advanced Standing
Provides undergraduate research. Guidance by a faculty member directs literature data, experimental design, data acquisition, interpretation of results, and conclusion. Written report, suitable in form for publication, necessary for completion. May be repeated for a maximum of 7 credits toward graduation. Lab access fee of $30 for computers applies. Course fee of $310 for materials applies.

FSCI 475R
Current Topics in Forensic Science
3:3:0 On Sufficient Demand
* Prerequisite(s): CJ 1350 or FSCI 3400 with a 'C+' or higher, and University Advanced Standing
Provides actual, on-the-job work experience on a paying or non-paying (volunteer) basis in a Forensic Science profession or other approved related discipline. Emphasizes successful work experience through job shadowing of a professional. May be repeated for a maximum of 9 credits toward graduation. May be graded Credit/No Credit.

FSCI 481R
Forensic Science Internship
On Sufficient Demand
* Prerequisite(s): Department Approval and University Advanced Standing
Provides actual, on-the-job work experience on a paying or non-paying (volunteer) basis in a Forensic Science profession or other approved related discipline. Emphasizes successful work experience through job shadowing of a professional. May be repeated for a maximum of 9 credits toward graduation. May be graded Credit/No Credit.

FSCI 4990
Forensic Investigation Capstone
3:3:0 Spring
* Prerequisite(s): FSCI 3300, FSCI 3830 and University Advanced Standing
Applies qualitative, quantitative, and/or mixed research methods for selected issues in forensic investigation. Requires the student to develop and present an undergraduate research project both orally and in writing. Students should plan to register for this course in their last semester of the program.
## Geography (GEOG)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Title</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GEOG 1000</td>
<td>Introduction to Physical Geography</td>
<td>Explores the world through each of the major components of physical geography: climatology, hydrology, geomorphology, and biogeography. Introduces the dynamic interactions among climate, vegetation, soils, and landforms. Can be taken in conjunction with laboratory exercises in GEOG 1005.</td>
</tr>
<tr>
<td>GEOG 1005</td>
<td>Introduction to Physical Geography Lab 1:0:2</td>
<td>Designed to be taken in conjunction with GEOG 1000. Explores the world from a broad perspective, examining each of the major components of physical geography: climatology, hydrology, geomorphology, and biogeography. Investigates physical processes of and interactions among climate, vegetation, soils, and landforms.</td>
</tr>
<tr>
<td>GEOG 130G</td>
<td>Survey of World Geography GI 3:0</td>
<td>Explores the world in which we live. Studies major countries of the world with special emphasis on location, physical environment, culture, resources, and current events. May be delivered online.</td>
</tr>
<tr>
<td>GEOG 1400</td>
<td>Introduction to Human Geography 3:0</td>
<td>Examines the theoretical, spatial, and relational aspects of human activity across the Earth's surface. Discusses the analytical frameworks for understanding the interactions of social, cultural, economic and political systems. Topics include population dynamics, international development, human conflicts, and urbanization.</td>
</tr>
<tr>
<td>GEOG 1600</td>
<td>Geography of Utah 3:0</td>
<td>Applies principles and methods of physical, cultural, and human-environment geography to the study of Utah's people, places, and environments; considers problems of adjustment, including natural hazards, environmental concerns, and human problems. Designed for Secondary Education students seeking Geography or Social Science Composite certifications.</td>
</tr>
<tr>
<td>GEOG 2000</td>
<td>Sustainability and Environment 3:0</td>
<td>Explores relationships of human and natural systems, how cultural groups experience nature, and global sustainability. Examines different ways of perceiving nature, resources, the environment, and society. Critically analyzes links between social, economic, political, historical, cultural, and environmental processes. Discusses environmental problems and ways to build more sustainable futures. Includes participation in locally sustainability issues.</td>
</tr>
<tr>
<td>GEOG 2100</td>
<td>Geography of the United States 3:0</td>
<td>Surveys primarily the regional geography of the United States and, secondarily, of Canada. Explores subregions of each country in detail. Includes topics such as culture, environment, economy, urbanization, transportation systems, territory and political borders.</td>
</tr>
<tr>
<td>GEOG 2200</td>
<td>Geography of Europe 3:0</td>
<td>Provides a regional survey of Europe including topics such as economic development, environment, politics, society and culture. Explores the place of Europe in geopolitical and global economic systems. Discusses internal relationships within the European Union, Eastern Europe, and Russia.</td>
</tr>
<tr>
<td>GEOG 2500</td>
<td>Geography of Latin America and the Caribbean 3:0</td>
<td>Surveys the Americas south of the United States. Explores each subregion of Latin America and the Caribbean in detail. Includes topics such as development, environment, indigenous peoples, history, and national political and financial crises.</td>
</tr>
<tr>
<td>GEOG 3010</td>
<td>Economic Geography 3:0</td>
<td>A course encompassing the study of humankind's economic activities on the earth, including hunting, gathering, agriculture, mining, manufacturing, forestry, fishing, high technology, and world trade. Studies population, environmental issues, urban patterns, and travel and tourism. Uses lectures, oral response, field trips, and audiovisual aids.</td>
</tr>
<tr>
<td>GEOG 3100</td>
<td>Cartography 3:2:3</td>
<td>Introduces fundamental principles of cartography including perception, visualization, topographic and thematic map interpretation, field mapping techniques (including GPS), and creating computer-based maps. Includes concepts of direction, scale, grids, projections, spatial transformations, spatial data analysis, data manipulation decisions, color theory and application, and principles of cartographic design and critical evaluation.</td>
</tr>
<tr>
<td>GEOG 3110</td>
<td>Urban Geography 3:0</td>
<td>Focuses on the origins, growth, structure and function of cities. Examines social and political dimensions of urban life and the emergence of new urban spaces around the world. Includes case studies in the decline of urban industrial America and the rise of Sunbelt and Edge Cities.</td>
</tr>
<tr>
<td>GEOG 3250</td>
<td>Cultural Geography 3:0</td>
<td>Explores the cultural landscape of the world's peoples. Describes the geographic complex of cultural forms including language, religion, music, art, architecture, folklore, food, clothing and land use. Topics include cultural conflicts, globalization, and the international entertainment industry.</td>
</tr>
<tr>
<td>GEOG 3400</td>
<td>Environmental Remote Sensing 3:2</td>
<td>Introduces the history, theory, and operation of remote sensing software. Includes an introduction to the electromagnetic spectrum and signals, sensors, image processing, and classification techniques. Provides a survey of the concepts and techniques of remote sensing and image analysis for mapping and monitoring natural resources, environment and land use, and an array of geoscientific applications at different scales. Software fee of $15 applies. Lab access fee of $35 applies.</td>
</tr>
<tr>
<td>GEOG 3430</td>
<td>Political Geography 3:0</td>
<td>Surveys the geographic dimensions of political action and theory at local, national and global scales. Covers topics such as geopolitics, nationalism, territory, and political conflicts. Examines subjects such as American electoral patterns, Cold War geographies, and 21st century global security.</td>
</tr>
<tr>
<td>GEOG 3500</td>
<td>Geomorphology 4:3</td>
<td>Examines the geologic processes operating at the Earth's surface to understand the origin of our planet's varied landscapes. Explores how landforms respond to climate change, tectonic forcing, and changes in land use. Addresses common geomorphic processes including weathering, soils, hillslope processes, fluvial processes, and landslides, aeolian transport, glacial and periglacial environments, karst, and coastal processes. Course lab fee of $21 applies.</td>
</tr>
</tbody>
</table>
**Course Descriptions**

**GEOG 3600 (Cross-listed with: GIS 3600)**
Introduction to Geographic Information Systems
4:3:3  
*Prerequisite(s): [Completion of a course that meets the PP (Physical Science) or SS (Social Science) general education requirement is recommended] and University Advanced Standing*

Introduces the history, theory, and operation of Geographic Information Systems (GIS). Includes an introduction to GIS data sources, database design, data input, spatial analysis, and map production. Offers valuable preparation for careers in geography, geology, geographic information systems, geomatics, planning, surveying, marketing, environmental technology, biology, engineering, and other related fields. Software fee of $18 applies. Lab access fee of $35 for computers applies.

**GEOG 3650**
Advanced Geographic Information Systems
4:3:3  
*Prerequisite(s): GEOG 3600 and University Advanced Standing*

Expands on GEOG 3600, Introduction to Geographic Information Systems (GIS), and reviews advanced GIS functions and applications to the sciences. Fundamental topics include spatial analysis, geostatistical analysis, 3-D modeling, and project development and implementation. Software fee of $18 applies. Lab access fee of $35 applies.

**GEOG 3700**
Wetland Studies
3:3:0  
*Prerequisite(s): GEOG 1000 OR GEO 1010 OR ENVT 1110 OR BIOL 1010; CHEM 1210 OR Instructor Approval; University Advanced Standing*

Examines the structure and function of wetlands with emphasis on wetland biogeochemistry processes, soils, plants, water, etc. and analyzes chemistry of wetlands. Examines the structure and function of wetlands with emphasis on wetland geology and its effect on life in the seas. Studies the physical parameters that allow marine life to survive in ocean conditions. May be repeated for a maximum of 4 credits toward graduation. May be graded Credit/No Credit.

**GEOG 3800 (Cross-listed with: HIST 3800)**
Environmental History of the United States
3:3:0  
*Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing*

Examines the history of the American landscape. Surveys the physical geography of the United States, landscape change during Native American to European transition, and causes of agricultural and industrial pollution. Topics include land ethics, processes of environmental degradation, technological remedies, history of federal laws and protection agencies. May include field experiences.

**GEOG 4100**
Geospatial Field Methods
3:1:4  
*Prerequisite(s): (GEOG 3600 or GIS 3600) and MATH 1060; University Advanced Standing*

Provides an introduction to measuring, recording, and finding geographic locations in the field using GPS and other methods widely used in industry and research. Applies GPS and other field techniques to scientific problems, and emphasizes hands-on experience with field equipment. Covers geographic reference frames, and integrates field data with desktop GIS software. Software fee of $18 applies. Lab access fee of $35 applies.

**GEOG 482R**
GIS Internship
1 to 3:1 to 4  
*Prerequisite(s): GEOG 3600 and GEOG 3650 or equivalent), department approval, declared major in any Earth Science program, and University Advanced Standing*

Engages students in supervised GIS work in a professional setting. Includes maintaining a journal of student experiences and preparing a paper summarizing their experience. A maximum of 3 credit hours may be counted toward graduation. May be graded Credit/No Credit.

**GEOG 489R**
Student Research in Geography
1 to 4:0 to 12  
*Prerequisite(s): Junior or Senior standing, instructor approval, and University Advanced Standing*

Provides the opportunity to conduct research under the mentorship of an Earth Science department faculty member. Includes any combination of literature reviews, original research, and/or participation in ongoing departmental projects. Involves students in the methodology of original geographic research. Requires preparation and presentation of oral and/or written reports, typically presented in a public forum. May be repeated for a maximum of 4 credits toward graduation.

**GEOG 489R**
Special Topics in Geography
1 to 4:1 to 4:0 to 9  
*Prerequisite(s): Instructor approval and University Advanced Standing*

Explores or examines special topics in geography. Topics vary depending on student demand and current topics of significance in geography. May be repeated for a maximum of 4 credits toward graduation.

**Geology (GEO)**

**GEO 1010**
Introduction to Geology
3:3:0  
*Prerequisite(s): [Completion of a course that meets the PP (Physical Science) or SS (Social Science) general education requirement is recommended] and University Advanced Standing*

Studies planet earth: its materials, structure, dynamics, and surface features. Taken alone it is designed for non-science students who want a broad introduction to earth science and a greater appreciation of their physical surroundings. Taken in conjunction with laboratory exercises in GEO 1015, the class is sufficiently rigorous to articulate as an introductory geology class.

**GEO 1015**
Introduction to Geology Laboratory
1:0:2  
*Prerequisite(s): [Completion of a course that meets the PP (Physical Science) or SS (Social Science) general education requirement is recommended] and University Advanced Standing*

Designed to be taken in conjunction with GEO 1010. Includes the identification of rocks, minerals, basic land forms and structures. Studies geologic processes occurring in desert, glacial, mountainous and other environments. Taken with GEO 1010, the class will articulate as an introductory earth science class. Course Lab fee of $11 for transportation, lab applies.

**GEO 101H**
Introduction to Geology
3:3:0  
*Prerequisite(s): [Completion of a course that meets the PP (Physical Science) or SS (Social Science) general education requirement is recommended] and University Advanced Standing*

Studies the structural and dynamic systems of the earth that create our environment. Stresses geology and related topics chosen for astronomy and meteorology. Course Lab fee of $10 for transportation, lab applies.

**GEO 1020 (Cross-listed with: BIOL 1200)**
Prehistoric Life
3:3:0  
*Prerequisite(s): BIOL 1010 or GEO 1010 recommended*

Studies prehistoric life. Uses the concepts of biology and physical science. Studies major groups of ancient animals and plants as found in the rock record. Includes aspects and fundamental concepts of biology, ecology, and geology.

**GEO 1080**
Introduction to Oceanography
3:3:0  
*Prerequisite(s): [Completion of a course that meets the PP (Physical Science) or SS (Social Science) general education requirement is recommended] and University Advanced Standing*

Introduces the origin and development of the oceans, marine geology and its effect on life in the seas. Discusses waves, tides, currents, and their impact on shorelines, the ocean floor, and basins. Examines physical processes as they relate to oceanographic concepts. Includes media as an alternative to the actual oceanic experience. Completers should have a basic knowledge and appreciation of the ocean's impact to the world's ecology.

**GEO 1085**
Introduction to Oceanography Laboratory
1:0:2  
*Prerequisite(s): [Completion of a course that meets the PP (Physical Science) or SS (Social Science) general education requirement is recommended] and University Advanced Standing*

A basic laboratory experience in the physical aspects of Oceanography. Introduces applied skills in Oceanography such as Marine Geology and Oceanographic Chemistry. Studies the physical parameters that allow marine life to flourish. Uses maps to study the structure of the sea floor and its relationship to plate tectonics. Provides hands-on experiences with salinity and marine chemistry. Course Lab fee of $10 applies.
GEO 1220 Historical Geology
3:3:0 Fall, Spring
* Prerequisite(s): GEO 1010
Examines the physical and biological evolution of the Earth from its origins 4.6 billion years ago to present day. Reviews fundamental processes and principles of geology and biology. Develops tools for interpreting rocks and the fossil record. Explores important changes through geologic time, including plate tectonics, paleogeography, mountain building, geochemical cycles, climate, sea level, and the origin and evolution of the great diversity of life on Earth.

GEO 1225 Historical Geology Laboratory
1:0:2 Fall, Spring
* Prerequisite(s): GEO 1010
* Prerequisite(s) or Corequisite(s): GEO 1220
Is designed to be taken in conjunction with GEO 1220. Reviews fundamental processes and principles of geology and biology. Develops skills for identifying main types of minerals, rocks, and fossils. Develops tools for interpreting Earth history through analysis of rocks, fossils, and paleoclimatic data. Develops skills for correlating strata and reading geologic mapping. Includes field trips to study local outcrops. Course lab fee of $10 applies.

GEO 202R (Cross-listed with: BIOL 202R) Science Excursion
1:0:2 Fall, Spring, Summer
For students interested in the natural world. Explores a wide variety of topics in science, including geology, botany, astronomy, zoology, ecology, and archeology. Consists of a minimum of a four-day field trip. Participants should gain an increased understanding of several fields of scientific study. May be repeated as many times as desired for interest, however a maximum of 3 credits may count toward graduation.

GEO 204R (Cross-listed with: BIOL 204R) PP Natural History Excursion
3:1:6 On Sufficient Demand
For students interested in the natural world. Promotes an in-depth look at a wide variety of topics in science, including geology, botany, astronomy, zoology, ecology, and archeology. Consists of 15 hours of lecture plus an appropriate field trip. Participants should gain an interdisciplinary understanding of science and nature. May be repeated for up to six credits toward graduation.

GEO 2070 Natural History of the Colorado Plateau
3:1:4 On Sufficient Demand
* Corequisite(s): BIOL 2070
Addresses the geological component of the Natural History Course taught in conjunction with BIOL 2070 at the Capitol Reef Field Station during the summer months. Teaches students about the rocks and strata of the area, the processes that mold the landscape, and the relationships between the physical and biological aspects of the ecosystem, including humans. Provides an intense, hands-on field course where faculty and students participate together in a natural setting. Requires students to live and learn at the field station for most of the course.

GEO 3000 Environmental Geochemistry
3:3:0 Fall
* Prerequisite(s): GEO 1010, (MATH 1050 or MATH 1055), CHEM 1210, University Advanced Standing
Introduces low temperature, environmental geochemistry with a focus on the use of quantitative measures to understand surficial geologic processes. Includes equilibrium thermodynamics and kinetics of chemical reactions, aqueous solutions, sorption and complexation, oxidation-reduction reactions, and the chemistry of the continental, marine, and atmospheric environments. Incorporates numerous examples to demonstrate how the conceptual framework can be applied in solving practical problems.

GEO 3070 (Cross-listed with: BIOL 3070) Advanced Desert Natural History
3:1:4 On Sufficient Demand
* Prerequisite(s): University Advanced Standing
Integrates the geological and biological systems of the southwestern deserts. Includes discussion of the ecology and geology of unique desert ecosystems; the rocks and strata providing the foundation of the landscape; the evolutionary and geological processes that mold the landscape and the species within it over time; and, the relationships between the physical and biological aspects of the ecosystem, including humans. Provides an intense, hands-on field course where faculty and students participate together in daily activities and experimental design in a natural setting. Is held part of the time on the UVU main campus and part of the time at the Capitol Reef Field Station. Requires students to live and learn at the field station for approximately 1/3 of the course.

GEO 3080 Earth Materials
3:3:0 Fall
* Prerequisite(s): GEO 1010, GEO 1015, and University Advanced Standing; CHEM 1210 or other chemistry course recommended
* Corequisite(s): GEO 3085
Investigates the physical characteristics, chemical properties, formation, and distribution of geologically significant igneous and metamorphic rocks and minerals. Develops ability to examine rocks and minerals, and analyze their chemical properties to understand geologic processes. Involves field trips, including the possibility of weekend trips. Course lab fee of $32 for transportation, lab supplies.

GEO 3085 Earth Materials Laboratory
1:0:3 Fall
* Prerequisite(s): GEO 1010, GEO 1015, and University Advanced Standing; CHEM 1210 or other chemistry course recommended
* Corequisite(s): GEO 3080
Focuses on identification and classification of common rocks and minerals in hand sample and introduces optical mineralogy and petrography. Investigates the occurrence and formation of common rocks and minerals through direct observation of their properties and occurrence. Involves field trips, including the possibility of weekend trips.

GEO 3100 Isotope Geochemistry
3:3:0 Spring
* Prerequisite(s): GEO 1010, (MATH 1050 or MATH 1055), CHEM 1210 and University Advanced Standing
Provides an introduction to the principles and applications of isotope geochemistry, which plays an important role in a wide variety of geological, biological, and environmental investigations, and summarizes the analytical techniques used in the field. Examines the theory of radiometric dating and provides an overview of the most commonly used geochronometers. Focuses on stable isotopes with emphasis on oxygen, hydrogen, carbon, nitrogen, and sulfur and with applications in paleoclimatology, ecology and paleoecology, archeology, and hydrology.

GEO 3105 Isotope Geochemistry Laboratory
1:0:2 Spring
* Prerequisite(s): GEO 1010, (MATH 1050 or MATH 1055), CHEM 1210 and University Advanced Standing
Explores the analysis and interpretation of real isotope data and provides hands-on experience in their use to solve problems and answer questions in geochronology, paleoclimatology, hydrology, and archaeology. Requires data analysis utilizing Microsoft Excel.

GEO 3200 Geologic Hazards
4:3:3 Fall
* Prerequisite(s): GEO 1010, GEO 1015, and University Advanced Standing
Investigates the ways in which geologic hazards (including earthquakes, landslides, and volcanoes) impact civilization. Studies the causes of these hazards, how to assess whether each of these hazards is a concern at a particular site, and how each type of hazard can be planned for. Includes field-based exercises. Course Lab fee of $21 applies.

GEO 3400 Forensic Geology
4:3:3 Not Offered
* Prerequisite(s): (CHEM 1210 and CHEM 1215 or higher) and University Advanced Standing
* Corequisite(s): CHEM 1220 and CHEM 1225 recommended
Provides a survey of the uses of geology in solving crime. Emphasizes actual criminal cases, hands-on laboratory activities, and critical observation skills. Covers mineral-forming processes in rock, soil, sediment, and teaches minerals identification with a hand lens and microscope. Examines some or all of the following: mineral pigments related to art forgery and cosmetics; imitation amber and other gems; environmental pollution; and crimes in archeology. Serves as an introduction to trace analysis.
GEO 3500 (Cross-listed with: GEOG 3500) Geomorphology 4:3:3 Spring
* Prerequisite(s): MATH 1050 or MATH 1055 or equivalent, University Advanced Standing, and one of the following lecture and lab pairs: (GEO 1010 and GEO 1015) or (GEO 1000 and GEO 1005)
Examines the geologic processes operating at the Earth’s surface to understand the origin of our planet’s varied landscapes. Explores how landforms respond to climate change, tectonic forcing, and changes in land use. Addresses common geomorphic processes including weathering, soils, hill slope processes, fluvial processes and landforms, aeolian transport, glacial and periglacial environments, karst, and coastal processes. Course Lab fee of $21 applies.

GEO 3700 Structure and Tectonics 4:3:3 Spring
* Prerequisite(s): GEO 1220, GEO 3080, (PHYS 2010 or PHYS 2210), and University Advanced Standing
Investigates the fundamentals of global plate tectonics and rock deformation. Includes applications to petroleum geology, environmental geology, and engineering geology. Explores geometric techniques of structural analysis in the laboratory. Involves field trips, possibly including weekend trips. Course lab fee of $21 for transportation, lab applies.

GEO 4080 Petrology 4:3:3 Spring Even Year
* Prerequisite(s): GEO 3080, CHEM 1220, and University Advanced Standing
Intended for students pursuing graduate school in geology or a career in geology such as mining or petroleum geology. Examines mineral equilibrium in igneous, sedimentary, and metamorphic rocks as it pertains to the genesis of these rocks. Introduces students to techniques of petrographic microscopy. Surveys the use of analytical tools in researching igneous and metamorphic rocks, including the use of isotopes for dating and for tracing the origin of magma and the use of the electron microprobe for determining temperatures of metamorphism. Examines the diagenesis of sandstones. Course Lab fee of $21 applies.

GEO 4200 (Cross-listed with: BIOL 4200, CHEM 4200, PHYS 4200) Teaching Methods in Science 3:2:2 Fall, Spring
* Prerequisite(s): Acceptance into secondary education program, senior-level standing, instructor approval, and University Advanced Standing
Examines objectives, instructional methods and curriculum for teaching science in the secondary school. Includes developing, adapting, evaluating, and using strategies and materials for teaching biological and physical sciences, appropriate both to the special needs of the learners and the special characteristics of science discipline.

GEO 4500 Sedimentary Geology 4:3:3 Spring
* Prerequisite(s): GEO 1220, GEO 1225, GEO 3080, and University Advanced Standing; CHEM 1210 or other chemistry recommended
Examines the origin, classification, and spatiotemporal distribution of sedimentary rocks. Examines the fundamental principles of sedimentology, petrology, and stratigraphy. Reviews weathering processes and soil formation. Develops analytical skills regarding particle size, erosion, transportation, and deposition. Develops skills for identifying and classifying sedimentary rocks. Develops tools for describing stratigraphic sections and interpreting the rock record. Develops skills for correlating strata and reading geologic maps. Develops critical thinking and writing skills. Includes field trips to study various outcrops in the state of Utah.

GEO 4510 Paleontology 4:3:2 Fall Odd Year
* Prerequisite(s): GEO 1220, GEO 1225, GEO 3080, (BIOL 1010 or BIOL 1610), and University Advanced Standing; GEO 4500 recommended
Exposes students to a wide variety of topics encompassed within the field of paleontology. Offers substantial knowledge of the major groups of life represented in the fossil record. Discusses the most fundamental concepts in paleontology, such as key principles of evolution and paleoecology. Offers an understanding of what paleontologists do, why the field is so crucial, and why all earth scientists should have at least a basic understanding of paleontology. Requires two weekend field trips (dates will be discussed in class). Course lab fee of $21 for transportation, lab applies.

GEO 4600 Field Experience 6:0:18 Summer
* Prerequisite(s): GEO 3080, GEO 3700, GEO 4500, and University Advanced Standing
Is an intensive field course giving students hands-on experience with several aspects of Earth Science field work. Involves 8 to 10 hours of field work per day, for three to five days per week, for four to six weeks. Requires an independent study program to be developed approved by a committee of Earth Science faculty. Requires an independent study program to be developed approved by a committee of Earth Science faculty. Requires an independent study program to be developed approved by a committee of Earth Science faculty. Requires an independent study program to be developed approved by a committee of Earth Science faculty.

GEO 480R Earth Science Seminar .5:5:0 Fall, Spring
* Prerequisite(s): (GEO 3080 or ENVT 3790 or Instructor Approval) and University Advanced Standing
Exposes students to current research topics in Earth Science and related fields. Provides an opportunity for students to attend bi-weekly lectures presented by department faculty and invited speakers. Lectures are usually a summary of the speaker's recent research results, or investigative projects in an earth science industry. May be repeated for a maximum of 2 credits toward graduation.

GEO 482R Geologic Environmental Internship 1 to 3:1 to 3:0 Fall, Spring, Summer
* Prerequisite(s): GEO 1010 or ENVT 1110; 12 credit hours of any GEO, GEOS, or ENVT courses; declared major in any Earth Science program and University Advanced Standing
Engages students in supervised geologic or environmental work in a professional setting. Requires approval by the Chair of the Department of Earth Science. Includes maintaining a journal of student experiences and preparing a paper summarizing their experience. A maximum of 3 credit hours may be counted toward graduation. May be graded Credit/No Credit.

GEO 489R Student Research 1 to 4:0:3 to 12 Fall, Spring, Summer
* Prerequisite(s): GEO 1015, Junior or Senior standing, instructor approval, and University Advanced Standing
Provides students the opportunity to conduct research under the mentorship of an Earth Science department faculty member. Includes any combination of literature reviews, original research, and/or participation in ongoing departmental projects. Involves students in the methodology of original geologic research. Requires preparation and presentation of oral and/or written reports, typically presented in a public forum. May be repeated for a maximum of 6 credits toward graduation.

GEO 490R Special Topics in Geology 1 to 4:1 to 4:0 to 9 On Sufficient Demand
* Prerequisite(s): GEO 1010, GEO 1015, Junior or Senior standing, instructor approval, and University Advanced Standing
Explores or examines special topics in geology. Topics vary depending on student demand and current topics of significance in geology. May be repeated for a maximum of 8 credits toward graduation.

GEO 495R Independent Study 1 to 4:0:3 to 12 Fall, Spring, Summer
* Prerequisite(s): GEO 1010, GEO 1015, and University Advanced Standing
Requires an independent study program to be developed with one or more Earth Science faculty member and approved by a committee of Earth Science faculty. Includes some combination of literature review, field work, numerical analysis, and/or laboratory analysis. Involves the preparation of a written report. An oral presentation may also be required. May be repeated for up to 4 credits.

GEO 525R Advanced Topics for Geology Teachers 1 to 5:1 to 5:0 to 10 On Sufficient Demand
* Prerequisite(s): Departmental Approval
For licensed teachers or teachers seeking to recertify their earth science or integrated science endorsements from the Utah State Office of Education. Teaches principles of geology and pedagogy of teaching geology for teachers in public or private schools. Emphasis will be placed on correlation with the Utah Core Curriculum, the National Science Education Standards, and the Benchmarks of Project 2061. Topics will vary.
GER 1010  
Beginning German I  
4:4:1  Fall, Spring

Provides an introduction to the language and culture of German-speaking countries. Emphasizes listening, speaking, reading, and writing skills along with basic grammar and vocabulary within the cultural context of modern German-speaking societies. Uses an eclectic method of instruction, with extra attention given to oral and written proficiency. Requires weekly lab. Lab access fee of $10 applies.

GER 1020  
Beginning German II  
4:4:1  Fall, Spring

* Prerequisite(s): Student should have equivalent knowledge of GER 1010

Provides a second-semester introduction to the language and culture of German-speaking countries. Emphasizes listening, speaking, reading, and writing skills along with basic grammar and vocabulary within the cultural context of modern German-speaking societies. Uses an eclectic method of instruction, with extra attention given to oral and written proficiency. Requires weekly lab. Lab access fee of $10 applies.

GER 1110  
German Conversation I  
4:4:0  On Sufficient Demand

A total immersion course taught in a classroom in a German speaking country. Students live in native, German-speaking homes or other total immersion environments. Practices creative language in conversation to develop proficiency in the German language at the novice level. Includes intensive listening and speaking experience to improve aural-oral proficiency. Students will attend cultural and sporting events. Offered only with the Summer Study Abroad program. May be taken concurrently with GER 2700.

GER 115R  
German Conversation I  
1:1:0  Fall, Spring

Offers novice German speakers opportunities to enhance their speaking proficiency in the target language by focusing on oral verbal production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, and sharpen listening comprehension for natural conversational flow. Contrasts with all other first year courses which must strive to produce mastery of the whole range of language acquisition components, including writing, grammar, etc. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of speech opportunities and defusing concern for such matters as spelling, etc. Increases mastery of lexical items through increased frequency of oral usage. May be repeated for a maximum of 3 credits toward graduation.

GER 2010  
Intermediate German I  
4:4:1  Fall, Spring

* Prerequisite(s): Students should have equivalent knowledge of GER 1020

Reviews and builds upon the grammar, reading, writing and conversational skills learned in the first year courses. Introduces readings and discussions on the history, culture, and literature of the German speaking world, maintaining a focus on oral proficiency. Lab access fee of $10 applies.

GER 202G  
Intermediate German II  
4:4:0  Fall, Spring

* Prerequisite(s): Students need equivalent knowledge of GER 2010

Studies fourth-semester conversational German that is used in daily settings. Includes culture study, pronunciation, reading, and grammar. Emphasizes conversation in real life situations. Uses field trips and guest lecturers. Prepares students to enter the advanced level of German. Completers should be able to converse enough to visit or work in a German speaking country. Lab access fee of $10 applies.

GER 215R  
German Conversation II  
1:1:0  Fall, Spring

* Prerequisite(s): Students should have equivalent knowledge of GER 2010

Offers lower division / novice German speakers opportunities to enhance their speaking proficiency in the target language by focusing on oral verbal production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, sharpen listening comprehension, and develop conversational strategies such as circumlocution and managing a conversation with useful expressions for starting a conversation, gaining time to think, helping the other speaker, seeking agreement, etc. Contrasts with all other first year courses which must strive to produce mastery of the whole range of language acquisition components, including writing, grammar, etc. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of speech opportunities and defusing concern for such matters as spelling, etc. Increases mastery of lexical items through increased frequency of oral usage. May be repeated for a maximum of 3 credits toward graduation.

GER 2700  
Immersion German Civilization and Culture  
4:4:0  On Sufficient Demand

A total immersion course of classroom study and experience in a German speaking country. Students will live in native, German-speaking homes or other total immersion environments. Includes classroom study, supervised travel of cultural interest, and attendance at various cultural and sporting events. Includes written response, journals, and examinations. Offered only with the Summer Study Abroad program. May be taken concurrently with GER 1110.

GER 3030  
German Composition and Conversation  
3:3:0  Fall Odd Year

* Prerequisite(s): (GER 202G or equivalent experience) and University Advanced Standing

Expands knowledge and skill base developed in lower-division courses with an emphasis in idiomatic expression in spoken and written German. Using authentic texts, students will learn to read, speak, and write with more precision and accuracy. Successful completion of this course will prepare students to participate fully in subsequent advanced courses.

GER 3050  
Advanced German  
3:3:0  Fall, Spring

* Prerequisite(s): It is recommended that students have GER 202G, one-year residency in German speaking country, or instructor approval

Designed for non-native German speakers who have lived in a German speaking country for at least one year. Includes a review of grammar and an introduction to German literature, art, music, and expository writing. Lab access fee of $10 applies.

GER 3200  
Business German  
3:3:0  Spring

* Prerequisite(s): (GER 3050 or equivalent knowledge) and University Advanced Standing

For those who plan to pursue careers in international business or related fields, learn the business language for German, understand the German corporate culture, or plan to major or minor in German. Teaches German business terminology and prepares students to take the International German Business Certificate examination. Presents Germany's role in a global economy. Explores how students can effectively do business with German companies within the framework of German culture. Includes current materials dealing with today's issues. Will be taught entirely in the German language. Lab access fee of $10 applies.

GER 351G  
German Culture and Civilization  
3:3:0  Spring Even Year

* Prerequisite(s): GER 3050 and University Advanced Standing

Explores chronologically the cultural formation and development of German-speaking societies and cultures in Germany, Austria, Switzerland, and other German-speaking regions. Discusses the ethnic development and linguistic history of these societies and countries. Presentations and class instruction conducted entirely in German.

GER 380R  
Topics in German Studies  
3:3:0  Fall Even Year

* Prerequisite(s): University Advanced Standing

Explores a variety of subjects relevant to the study of German language, literature, history and culture. Engages students in critical analysis and discourse. Possible topics may include Medieval German literature, Weimar film, History of the German Language, current events in Germany, or the Holocaust. May be repeated for a maximum of 6 credits toward graduation.
GIS 3650 Thematic Mapping Culture and Societies
3:3:0 On Sufficient Demand
* Prerequisite(s): GIS 2640 and University Advanced Standing
Focuses on thematic maps of human activity covering the major cultural regions of the world considering cultural, political, and economic environments. Presents various ways to cartographically depict sociological data such as: population, religion, language, migration, and industries, etc... Involves producing a thematic global and regional mapping project(s) as presented in this course. Lab access fee of $45 for computers applies.

Greek (GRK)

GRK 1010 Beginning Ancient Greek I
4:4:0 LH
* Prerequisite(s): ENGL 1010 or ENGL 1005
Studies Ancient Greek language at the introductory level, focusing primarily on Attic Greek. Centers on grammar and textbook exercises with some analysis of literary and/or philosophical selections in Ancient Greek. Relates particularly to students interested in studying Ancient Greek culture and thought.

GRK 1020 Beginning Ancient Greek II
4:4:0 Spring
* Prerequisite(s): GRK 1010
Continues study of the Ancient Greek language at the introductory level, focusing primarily on Attic Greek. Centers on grammar and textbook exercises with some analysis of literary and/or philosophical selections in Ancient Greek. Relates particularly to students interested in studying Ancient Greek culture and thought.

GRK 1040 Intermediate Ancient Greek I
4:4:0 On Sufficient Demand
* Prerequisite(s): GRK 1020
Studies the Ancient Greek language at the intermediate level, focusing primarily on Attic Greek. Centers on grammar and textbook exercises with some analysis of literary and/or philosophical selections in Ancient Greek. Relates particularly to students interested in studying Ancient Greek culture and thought.

GRK 2060 Intermediate Ancient Greek II
4:4:0 On Sufficient Demand
* Prerequisite(s): GRK 2010
Studies Ancient Greek language at the intermediate level, focusing primarily on Attic Greek. Centers on grammar and textbook exercises with some analysis of literary and/or philosophical selections in Ancient Greek. Relates particularly to students interested in studying Ancient Greek culture and thought.

GRK 3010 Readings in Ancient Greek
3:3:0 On Sufficient Demand
* Prerequisite(s): GRK 2020 and University Advanced Standing
Instructs students in the translation of selected Ancient Greek poetry and prose.
History (HIST)

HIST 1500
World History to 1500
3:3:0  Fall, Spring, Summer
Serves as an introduction to pre-modern world civilization. Surveys cultural, economic, intellectual, and social history up to the year 1500, with special attention to the rise of world religions.

HIST 151G
World History from 1500 to the Present
3:3:0  Fall, Spring, Summer
Serves as an introduction to modern world civilization. Surveys cultural, economic, intellectual and social developments from 1500 to the present. Emphasizes global, comparative, and intercultural issues.

HIST 1700
American Civilization
3:3:0  Fall, Spring, Summer
Stresses movements and developing institutions that are important for an appreciation of American History from the Pre-Colombian period to the present. Discussions include analysis of developing political, economic, and social institutions and their interrelationships with, and impact upon, the geographical features of the land. Includes book reports, oral response, research papers, media presentations and applications to current events.

HIST 170H
American Civilization
3:3:0  Spring
Stresses movements and developing institutions that are important for an appreciation of American History from the Pre-Colombian period to the present. Discussions include analysis of developing political, economic and social institutions and their interrelationships with and impact upon the geographical features of the land. The honors section extends the course’s historical inquiry with additional written and reading requirements which will allow the student a fuller participation in historical debate and the process of “doing” history.

HIST 1740
US Economic History
3:3:0  Fall, Spring
Studies economic development in America, with emphasis on resources, commerce, agriculture, capital, manufacturing, government, and labor organizations.

HIST 204G
Colonial Latin America
3:3:0  Fall
Introduces the history of Latin America from the earliest New World inhabitants through the nineteenth-century Latin American Wars for Independence. Analyzes the social, political, economic, and cultural developments of Latin America. Explores the complex dynamics that shaped pre-Columbian and colonial societies which culminated in early nineteenth-century independence movements.

HIST 205G
Modern Latin America
3:3:0  Spring
Introduces the history of Latin America from 1820 to the present. Focuses on the key issues and themes of the last 150 years including social revolution, dependency and foreign intervention, gender and race. Includes case studies from specific countries.

HIST 2700
US History to 1877
3:3:0  Fall, Spring, Summer
Surveys the origins of the United States from the Pre-Columbian era and early colonization through Reconstruction. Focuses on encounters among indigenous, African and European peoples; gender, race, and Atlantic slavery; the causes and consequences of the American Revolution; the westward expansion of the United States; and the sectional crisis that lead to the American Civil War.

HIST 270H
US History to 1877
3:3:0  On Sufficient Demand
Examines the first half of the American experience, beginning with the Paleo-Indian cultures through Post-Civil War Reconstruction. Surveys social, political, cultural, and diplomatic developments during this period.

HIST 2710
US History since 1877
3:3:0  Fall, Spring, Summer
Surveys the making of a modern United States, beginning with the promises and failures of Reconstruction and continuing with contemporary American issues. Emphasizes diverse American experiences at the intersections of race, gender, and class while tracing social, cultural, political and diplomatic developments during this period.

HIST 271H
US History since 1877
3:3:0  On Sufficient Demand
Examines the second half of the American experience, beginning with the collapse of Post-Civil War Reconstruction and concluding with contemporary American issues. Surveys social, political, cultural, and diplomatic developments during this period. The honors section extends the course’s historical inquiry with in-depth discussions and additional written and reading requirements, all of which allow the student a fuller participation in historical debates and the process of “doing” history.

HIST 290H
Independent Study
1:1:0  On Sufficient Demand
* Prerequisite(s): Honors Director Approval
Provides independent study for Honors students unable to secure a desired class within regular semester curriculum offering. Involves designing and completing readings and other projects at the lower-division level in cooperation with the Honors director. Maximum of 3 credits may be applied toward Honors graduation.

HIST 290R
Independent Study
1 to 4:1 to 4:0  On Sufficient Demand
* Prerequisite(s): Dean and/or Department Chair approval
Provides independent study for students unable to secure a desired class within regular semester curriculum offering. With approval of dean and/or department chair, student and instructor design and complete readings and other projects at the lower-division level. Maximum of 6 credits may be applied toward graduation.

HIST 3010
The Historians Craft
3:3:0  Fall, Spring
* Prerequisite(s): HIST 1500, HIST 151G, HIST 2700, and HIST 2710 and University Advanced Standing
Foundational course builds upon information and library literacy skills, primary and secondary sources research, analysis, and writing skills introduced in lower division courses to prepare students for Junior/Senior level coursework. Teaches the craft of History, develop and hone skills in the areas of historical methodology, historiography, and theory, formulate interpretations based on evidence, and present their findings in accordance with professional standards. Prerequisite for all 3000 and 4000 level History courses.

HIST 3020
Public and Digital History
3:3:0  Fall
* Prerequisite(s): HIST 3010 or Instructor Approval; University Advanced Standing
Introduces the disciplines of public history and digital history, including methodology and literature. Exposes students to the major fields in public history, and identifies career opportunities. Covers the tools of public history, such as archives, special collections, oral histories, photographs, documents, journals, museum exhibitions. Emphasizes new digital techniques for collection, preservation, and presentation of primary sources. Teaches skills such as analyzing, interpreting, and communicating historical data for the public and by digital means. Discusses the professional and ethical dimensions of public history.

HIST 3030
Introduction to African History
3:3:0  Fall
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys African history since the sixteenth century: traditional societies, the slave trade, European colonialism, the struggle for independence, underdevelopment, and the challenge of globalization.

HIST 3110
Greek History
3:3:0  Fall
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Explores historical and geographical context of Greece from 1600 B.C.E. to the Roman conquest in 30 B.C.E. spanning Minoan, Mycenaean, Hellenic, and Hellenistic ages. Examines the development of social/cultural, political, and economic institutions emphasizing their influence on Western civilization and our own cultural context.

<td>HIST 3130</td>
<td>Roman Republic</td>
<td>3:3:0</td>
<td>On Sufficient Demand</td>
<td>* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing</td>
<td></td>
<td>Covers the development of Rome and Italy from prehistory through the end of the Republic in first century B.C. Surveys social, cultural, political, economic and military aspects of Republican Rome. Examines the influence of Rome on Western Civilization. Part of a two semester sequence on Roman history. Each semester may be taken independently.</td>

</tr>
</tbody>
</table>
HIST 3440
The History of World War I
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Explores the numerous factors leading to, sustaining, and concluding World War I, including military developments, diplomacy, and political and economic rivalries. Discusses various battles and campaigns of the conflict, the experience of the average soldier, the crumbling of old governments, and the beginnings of modern genocide.

HIST 345G
The History of World War II
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Deals with background and cases, course, conduct, and consequences of World War II in Europe and Asia, with special attention to strategy, tactics, diplomacy, and politics.

HIST 3540
History of South Africa
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Explores the history of South Africa from first peoples to the present, with special attention to twentieth-century developments. Topics include Khoisan and Bantu societies, Dutch settlement at the Cape of Good Hope, British colonization, the Zulu kingdom, the Great Trek, British-Boer conflict, the mining economy, Union, segregation and Apartheid, and the struggle for non-racial democracy. For history and integrated studies majors, and other students interested in world history.

HIST 3550
American Origins to 1790
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys the origins of the United States from the Pre-Columbian era and early colonization through the Early Republic. Focuses on adaptation and transformations of Native, African and European peoples; the causes and consequences of the American Revolution, the US Constitution, and the search for a national identity.

HIST 3560
American Revolution
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing

HIST 3570
American Civil War and Reconstruction
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Describes forces at work in the antebellum period that led to sectionalism and eventually to civil war. Examines military, political, social, economic, and racial issues before, during, and after the war. Analyzes the painful period of Reconstruction and its historiography.

HIST 3600
Environmental History of the United States
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Examines human modification of the American landscape. Surveys the physical geography of the United States, landscape change during Native American to European transition, and causes of agricultural and industrial pollution. Topics include land ethics, processes of environmental degradation, technological remedies, history of federal laws and protection agencies. May include field experiences.

HIST 3610
History of South Africa
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys United States history thematically and focuses upon social, cultural, economic, and political movements. Includes topics such as the New Republic, slavery, westward expansion, sectionalism, the Civil War and its aftermath, immigration, reform, and the development of modern culture.

HIST 3620
U.S. History-Progressive Era to the 21st Century
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Includes topics such as the New Republic, slavery, westward expansion, sectionalism, the Civil War and its aftermath, immigration, reform, and the development of modern culture.

HIST 3630
U.S. History-Progressive Era to the 21st Century
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys United States history thematically and focuses upon social, cultural, economic, and political movements. Includes topics such as the New Republic, slavery, westward expansion, sectionalism, the Civil War and its aftermath, immigration, reform, and the development of modern culture.

HIST 3640
History of South Africa
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys United States history thematically and focuses upon social, cultural, economic, and political movements. Includes topics such as the New Republic, slavery, westward expansion, sectionalism, the Civil War and its aftermath, immigration, reform, and the development of modern culture.

HIST 3650
American Origins to 1790
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys the origins of the United States from the Pre-Columbian era and early colonization through the Early Republic. Focuses on adaptation and transformations of Native, African and European peoples; the causes and consequences of the American Revolution, the US Constitution, and the search for a national identity.

HIST 3660
American Revolution
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing

HIST 3670
American Civil War and Reconstruction
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Describes forces at work in the antebellum period that led to sectionalism and eventually to civil war. Examines military, political, social, economic, and racial issues before, during, and after the war. Analyzes the painful period of Reconstruction and its historiography.

HIST 3710
Issues and Topics in American History
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys specific American history issues or topics at the Junior/3000-level. May be repeated for a maximum of 6 credits toward graduation.

HIST 3730
American Origins to 1790
3:3:0
On Sufficient Demand
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing
Surveys the origins of the United States from the Pre-Columbian era and early colonization through the Early Republic. Focuses on adaptation and transformations of Native, African and European peoples; the causes and consequences of the American Revolution, the US Constitution, and the search for a national identity.
Course Descriptions

HIST 4140  
Genocide in the Twentieth Century  
3:3:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Examines the major genocides of the twentieth century: the Armenian Massacre, the Holocaust, the Killing Fields of Cambodia, the Balkan genocides, and the Rwandan genocide. Promotes a greater understanding of why and how genocides occurred in the twentieth century. Teaches and improves critical thinking, writing, and comprehension skills and develops additional skills in using comparative history, historiography, and primary and secondary sources.

HIST 4180  
The Italian Renaissance  
3:3:0  Fall  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Examines the origins, development, and impact of Renaissance culture in Italy from 1300 to 1600. Focuses on the social and urban background that gave rise to such Renaissance achievements as humanism, modern individualism, secularism, and artistic innovation. Analyzes the legacy and influence of Italian Renaissance culture on the modern world.

HIST 420R  
Issues and Topics in Global History  
3:3:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Surveys a specific topic in Global History. Topic varies each semester. A maximum of 6 credits may be applied toward graduation.

HIST 4250  
Teaching History in the Secondary Curriculum  
3:3:0  Fall, Spring  
* Prerequisite(s): Admission to Professional Education Program, (EDSC 4550 or instructor approval), and University Advanced Standing  
For students majoring in secondary education. Examines teaching methodology as related to teaching history and learning teaching strategies to prepare students for secondary education certification. Utilizes various group projects, classroom exercises, and an actual teaching project at the end of the semester. Evaluated by participation, teacher evaluation, written evaluation, exams, personal journal, and a final teaching project.

HIST 430G  
Violence and Social Conflict in Latin America  
3:3:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Examines impact of violence and social conflict in Latin American society. Covers from Ancient Native American cultures to the present.

HIST 4320  
History of Scientific Thought  
3:3:0  Fall  
* Prerequisite(s): University Advanced Standing  
Explores development of Western scientific context from 6th century B.C. Greece to modern times. Emphasizes how our understanding of nature is influenced by a scientific approach. Examines technological impact of science on our lives.

HIST 4330  
Machines in the Making of History  
3:3:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Surveys the development of modern technology with special reference to the Industrial Revolution of the nineteenth century and the Information Revolution of the twentieth. Examines weekly case studies focused on major innovations which have helped shape the modern world. Fosters appreciation of the interaction with technology change as a historical phenomenon.

HIST 435R  
Issues and Topics in the History of Science  
3:3:0  Spring  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Surveys a specific topic in the History of Science. Topic varies each semester. May be repeated once for credit as long as course topic is substantially different than previous class.

HIST 461G  
Peoples of the Atlantic World 1450-1800  
3:3:0  Spring  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Offers an introduction to the main themes and issues of the early Atlantic world and the field of Atlantic History, from the angle of intercultural relations and social/political productions. Examines in depth the encounters, exchanges, and clashes between Africans, Europeans, and Native Americans through the life experiences of the peoples who lived "between cultures," such as interpreters, mariners, missionaries, creoles, etc. Encourages reflection about the modern legacies of the colonial period and issues of multiculturalism and post-colonialism.

HIST 463G  
Missions and Conversion in Early North America  
3:3:0  Not Offered  
* Prerequisite(s): (HIST 2700 or HIST 3730) and (ENGL 2010 with a grade of C+ or higher, or instructor approval) and University Advanced Standing  
Examines in a comparative perspective various European religious missionary enterprises in North America and their reception among Indians from the seventeenth century through the antebellum period. Surveys the origins, doctrines, methods, and changes over time of the Jesuit, Franciscan, Moravian, Puritan, and other Protestant missions, emphasizing the international and multicultural aspects of the missionary landscape in early America. Addresses the ways in which various Native American groups and individuals responded to these European missionary efforts.

HIST 466G  
Legacies and Reckonings in the American West  
3:3:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Interdisciplinary survey of key theories and issues in the American West. Examines the diverse experiences of peoples and cultures in the West, the cultural symbolism of the American West, different cultures’ interactions/relationships with the environment, and the role of myth in the formulation of regional identity.

HIST 471R  
Special Issues and Topics in American History  
3:3:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Surveys a specific topic in American History. Topic varies each semester. May be repeated once for credit as long as course topic is substantially different than previous class.

HIST 482R  
Public History Internship  
2 to 9:2 to 9:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval and University Advanced Standing  
Provides opportunities for internship experience in public history organizations, including, but not limited to, museums, archives, manuscript collections, federal, state, local, and private historical sites, and governmental and non-governmental history organizations. May be repeated for a maximum of 9 credits toward graduation. May be graded credit/no credit.

HIST 490R  
Independent Study  
1 to 4:1 to 4:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
Provides independent study for students unable to secure a desired class within regular semester curriculum offering. With approval of dean and/or department chair, student and instructor design and complete readings and other projects at the upper-division level. A maximum of six credits may be applied toward graduation.

HIST 491R  
Directed Readings  
2 to 4:2 to 4:0  On Sufficient Demand  
* Prerequisite(s): HIST 3010 and instructor approval; University Advanced Standing  
Allows students to work intensively with faculty to deeply explore specific topics that are not normally offered in the two-year cycle of the History Program. May be repeated for a maximum of 4 credits toward graduation.

HIST 4980  
Senior Research Thesis Research Component  
3:3:0  Fall  
* Prerequisite(s): HIST 3010 or instructor approval; University Advanced Standing  
First half of the capstone experience for Majors. Requires students to work with a faculty member in a directed and extensive research and writing project. Topics vary according to thesis director. Honors students should consult Honors Program for thesis options.
HIST 4990
Senior Research Thesis Writing Component
3:3:0 Spring
* Prerequisite(s): HIST 4980 and Senior Standing in History and University Advanced Standing
Second half of the required capstone experience for History Majors. Student continues to work on and complete the extensive research, analysis, and writing project developed in Hist 4980 under faculty direction. Honors students should consult Honors Program for thesis options.

Community Health (HLTH)

HLTH 1100
Personal Health and Wellness
2:2:0 Fall, Spring, Summer
Examines the challenges to individual and community health, and encourages students to become actively engaged in preserving, protecting, and promoting health at all levels. Develops a greater appreciation for bodies and understanding of requirements of maintain or achieve good physical, mental, emotional, social, and spiritual health. Includes lecture, discussion groups, guest lecturers, media, and role-playing.

HLTH 1200
First Aid
3:3:0 Fall, Spring
Provides first aid and emergency care training as well as instruction with Automated External Defibrillators. Structured to meet National Safety Council First Aid requirements with successful completers being certified in First Aid and CPR. Includes lectures, hands-on experience with mannequins, audiovisuals, discussions, and field trips.

HLTH 1300
Medical Terminology I
2:2:0 Fall, Spring, Summer
Helps students read and understand the language of medical terminology. Stresses terminology usage and accuracy. Studies elements, abbreviations, spelling, pronunciation, and logic of medical terminology. Includes lectures and audiovisual presentations. Canvas Course Mats $52/Pearson applies.

HLTH 2000
Body Image Self-Esteem and Weight Management
3:3:0 Fall, Spring
Provides students with the information and tools necessary to understand and manage eating habits, body size, and self-esteem concerns in a healthy way.

HLTH 2200
Introduction to Health Professions
2:2:0 Fall, Spring
For students planning to major in a health related field. Examines the historical and continuing evolution of health care. Explores work description, environment, employment opportunities, education, expectations, legal requirements, and expected earnings of each covered health profession. Focuses on, but not limited to medicine, dentistry, nursing, community health, optometry, respiratory care, dental hygiene, physical therapy, and social work.

HLTH 2400
Concepts of Stress Management
3:3:0 Fall, Spring, Summer
For those interested in developing skills and techniques necessary to work with clients in stress reduction programs. Includes identifying, managing, and eliminating stress in individuals, families, and communities. Examines effects of stress on the immune, endocrine, and nervous systems and the relationship to disease. Teaches stress reduction application and methods in wellness and health care settings.

HLTH 2510
Media and Computer Applications in Health
3:3:0 Not Offered
Introduces students to computer-based methods for accessing, analyzing, and communicating health-related information. Explores the relationship between mass media and health promotion and the key elements in the development of successful health communication campaigns.

HLTH 2600
Drugs Behavior and Society
3:3:0 Fall, Spring, Summer
For students interested in drug abuse prevention. Studies substance mis-use and abuse. Discusses addictive behaviors, dependence, and treatment modalities. Examines common substances of abuse and dependence and effects upon individuals and society. Investigates the use of psychotherapeutic drugs in the treatment of mental illness. Promotes awareness of personal and social decisions concerning drugs, behaviors, and habits.

HLTH 2800 (Cross-listed with: PSY 2800)
Human Sexuality
3:3:0 Fall, Spring, Summer
* Prerequisite(s): ENGL 1010 or ENGH 1005
Interdisciplinary course in human sexuality, exploring topics in biology, health, psychology, and sociology. Introduces basic concepts of human sexuality, including anatomy, reproduction, and sexual response across the life-cycle. Studies gender roles, sexual orientation, dysfunction, and sexually transmitted disease. Examines sexual behavior from the perspective of ethics, religion, the law, and education. Students assess their sexual attitudes and should be able to make responsible sexuality decisions.

HLTH 2900
Health Education for Elementary Teachers
2:2:0 Fall, Spring
For Elementary Education majors. Emphasizes the role of the teacher as a health educator and team member in providing a healthy school environment. Studies the basic Utah health core curriculum. Develops learning activities applicable to the health needs of the elementary school student.

HLTH 3000
Health Concepts of Death and Dying
3:3:0 Spring
* Prerequisite(s): University Advanced Standing
Examines information and data pertaining to death in the United States. Discusses historical and cultural perspectives of death, causes of death, definitions of death, stages of dying, bereavement, the will to live, legal and ethical issues, euthanasia, and suicide. Focuses on attitudes and values of Americans concerning death. Studies ways to work with and relate to dying individuals and their families. Will also be offered summer of odd years.

HLTH 3150
Culture Ecology and Health
3:3:0 On Sufficient Demand
* Prerequisite(s): ENGL 2010 with a grade C+ or higher, ANTH 101G, and University Advanced Standing
Examines reciprocal roles of culture, environment, and disease in human health. Covers nutrition, stress, and traditional non-Western treatments. Explores cultures’ use of their own global medicine to sustain health and welfare.

HLTH 3160
Health Care Law
3:3:0 Spring
* Prerequisite(s): University Advanced Standing
Explores impact of laws, regulations, social policies on management and delivery of health care. Includes provider liability, managed health care contracts, HIV-related concerns, assisted suicide, and other issues.

HLTH 3200
Principles of Community Health
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing
For students in health and behavioral sciences who wish to work in community health settings. Presents the role and function of various community health services and agencies and how they interface. Examines health care models and agencies, health care reform, health objectives for the nation, and health planning and promotion. Explores life style risk reduction, environmental issues, ethical health issues, and other appropriate topics.

Utah Valley University
Course Catalog 2020-2021
761
HLTH 3220
Foundations of Health Education
3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing and matriculation into BS Community Health or BS School Health Education

For students interested in a community health career. Examines the history and role of health education in today's society. Covers the philosophical principles and models utilized in the delivery of health education. Analyzes types of health information available in health journals and on the internet. Introduces the major health associations and describes the competencies necessary for certification as a Health Education Specialist.

HLTH 3230
Professional Development for Community Health
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Matriculation into BS Community Health or BS School Health Education and University Advanced Standing
* Prerequisite(s) or Corequisite(s): HLTH 3200

Provides students with preparation for a Community Health internship, first job, or graduate school.

HLTH 3240
Womens Health Issues
3:3:0 Fall
* Prerequisite(s): HLTH 1100 or PES 1097 and University Advanced Standing

For students in various health care professions. Reviews important dimensions of a woman's health and examines the contributing epidemiological, historical, psychosocial, cultural/ethnic, legal, political, and economic influences. Focuses on women throughout their lifespan and incorporates the many factors that affect health and well-being. Examines the role of women in the workplace, family, and community. Introduces the study of human diseases including general principles of disease and major diseases of body systems and organs. Applies genetic, behavioral and environmental issues to the study of human diseases.

HLTH 3400
Human Diseases
3:3:0 Fall, Spring, Summer
* Prerequisite(s): ZOOL 1090 and University Advanced Standing

For students interested in a Community Health option within the Integrated Studies Degree. Also for students interested in or working in health care fields such as nursing, public health, and dental hygiene. Introduces the study of human diseases and their impact on individuals and populations.

HLTH 3450
Public Health and the Environment
3:3:0 Fall, Spring, Summer
* Prerequisite(s): HLTH 3200, University Advanced Standing

Examines the relationship of people to their environment and the environment's impact on human health. Focuses on the role of environmental factors in the causation of disease and the importance of environmental screening in community health services.

HLTH 3500
International Health
3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing

Provides knowledge regarding the various health issues that affect people around the world. Focuses on the role of culture, ethnicity, country of origin, politics, and gender on health. Examines the importance of cultural sensitivity and competence when attempting to eradicate public health concerns. Will also be offered summer of even years.

HLTH 3550
Biostatistics for Public Health
3:3:0 Fall, Spring
* Prerequisite(s): HLTH 3400, University Advanced Standing, and matriculation into BS Community Health or BS School Health Education

Introduces biostatistical principles and methods. Examines the historical and theoretical bases of epidemiology; statistical methods; and methodology in epidemiology; and the application of epidemiology to the prevention of disease and the promotion of health.

HLTH 4100
Health Education Curriculum for Secondary Teachers
3:3:0 Fall
* Prerequisite(s): University Advanced Standing and matriculation into the BS School Health program

For secondary education majors. Emphasizes the role of the teacher as a health educator and team member in providing a healthy school environment. Examines comprehensive school health education and studies the basic Utah health core curriculum for secondary education. Develops learning activities applicable to the health needs of secondary education students.

HLTH 4140
Community Health Assessment and Program Development
3:3:0 Fall
* Prerequisite(s): HLTH 3200, HLTH 3220, University Advanced Standing, and matriculation into the BS Community Health

Intended for Community Health Education majors. Covers building a rationale, gaining support of stakeholders, selecting an appropriate model or theory, conducting a needs assessment, developing goals and objectives, and determining appropriate health education strategies. The first of two courses which will help students develop the skills to successfully begin the program planning process.
HLTH 4160 Program Implementation and Evaluation 3:3:0 Spring
* Prerequisite(s): HLTH 4140 and University Advanced Standing

Intended for Public and Community Health majors. Builds upon HLTH 4140 and develops the knowledge, skills, and abilities to conduct health program implementation and evaluation. Includes a systematic approach to the implementation and evaluation of health education programs.

HLTH 4200 Health Education Teaching Methods 3:3:0 Spring
* Prerequisite(s): HLTH 4100, University Advanced Standing and matriculation into BS School Health

For secondary education school health majors. Examines teaching methods, materials and techniques. Studies secondary education health curriculum, program planning, development, implementation, and evaluation. Students will develop lesson plans and present them in secondary education settings.

HLTH 4250 (Cross-listed with: POLS 4250) Public Health Organization and Policy 3:3:0 Fall, Spring
* Prerequisite(s): HLTH 3200, University Advanced Standing, and matriculation into BS Community Health or BS School Health Education; or instructor approval

Focuses on U.S. health policy and policy analysis. Describes the basic machinery of policymaking and legal processes that underpin the individual health care and public health systems. Analyzes the fundamental problems and contemporary issues in health policy and teaches students how to properly develop and analyze health policy.

HLTH 4300 Community Health Ethics 3:3:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing & matriculation into BS Community Health

For students majoring in Community Health or Integrated Studies with a Community Health emphasis. Also for students interested or working in health-care fields such as nursing, dental hygiene, etc. Explores and interprets ethical codes of conduct as set forth by health professions and/or organizations. Emphasis will be given to the Code of Ethics for the Health Care profession. Examines various health care issues such as: health care allocation, health care costs, death and dying issues, patient rights, informed consent, confidentiality etc. Investigates conflicts arising from existing and evolving codes of conduct using case studies as an arena for discussion.

HLTH 440G Health and Diversity 3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing

Provides students with a specific set of skills and knowledge in cultural competence. Focuses on understanding the public health system, identifying one's own cultural biases, understanding biases regarding one's own cultural identity, and developing culturally competent approaches and tools. Enables students to be more effective public health professionals whether they work with diverse populations within the United States or in international settings. Is offered each Fall and Spring Semester and Summer of odd years.

HLTH 4500 Public Health Administration 3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing and matriculation into BS Community Health

Gives individuals a working and practical look at numerous aspects of public health administration and leadership. Includes definitions of leadership, qualities of an effective leader, sources of power, time management, the planning and decision making process, three core functions of public health, social marketing strategies, as well as other timely topics related to the administration and practice of public health.

HLTH 4600 Research Methods for Community Health 3:3:0 Spring
* Prerequisite(s): University Advanced Standing, and matriculation into BS Community Health or BS School Health Education; or instructor approval

Introduces research techniques, methodology, and designs. Examines the planning, organizing, and conducting of research studies for solving problems unique to community health. Includes literature review and research article critiques.

HLTH 4720 CHES Preparation 3:3:0 Fall, Spring
* Prerequisite(s): Department approval; University Advanced Standing; Senior standing

Provides an overview of the health education areas of responsibilities in preparation for the Certified Health Education Specialist national exam. For students in their last semester at UVU, planning to register and take the CHES exam in October or April.

HLTH 482R Community Health Internship 1 to 8:1 to 8:0 Fall, Spring, Summer
* Prerequisite(s): HLTH 3230, University Advanced Standing, and matriculation into BS Community Health

Provides field experience and enhanced knowledge in community health services and education, under the preceptorship of an individual qualified by education and/ or experience. May be repeated for a maximum of 6 credits toward graduation. May be graded credit/no credit.

HLTH 489R Undergraduate Research 1 to 3:0 to 15 On Sufficient Demand
* Prerequisite(s): Instructor approval, departmental approval, and University Advanced Standing

Provides students the opportunity to conduct research under the mentorship of a faculty member. Provides an opportunity to put in practice the theoretical knowledge gained in prior major courses. Requires the creation of a significant intellectual or creative product that is characteristic of the community health discipline and worthy of communication to a broader audience. May be repeated for a maximum of 3 credits toward graduation.

HLTH 490R Special Topics in Community Health 1 to 3:1 to 3:0 On Sufficient Demand
* Prerequisite(s): Department Approval and University Advanced Standing

Explores and examines special topics related to community health issues and problems. May include community health topics such as AIDS/HIV, West Nile Virus, special drug and sexuality issues, obesity, suicide, teenage pregnancy and terrorism. May be repeated for a maximum of 6 credits toward graduation.

HLTH 4950 Senior Capstone 1:1:0 Fall, Spring, Summer
* Prerequisite(s): University Advanced Standing, Senior Standing, Matriculation in BS Community Health
* Prerequisite(s) or Corequisite(s): HLTH 4250

Assesses both content knowledge and skills developed during the course of the Community Health Education program. Provides students an opportunity to reflect on their learning and demonstrate the program outcomes through the development and presentation of a professional electronic portfolio, and the completion of a cumulative post-test. For Community Health Education seniors in their last semester.

HLTH 6200 Issues in Public Health 3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Masters of Public Services Program

Examines public health principles and concepts by focusing on the five core public health knowledge areas and the ten essential public health services. Explores public health infrastructure, surveillance, social determinants of health, policy, and emerging issues. Provides a broad framework for understanding public health's role in community health, prevention, and medicine.

Hospitality Management (HM)

HM 1010 Introduction to Hospitality Industry 3:3:0 Fall, Spring

Designed for hospitality management majors and as elective credit for other business majors. Provides a basic understanding of the lodging and food service industry by tracing the industry's growth and development. Analyzes management's functions and responsibilities in such areas as administration, organization, communications, accounting, marketing, and human relations. Examines industry opportunities and future trends. Includes lecture, field trips, guest speakers, film, and tapes. Completers should have a knowledge of career opportunities and basic hospitality management principles. Lab access fee of $30 for computers applies.
## Course Descriptions

### HM 1130
**Hotel Operations I**

3:3:0  
**Fall, Spring**

Designed for hospitality management majors and as elective credit for other business majors. Presents a systematic approach to front office procedures by detailing the flow of business through a hotel beginning with the reservation process and ending with check-out settlement. Examines various elements of effective front office management, paying particular attention to planning and evaluating front office operation and to personnel management. Front office procedures and management are placed within the context of the overall operation of a hotel. Includes role play and computer simulations. Completers should be competent to be a beginning front desk clerk. Lab access fee of $30 for computers applies.

### HM 1180
**Food and Beverage Management**

3:3:0  
**Fall, Spring**

Designed for hospitality management majors and as elective credit for other business majors. Studies management principles of menu planning, purchasing, storage, food and beverage production, service, and sanitation. Includes lecture, case studies, guest speakers, field trip and project. Completers should understand the basic structure of a hospitality unit and how management principles relate to a restaurant. Lab access fee of $30 for computers applies.

### HM 2500
**Statistics for the Hospitality Industry**

3:3:0  
* Prerequisite(s): MAT 1030, MAT 1035, STAT 1040, STAT 1045, MATH 1050, MATH 1055, or MATH 1090, or higher

Provides a step-by-step approach to gathering, analyzing, and using numeric market, operating, and financial data in the hospitality management industry. Hospitality/industry scenarios and hands-on exercises and labs are used to build student skills in data analysis as a platform to practice data-gathering and analysis for projects in business planning, market research, revenue management, or designing customer-employee satisfaction surveys. Canvas Course Mats $72/Wiley applies

### HM 281R
**Cooperative Work Experience**

2 to 9:2 to 9:0  
**Fall, Spring, Summer**  
* Prerequisite(s): Approval of School of Business Career and Corporate Manager

Provides opportunities to apply classroom theory on the job. Students work as paid employees in a job that relates to their careers while enrolled at the College. Credit is determined by the number of hours a student works during the semester. Completers meet individually set goals. A total of six credits may be applied toward graduation with a diploma or AAS degree and three credits toward Certificate programs. May be graded credit/no credit.

### HM 2890
**Industrial Work Experience**

1 to 8:0 to 40  
**Fall, Spring, Summer**

Designed for hospitality management majors as elective credit. Provides practical work experience in an actual restaurant, applying management theory in carrying out duties assigned by the manager/owner.

### HM 296R
**Hospitality Management Seminar**

1 to 3:1 to 3:0  
**On Sufficient Demand**  
* Prerequisite(s): Instructor/Department Chair Approval

Provides short courses, workshops, and special programs in hospitality management or culinary arts topics. Repeatable for up to 3 credits.

### HM 297R
**Independent Study**

1 to 3:1 to 3:0  
**Not Offered**  
* Prerequisite(s): Department Chair Approval

Provides opportunities to apply classroom theory on the job. Individual projects, etc., in the area of hospitality management or culinary arts are designed by the student and approved by the department chair. May be repeated for up to 6 credits toward graduation.

### HM 3020
**Hospitality Managerial Accounting I**

3:3:0  
**Fall, Spring**  
* Prerequisite(s): ACC 2010, Matriculation into the Woodbury School of Business, and University Advanced Standing

Presents a basic understanding of accounting as it relates to the hospitality industry. Emphasizes developing competencies in analyzing real world hospitality industry scenarios using spreadsheet software. Includes: cost volume profit analysis and applications, forecasting, production controls, budget creation and uses, flexible budgets, depreciation, taxation, time value of money basics, capital budgeting, evaluating and financing investments, and cost benefit analysis.

### HM 3030
**Hospitality Managerial Accounting II**

3:3:0  
**Fall, Spring**  
* Prerequisite(s): ACC 2010, HM 3020, Matriculation into the Woodbury School of Business and University Advanced Standing  
* Prerequisite(s) or Corequisite(s): HM 3020

Is the second in a two part series designed to integrate principles of operations and managerial accounting as they relate to the hospitality industry. Emphasizes developing competencies in analyzing real world hospitality industry scenarios using spreadsheet software. Includes: cost volume profit analysis and applications, forecasting, production controls, budget creation and uses, flexible budgets, depreciation, taxation, time value of money basics, capital budgeting, evaluating and financing investments, and cost benefit analysis.

### HM 3050
**Country Club Management**

3:3:0  
**Not Offered**  
* Prerequisite(s): University Advanced Standing

Provides a basic understanding of country club management with golf operations. Analyzes management's functions and responsibilities in such areas as administration, organization, communications, accounting, marketing, and human relations. Examines industry opportunities and future trends. Includes lectures, field trips, guest speakers, films, and tapes. Completers should have knowledge of career opportunities and basic hospitality management principles.

### HM 3090
**Industrial Work Experience**

1 to 8:0 to 40  
**Fall, Spring, Summer**

Designed for hospitality management majors as elective credit. Provides practical work experience in an actual restaurant, applying management theory in carrying out duties assigned by the manager/owner.
HM 3390 Hotel Operations II 3:3:0 Fall, Spring
* Prerequisite(s): HM 1130 and University Advanced Standing

Overviews fundamentals of housekeeping management. Describes the management functions, tools, and practices required in today's lodging and institutional housekeeping departments. Provides students with information they need to successfully manage a physical plant and work effectively with engineering and maintenance. Includes lecture, role play, site visits, film, and tapes. Completers should have a basic understanding of housekeeping and facility management. Lab access fee of $30 for computers applies. Canvas Course Mats $54/Wiley applies.

HM 3640 Food and Beverage Controls 3:3:0 Fall, Spring
* Prerequisite(s): ACC 210 and University Advanced Standing

Designed for hospitality management majors and as elective credit for other business majors. Covers the principles and procedures involved in an effective food and beverage control system, including standards determination, the operating budget, income and cost control, menu pricing, and computer applications. Includes lecture and computer simulation. Completers should have a basic understanding of control functions within a hospitality unit and be familiar with computer control systems. Lab access fee of $30 for computers applies. Canvas Course Mats $54/Wiley applies.

HM 3710 Marketing of Hospitality Services 3:3:0 Fall, Spring
* Prerequisite(s): MKTG 2200 and University Advanced Standing

For hospitality management majors and as elective credit for other business majors. Provides basic knowledge and practical experience which will enable students to develop strategic marketing plans for hotel/motel properties. Focuses on practical sales techniques, proven approaches to selling to targeted markets, and advertising's role in sales. Includes lecture, role play, case studies, simulations and projects. Completers should be able to develop a marketing study of hospitality unit and understand marketing and sales techniques. Lab access fee of $30 for computers applies. Canvas Course Mats $54/Wiley applies.

HM 3800 Vacation Rental Management 3:3:0 Fall, Spring
* Prerequisite(s): University Advanced Standing

Introduces management practices used in the short term rental market of the lodging industry. Provides an overview of the industry including regulations and accounting, marketing and reservations, guest and neighbor relations, maintenance and housekeeping, design and decor, security and guest safety, tech devices and innovations, and opportunities for entrepreneurial entity.

HM 4150 Hospitality Revenue Management 3:3:0 Spring
* Prerequisite(s): HM 1130, and University Advanced Standing

Designed for Hospitality Management majors. Addresses the emerging revenue management process and the keys to effective revenue management planning. Explores how to develop, implement, and evaluate strategic management processes. May be delivered hybrid and/or online.

HM 4200 Event Planning 3:3:0 Fall, Spring
* Prerequisite(s): HM 3210 and University Advanced Standing

Introduces the event industry, its scope and responsibilities, and the multidimensional nature of an event experience. Develops needs assessment, feasibility studies, and project management techniques to help students understand events in greater detail. Explores the interaction between attendee and the environment that enhances the event experience. Provides experience managing food and beverage services, technical services, ancillary activities, and marketing for events.

HM 4250 Advanced Event Production 3:3:0 Fall, Spring
* Prerequisite(s): HM 4200 and Advanced University Standing

Explores advanced techniques and procedures to effectively execute an event production. Includes creating feasible site plans, lighting and sound designs, table-top and stage decor, menu and food set-up designs, and event marketing plans. Focuses on how to successfully manage an event from inception to implementation to evaluation. Provides hands-on experience in event production and the creation of a professional event portfolio.

HM 4300 Food and Beverage Consulting 3:3:0 Spring
* Prerequisite(s): HM 1180, HM 3030, and University Advanced Standing

Provides a consulting experience with a local company. Promotes application of principles taught throughout the hospitality management program with a specific focus on effectively managing food and beverage functions. Tailors projects to students completing the food and beverage track. Requires but does not require at least a year of experience working in the foodservice industry. Use student-led consulting teams to complete real-world projects.

HM 4550 Hospitality Strategic Management 3:3:0 Spring
* Prerequisite(s): HM 3030 and Matriculation into the Woodbury School of Business and University Advanced Standing

Examines delivery of the organization's product or service. Includes investigative and production planning, scheduling of operations, allocation of resources, manpower and equipment decisions, inventory control, production planning, and quality. May be delivered online. Lab access fee of $30 for computers applies. Canvas Course Mats $54/Wiley applies.

HM 481R Internship 1 to 3:1 to 3:0 Fall, Spring, Summer
* Prerequisite(s): Approval of School of Business Career and Corporate Manager and University Advanced Standing

For Bachelor of Science Degree students in Business Management or Hospitality Management. Provides opportunities to apply classroom theory on the job. Allows students to work as employees in a job that relates to their careers while enrolled at the College. Credit is determined by the number of hours a student works during the semester. Completers meet individually set goals. 3 credits may be applied toward a Bachelor of Science degree in Business Management; 6 credits may be applied to the Hospitality Management degree. May be graded credit/no credit.

HM 496R Hospitality Management Seminar 1 to 3:1 to 3:0 On Sufficient Demand
* Prerequisite(s): Instructor/Department Chair Approval and University Advanced Standing

Provides short courses, workshops, and special programs in hospitality management. Repeatable for up to 3 credits.

HM 497R Independent Study 1 to 3:1 to 3:0 Not Offered
* Prerequisite(s): Department Chair Approval and University Advanced Standing

For bachelor's degree students and other interested persons. Offers independent study as directed in reading, in individual projects, etc., in the area of hospitality management at the discretion and approval of the department chair.

Honors (HONR)

HONR 100R Honors Colloquium 1:1:0 Fall, Spring
* Prerequisite(s): Current enrollment in Honors program

Limited to students accepted to the Honors Program. Includes experiential education activities and cohort-building academic experiences, cultural events, and research/service projects. Develops reflective writing abilities. May include readings, guest lectures, community/campus service and leadership projects, research groups, outdoor excursions, and attendance at fine arts performances. May be repeated for a maximum 6 credits toward graduation. Course fee of $15 for tickets, vehicle costs, and equipment rental applies.

HONR 150R Honors Housing Colloquium 1:1:0 Fall, Spring
* Prerequisite(s): Current enrollment in Honors program and receipt of Honors Housing Scholarship

Limited to students currently receiving the Honors Housing Scholarship. Builds collegiate and adult life skills through cohort-based collaborative learning. Develops reflective and communication abilities. May include readings, guest lectures, community or campus service and leadership projects, outdoor excursions, and attendance at fine arts or sporting events. May be repeated for a maximum 4 credits toward graduation.
**Course Descriptions**

**HONR 2000**  
Ancient Legacies  
3:3:0  
Fall, Spring  
* Prerequisite(s): Current enrollment in Utah Valley University Honors program or permission of the instructor

Provides students with the opportunity to study selected great works in the history of ideas from an interdisciplinary perspective. Examines Ancient, Medieval, and early Renaissance thought through primary texts composed before 1500 C.E. Focus of the class determined by instructor, but must include at least one text written during each of these periods, and at least one non-Western text. Emphasizes close study of primary texts drawn from disciplines including, but not limited to, astronomy, physics, biology, literature, history, philosophy, and religion. Develops strong critical thinking, writing, and rhetorical skills.

**HONR 2100**  
Modern Legacies  
3:3:0  
Fall, Spring  
* Prerequisite(s): Current enrollment in Honors program or permission of the instructor

Provides students with the opportunity to study selected great works in the history of ideas from an interdisciplinary perspective. Examines Modern and Contemporary thought through primary texts composed after 1500 C.E. Focus of the class determined by instructor, but must include at least one text that adds diversity (for instance, in ethnicity, class, or gender). Emphasizes close study of primary texts drawn from disciplines including, but not limited to, astronomy, physics, biology, literature, history, philosophy, and religion. Develops strong critical thinking, writing, and rhetorical skills.

**HONR 300R**  
Honors Interdisciplinary Seminar  
1 to 4:1 to 4:0 to 3  
On Sufficient Demand  
* Prerequisite(s): Current enrollment in UVU Honors Program or instructor approval and University Advanced Standing

Topics may be drawn from any academic discipline including but not limited to business, technology and computing, education, fine and performing arts, physical and biological sciences, health science, humanities, and social sciences. Specific content determined by faculty. Consists of rigorous analysis and synthesis of innovative, current, or special topics. May include lab or performance requirement. May be repeated for a maximum of 12 credits toward graduation.

**HONR 400R**  
Honors Capstone  
1:1:0  
Fall, Spring  
* Prerequisite(s): Senior status or permission of Honors Director and University Advanced Standing  
* Corequisite(s): Enrollment in Honors Program and a GPA of at least 3.20

Prepares students to complete an Honors Thesis or Honors Project (HONR 498R or HONR 499R). Initiates the research or design for an Honors Thesis or Honors Project, includes drafting and completing a proposal, performing background design or research, and assembling a committee of at least two faculty or community mentors. May include completion of an Institutional Review Board application for research involving human subjects. Consists of rigorous analysis and synthesis of current topics in the student’s discipline. May be repeated for a maximum of 2 credits toward graduation.

**HONR 488R**  
Honors Thesis  
3:0:6  
Fall, Spring  
* Prerequisite(s): HONR 400R (Senior status or permission of Honors Director) and University Advanced Standing  
* Corequisite(s): Enrollment in Honors Program

For students completing a baccalaureate degree and the Honors Program. Provides an opportunity for seniors in the Program to research and write on a topic related to their major, supervised by a faculty mentor. Includes independent research as necessary. Culminates in the preparation of a written paper and oral presentation describing the results of the research project. Honors Project HONR 499R may be substituted. May be repeated for a maximum of 6 credits toward graduation. Course fee of $10 for binding applies.

**HONR 499R**  
Honors Project  
3:0:6  
Fall, Spring  
* Prerequisite(s): HONR 400R and (Senior status or permission of Honors Director) and University Advanced Standing  
* Corequisite(s): Enrollment in Honors Program

For students completing a baccalaureate degree and the Honors Program. Provides an opportunity for seniors in the Program to research, design, carry out, and report results of an project related to their major, supervised by a faculty mentor. Includes independent research and creative endeavor as necessary. Culminates in the public presentation in a seminar, colloquium, recital, show, portfolio, or other appropriate method in the discipline, and the preparation of a written section evaluating or reflecting on the project’s results. May be taken as an extension of research pursued in Honors Thesis 498R; may be taken as a substitute for Honors Thesis 498R. If a student’s major department requires a comparable course (with, for instance, substantial written component), that course may be substituted, with permission of the Honors Director. May be repeated for a maximum of 6 credits towards graduation. Course fee of $10 for binding applies.

**HR 3430**  
Introduction to Human Resource Management  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Covers labor and management relations, legal issues, job analysis and design, recruiting and selecting, job placement and orientation, training, career planning, EEO, performance appraisal, and employee benefits. Presents tools for the implementation of a human resource management program. Includes class discussions, case studies, videos, oral presentations, written assignments, group projects, and guest speakers. May be delivered online and/or hybrid. Lab access fee of $30 for computers applies.

**HR 3530**  
Cross-listed with: LEGL 3530  
Employment and Labor Law  
3:3:0  
Fall  
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Covers employment and labor law, cases, and policy. Includes employment discrimination along with labor relations statues exploring the link between employment discrimination and traditional labor relations law. Presents tools necessary to formulate and write policy for profit and non-profit organizations. Includes lecture, class discussions, case studies, a service learning project, and guest speakers. Lab access fee of $30 for computers applies.

**HR 3550**  
Organization Development  
3:3:0  
Spring  
* Prerequisite(s): ENGL 1010 or ENGH 1005 and University Advanced Standing; HR 3430 highly recommended

Studies the process of ensuring skills, knowledge, abilities, and performance of the workforce meet current and future individual, team, and organizational needs. Includes the development, implementation, evaluation activities, interventions, and programs that focus on customized organization development (change), performance management, training and development, career development, and other unique employee or employee group needs.

**HR 3570**  
Training and Development  
3:3:0  
Fall  
* Prerequisite(s): ENGL 2010 and University Advanced Standing; HR 3430 recommended

Studies current models, methods, and skills for training and development designed to improve individual, group, and organizational performance. Examines the organizational role of the training specialist, identifying training needs, maximizing the trainee’s learning, evaluating training programs, on-site training methods, off-site training methods, developing and training leaders, management and executive development, and societal concerns. Includes teaching techniques such as lecture, class discussions, small group activities or projects, oral presentations, written assignments, guest speaker, and scholarly dialogue. Includes a semester-long training and development academic service-learning project.

**HR 4000**  
Total Compensation I–Pay and Incentives  
3:3:0  
Fall  
* Prerequisite(s): HR 3430 and University Advanced Standing

Studies wage and salary administration in private and public organizations; total compensation systems; interrelationship among employee performance, intrinsic and extrinsic rewards, perceived equitable payments, and employee satisfaction; employee benefits; employee incentive programs. Lab access fee of $30 for computers applies.
HR 4010
Total Compensation II--Benefits
3:3:0 Fall
* Prerequisite(s): HR 3430 and University Advanced Standing

Identifies a framework for implementing benefits systems to attract and retain a high performance workforce in a global environment; provides a comprehensive overview of benefits management strategies in organizations; discusses relevant models of compensation; and reviews various benefits influences, including laws and regulations.

HR 4050
Human Resource Information Systems
3:3:0 Fall
* Prerequisite(s): HR 3430 and University Advanced Standing

Provide students with introductory knowledge of Human Resource Information Systems. Examines HR information system adoption, implementation, and the assessment and building of management support to achieve HR strategic objectives.

HR 4060
HR Analytics
3:3:0 Fall, Spring
* Prerequisite(s): HR 3430 and University Advanced Standing

Explores key metrics, analysis, interpretation and communication tools necessary in developing comprehensive human capital strategies. Enables students to identify, analyze and interpret data to make human resource recommendations for individuals and organizations. Includes exploration of data analysis and presentation skills for human capital research and decision-making for planning, employee selection, compensation, employee survey data, organizational effectiveness and utilization analysis.

HR 4610
Strategic Staffing & Performance Evaluation
3:3:0 Fall
* Prerequisite(s): Matriculation into the Woodbury School of Business and University Advanced Standing

Addresses the key HR functions of planning, staffing, and maintaining a quality workforce. Includes identifying critical specifications for filling positions, recruiting a pool of talent, developing selection methods, and creating desirable person/job matches. Lab access fee of $30 for computers applies.

HR 4800
Strategic Human Resource Management
3:3:0 Fall, Spring
* Prerequisite(s): HR 3430, HR 4050, HR 4060, Matriculation into the Woodbury School of Business, and University Advanced Standing

Facilitates students' understanding of the total alignment of human resource management (HRM) and business strategies. Provides an overview of the role of HRM as a capstone course. Considers the overall design of the HRM infrastructure to enable optimal employee performance relative to the strategic goals of the organization, to achieve competitive advantages. Examines the techniques, policies, processes, strategies, and practices used by companies and / or managers to effectively and efficiently utilize human resources. Teaches theories and practices in multiple HRM areas, including staffing, performance evaluation, work and job design, training, total compensation, the legal environment, labor relations, and megatrends in the external labor market. Provides extensive training to prepare for the aPHR (Associate Professional of Human Resources) exam as a professional certification from the Human Resource Certification Institute (HRCI).

HR 495R
Advanced Topics in Strategic Human Resource Management
1 to 3:1 to 3:0
* Prerequisite(s): Department chair approval and University Advanced Standing.

Provides exposure to emerging current interests in strategic human resource management topics. Topics vary each semester. May be repeated for a maximum of 6 credits toward graduation.

Humanities (HUM)

HUM 1010
Humanities Through the Arts
3:3:0 Fall, Spring, Summer

Studies the media and compositional elements of the various art forms (literature, music, visual arts, theater, film, dance, and architecture), for greater understanding and enjoyment. Teaches how to interpret artistic meaning by analyzing artworks formally as well as in their historical contexts, such as the predominant subject matters and styles of their period. Encourages students to integrate the arts into their daily lives habitually, so that they become lifelong learners and educators.

HUM 101G
Humanities Through the Arts
3:3:0 Fall, Spring

Studies the media and compositional elements of the various art forms (literature, music, visual arts, theater, film, dance, and architecture), for greater understanding and enjoyment. Teaches how to interpret artistic meaning by analyzing artworks formally as well as in their historical contexts, such as the predominant subject matters and styles of their period. Encourages students to integrate the arts into their daily lives habitually, so that they become lifelong learners and educators. Places emphasis on the global, trans- and intercultural nature of human creativity and its impacts.

HUM 101H
Humanities Through the Arts
3:3:0 Fall, Spring

Studies the media and compositional elements of the various art forms (literature, music, visual arts, theater, film, dance, and architecture), for greater understanding and enjoyment. Teaches how to interpret artistic meaning by analyzing artworks formally as well as in their historical contexts, such as the predominant subject matters and styles of their period. Encourages students to integrate the arts into their daily lives habitually, so that they become lifelong learners and educators.

HUM 120R
Humanities Forum
3:3:0 On Sufficient Demand

Introduces students to a wide variety of aspects of the humanities. Provides enriched learning situations in which students are exposed to humanities events or noted guest scholars and other lecturers. Requires attendance of a choice of specified events on campus and off, as well as of workshop meetings with an instructor. May be repeated for a maximum of 6 credits toward graduation.

HUM 2010
World History Through the Arts I
3:3:0 Fall, Spring, Summer

Studies early societies through the 1600s, as the first part of a two-part series which examines world civilizations through the arts. Explores formative creative events in history and their relationships to modern issues. Presents perspectives of traditional humanistic values of arts and ideas. Investigates how others have dealt with problems that humans faced in the past, and possible strategies for problem solving that might aid students today.

HUM 201G
World History Through the Arts I
3:3:0 Fall, Spring, Summer

Studies early societies through the 1600s, as the first part of a two-part series which examines world civilizations, including non-Western civilizations, through the arts. Explores formative creative events in history, and their relationships to modern issues. Presents perspectives of traditional humanistic values of arts and ideas. Investigates how others have dealt with problems that humans faced in the past, and possible strategies for problem solving that might aid students today. Promotes a trans- and intercultural, global understanding of human creativity and its impact through the ages.

HUM 201H
World History Through the Arts I
3:3:0 Fall

The first of a two-part series which examines world civilizations through the arts. Studies early societies through the 1600s. Explores formative creative events in history and their relationships to modern issues. Presents perspectives of traditional humanistic values of arts and ideas. Investigates how others have dealt with problems that humans faced in the past, and possible strategies for problem solving that might aid students today.
Course Descriptions

HUM 2020 World History Through the Arts II 3:3:0 Fall, Spring
Studies societies from the 1600s, as the second part of a two-part series which examines world civilizations through the arts. Explores formative creative events in history and their relationships to modern issues. Presents perspectives of traditional humanistic values of arts and ideas. Investigates how others have dealt with problems that humans face in the past, and possible strategies for problem solving that might aid students today.

HUM 202G World History Through the Arts II 3:3:0 Spring
Studies societies from the 1600s, including non-Western societies, as the second part of a two-part series which examines world civilizations through the arts. Explores formative creative events in history and their relationships to modern issues. Presents perspectives of traditional humanistic values of arts and ideas. Investigates how others have dealt with problems that humans face in the past, and possible strategies for problem solving that might aid students today. Promotes understanding of the global, trans- and intercultural nature of human creativity and its impacts.

HUM 202H World History Through the Arts II 3:3:0 Spring
The second of a two-part series which examines world civilizations through the arts. Studies societies from the 1600’s. Explores formative events in history and their relationships to modern issues. Presents perspectives of traditional humanistic values of arts and ideas. Investigates how others have dealt with problems that humans face in the past, and possible strategies for problem solving that might aid students today.

HUM 203G Art Form Focus I GI 3:3:0 On Sufficient Demand
Surveys the nature, history, and possibilities of one specific art form, such as painting, sculpture, theater, architecture, dance, music, or literature, in the context of the influence that art forms exert on each other. Deals with characteristics of a chosen art form prior to 1500 in more depth than Hum 1010 or 2010 can, while highlighting how creative events in human history always are in dialogue with the social discourses of their times and with each other.

HUM 204G Art Form Focus II GI 3:3:0 On Sufficient Demand
Surveys the nature, history, and possibilities of one specific art form, such as painting, sculpture, theater, architecture, dance, music, or literature, in the context of the influence that art forms exert on each other. Deals with characteristics of a chosen art form after 1500 in more depth than Hum 1010 or 2010 can, while highlighting how creative events in human history always are in dialogue with the social discourses of their times and with each other.

HUM 2100 Adventures of Ideas Through 1500 3:3:0 Fall
Studies great written or visual texts in the Western or Eastern history of ideas–artistic, literary, philosophical, religious, political, technological, or scientific–from Antiquity through 1500. Readings and thematic focus vary by instructor, but all courses interrelate texts from different disciplines and world regions under one broad topic relating to the human condition, such as love, death, war and peace, family, justice, the state etc.

HUM 210H Adventures of Ideas Through 1500 3:3:0 Fall
* Prerequisite(s): Enrollment in the UVU Honors program or approval by the instructor.
Studies great written or visual texts in the history of ideas–artistic, literary, philosophical, religious, political, technological, or scientific–from Antiquity through 1500. Readings and thematic focus vary by instructor, but all courses interrelate texts from different disciplines and world regions under one broad topic relating to the human condition, such as love, death, war and peace, family, justice, the state etc. This Honors version of HUM 2100 requires more rigorous reading and writing assignments and is open to students in the Honors program or students with special approval from the instructor only.

HUM 2200 Adventures of Ideas After 1500 3:3:0 Spring
Studies great written or visual texts in the Eastern or Western history of ideas–artistic, literary, philosophical, religious, political, technological, or scientific–from the Renaissance through the present. Readings and thematic focus vary by instructor, but all courses interrelate readings from different disciplines and world regions under one broad topic relating to the human condition, such as individuality, power, health, freedom, violence, the natural environment, etc.

HUM 220H Adventures of Ideas After 1500 3:3:0 Spring
* Prerequisite(s): Enrollment in the Honors Program or instructor’s approval
Studies great written and visual texts in the Eastern or Western history of ideas–artistic, literary, philosophical, religious, political, technological, or scientific–from the Renaissance through the present. Readings and thematic focus vary by instructor, but all courses interrelate readings from different disciplines and world regions under one broad topic relating to the human condition, such as individuality, power, health, freedom, violence, the natural environment, etc. This Honors version of HUM 2200 requires more rigorous reading and writing assignments and is open to students in the Honors program or students with special approval from the instructor only.

HUM 2500 Introduction to Ancient Greek I 6:6:0 On Sufficient Demand
* Prerequisite(s): ENGL 1010 or ENGH 1005
Allows students the opportunity to intensively study the Ancient Greek language at the introductory level. Focuses primarily on Attic Greek. Focuses primarily on grammar and textbook exercises with some analysis of literary and/or philosophical selections in Ancient Greek. Relates particularly to students interested in studying Ancient Greek philosophy or Ancient Greek literature, and offers an important grounding for students interested in studying the New Testament.

HUM 2510 Introduction to Ancient Greek II 6:6:0 On Sufficient Demand
* Prerequisite(s): HUM 2500
Allows students to continue intensive study of the Ancient Greek language at the introductory level. Focuses primarily on Attic Greek. Focuses primarily on grammar and textbook exercises with some analysis of literary and/or philosophical selections in Ancient Greek. Relates particularly to students interested in studying Ancient Greek philosophy or Ancient Greek literature and is an important grounding for students interested in studying the New Testament.

HUM 281R Internship 1 to 6:1 to 6:0 On Sufficient Demand
* Prerequisite(s): Approval of Cooperative Coordinator
* Prerequisite(s) or Corequisite(s): Completion of at least nine credits of class work in Humanities.
Allows pre-advanced Humanities students to receive credit for Humanities-related service as a paid or unpaid intern in a governmental, not-for-profit, or private agency. Provides practical and research development in the selected areas of service so as to further students' academic and professional interests and goals. Internship must be supervised by agency representative. Must be approved by Humanities internship advisor and department chair and written contracts must be completed and signed. Credit is determined by the number of hours a student works during the semester. May be repeated for a maximum of 9 credits toward graduation. May be graded credit/no credit.

HUM 290R Independent Study 1 to 3:0 to 3:0 to 12 On Sufficient Demand
* Prerequisite(s): Enrollment in the Honors Program or instructor’s approval
Provides independent study as directed in reading and individual projects. Request must be submitted for approval by the department. Students may do independent study for one, two or three credits with a limit of three credits applying toward graduation with an AA/AS degree.

HUM 295R Directed Readings 1 to 3:0 to 3:0 to 12 On Sufficient Demand
Provides an opportunity for second year students to do in-depth research within the Humanities. Study is limited to advanced work beyond that which can be completed in existing, available classes. A proposal must be submitted and approved by the department prior to enrollment.
HUM 3060 (Cross-listed with: ENGL 3060) Visual Rhetoric 3:3:0 Fall
* Prerequisite(s): ENGL 2010 with a grade of C- or higher and University Advanced Standing

Investigates the growing academic and cultural interest in the rhetorical nature of visual texts. Teaches critical thinking about the consumption and productions of images and multimodal texts. Explores visual grammars and other theories of visual rhetoric as articulated by contemporary image, language, and scholars of rhetoric. Encourages the development of theoretical and practical knowledge through reading, discussion, and analysis as well as through the production of visual texts and written work.

HUM 320R Topics in Humanities 1 to 3:1:3:0 Fall, Spring
* Prerequisite(s): ENGL 2010 or at least sophomore status and University Advanced Standing

Studies varying topics such as a theme (e.g., death or story-telling), figure (e.g., John Cage or Michelangelo), or movement (e.g., DaDa or Pragmatism) in humanities. Includes study of more than one art form (e.g., film, literature, and music) or discipline (e.g., art, history, and biology). May be repeated for a maximum of 6 credits toward graduation with different topics.

HUM 325R Area Studies in Humanities 3:3:0 Fall, Spring
* Prerequisite(s): ENGL 2010 or at least sophomore status and University Advanced Standing

Studies the literature, philosophy, and arts of a particular geographical area. Topics vary. May be repeated for a maximum of 6 credits toward graduation with different topics.

HUM 330R Period Studies in Humanities 3:3:0 Fall, Spring
* Prerequisite(s): ENGL 2010 or at least sophomore status and University Advanced Standing

Studies a particular period within the humanities (such as the medieval world, Romanticism, or Modernism). Includes study of more than one art form (e.g., music, art, and literature) or discipline (such as literature and philosophy) from during the chosen period. Topics vary. Repeatable, with different topics, toward graduation.

HUM 3500 Approaches to Humanities WE 3:3:0 Fall
* Prerequisite(s): University Advanced Standing

Surveys recent critical and aesthetic theory for each art form and teaches students how to apply theoretical approaches to the interpretation of individual texts, films, artworks, buildings, performances, etc. Includes readings of seminal works by philosophers, academic or professional critics, and practicing artists. Studies examples where the apparent divide between theory and practice is collapsed, where, for instance, an artistic product in itself may have provided a new approach for future artistic productivity and interpretation, or where a theoretical contribution has been made in such a way as immediately to demonstrate a certain creative practice.

HUM 3800 (Cross-listed with: PHIL 3800) Aesthetics 3:3:0 Fall
* Prerequisite(s): University Advanced Standing

Studies aesthetics as perceived by the disciplines of philosophy, psychology, sociology, anthropology, history, and others. Analyzes art forms, including the visual arts, literature, music, and theater from the perspectives of philosophers such as Plato, Aristotle, Kant, Hume, Dewey, Danto, Bell, Collingwood, Thoreau, and Dickie.

HUM 3820 (Cross-listed with: PHIL 3820) Philosophy Through Literature 3:3:0 Spring Even Year
* Prerequisite(s): PHIL 1000 or PHIL 100H or PHIL 2050 or PHIL 205H or PHIL 205G or PHIL 2110 or PHIL 2150 or instructor approval and University Advanced Standing

Provides students with an interdisciplinary approach to the study of philosophy through literature. Given students the opportunity to read some of the most engaging thinkers and how they offer differing perspectives through a variety of texts. Breaks down some of the strict divisions placed between philosophical and literary texts.

HUM 400R Humanism and Posthumanism 3:3:0 Fall
* Prerequisite(s): At least junior standing and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 2010

Explores Humanism or Posthumanism across the arts and their diverse cultural history. Defines humanism as varieties of the traditional view that Man is the measure of all things, and Posthumanism as an umbrella term for recent theoretical approaches within the humanities that challenge this view, for instance by placing humanity in the context of global or universal, intrinsically diverse and self-generating, scientific, technological, or ecological systems. May compare aspects of humanism throughout space and time, in its diverse cultural manifestations, or may focus on a twenty-first-century view of these long traditions. May also choose the example of the humanistic or posthumanistic aspects of a single time period, culture, or interdisciplinary oeuvre. Offers an opportunity to advanced students to synthesize, critique, and strengthen their own viewpoints, and to expand their interdisciplinary understanding of human expression, in response to the most fundamental or recent currents within intellectual history. May be repeated for a maximum of 6 credits toward graduation.

HUM 401R Directed Readings 1 to 3:1:3:0 Fall, Spring
* Prerequisite(s): Department Chair Approval, Instructor Approval, and University Advanced Standing

Designs reading and writing assignments in consultation with a faculty member to meet special needs or interests not available through regular course work. May be repeated for a maximum of 6 credits toward graduation.

HUM 414R Advanced Topics in Humanities 3:3:0 Fall, Spring
* Prerequisite(s): At least junior standing and University Advanced Standing
* Prerequisite(s) or Corequisite(s): ENGL 2010

Studies a topic relevant to cross-disciplinary humanities at an advanced level of critical engagement. Includes more than one art form or discipline of humanistic inquiry. Requires study of secondary literature and theoretical texts. May be repeated, with different topics, for a maximum of 6 credits toward graduation.

HUM 4300 (Cross-listed with: PHIL 4300) Environmental Aesthetics 3:3:0 On Sufficient Demand
* Prerequisite(s): PHIL 1000, PHIL 100H, PHIL 2050, PHIL 205H, PHIL 205G, ENST 3000, HUM 1010, HUM 101H, HUM 101G, or HUM 3500 and University Advanced Standing

Introduces students to emerging themes in environmental aesthetics. Evaluates concepts and attitudes toward nature including, but not limited to, the concept of beauty in natural and human-made environments from a cross-cultural perspective. Studies environmental formalism, cognitivism and non-cognitivism, as well as divergent spiritual, ecological, religious, and moral approaches to the appreciation of nature.

HUM 481R Internship 1 to 6:1 to 6:0 On Sufficient Demand
* Prerequisite(s): Department chair approval and University Advanced Standing

Allows advanced Humanities students to receive credit for Humanities-related service as a paid or unpaid intern in a governmental, not-for-profit, or private agency. Provides practical and research development in the selected areas of service so as to further students' academic or professional interests or goals. Internship must be supervised by agency representative. Must be approved by Humanities internship advisor and department chair and written contracts must be completed and signed. Credit is determined by the number of hours a student works during the semester. May be repeated for a maximum of 9 credits toward graduation. May be graded credit/no credit.

HUM 490R Directed Readings 1 to 3:1 to 3:0 Fall, Spring
* Prerequisite(s): Department Chair Approval, Instructor Approval, and University Advanced Standing

Designs reading and writing assignments in consultation with a faculty member to meet special needs or interests not available through regular course work. May be repeated for a maximum of 6 credits toward graduation.
To be taken during the students’ last semester in the baccalaureate program. Instructs them how to conduct Humanities research, develop a complex critical argument, and write a senior thesis, building on skills and knowledge gained in earlier courses. Encourages students to explore their desired professional or graduate research interests. Includes defending the paper’s thesis, method, and conclusion before a faculty committee, as well as the creation of a portfolio helpful in applying to graduate school or seeking employment.

### Interdisciplinary Studies Prog (IDST)

**IDST 281R**
#### Interdisciplinary Studies Internship
1 to 8:1 to 8:0
* Prerequisite(s): Department Approval
Proven, supervised, practical, and professional experience for upper division students. May be repeated for a maximum of 8 credits toward graduation. May be graded Credit/No Credit.

**IDST 481R**
#### Interdisciplinary Studies Internship
1 to 8:1 to 8:0
* Prerequisite(s): Junior standing, department approval, and University Advanced Standing
Provides supervised, practical, and professional experience for upper division students preparing for a variety of careers associated with interdisciplinary studies. May be repeated for a maximum of 8 credit hours. May be graded credit/no credit.

**IDST 4900**
#### Interdisciplinary Studies Capstone
3:3:0  
* Prerequisite(s): Senior status and University Advanced Standing
For students nearing completion of an Interdisciplinary Studies minor. Provides an opportunity for students to synthesize their interdisciplinary course work. Requires and facilitates a major research project. Addresses the theoretical and practical problems of interdisciplinary research and writing. Requires participation in peer review groups and in-class presentations.

### Information Management (IM)

**IM 1010**
#### Basic Computer Applications
3:3:0  
* Prerequisite(s): Basic keyboarding skill
Fall, Spring, Summer
Prepares students for the IC3 certification exam. Teaches basic computer fundamentals, digital living concepts, and key applications. Includes PC computer system concepts, basics of the Windows operating system, software licensing and installation, electronic communication, Internet and research fluency, and ethical computer usage. Provides hand-on experience in the basic features of Microsoft Word, PowerPoint, Excel, and Access as common business problem solving and communication tools. May be delivered hybrid and/or online. Lab access fee of $45 for computers applies. Canvas Course Mats $78/Cengage applies. Software fee of $10 applies.

**IM 101A**
#### Word Processing Applications
1:1:0  
* On Sufficient Demand
Introduces word processing software. Emphasizes commands needed to create, format, revise, save, and print documents. Includes inserting and formatting graphics, tables, and tabs into a text document. Lab access fee of $45 for computers applies.

**IM 101B**
#### Presentations Applications
.5:.5:0  
* On Sufficient Demand
Introduces presentation software. Emphasizes process of creating, formatting, revising, saving, print, and showing presentations. Includes planning a slide show, choosing appropriate designs, and using templates. Lab access fee of $45 for computers applies.

**IM 183R**
#### IM Student Chapter
1:1:0  
Fall, Spring
Develops insights regarding lifetime careers and advancement opportunities in business, education, and industry through participation in a student organization. Helps students develop professionally through opportunities to use and apply, human relations, management, social, communicative, and organizational skills. Provides opportunities for leadership positions, committee assignments, participation in school and community activities, and competition in state and national competitive events. Requires payment of local, state, and national dues. Students may choose membership in Phi Beta Lambda, the collegiate division of FBLA (Future Business Leaders of America), or IAAP (International Association of Administrative Professionals). Designed for information management and education-oriented students but open to all students interested in lifetime business skills. Graded credit/no credit. May be repeated for a maximum of 4 credits toward graduation. Lab access fee of $45 for computers applies.

**IM 184R**
#### IM Student Leadership
1:1:0  
* Instructor Approval
Fall, Spring
For Phi Beta Lambda officers and International Association of Administrative Professionals. Includes development, organization, and direction of the Program of Work for student chapters. Graded on a credit/no credit basis. May be repeated for a maximum of 4 credits toward graduation.

**IM 201A**
#### Spreadsheet Applications
2:2:0  
* On Sufficient Demand
* Prerequisite(s): (IM 1010 with a grade of B- or higher) or (Basic Computer Applications Exam with a score of 80% recommended)
Introduces spreadsheet software. Emphasizes process of creating, formatting, enhancing, revising, saving, and printing spreadsheets. Stress use of formulas and functions to solve problems. Includes creating charts using spreadsheet data. Lab access fee of $45 for computers applies.

**IM 201B**
#### Database Applications
1:1:0  
* On Sufficient Demand
* Prerequisite(s): (IM 1010 with a grade of B- or higher) or (Basic Computer Applications Exam with a score of 80% or higher) or Instructor Approval
Introduces database software. Emphasizes process of designing, modifying, and creating related tables. Includes creating forms, generating reports and labels and constructing queries. Lab access fee of $45 for computers applies.

**IM 2100**
#### Document Processing Applications
3:3:0  
* Basic keyboarding skills
* On Sufficient Demand
IM 2300 Information Management Principles 3:3:0 Fall
* Prerequisite(s): IM 1010 or IM 2100 or Instructor Approval

Includes storage and retrieval systems, managing manual and electronic files, cross referencing, automated records systems, safety, security, and disaster recovery. Discusses the records cycle, equipment, supplies, retention schedules, and micrographics and image technology. Explores legal and ethical concerns. Lab access fee of $45 for computers applies. Canvas Course Mats $78/Cengage applies.

IM 2400 Presentation Applications 3:3:0 On Sufficient Demand
* Prerequisite(s): IM 1010 or IM 2100 or Instructor Approval

Uses a presentation software tool to create computer slide presentations, business charts and graphs, illustrations for desktop publishing, text charts, and other business-oriented publications. Incorporates presentation templates, clip art, charts and graphs, scanned images, sound, animations, video, and hyperlinks to create projects. Software fee of $8 applies. Lab access fee of $45 for computers applies.

IM 2500 Graphic Applications 3:3:0 Fall
* Prerequisite(s): IM 1010 or IM 2100 or Instructor Approval

Explores digital image editing using Adobe Photoshop and Adobe Illustrator. Provides an overview of image optimization processes for the web. Lab access fee of $45 for computers applies.

IM 2600 Spreadsheet Applications 3:3:0 Fall, Spring, Summer
* Prerequisite(s): MAT 0990 or equivalent business math knowledge; basic keyboarding skill

Provides an extensive study and hands-on examination of practical business applications using electronic spreadsheets. Provides comprehensive coverage of features available in the current Windows version of spreadsheet software. Software fee of $18 applies Lab access fee of $45 for computers applies. Canvas Course Mats $78/Cengage applies.

IM 2800 Integrated Software Projects 3:3:0 Spring
* Prerequisite(s) or Corequisite(s): IM 2100 and IM 2600 or Instructor Approval

Emphasizes organizing projects, prioritizing tasks, working under time pressures, and dealing with stressful situations. Requires completion of advanced document production in an automated environment using current versions of suite software packages. Course projects stress self-motivation, acceptance of responsibility, critical thinking, and effective decision making. Designed to prepare students majoring in administrative information management to enter the work force, and should be taken at the end of a program in order to grasp the concepts presented and, with little supervision, produce material acceptable on the job. Software fee of $18 applies. Lab access fee of $45 for computers applies. Software fee of $8 applies.

IM 281R Internship 1 to 8:1 to 8:0 On Sufficient Demand
* Prerequisite(s): Departmental Approval

For Information Management majors only. Provides a transition from school-to-work where learned theory is applied to actual practice through a meaningful on-the-job experience. Includes student, employer and coordinator evaluations, on-site work visits, and written assignments. Completers should obtain experience in establishing and accomplishing individualized work objectives that improve work performance. Internship is intended for entry level IM students who are working at that level. Credit is determined by the number of hours a student works during the semester and completion of individually set goals. May be repeated for a maximum of 9 credits towards graduation. May be graded credit/no credit.

IM 290R Current Topics in Information Management 1 to 3:0 to 3:0 to 9 Fall, Spring, Summer
* Prerequisite(s): Departmental Approval

Designed for students interested in specific information management tools and concepts. Includes relevant and changing topics and tools used by business and industry. Emphasizes hands-on experience along with lectures and demonstrations. May be taken for a total of 9 credits toward graduation. Lab access fee of $45 for computers applies.

IM 3000 Database Applications 3:3:0 Spring
* Prerequisite(s): Basic keyboarding skill and University Advanced Standing

Explores creating and utilizing database files using database management software. Covers basic concepts of database management emphasizing commonly used applications. Teaches use of reports, letters, labels, custom screens, and queries in a business setting. Software fee of $10 applies. Lab access fee of $45 for computers applies.

IM 3500 Desktop Publishing Applications 3:3:0 Spring
* Prerequisite(s): IM 2100 or Instructor approval

For administrative information management or administrative information support majors and others interested in learning desktop publishing features. Teaches the use of current desktop publishing software in a Windows environment. Emphasizes production of complex documents for the purpose of publication. Teaches formatting and design principles through the use of theory instruction, demonstration, and hands-on experience. Lab access fee of $45 for computers applies.

IM 3600 Advanced Excel for Decision Making 3:3:0 Fall, Spring
* Prerequisite(s): IM 2100 or University Advanced Standing

Uses Microsoft Excel as a reporting tool and as a modeling tool for solving business problems. Focuses on reporting, analyzing data, and building analytic models to improve operations, increase profits, or reduce costs. Builds models to help make business decisions including advanced functions, dashboards, forecasting, optimization, and simulation. Lab access fee of $45 for computers applies.

IM 3700 Database Applications 3:3:0 Spring
* Prerequisite(s): Basic keyboarding skill and University Advanced Standing

Provides experience in an automated environment using current versions of suite software packages. Course projects stress self-motivation, acceptance of responsibility, critical thinking, and effective decision making. Designed to prepare students majoring in administrative information management to enter the work force, and should be taken at the end of a program in order to grasp the concepts presented and, with little supervision, produce material acceptable on the job. Software fee of $18 applies. Lab access fee of $45 for computers applies. Software fee of $8 applies.

IM 3800 Business Applications 3:3:0 Fall, Spring
* Prerequisite(s): IM 2100 or Instructor Approval

Teaches the use of current business applications software. Teaches use of reports, letters, labels, custom screens, and queries in a business setting. Software fee of $10 applies. Lab access fee of $45 for computers applies.

IM 390R Information Management Seminar 3:3:0 Spring, Summer
* Prerequisite(s): Instructor approval

Provides experience in an automated environment using current versions of suite software packages. Course projects stress self-motivation, acceptance of responsibility, critical thinking, and effective decision making. Designed to prepare students majoring in administrative information management to enter the work force, and should be taken at the end of a program in order to grasp the concepts presented and, with little supervision, produce material acceptable on the job. Software fee of $18 applies. Lab access fee of $45 for computers applies. Software fee of $8 applies.

IM 400R Information Management Seminar 3:3:0 Spring, Summer
* Prerequisite(s): Instructor approval

Provides experience in an automated environment using current versions of suite software packages. Course projects stress self-motivation, acceptance of responsibility, critical thinking, and effective decision making. Designed to prepare students majoring in administrative information management to enter the work force, and should be taken at the end of a program in order to grasp the concepts presented and, with little supervision, produce material acceptable on the job. Software fee of $18 applies. Lab access fee of $45 for computers applies. Software fee of $8 applies.

IM 410R Information Management Seminar 3:3:0 Spring, Summer
* Prerequisite(s): Instructor approval

Provides experience in an automated environment using current versions of suite software packages. Course projects stress self-motivation, acceptance of responsibility, critical thinking, and effective decision making. Designed to prepare students majoring in administrative information management to enter the work force, and should be taken at the end of a program in order to grasp the concepts presented and, with little supervision, produce material acceptable on the job. Software fee of $18 applies. Lab access fee of $45 for computers applies. Software fee of $8 applies.
Course Descriptions

INFO 1000
E-Commerce Techniques for Small Business
3:3:0  
**Prerequisite(s):** Basic Computer Proficiency or IM 1010 strongly recommended
Introduces strategies and best practices for analyzing a target market, designing an online business, and implementing an e-Commerce solution. Discusses online marketing, branding, usability, search engine optimization, personalization, rapid development, theming, and security. Requires implementation of an online small business individually or with a group. Lab access fee of $45 for computers applies.

INFO 1120
Information Systems and Technology Fundamentals
3:3:0  
**Prerequisite(s):** IM 1010 recommended
Explores the fundamental concepts of information technology and the role played by enterprise systems in business and organizational strategy. Introduces types of systems, computer organization and hardware, operating systems and networking, project planning, software development, computer ethics, and career paths for enterprise developers and IT professionals. Lab access fee of $45 for computers applies.

INFO 1200
Computer Programming I for IS IT
3:3:0  
**Prerequisite(s):** MAT 1010 or higher; INFO 1120 recommended
Presents concepts of modern computer programming. Emphasizes problem-solving, algorithm development, and programming design. Stresses constructs, data representation, fundamental types and data structures, decision structures, repetition structures, methods, arrays, classes, and objects: Includes testing, debugging, and documentation. Introduces object-oriented, event-driven programming models. Lab access fee of $45 for computers applies.

INFO 2100
Computer Proficiency for Technology Professionals
3:3:0  
**Prerequisite(s):** ENGL 1010, ENGH 1050, or higher and (MAT 1030 or higher)
For Technology Management and Construction Management students. Provides opportunities for students to gain proficiency in using Microsoft Office (Word, PowerPoint, Excel, and Access) to enhance their business productivity and problem-solving skills. Teaches students to apply information technologies to problem situations. Meets computer proficiency requirement for Technology Management degree. Lab access fee of $45 for computers applies.

INFO 2200
Computer Programming II for IS IT
3:3:0  
**Prerequisite(s):** INFO 1200 or CS 1400 with a grade of C- or better within the past seven years) or Departmental Approval
**Prerequisite(s) or Corequisite(s):** MATH 1050 or higher
Focuses on object-oriented design and programming methodologies. Teaches inheritance, polymorphism, and encapsulation. Develops knowledge to abstract functionality by using interfaces. Covers collection classes, generics, exception handling, file handling, and more advanced topics such as accessing databases via LINQ, socket/network programming, and multi-threading. Lab access fee of $45 for computers applies.

INFO 2410
Database Fundamentals
3:3:0  
**Prerequisite(s):** INFO 1120 recommended or IM 2010 recommended
Introduces concepts and use of database management systems. Presents the relational model, Structured Query Language, database design including normalization theory, and application development tools using an enterprise-level relational database management system. Lab access fee of $45 for computers applies.

INFO 2420
Web Application Design
3:3:0  
**Prerequisite(s):** INFO 1120 recommended or IM 2010 recommended
Focuses on the design and construction of Web pages and maintenance of Web sites. Includes foundations in standards-based HTML and CSS. Covers code markup, design concepts and web graphics manipulation, page layout, form development, and usability and accessibility issues. Teaches use of Web authoring tools for code development and site management. Requires individual projects. May be delivered hybrid and/or online. Lab access fee of $45 for computers applies.

INFO 2810R
Internship
1 to 8:1 to 8:0  
**Prerequisite(s):** Department Approval
Provides opportunities to apply classroom theory on the job. Requires work as paid employees in a job that relates to their careers while enrolled at the College. Students meet at least monthly with the Departmental Internship Coordinator. Completers meet individually set goals. Six credits may be applied toward graduation with an AAS degree and three credits toward certificate programs. May be graded credit/no credit.

INFO 297R
Independent Study
1 to 3:0 to 9  
**Prerequisite(s):** Department Approval
Offers independent study as directed in reading in individual projects. Approval for this course is at the discretion of the department chairperson. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies.

INFO 3120
Management Information Systems
3:3:0  
**Prerequisite(s):** (INFO 1120 or IM 1120 or IM 2010 or IM 2600 with a grade of C- or better within the past five years) or departmental approval and University Advanced Standing
Introduces the field of information systems and technology. Teaches the general business manager how to use and manage the most current information technologies (IT). Studies the Internet, Intranets, and Extranets for electronic commerce and enterprise collaboration. Examines business cases demonstrating IT contributions to competitive advantage, reengineering business processes, and decision making. May be delivered online.Lab access fee of $45 for computers applies.

INFO 3130
Introduction to Applied Data Analytics
3:3:0  
**Prerequisite(s):** Basic statistics course (MGMT 2340 or STAT 1040 or STAT 1045 or STAT 2040 or STAT 2050 or BESC 3010) and (Computer Proficiency or INFO 1120 or IM 2010 or IM 2600 with a grade of C- or better within the past five years) or departmental approval and University Advanced Standing
Intended for people who will be working with data analysts and data scientists, managing analytics projects, or investing in analytics ventures, and aspiring data scientists. Provides opportunities for students to gain skills in data-analytic thinking required to succeed in today's analytical and data-driven economy. Introduces the basics of data management and data analytics. Covers core analytic techniques: data exploration and visualization, pattern discovery (segmentation and association), predictive modeling (decision tree, logistic regression, neural network), and forecasting. Lab access fee of $45 for computers applies.
INFO 3300  
Web Systems Development  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): ((INFO 1200 or IT 1200 or CS 1400) and (INFO 2410 or CS 3520) both with a grade of C- or higher within the past seven years) and University Advanced Standing. INFO 2420 recommended  
Emphasizes interpretation of business processes, process modeling, and implementation of the models as web applications. Instructs how to implement web solutions that use a relational database backend to manage site data using an industry-standard programming language to interact with the database to produce dynamic web content. Covers parameter passing, cookie storage, and session variables. Introduces application platforms that can be customized to new business requirements. Teaches how to use content management systems (CMS) and how to customize such systems to quickly produce web applications to meet business needs. Lab access fee of $45 applies.

INFO 3330  
Client-Side Web Development  
3:3:0  
Fall  
* Prerequisite(s): ((INFO 1200 or IT 1200 or CS 1400) and (INFO 2410 or CS 3520) both with a grade of C- or higher within the past seven years) and University Advanced Standing. INFO 2420 recommended  
Teaches how to create high performance and scalable web sites using JavaScript across the client and server (full development stack). Instructs how to program directly in JavaScript as well as how to utilize JavaScript libraries and frameworks. Introduces popular JavaScript libraries to perform client-side form validation, make AJAX server calls, and deploy mobile apps based on web standards. Covers web application development using client-side frameworks that implement model view controller design patterns. Introduces server-side JavaScript tools and the NoSQL database to manage application data. Lab access fee of $45 applies.

INFO 3360  
Server-Side Web Frameworks  
3:3:0  
Spring  
* Prerequisite(s): ((INFO 1200 or IT 1200 or CS 1400) and (INFO 2410 or CS 3520) both with a grade of C- or higher within the past seven years) and University Advanced Standing. INFO 2200 recommended  
* Prerequisite(s) or Corequisite(s): INFO 3300  
Emphasizes web application development using modern server-side frameworks for web site architecture as well as data integration technologies. Covers server-side architectural design patterns in depth using Model View Controller (MVC) frameworks. Covers Object Relational Mapping (ORM) tools for database integration as well as techniques to secure a website from common attacks. Teaches how to implement web site authentication and authorization, form validation, web services, and introduces unit testing and test-driven development. Instructs how to package and deploy applications to a web server. Lab access fee of $45 applies.

INFO 3410  
Database Systems and Warehousing  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): (INFO 2410 or CS 3520 with a grade of C- or higher within the past seven years) and University Advanced Standing  
Covers advanced database development topics and introduces a data warehouse model designed especially to support analytics and reporting needs. Database development topics covered include transaction management, performance optimization, data loading, and the development of stored procedures, triggers, and functions. Presents the data warehouse model in contrast to existing operational transaction systems. Analyzes business reporting needs, creates models for data warehouses based on the reporting needs, and uses SQL to create and populate tables based on dimensional models. Lab access fee of $45 for computers applies.

INFO 3430  
Systems Analysis and Design  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): (INFO 2410 and (INFO 2420 or IT 2700)) or (IM 2600 and IM 2800) each with a grade of C- or higher within the past seven years) and (MKTG 2200 or ENGL 2310) and University Advanced Standing  
Introduces the systems development life cycle with a focus on systematic planning; requirements, process, and data analysis; and an overview of the design phase. Covers fundamental principles, effective processes, and techniques of project management, including scheduling and project control. Covers appropriate methodologies, tools, diagrams, and techniques for systems analysis, design, and project management. Requires working in teams to complete and present the first planning and analysis phases of a project for a client. Should be taken in the end of the junior year or first semester of the senior year. Should be taken in sequence with INFO 4430 immediately following this course. Lab access fee of $45 for computers applies.

INFO 3700  
Health Informatics Fundamentals  
3:3:0  
Fall, Spring  
* Prerequisite(s): University Advanced Standing  
* Prerequisite(s) or Corequisite(s): INFO 2410 or ZOOL 1090 or HLTH 3200  
Introduces the concepts, practices and ethics of health informatics. Includes a survey of current health care information systems, such as electronic health records, practice management systems, patient portals, consumer health informatics, disease registries, e-prescribing, telemedicine, and public health informatics. Surveys health care information exchange and related standards and classification systems used to implement interoperable computer-based patient records. Examines privacy and security measures, such as HIPAA, HITECH Act, and Meaningful Use and how they are related to data security, privacy, and public perception. Lab access fee of $45 for computers applies.

INFO 3750  
Healthcare Information Systems  
Applications  
3:3:0  
Spring  
* Prerequisite(s): ((INFO 1200 or IT 1200 or CS 1400) and (INFO 2410 or CS 3520) both with a grade of C- or higher within the past seven years) and University Advanced Standing  
* Prerequisite(s) or Corequisite(s): INFO 3700  
Provides pragmatic coverage of the topics and resources relevant to health informatics. Exposes students to real-world examples and skills related to the acquisition, representation, management, analysis, and use of different types of HIS data. Emphasizes issues such as standardization, security, and handling unstructured data. Includes assignments, a course project, and hands-on experience in applying informatics solutions in health care settings. May be delivered hybrid. Lab access fee of $45 for computers applies.

INFO 405G  
Global Ethical and Professional Perspectives in IS and IT  
3:3:0  
Fall, Spring, Summer  
* Prerequisite(s): INFO 3430 and University Advanced Standing  
Examines professional and ethical issues within the information systems and information technology fields with a global perspective. Covers ethical and legal issues IT professionals face dealing with computer and cybercrimes, privacy issues, freedom of expression, intellectual property, software development including risk analysis, and social networking. Includes career professional development through resumes, cover letters, and job interviews specific to information systems and technology. Focuses on global networked readiness, digital highways, and challenges that information technology organizations face. May be delivered hybrid. Lab access fee of $45 for computers applies. Canvas Course Mats $76/Cengage applies.

INFO 4120  
Business Intelligence Systems  
3:3:0  
Fall, Spring  
* Prerequisite(s): ((INFO 3120 or INFO 3130) and University Advanced Standing; INFO 2410 recommended  
Focuses on extracting business intelligence from data sets for various applications including reporting and visual analytics in multiple domains including web analytics and business analytics to aid decision-making processes. Provides hands-on experience with a variety of business intelligence software for reporting and building visualizations and dashboards. Emphasizes how to extract, present and apply business intelligence to improve business decision making. Lab access fee of $45 for computers applies.
INFO 4130
Data Science and Big Data Analytics
3:3:0  Fall, Spring  
* Prerequisite(s): (STAT 2050 or MGMT 2340), INFO 3130, and University Advanced Standing

Capstone course extends the concepts of analytics to the analysis of large data-sets, and preparation of analysis reports and presentations describing implications of findings. Uses modern tools such as SAS and R for advanced analytics and Hadoop for big data. Covers the theory and methods of advanced data analytics such as clustering, association, decision trees, time series, and text analysis. Hands-on application using a big data lifecycle lab. Lab access fee of $45 for computers applies.  

INFO 4135
Data Security Analytics  
3:3:0  Fall  
* Prerequisite(s): IT 2700 and INFO 2410 and University Advanced Standing; (INFO 3130 and INFO 3410 recommended)

Introduces students to the concept of data analytics as applied to cyber security. Includes collection, aggregation, data mining, and analysis of various data sources. Utilizes data analytics tools that correlate data in order to identify security events that may go undiscovered by traditional detection and log analysis methods. Lab access fee of $45 for computers applies.  

INFO 4300
Enterprise Web Development  
3:3:0  On Sufficient Demand  
* Prerequisite(s): INFO 3300 and University Advanced Standing

Addresses the challenges of developing software applications in a corporate environment. Covers methods to interact with code repositories and commit developed code. Teaches how to create web applications using test-driven development and how to write unit tests for applications. Teaches how to create and group unit tests together and how to trigger the tests automatically when code changes are made. Implements cloud deployments of web applications and teaches how to manage cloud resource usage. Lab access fee of $45 for computers applies.  

INFO 4410
Database Administration  
3:3:0  Fall, Spring  
* Prerequisite(s): (INFO 2410 or CS 3520 within the past five years) and University Advanced Standing

Introduces students to the database administration tasks and tools of a Relational Database Management System (DBMS). Includes the core areas of installation and configuration, maintaining instances and databases, optimizing and troubleshooting, managing data, implementing security, and implementing high availability. Also, introduces NoSQL database solutions and their administration and configuration. Hands-on assignments provide students with opportunities to apply the knowledge gained in the course to a popular commercial database management system. Lab access fee of $45 for computers applies.  

INFO 4415
Database Security and Auditing  
3:3:0  Spring  
* Prerequisite(s): (INFO 3410 or IT 3700) and University Advanced Standing

Utilizing theory, scenarios, and step-by-step examples, this course provides a strong foundation in database security and auditing. Covers the following topics in depth: the importance of database security in contemporary business environments; Security; Profiles; Password policies, privileges and roles; Virtual Private Databases; Auditing; SQL injection; Database management security issues. Lab access fee of $45 for computers applies.  

INFO 4420
Mobile Application Development  
3:3:0  Fall  
* Prerequisite(s): (INFO 1200 or CS 1400) and (INFO 2410 or CS 3520) and University Advanced Standing; (INFO 2200 recommended or CS 1410 recommended)

Focuses on the design and development of native mobile device applications. Covers mobile interface design and development using the navigation controls specific to a popular mobile development platform. Teaches methods for integrating various device capabilities such as the accelerometer, touch interface, contacts app, image displaying capabilities, and the device’s storage. Introduces apps that store and retrieve data from popular cloud data stores. Lab access fee of $45 for computers applies.  

INFO 4425
Web Application Security  
3:3:0  Spring  
* Prerequisite(s): IT 2700 and University Advanced Standing  
* Prerequisite(s) or Corequisite(s): INFO 3300

Examines web application vulnerabilities and remediation techniques. Explores various tools and techniques for mapping web applications and assessing their vulnerabilities. Includes authentication management, session management, cross-site scripting, SQL injection, and web server configuration. Emphasizes practical skills developed through extensive hands-on exercises. Lab access fee of $45 for computers applies.  

INFO 4430
Systems Design and Implementation  
3:3:0  Fall, Spring, Summer  
* Prerequisite(s): INFO 3430 and University Advanced Standing

Continuation of INFO 3430. Focuses on the design and implementation of an information system using an agile, iterative development approach. Utilizes self-organizing teams that will deliver working software with ongoing customer collaboration. Introduces use of a source control system to manage code base, an agile project management tool, and encourages continuous integration practices. Requires that students work in teams to complete and present a working system of a project for a client. Lab access fee of $45 for computers applies.  

INFO 4440
Enterprise Computing Environments  
3:3:0  On Sufficient Demand  
* Prerequisite(s): (ACC 2020 or INFO 3120 or TECH 4420) and University Advanced Standing

Introduces students to Enterprise Computing Environments. Focuses particularly on the configuration and information processing capabilities of ecommerce systems and Enterprise Resource Planning (ERP) systems. Requires students to install, configure, and customize the Magento ecommerce system, and to manage master data. Introduces both Microsoft Dynamics and the SAP ERP system. Uses SAP and Dynamics to demonstrate how enterprise software supports business processes such as order processing, materials requirements management, shipping, invoicing, and purchasing. Requires students to configure a fictional business using the SAP ERP system. May be delivered hybrid. Lab access fee of $45 for computers applies.  

INFO 4450
Senior Project  
3:3:0  On Sufficient Demand  
* Prerequisite(s): INFO 3430 and University Advanced Standing

Involves the implementation of a significant information system or information technology project. Requires students to work in teams to design and develop a working information system or information technology solution for a community client. Culminates in a presentation of the completed project by project developers to project stakeholders, interested faculty, and administration. Lab access fee of $45 for computers applies.  

INFO 449R
Current Topics in Information Systems  
3:3:0  Fall, Spring  
* Prerequisite(s): (Junior Standing or Department Approval) and University Advanced Standing

Provides exposure to emerging technologies and topics of current interest in information systems. Varies each semester depending upon the changes in the information systems discipline or to address a focused area within the information systems discipline. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies.  

INFO 4700
Healthcare Information Systems Management  
3:3:0  On Sufficient Demand  
* Prerequisite(s): University Advanced Standing

Introduces students to the management aspects of the legal and ethical issues related to HIS including applying laws related to confidentiality and data security. Lab access fee of $45 for computers applies.
INFO 481R
Internship
1 to 3:1 to 3:0  Fall, Spring, Summer
* Prerequisite(s): INFO 3300, INFO 3410, INFO 3430, (INFO 3130 or INFO 3330 or INFO 3700 or IT 2700, depending on emphasis), Department Approval, and University Advanced Standing

For upper-division students in information systems. Provides an opportunity to apply classroom theory while students work as employees in a job that relates to their careers in information systems. A maximum of 3 credit hours may be counted towards graduation without prior written IS&T Department approval. May be graded credit/no credit.

INFO 489R
Undergraduate Research in Information Systems
1 to 4:0:5 to 20  On Sufficient Demand
* Prerequisite(s): Department approval and University Advanced Standing

Provides the opportunity to conduct research under the mentorship of a faculty member. Practices the theoretical knowledge gained in prior major courses. Creates a significant intellectual or creative product that is characteristic of the Information Systems discipline and worthy of communication to a broader audience. May be repeated for a maximum of 6 credits toward graduation.

INFO 497R
Independent Study
1 to 3:0:3 to 9  On Sufficient Demand
* Prerequisite(s): Department chair approval and University Advanced Standing

For bachelor's degree students and other interested persons. Offers independent study as directed in reading, in individual projects, at the discretion and approval of the department chairperson. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies.

INFO 6420
Web and Mobile Application Security
3:3:0  Fall
* Prerequisite(s): Acceptance into Graduate Certificate or Master of Science in Cybersecurity or Departmental Approval

* Prerequisite(s) or Corequisite(s): IT 6300

Examines Web application vulnerabilities and remediation techniques. Explores various tools and techniques used to perform Web application assessments. Includes cross-site scripting, SQL injection, session management, and Web server configuration. Emphasizes practical skills developed through extensive hands-on exercises.

Intelligence Studies (INTS)

INTS 1000
Introduction to Intelligence Operations Studies
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Introduces the basic elements of intelligence: collection, analysis, dissemination, counterintelligence, and covert action. Examines the difference between intelligence and information. Describes the structure, functions, capabilities, and contributions of the national intelligence community, including Congress, the military, joint and unified commands, and law enforcement agencies. Identifies the various steps of the intelligence cycle and their purposes. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 1010
Counterintelligence Investigations
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Introduces the principles, objectives, procedures, and reports used to conduct counterintelligence investigations within various investigational contexts. Assesses the planning, communicating, operating, credentialing, and investigating processes associated with counterintelligence investigations. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 1020
Security Programs
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Introduces the principles, objectives, and basic procedures used to develop, account for, control, protect, and arrange for the eventual destruction of sensitive information and material. Prepares students for the investigation of security crimes and the protection of classified information and material in the custody of counterintelligence agents. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 1030
Intelligence Law and Administration of Justice
1:1:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Introduces the legal principles of intelligence law as those principles apply to counterintelligence investigations and operations. Prepares students to use the principles of intelligence law and the administration of justice in the performance of their duties as counterintelligence agents. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 1040
Analytical Process and Product
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Introduces the three analytical processes in the intelligence cycle: intelligence preparation of the battlefield, intelligence surveillance and reconnaissance, and targeting. Leverages analytical products associated with these processes such as PMESII, ASCOPE, Link-Pattern-Nodal analysis, threat characteristics, threat objectives, threat templates, the oil spot, and the situation template. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 1050
Interrogation Operations
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Introduces the basic skills and knowledge to support the collection, dissemination, and protection of intelligence information during human intelligence operations. Applies conventional and unconventional sources with students performing as members of an interrogation team during simulated operations at both tactical and strategic levels. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 1060
Map Reading and Analysis
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Applies map reading and analysis including marginal data, identification of terrain features, and calculation of azimuths. Teaches analytical skills essential to information gathering, collection capabilities, and interpretation of assets. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 1080
Signal Theory
3:3:0  On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program

Identifies the basic skills to intercept, analyze, and report non-communication signals. Includes the handling of classified material. Examines signal and wavelength theory, radar theory, electronic intelligence parameters, and basic collection operations. Assesses worldwide non-communications threats to include weapons systems operations, message information extraction, opposing forces operations, and situation analysis. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

<td>Battlefield Forensic Investigations I</td>
<td>4:3:3</td>
<td>* Prerequisite(s): Acceptance into the Intelligence Studies Program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Examines battlefield forensic investigation procedures and techniques. Emphasizes incident scene management and the identification, collection, and preservation of material evidence related to the manufacture and use of improvised explosive devices (IEDs). This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>INTS 1420</td>
<td>Battlefield Forensic Investigations II</td>
<td>4:3:3</td>
<td>* Prerequisite(s): Acceptance into the Intelligence Studies Program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Explores the technical aspects of the collection and preservation of physical evidence from a battlefield environment. Emphasizes the processes involved in identifying persons assembling improvised explosive devices (IEDs), and the tactics and techniques used in the employment of those devices. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>INTS 2000</td>
<td>Collection Operations</td>
<td>4:4:0</td>
<td>* Prerequisite(s): Acceptance into the Intelligence Studies Program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Teaches source collection operations in the operational cycle, including: collection planning, identifying, assessing, recruiting, training, tasking, interviewing, and providing source operations support. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>INTS 2020</td>
<td>Force Protection Operations and Support</td>
<td>3:3:0</td>
<td>* Prerequisite(s): Acceptance into the Intelligence Studies Program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Teaches how to assimilate, analyze, and distribute multidiscipline counterintelligence products in support of tactical force protection. Explores specific areas of interest, to include counterintelligence operations in a deployed environment and current threat assessment technology. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>INTS 2030</td>
<td>Combating Terrorism</td>
<td>3:3:0</td>
<td>* Prerequisite(s): Acceptance into the Intelligence Studies Program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Teaches the history and development of terrorism. Includes recognizing the phases of a terrorist incident and how to understand a terrorist group’s structure, degree of support, and scope of operations. Teaches use of basic analytical tools available to combat terrorism. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>INTS 2040</td>
<td>Interrogation and Interview Techniques</td>
<td>3:3:0</td>
<td>* Prerequisite(s): Acceptance into the Intelligence Studies Program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Describes how to prepare for and question a source, collect all information of intelligence value, and report this information in the proper format. Identifies appropriate approach and questioning techniques, effective listening and note-taking methods, source screening procedures, and proper exploitation phases to collect intelligence information. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>INTS 2090</td>
<td>Automated Intelligence Systems</td>
<td>3:3:0</td>
<td>* Prerequisite(s): Acceptance into the Intelligence Studies Program</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Explores the use of automated intelligence systems in the field of intelligence operations. Assesses the basic system operations and conventions. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.</td>
<td></td>
<td></td>
<td></td>

Course Descriptions

INTS 215R
Briefing Skills II
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Demonstrates advanced preparation and delivery of briefings in the intelligence operations field. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah. May be repeated for a total of nine credits toward graduation.

INTS 2200
Reporting of Intelligence Data III
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Examines tactical human intelligence (HUMINT) issues for the advanced intelligence operations practitioner maintaining a HUMINT-specific occupational specialty. Teaches how to plan and prepare timely and effective intelligence reports in both urban and rural environments. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 2210
Counterintelligence Investigations III
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Focuses on how to understand the objectives, apply the procedures, and produce the reports used in advanced counterintelligence investigations. Expands knowledge and abilities in the planning, communicating, operating, credentialing, and investigating processes related to advanced counterintelligence investigations. Designed for the tactical human intelligence (HUMINT) practitioner. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 2230
Intelligence Law and Administration of Justice II
1:1:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Examines the legal principles and regulations of intelligence law as they apply to counterintelligence investigations and operations. Teaches the application of principles of intelligence law and of the administration of justice in the performance of duties as tactical human intelligence (HUMINT) practitioners. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 2240
Force Protection Operations and Support II
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Teaches the human intelligence (HUMINT) practitioner improved methods to assimilate, analyze, and distribute multidiscipline human products in support of tactical force protection operations. Focuses on human intelligence operations in a tactically deployed environment. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 2250
Analytical Process and Product II
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Explores the tactical human intelligence (HUMINT) field. Teaches the preparation of analytical tools to assess a combat environment. Analyzes conventional and unconventional threat forces, various types of organizations, and associated weapons and equipment, as well as the tactics, techniques, and procedures of groups or forces identified as posing a threat to U.S. interests. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 2260
Interrogation and Interviewing Techniques II
3:3:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Provides advanced preparation for questioning a human intelligence source and to collect and report information that is of intelligence value. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 2410
Management of Intelligence and Counterintelligence Operations I
4:4:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Studies the organizational management of intelligence and counterintelligence operations. Examines the theoretical and practical perspectives of challenged intelligence as a way of life. Includes problem-solving and decision-making processes and the role of the leader. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

INTS 2420
Management of Intelligence and Counterintelligence Operations II
4:4:0 On Sufficient Demand
* Prerequisite(s): Acceptance into the Intelligence Studies Program
Explores the managerial challenges related to the multidiscipline roles in intelligence and counterintelligence operations. Emphasizes the assessment of external and internal environments, strategic initiatives, and communication techniques, and the allocation and coordination of personnel and resources. This course is limited to students participating in the Utah National Guard’s (UNG) Military Intelligence Education Program at Camp Williams in Bluffdale, Utah.

Integrated Studies (IS)

IS 2000
Knowledge Integrated
3:3:0 Fall, Spring
Introduces questions or problems whose answers or solutions require the integration of ideas and disciplines. Focuses on ideas from a variety of cultural perspectives. Covers how important thinkers through history have approached difficult questions in ways that integrated disciplines. Provides the opportunity to complete written assignments based on research.

IS 300R
Introductory Topics in Integrated Studies
3:3:0 Fall, Spring, Summer
* Prerequisite(s): (PHIL 2050 or 205H or 205G) and (ENGL 2010 or 201H) and University Advanced Standing
Introduces a variety of topics crossing disciplines in science, religion, philosophy, history, literature, business, technology and the arts. Topics vary from semester to semester, but course remains modular in structure. Research and writing intensive. Requires final research paper. Involves writing across the curriculum. May be repeated for a maximum of 12 credits toward graduation.

IS 350R
Topics in Integrated Studies
3:3:0 Fall, Spring, Summer
* Prerequisite(s): (PHIL 2050 or 205H or 205G) and (ENGL 2010 or 201H) and University Advanced Standing
Examines a particular interdisciplinary topic; topics vary from semester to semester. Presents topics that cross one or more fields of academic specialty from the arts and sciences. Includes lecture, reading, discussion and research. Research and writing intensive, requires final research paper. May be repeated for a maximum of 12 credits toward graduation.

IS 495R
Interdisciplinary Lecture Series
1:1:0 On Sufficient Demand
* Prerequisite(s): University Advanced Standing
Explores connections between various academic disciplines. Provides a broadly based look at a range of disciplines. May be repeated for a maximum of 3 credits towards graduation.
IS 4980
Integrated Studies Capstone I
3:3:0 Fall, Spring, Summer
* Prerequisite(s): IS 300R or IS 350R; Junior or Senior Standing in the Integrated Studies bachelor degree; and University Advanced Standing
Focuses on a major research paper integrating the student's two emphases. Addresses theoretical and practical problems associated with research and writing that combine disciplines. Includes work with a committee throughout the semester. Taken first semester in the two-semester capstone sequence.

IS 4990
Integrated Studies Capstone II WE
3:3:0 Fall, Spring, Summer
* Prerequisite(s): IS 4980 and University Advanced Standing
Focuses on a major research paper (senior thesis) integrating the student’s two or more emphases. Addresses theoretical and practical problems associated with research and writing that combine disciplines. Includes work with a committee throughout the semester, which must approve the written thesis. Requires the student to orally present the thesis in a formal defense. Taken second semester in a two-semester capstone sequence.

Information Technology (IT)

IT 1200
Scripting for Administrators
3:3:0 On Sufficient Demand
* Prerequisite(s): MAT 1010 or higher; INFO 1120 recommended
Introduces the fundamentals of script design and implementation with an emphasis on the automation of administrative tasks. Covers modular script design and the use of file input and output. Emphasizes interaction of a script with other scripts, utilities, and the operating system to form more complex systems. Manipulates values of variables (both numbers and strings). Introduces simple GUI interfaces. Lab access fee of $45 for computers applies.

IT 1510
Introduction to System Administration--Linux/UNIX
3:3:0 Fall, Spring, Summer
* Prerequisite(s): INFO 1120 recommended
Introduces the UNIX Operating System using the popular Linux OS. Explores the Linux file system, Linux administration, OS utilities, and program features and uses. Aids the student in the development, understanding, and working knowledge of the details of the Linux Operating System, memory organization, disk architectures, and demand paging virtual memory. Includes OS installation, user creation, rights management, loading daemons, and server best practices. Lab access fee of $45 for computers applies.

IT 1600
Computer Architecture and Systems Software
3:3:0 Fall, Spring, Summer
* Prerequisite(s): INFO 1120 recommended
Provides a thorough grounding in computer hardware, system software, and contemporary information system architecture. Examines hardware structure, operating systems theory, and systems software as part of a technical foundation for enterprise systems development and IT infrastructure procurement and management. Lab access fee of $45 for computers applies. Canvas Course Mats $153/TstOut applies.

IT 1700
Cybersecurity Essentials
3:3:0 On Sufficient Demand
For non-Information Technology and non-Information Systems majors. Introduces cybersecurity and its role in society in a nontechnical way. Explores cybersecurity topics, including protecting accounts, securing data, and avoiding phishing scams. Discusses current hacking and cybersecurity events. Identifies best practices for personal cybersecurity. Provides basic introduction to cybersecurity tools. Lab access fee of $45 for computers applies.

IT 2400
Voice and Data Cabling Fundamentals
3:3:0 Fall, Spring, Summer
* Prerequisite(s): INFO 1120 or INFO 1200 or CS 1030 or CS 1400
For students interested in the physical aspects of voice and data network cabling and installation. Focuses on cabling issues related to data and voice connections and provides an understanding of the industry and its worldwide standards. Covers types of media and cabling, physical and logical networks, as well as signal transmission. Focuses on best practices and safety using copper and fiber-optic cabling. Requires students to install a complete cable infrastructure for a simulated telecommunications room. Enforces industry and worldwide standards. Requires a community project and portfolio based on voice/data cabling skills. Lab access fee of $45 for computers applies.

IT 2530
Introduction to System Administration--Windows Client
3:3:0 Fall, Spring
* Prerequisite(s): IT 1600
Introduces operation management of operating systems using Microsoft Windows. Introduces installation methods and troubleshooting, hardware device installation and management, storage management, disaster recovery planning and management. Aids the student in the development, understanding, and working knowledge of the Windows networking framework including peer-to-peer, workgroups, user profiles, domains, NTFS, and share-level permissions. Lab access fee of $45 for computers applies.

IT 2600
Data Communication Fundamentals
3:3:0 Fall, Spring, Summer
* Prerequisite(s): INFO 1120 recommended or IT 1600 recommended or CS 1400 recommended
Provides an in-depth knowledge of data communications and enterprise networking including networking and telecommunications technologies, hardware, and software. Emphasizes underlying technologies and protocols. Design topics include wired and wireless architectures; topologies, models, standards and protocols; and operation of bridges, routers, switches, and gateways. Includes lab assignments covering TCP/IP implementations. May be delivered hybrid. Lab access fee of $45 for computers applies.

IT 2700
Information Security Fundamentals
3:3:0 Fall, Spring, Summer
* Prerequisite(s): IT 2600 or CS 2600; (IT 1600 recommended)
Explores introductory information and cybersecurity concepts: security technologies, methodologies, and tools. Topics include security models, risk assessment, threat analysis, attack types, encryption technologies, security implementation, access controls, business continuity, and policy security. Discusses current topics, trends, and career opportunities in information security. Includes lab assignments covering information security principles. Software fee of $18 applies. Lab access fee of $45 for computers applies.

IT 2800
Computer Forensic Fundamentals
3:3:0 Fall, Spring, Summer
* Prerequisite(s): INFO 1120 or IT 1600 or CS 1400 or CJ 1010
Explores procedures for identification, preservation, and extraction of electronic evidence. Emphasizes auditing and investigation of network and host system intrusions, analysis and documentation of information gathered, and preparation of expert testimonial evidence. Examines forensic tools and resources for system administrators and forensic technology. Includes ethics, law, policy, and standards concerning digital evidence. Requires lab experience and a research paper or project. Lab access fee of $45 for computers applies.

IT 281R
Internship
1 to 4:1 to 4:0 On Sufficient Demand
* Prerequisite(s): Department Approval
Provides opportunities to apply classroom theory on the job. Requires work as paid employees in a job that relates to their careers while enrolled at the university. Requires students to meet at least monthly with the Departmental Internship Coordinator. Requires completers to meet individually set goals. May be repeated for a maximum of three credits toward graduation. May be graded credit/no credit.
IT 290R Current Topics in Information Technology 1 to 3:1 to 3:0 On Sufficient Demand
* Prerequisite(s): Departmental Approval
Provides exposure to current and emerging information technologies. May be used to provide content to prepare students to take industry-recognized IT certification exams, such as CompTIA Linux+, CompTIA A+, Apple Certified Professional, Certified Fiber Optic Technician, IC3, CompTIA Network+, CompTIA CTP+, Access Data Certified Examiner, MCSA, Cisco CompTIA Security+, Certified Ethical Hacker, etc. Varies each semester. May be repeated for a maximum of 6 credits toward graduation. Lab access fee of $45 for computers applies.

IT 3350 Intellectual Property and Cyber Law 3:3:0 Fall, Summer
* Prerequisite(s): ENGL 1020 and (PRLG 1000 or CS 1030 or INFO 1120 or LEGL 3000) and University Advanced Standing
Explores the legal and policy issues associated with the Internet and cyberspace. Studies case law, statutes, regulations, and constitutional provisions that affect people and businesses interacting through computers and the Internet. Covers intellectual property (trademarks, copyrights, patents, trade secrets, and unfair competition) and examines legal requirements to create, register and protect intellectual property rights. Focuses on e-commerce, online contracts, cybercrimes, torts, and privacy issues pertaining to technology. Lab access fee of $45 for computers applies.

IT 3400 Data Cabling Signal Characteristics 3:3:0 On Sufficient Demand
* Prerequisite(s): INFO 1120 or INFO 1200 or CS 1030 or CS 1400 or MECH 1200
For EART/Mechatronics majors or students interested in the physical aspects of data network signal characteristics, cabling and installation for those signals. Focuses on cabling issues related to data and voice connections and provides an understanding of the industry and its worldwide standards. Covers types of media and cabling, physical and logical networks, as well as signal transmission. Focuses on best practices and safety using copper and fiber-optic cabling. Requires students to install a complete cable infrastructure for a simulated telecommunications room. Enforces industry and worldwide standards. Requires a community project and portfolio based on voice/data cabling skills. Requires a research paper.

IT 3510 Advanced System Administration--Linux/UNIX 3:3:0 Fall, Spring, Summer
* Prerequisite(s): [INFO 1200 and IT 1510 and (IT 2600 or CS 2600)] all with a grade of C- or higher within the past five years] and University Advanced Standing
Explores enterprise systems administration using the UNIX/Linux operating system. Students learn advanced administrative tasks including server installation, network configuration and user management, file management, network services deployment, server security, back up and recovery, shell scripting, source compilation, performance monitoring and tuning, troubleshooting, and managing hardware and component changes. Requires a community project and portfolio based on advanced server management skills. Lab access fee of $45 for computers applies.

IT 3530 Advanced System Administration--Windows Server 3:3:0 Fall, Spring, Summer
* Prerequisite(s): [INFO 1200 and IT 2530 and (IT 2600 or CS 2600)] all with a grade of C- or higher within the past five years] and University Advanced Standing
Explores enterprise systems administration using the Microsoft Windows Server operating system. Students learn advanced administrative tasks including server installation; hardware change management; software application management; network configuration and user management; file management; printing; network services deployment; server security; back up and recovery; scripting; performance monitoring, tuning, and troubleshooting. Lab access fee of $45 for computers applies.

IT 3540 Mac OS and Server Support 3:3:0 Fall, Spring, Summer
* Prerequisite(s): [INFO 1200 and IT 2530 and (IT 2600 or CS 2600)] all with a grade of C- or higher within the past five years] and University Advanced Standing
Provides an in-depth exploration of the Mac OS X, and provides the skills to troubleshoot and correct problems that may arise by users. Teaches installation and configuration of a Mac OS X Server. Involves implementing and maintaining a Mac server in a network, including file sharing, mail, web, and wikis. Software fee of $14 applies. Lab access fee of $45 for computers applies.

IT 3600 Internetworking and Router Management 3:3:0 Fall, Spring, Summer
* Prerequisite(s): ([INFO 1200 or CS 1400) and (IT 2600 or CS 2600)] all with a grade of C- or higher within the past five years] and University Advanced Standing
Teaches the theory and implementation skills and techniques needed to configure, troubleshoot and support reliable TCP/IP internetworks. Discusses security and management issues. Offers the opportunity to build an internetwork with cables, network cards, and routers. Emphasizes the analysis and design of networks in organizations. Includes lab assignments covering TCP/IP implementations and router configurations. Lab access fee of $45 for computers applies.

IT 3650 Information Storage and Management 3:3:0 On Sufficient Demand
* Prerequisite(s): IT 1600, IT 2600, and University Advanced Standing
Presents concepts, principles, and deployment considerations across all technologies that are used for storing and managing information. Describes challenges and solutions for data storage and data management, intelligent storage systems, and storage networking. Studies backup, recovery, and archive processes. Discusses business continuity, disaster recovery, storage security and virtualization, and managing and monitoring the storage infrastructure. Software fee of $192 applies. Lab access fee of $45 for computers applies.

IT 3700 Information Security--Network Defense and Countermeasures 3:3:0 Fall, Spring, Summer
* Prerequisite(s): IT 1510, IT 2700, (IT 3510 or IT 3530), and University Advanced Standing
* Prerequisite(s) or Corequisite(s): IT 3600
Examines advanced information security concepts through an applied viewpoint. Extends the student’s understanding of security issues through hands-on application of real-world techniques and use of current security software. Topics include legal/ethical issues, use of security tools, network reconnaissance, password/brute-force attacks, firewall configuration, Honeypot deployment, intrusion analysis/detection, server hardening, and penetration testing. Guest lecturers provide insight into current trends in advanced security issues. Software fee of $18 applies. Lab access fee of $45 for computers applies.

IT 459R Current Topics in Information Technology 3:3:0 On Sufficient Demand
* Prerequisite(s): (Junior Standing or Department Approval) and University Advanced Standing
Provides exposure to emerging technologies and topics of current interest in information technology. Varies each semester depending upon the changes in the information technology discipline or to address a focused area within the information technology discipline. May be repeated for a maximum of 9 credits toward graduation. Lab access fee of $45 for computers applies.
IT 4600
Enterprise Network Architectures and Administration
3:3:0  Fall, Spring, Summer
* Prerequisite(s): IT 3600 and University Advanced Standing

Examines management of resources used in enterprise computing environments from a practical, applied viewpoint. Extends the student's understanding of these concepts through hands-on application of real-world network, server, and software management techniques and addresses the problems associated with providing a secure, stable, reliable enterprise computing infrastructure. Includes principles of IT enterprise infrastructure management, configuration, analysis, and troubleshooting of virtual servers; redundancy and failover; directory service integration, access control and security; uptime monitoring and notification; backup and recovery; Storage Area Networking; Cloud computing platform choices, functionality, cost, deployment, flexibility, and adaptability. Lab access fee of $45 for computers applies. Software fee of $118 applies.

IT 4700
Enterprise Cybersecurity Management
3:3:0  Fall, Spring, Summer
* Prerequisite(s): IT 2700 and University Advanced Standing
* Prerequisite(s) or Corequisite(s): INFO 3430

Provides perspective of key issues involved in IT activities across the organizational and technical security landscape. Examines management methodologies, staffing, and operational issues. Teaches use of financial analysis and decision-making methodologies to aid investment decisions at the operational, functional, and strategic levels. Illustrates use of risk assessment and contingency planning as applied to business continuity and disaster recovery strategies. Includes the use of Service Level Agreement for managing both internal and external relationships. Lab access fee of $45 for computers applies.

IT 4750
Network Security and Operations Capstone
3:3:0  Fall, Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): IT 4700

Senior-level, capstone experience course. Enhances student cyber security knowledge with operational and business applications. Focuses on integrating cyber security principles as an organic part of an organization's processes. Covers barriers to implementing security policy, building a business case for cyber security, and incorporating cyber security into project management and software life cycles. Requires student project presentations. Lab access fee of $45 for computers applies.

IT 4760
Case Studies in Cyber Security
3:3:0  On Sufficient Demand
* Prerequisite(s): IT 2700 and University Advanced Standing

Discusses current trends and issues in cyber security. Updated regularly to reflect global events related to cyber security. Topics include data breaches, cyber warfare, emerging threats. Emphasis on the changing and transformative nature of cyber security threats, including geographical, institutional, and cultural evolution. Guest lecturers from industry will provide students with perspectives on the state of cyber security. Examines real-world examples of the application of cyber security principles and requires critical analysis of each case. Lab access fee of $45 for computers applies.

IT 4800
Advanced Mobile Devices Forensics
3:3:0  Spring
* Prerequisite(s): IT 2800 and University Advanced Standing

Discusses devices that can store digital information such as cell phones, tablets, digital camera/camcorders, thumb drives and memory cards. Focuses on lab investigations of one or more digital media through image acquisition, data analysis, and assembly of a final written report of findings. Provides opportunities to use multiple software tools in device acquisition and analysis. Covers processes and procedures through mock investigations. Lab access fee of $45 for computers applies.

IT 481R
Internship
1 to 8:1 to 8:0  Fall, Spring, Summer
* Prerequisite(s): IT 3510 or IT 3530 or IT 3540 or IT 3600 or IT 3700 or department approval and University Advanced Standing

For Information Technology bachelor's degree students. Provides opportunities to apply upper-division classroom theory while students work as employees in a job that relates to their careers. Meet periodically with a Departmental Internship Coordinator. Credit is determined by the number of hours a student works during the semester and completion of individually set goals that relate to the student's selected emphasis. Prior written department chair approval is required to apply more than three credits toward a Bachelor of Science Degree in Information Technology. May be graded credit/no credit.

IT 4850
Digital Forensics Investigations
3:3:0  On Sufficient Demand
* Prerequisite(s): IT 2800 and University Advanced Standing

Is a senior capstone course for students in the Computer Forensics emphasis. Covers one or more investigations from start to finish. Integrates knowledge and skills from previous CJ, FSCI, and IT courses in this culminating experience. Lab access fee of $45 for computers applies.

IT 489R
Undergraduate Research in Information Technology
1 to 4:0:5 to 20  On Sufficient Demand
* Prerequisite(s): Department approval and University Advanced Standing

Provides the opportunity to conduct research under the mentorship of a faculty member. Practices the theoretical knowledge gained in prior major courses. Creates a significant intellectual or creative product that is characteristic of the Information Technology discipline and worthy of communication to a broader audience. May be repeated for a maximum of 6 credits toward graduation.

IT 497R
Independent Study
1 to 3:0:3 to 9  On Sufficient Demand
* Prerequisite(s): Department chair approval and University Advanced Standing

For bachelor degree students and other interested persons. Offers independent study as directed in reading, in individual projects, at the discretion and approval of the department chairperson. May be repeated for a maximum of 9 credits toward graduation.

IT 6300
Principles of Cybersecurity
3:3:0  Fall
* Prerequisite(s): Acceptance into Graduate Certificate or Master of Science in Cybersecurity or Departmental Approval

Provides foundational knowledge of cybersecurity for graduate-level studies. Covers information security theories, terminology, and implementation. Includes networking and system fundamentals, cryptography, malware, authentication, authorization, access control, physical security, attacker profiles, appropriate threat responses, and the human elements of cybersecurity. Introduces multiple aspects of cybersecurity and various career paths within the field.

IT 6330
Cybersecurity Operations
3:3:0  Fall
* Prerequisite(s): Acceptance into Graduate Certificate or Master of Science in Cybersecurity or Departmental Approval

Focuses on operational aspects of cybersecurity. Includes incident response, network monitoring, change management, configuration management, and resource protection. Emphasizes the role of cybersecurity in the enterprise. Integrates sound cybersecurity principles into various aspects of IT operations. Includes information on secure system administration and open source security software. Teaches cybersecurity standards for government and industry sources and the application of those standards.
IT 6350
Law/Ethics/Privacy in Cybersecurity
3:3:0 Spring
Prerequisite(s): Acceptance into Graduate Certificate or Master of Science in Cybersecurity or Departmental Approval
Explores legal, ethical, and privacy issues as they apply to cybersecurity. Includes the legalities and ethics of hacking, corporate information security and use policies, and the government’s role in cybersecurity. Emphasizes the roles and responsibilities of individual cybersecurity practitioners as well as corporate entities, including vulnerability disclosure and correcting software defects. Teaches privacy policies and regulations as they relate to cybersecurity and information systems.

IT 6750
Reverse Engineering and Malware Analysis
3:3:0 Spring
Prerequisite(s): Acceptance into Graduate Certificate or Master of Science in Cybersecurity or Departmental Approval
Prerequisite(s) or Corequisite(s): IT 6300
Explores advanced topics in ethical hacking, reverse engineering, legal issues and regulations, and the resolution of malicious software. Includes the implementation and analysis of anti-malware tools, intrusion detection, operating systems, managing malware, and the development of malware intercepting and protective tools.

IT 6770
Cybersecurity Management
3:3:0 Summer
Prerequisite(s): IT 6300 or Departmental approval
Teaches management skills applicable to cybersecurity. Includes governance models, business continuity, disaster recovery, risk management, organizational security, cybersecurity life cycle management, and interactions between information technology and business units. Focuses on policies, procedures, and guidelines based on industry and government standards to fulfill legal, regulatory, and operational requirements.

IT 6900
Cybersecurity Capstone
3:3:0 Spring
Prerequisite(s): IT 6330, IT 6350, IT 6740, and IT 6770
Provides culmination of cybersecurity in a self-directed research or practical project that showcases student’s mastery of cybersecurity topics. Provides an opportunity to conduct research and/or implement systems that incorporate topics from previous courses. Requires students to present their work at the end of the semester.

Japanese (JPNS)

JPNS 1010
Beginning Japanese I
4:4:1 Fall, Spring
Writing and reading Hiragana and Katakana, listening, speaking in the basic grammar structure, expressing opinions and describing things in a limited situation. Lab access fee of $10 applies.

JPNS 1020
Beginning Japanese II
4:4:1 Fall, Spring
Prerequisite(s): Students need equivalent knowledge of JPNS 1010
Reviews and builds further language skills upon the grammar, reading, writing, and conversation skills learned in the first year courses. Lab access fee of $10 applies.

JPNS 115R
Japanese Conversation I
1:1:0 Fall, Spring
Offers novice Japanese speakers opportunities to enhance their speaking proficiency in the target language by focusing on oral verbal production. Teaches how to improve authentic pronunciation, reduce errors in authenticity of language structure, generate thought in the target language spontaneously as a substitute for translation, and sharpen listening comprehension for natural conversational flow. Contrasts with all other first year courses which must strive to produce mastery of the whole range of language acquisition components, including writing, grammar, etc. Facilitates lowering the affective filter when conversing in the target language by increasing the frequency of speech opportunities and defusing concern for such matters as spelling, etc. Increases mastery of lexical items through increased frequency of oral usage. May be repeated for a maximum of 3 credits toward graduation.

JPNS 1500
The Art of Japanese Calligraphy
2:2:0 On Sufficient Demand
Introduces the origin of the art of calligraphy, the reasons why calligraphy developed and became so popular in Japan, works done by famous calligraphers, how to handle a brush and India ink, and how to write letters with a brush. Demonstrates the proper usage of the brush, correct stroke orders, and develops the skills of writing letters (start from level 1- easy to level 8- difficult) with a brush.
**Languages (LANG)**

**LANG 1000**

*English Literacy for Deaf Students*

5:5:0  
On Sufficient Demand

*Prerequisite(s):* Deaf students fluent in American Sign Language

Individually tailored English course taught entirely in ASL. Covers a variety of topics to prepare Deaf students for entrance to courses satisfying college English requirements. Topics of study, which vary by semester and by student need, include grammar, usage, reading comprehension and analysis, sentence construction, paragraph composition, and thematic approaches to writing. Uses students' experience with American Sign Language and Deaf culture as the basis for instruction in English as a Second Language.

**LANG 281R**

*Language Internship*

1 to 8:1 to 8:0  
On Sufficient Demand

*Prerequisite(s):* Department approval

Provides supervised, practical, and professional experience for students preparing for careers related to languages. May be repeated for a maximum of eight credit hours. May be graded credit/no credit.

**LANG 291R**

*Independent Study*

1 to 3:0 to 3:0 to 12  
On Sufficient Demand

Designed primarily for students who will travel or live in a foreign country for a period of time and want to participate in an instructor-directed academic experience worthy of one to three hours of credit. May also be used similarly for directed studies, either on or off campus, dealing with a foreign language or culture.

**LANG 3000** (Cross-listed with: ANTH 3000)

*Language and Culture*

3:3:0  
Fall, Spring, Summer

*Prerequisite(s):* ENGL 1010 or ENGH 1005, (ANTH 101G or any foreign language 2010 course), Sophomore status, and University Advanced Standing

Introduces cultural linguistics. Analyzes features of human languages that make possible semantic universality. Examines distinction between phonetic and phonemic units. Explores relationship between language and culture. Studies how language shapes culture and how culture shapes language.

**LANG 3010**

*Introduction to Linguistics*

3:3:0  
Fall

*Prerequisite(s):* University Advanced Standing

Focuses on achieving an understanding of language as a group of distinct yet complementary systems which interact to enable human communication, e.g., phonology, morphology, syntax, semantics, and pragmatics. Introduces implications of how languages reflect the cultures in which they are used, and discusses how language is learned, processed and interpreted and how languages change over time.
### Course Descriptions

**LANG 312R (Cross-listed with: CINE 312R)**  
**National Cinema History**  
3:3:0  
Fall, Spring  
* Prerequisite(s): ENGL 2010 and University Advanced Standing  

Covers a single national cinema tradition from the early days of film to the present. Explores representative films from a nation's cinematic chronology, considering major themes, movements, controversies, and artists. Considers social and political contexts as related to the nation's film output. May be repeated for a maximum of 9 credits toward graduation.

**LANG 4200**  
**Methods of Teaching a Foreign Language**  
3:3:0  
Fall  
* Prerequisite(s): (Matriculation into any secondary education bachelor degree program or departmental approval) and University Advanced Standing  

For those who plan to certify to teach a foreign language. Addresses learning approaches, methods, evaluation procedures, text analysis, and other techniques for teaching and evaluating language learning. Includes discussion about professional organizations and other resources in the field. Taught entirely in English.

**LANG 450R**  
**Translation Technology**  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): (CHIN 3050 or FREN 3050 or GER 3050 or JPNS 3050 or PORT 3050 or RUS 3050 or SPAN 3050) and University Advanced Standing  

Provides the environment for students to acquire speed and proficiency in translation. Allows students to become proficient in the use of CAT (Computer Assisted Translation) tools. Prepares students and translators of any language to obtain an SDL Trados Certification. Includes class discussion, translation practice, analysis of translation practice and a student portfolio. May be repeated for a maximum of 9 credits toward graduation.

**LANG 481R**  
**Language Internship**  
1 to 8:1 to 8:0  
On Sufficient Demand  
* Prerequisite(s): Departmental Approval and University Advanced Standing  

Provides students real-world, closely-supervised work experiences in positions directly related to their language studies. Includes a theoretical component such as, but not limited to, papers, projects, completion of assignments, tests, journaling, field studies, etc. Students desiring to do language internships must get department approval and must meet with a faculty sponsor to determine individual credit hours and requirements. May be repeated for a maximum of 8 credits toward graduation. May be graded credit/no credit.

**LANG 490R**  
**Special Topics in Languages**  
1 to 3:1 to 3:0  
On Sufficient Demand  
* Prerequisite(s): Department Approval and University Advanced Standing  

Provides an opportunity to undertake a well-defined project or academically rigorous independent research in languages. May include formal instruction and collaboration with faculty and other students. May be repeated for a total of 6 credits toward graduation.

---

### Latin (LATN)

#### LATN 1010  
**Beginning Latin I**  
4:4:0  
Fall  
* Prerequisite(s): LATN 1010 or equivalent  

Allows students the opportunity to study Latin at the introductory level. Focuses primarily on Ancient Latin. Develops basic Latin reading skills with the help of grammar and translation exercises. Profoundly strengthens students' general understanding of grammar, syntax, and word formation in any language, particularly Romance and Germanic languages (including English).

#### LATN 1020  
**Beginning Latin II**  
4:4:0  
Spring  
* Prerequisite(s): LATN 1010 or equivalent  

Allows students the opportunity to continue to study Latin at the introductory level. Focuses primarily on Ancient Latin. Develops more advanced Latin reading skills, with the help of grammar and translation exercises. Study of Latin profoundly strengthens students' general understanding of grammar, syntax, and word formation in any language, particularly Romance and Germanic languages (including English).

#### LATN 2010  
**Intermediate Latin I**  
4:4:0  
Fall  
* Prerequisite(s): LATN 1020 or equivalent  

Studies Latin at the intermediate level. Develops more advanced reading skills through the translation of selected Classical Latin texts.

#### LATN 2020  
**Intermediate Latin II**  
4:4:0  
On Sufficient Demand  
* Prerequisite(s): LATN 2010 or equivalent  

Continues study of Latin at the intermediate level. Develops more advanced reading skills through the translation of selected Classical Latin texts.

#### LATN 3010  
**Readings in Latin**  
3:3:0  
On Sufficient Demand  
* Prerequisite(s): (LATN 2010 or equivalent) and University Advanced Standing  

Studies Latin beyond the intermediate level through translation of original Classical or Medieval Latin texts.

### Legal Studies (LEGL)

#### LEGL 1010  
**Survey of Law**  
3:3:0  
Not Offered  

Covers the history and development of present-day law practice, including specialized areas of practice. Completers should be able to describe the American court system, know and use legal vocabulary, have a basic understanding of different substantive areas of law. Lab access fee of $30 for computers applies.

#### LEGL 1110  
**Civil Litigation**  
4:4:0  
Fall, Spring  
* Prerequisite(s): PRLG 1000 and (ENGL 1010 or ENGH 1005)  

Examines the admissibility of evidence in both a civil and criminal trial context. Studies the Federal Rules of Evidence, and the privileges, challenges, advancements in technology and emerging issues in the use of evidence in American courts.

---

784  
Course Catalog 2020-2021  
Utah Valley University
LEGL 3000
Business Law
3:3:0  Fall, Spring, Summer
* Prerequisite(s): ENGL 1010 or ENGL 1005 or appropriate test scores and University Advanced Standing

For School of Business students and others desiring a more complete understanding of business law. Presents the American legal system, constitutional law, statutory law, common law, and administrative law and alternatives to courts. Discusses crimes, torts, negligence, contracts, negotiable instruments, and contractual relationships. May be delivered online. Lab access fee of $30 for computers applies.

LEGL 300H
Business Law
3:3:0  Fall, Spring
* Prerequisite(s): ENGL 1010 or ENGL 1005 or appropriate test scores and University Advanced Standing

For School of Business students and others desiring a more complete understanding of business law at an honors level. Presents the American legal system, constitutional law, statutory law, common law, and administrative law and alternatives to courts. Discusses ownership in real estate, settlement, taxation, real estate finance, math in real estate applications, and real estate valuation and appraisal. Lab access fee of $30 for computers applies.

LEGL 3130
Real Estate Principles and Finance
3:3:0
* Prerequisite(s): ENGL 1010 or ENGL 1005 or equivalent.

Includes the nature of real property, estates in land, transfer of real property rights, encumbrances, public restrictions, and contracts. Discusses ownership in real estate, settlement, taxation, real estate finance, math in real estate applications, and real estate valuation and appraisal. Lab access fee of $30 for computers applies.

LEGL 3140
Real Estate Law
3:3:0
* Prerequisite(s): ENGL 1010 or ENGL 1005 or equivalent.

Explores the legal implications of ownership of real property, including property management and new construction. Also covers federal and Utah-specific law, and Utah licensing testing and review. Lab access fee of $30 for computers applies.

LEGL 3150
Survey of Dispute Resolution
3:3:0  Fall
* Prerequisite(s): (PRLG 1000 or LEGL 3000 or PSY 1010 or SOC 1010 or SW 1010) and University Advanced Standing

Offers an introduction to the most commonly practiced dispute resolution processes, including negotiation, mediation, arbitration, and litigation. Studies conflict resolution theory and explores contemporary dispute resolution policy issues. Involves participation in simulations of various dispute resolution processes, including interviewing and counseling, negotiation, mediation, and arbitration.

LEGL 3170
Real Estate Contracts and Agency
3:3:0  Spring
* Prerequisite(s): ENGL 1010 or ENGL 1005 or equivalent

Explores the intricacies of contracts and agency relationships in real estate transactions, including uniform real estate contracts, agency agreements and principles, the Utah standard Real Estate Purchase Contract, and other related issues.

LEGL 3210
Interviewing and Investigations
3:3:0  Spring
* Prerequisite(s): University Advanced Standing

Overview of how to conduct a factual investigation in various contexts, including criminal and civil cases, with particular emphasis on interviewing witnesses. Includes technology-driven investigative tools, social media, the Freedom of Information Act and other resources, and the ethical and legal limitations on investigative techniques.

LEGL 3250 (Cross-listed with: POLS 3250)
Introduction to Law and Politics
3:3:0  Fall, Summer
* Prerequisite(s): (POLS 1010 or POLS 1100) and University Advanced Standing

Examines the relationship between law and politics. Addresses the impact politics have on the judiciary and the strengths and weaknesses of law as a means of social order. Focuses on general issues of legal and political theory and the social and political function of law.

LEGL 3310
Marketing Law
3:3:0  Spring
* Prerequisite(s): (ENGL 1010 or ENGL 1005) and University Advanced Standing

For School of Business marketing students and others desiring a more complete understanding of marketing law. Broadly presents the American legal system, with special attention to issues in constitutional law, statutory law, common law, and administrative law and alternatives to courts with respect to marketing. Discusses crimes, torts, negligence, contracts, negotiable instruments, intellectual property, and contractual relationships.

LEGL 3410
Mediation and Negotiation
3:3:0  Fall
* Prerequisite(s): PRLG 1000 or LEGL 3000) and University Advanced Standing

Prepares students to knowledgeably understand and participate on a basic level in the process of mediation and negotiation in a legal context. Focuses on conceptual knowledge of both process and practical skills and effectiveness as a mediator and negotiator.

LEGL 3530 (Cross-listed with: HR 3530)
Employment and Labor Law
3:3:0  Fall
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Covers employment and labor law, cases, and policy. Includes employment discrimination along with labor relations statues exploring the link between employment discrimination and traditional labor relations law. Presents tools necessary to formulate and write policy for profit and non-profit organizations. Includes lecture, class discussions, case studies, a service learning project, and guest speakers. Lab access fee of $30 for computers applies.

LEGL 3650
Tort Law
3:3:0  Spring
* Prerequisite(s): PRLG 1000, ENGL 2010, and University Advanced Standing

Provides instruction in theory and practice of tort and injury law. Successful completers should know and use legal vocabulary and demonstrate an understanding of tort and injury law. Lab access fee of $30 for computers applies.

LEGL 3760
Law Practice Management
3:3:0  Fall
* Prerequisite(s): Matriculation into any Legal Studies Program and University Advanced Standing

Covers management principles applicable in modern law practice from solo practice to large mega firms. Provides students with parameters and policies of the business of law to understand why law firms conduct business differently from other industries. Introduces students to administrative and substantive functions and procedures common to a law office that make the student’s transition into legal employment easier. Encourages ethical considerations and acquisition of skills required by law firms that use efficient systems and procedures.

LEGL 3890
Certified Legal Assistant Preparation
3:3:0  Spring
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Acquaints students with Certified Legal Assistant exam prerequisite and preparation strategies. Reviews all required sections of the exam which include legal terminology, communications, legal ethics, judgment and analytical ability, legal research, human relations and interviewing techniques, and general law. Also covers some elective law portions of the exam which might include administrative law, bankruptcy law, business organizations, contract law, criminal law, estate planning and probate, family law, litigation, real estate law. Successful completers should be prepared to sit for the CLA Exam.
LEGL 4000
Advanced Business Law and E-Commerce
3:3:0 Spring
* Prerequisite(s): LEGL 3000 and University Advanced Standing

Examines contemporary issues in business law, with an emphasis in e-commerce and business in a digital environment. Studies secured transactions, business associations, investor protection, consumer protection and government regulation in an increasingly global and interconnected business environment. Recommended for students interested in graduate school, especially in law or business.

LEGL 4100
Advanced Mediation
3:3:0 Spring
* Prerequisite(s): LEGL 3410 and University Advanced Standing

Prepares students to perform at an advanced level in the mediation process. Builds on the fundamentals learned in the basic course, improves knowledge, and sharpens practical skills and effectiveness as a mediator. Uses an interactive-workshop format that blends theory with simulated class role-play.

LEGL 4130
Bankruptcy and Collections
3:3:0 Spring
* Prerequisite(s): University Advanced Standing
* Prerequisite(s) or Corequisite(s): LEGL 3000

Covers collection of debts and the discharge of certain financial obligations in bankruptcy, including Chapter 7, 11, and 13 filings. Utilizes lecture and practical experience in the preparation of collection and bankruptcy documents. Teaches basic collections, bankruptcy law, drafting collections, bankruptcy pleadings, and schedules. Lab access fee of $30 for computers applies.

LEGL 4150
Will Trusts and Probates
3:3:0 Fall
* Prerequisite(s): Matriculation into any Woodbury School of Business program and University Advanced Standing

Examines purpose and methods of estate planning, emphasizing the drafting of simple wills, trusts, and other estate planning documents. Covers testamentary and non-testamentary disposition of property, taxation, intestate succession, medical directives, power of attorney and probate and estate administration processes. Lab access fee of $30 for computers applies.

LEGL 4160
Contract Law
3:3:0 Spring
* Prerequisite(s): LEGL 3000, ENGL 2010, and University Advanced Standing

Provides a functional approach to the Law of Contracts. Teaches contract problems and defenses through case study method. Lab access fee of $30 for computers applies.

LEGL 418G
International Law
3:3:0 Spring
* Prerequisite(s): ENGL 2010 and University Advanced Standing

Examines the emergence of International Law as a reflection of changing social, cultural, religious perspectives in an increasingly global community. Studies the global relationships between states, businesses, and individuals, and the resolution of disputes on an international level, including special problems in international crime, jurisdiction, courts, contracts and trade, intellectual property, and other current issues.

LEGL 4190
Constitutional Law
3:3:0 Fall, Spring
* Prerequisite(s): Matriculation into any Legal Studies major and University Advanced Standing

Examines the relationships between individual liberty and the government, including the separation of powers, federalism and limits on the government's ability to restrict individual freedom. Studies the Bill of Rights, with emphasis on the first, fourth, and fourteenth amendments, and their practical effect in civil and criminal cases.

LEGL 4200
Domestic Mediation
3:3:0 Fall
* Prerequisite(s): (LEGL 3410 or instructor approval) and University Advanced Standing

Prepares students to understand and participate knowledgeably and effectively in the process of domestic mediation. Improves conceptual knowledge about and understanding of the domestic mediation process as well as improving practical negotiation and mediation skills. Utilizes a highly interactive workshop format that blends theory with practice.

LEGL 430G
International Business Law
3:3:0 Fall
* Prerequisite(s): ENGL 2010, Junior Standing, and University Advanced Standing

Examines current issues in international and comparative business law, including environmental protections, multinational enterprises, foreign investment, banking, labor, financing and taxation, Studies how culture, values, religion, and other factors affect law in a global business context. Recommended for students graduate work, especially in business or law. Fulfills Global/Intercultural Requirement.

LEGL 4830
Legal Capstone Course
3:3:0 Fall, Spring
* Prerequisite(s): LEGL 1110, LEGL 3000, and University Advanced Standing

A capstone course for the Bachelor's Degree in Legal Studies. Provides integration of all functional paralegal skills via mock trials. Requires the student to write a legal memorandum analyzing a particular case and to present a legal issue to the class.

LEGL 498R
Directed Research
1 to 3:1 to 3:0 Fall, Spring, Summer
* Prerequisite(s): ENGL 2010, Department Approval, and University Advanced Standing

Studies the process of researching and writing for scholarly publication. Includes understanding the concepts of scholarly conversation, managing scholarship, choosing a topic, identifying appropriate journals, using exemplars, creating a title and abstract, making an outline, developing an introduction and conclusion, writing the body of the paper, and then revising, submitting, and finally publishing in a scholarly journal. May be repeated for a maximum of 6 credits toward graduation.

LEGL 6000
Legal Challenges in Modern Business
1.5:1.5:0 Spring
* Prerequisite(s): Acceptance into the Woodbury School of Business MBA program

Examines contemporary issues in business law, with an emphasis in e-commerce and business in a digital environment. Studies secured transactions, business associations, investor protection, consumer protection and government regulation in an increasingly global and interconnected business environment. Recommended for business executives and managers.

Mathematics (MATH)

MATH 100R
Math Leap
1:1:0 Fall, Spring, Summer

For students in STEM and related fields who desire to improve problem-solving skills and/or placement level in preparation for STAT 1040 and higher-numbered MATH courses. Addresses unique strengths and weaknesses of students, by providing group problem solving activities along with an individual assessment and study plan for mastering target material. Requires mandatory class attendance and a minimum number of hours per week logged into a preparation module, with progress monitored by a mentor. May be repeated for a maximum of 4 credits toward graduation. May be graded credit/no credit.

MATH 1050
College Algebra
4:4:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years one of the following: MAT 1000 or MAT 1010 with a grade of C or better or appropriate math placement score.

Includes inequalities, functions and their graphs, polynomial and rational functions, exponential and logarithmic functions, systems of linear and nonlinear equations, matrices and determinants, arithmetic and geometric sequences, and the Binomial Theorem. May be delivered hybrid and/or online.
MATH 1055
College Algebra with Preliminaries
5:5:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years one of the following: MAT 1000 or MAT 1010 with a grade of C or better or appropriate math placement score.

Includes inequalities, functions and their graphs, polynomial and rational functions, exponential and logarithmic functions, systems of linear and nonlinear equations, matrices and determinants, arithmetic and geometric sequences, and the Binomial Theorem. May be delivered hybrid and/or online. Lab access fee of $30 applies.

MATH 1060
Trigonometry
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years: MATH 1050 or MATH 1055 with a grade of C or higher or appropriate math placement score.

Includes the unit circle and right triangle definitions of the trigonometric functions, graphing trigonometric functions, trigonometric identities, trigonometric equations, inverse trigonometric functions, the Law of Sines and the Law of Cosines, vectors, complex numbers, polar coordinates, and rotation of axes.

MATH 1080
Precalculus
5:5:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years, one of the following: MAT 1000 or MAT 1010 with a grade of B or better or an appropriate math placement score.

Is an accelerated version of MATH 1050 and MATH 1060. Includes functions and their graphs including polynomial, rational, exponential, logarithmic, and trigonometric functions. Covers inequalities, systems of linear and nonlinear equations, matrices, determinants, arithmetic and geometric sequences, the Binomial Theorem, the unit circle, right triangle trigonometry, trigonometric equations, trigonometric identities, the Law of Sines, the Law of Cosines, vectors, complex numbers, polar coordinates, and conic sections.

MATH 1090
College Algebra for Business
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years one of the following: MAT 1000 or MAT 1010 with a grade of C or better or appropriate math placement score.

Uses linear, quadratic, power, polynomial, rational, exponential, logarithmic, and logistic functions to analyze business applications such as market equilibrium, rates of change, cost-benefit analysis, and inflation. Includes systems of linear and non-linear equations and inequalities, matrices and matrix equations, sequences and series, and financial mathematics.

MATH 1100
Introduction to Calculus
4:4:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years: MATH 1050 or MATH 1055 or MATH 1080 with a grade of C or better or appropriate math placement score.

Provides an overview of the basic concepts and techniques of differential and integral calculus. Features applications in business, economics, and the life, social, and physical sciences. Includes optimization techniques in multivariable differential calculus.

MATH 1210
Calculus I
5:5:0 Fall, Spring, Summer
* Prerequisite(s): One of the following within the past two years: (MATH 1050 or MATH 1055) and MATH 1060, each with a grade of C or higher; OR MATH 1080 with a grade of C or higher; OR appropriate placement by math placement test.

Covers limits, continuity, differentiation, applications of differentiation, integration, and applications of integration, including derivatives and integrals of polynomial functions, rational functions, exponential functions, logarithmic functions, trigonometric functions, inverse trigonometric functions, and hyperbolic functions. Is a prerequisite for calculus-based sciences.

MATH 121H
Calculus I
5:5:0 Fall, Spring
* Prerequisite(s): One of the following within the past two years: (MATH 1050 or MATH 1055) and MATH 1060, each with a grade of C or higher; OR MATH 1080 with a grade of C or higher; OR appropriate placement by math placement test.

Covers limits, continuity, differentiation, applications of differentiation, integration, and applications of integration, including derivatives and integrals of polynomial functions, rational functions, exponential functions, logarithmic functions, inverse trigonometric functions, and hyperbolic functions. Is a prerequisite for calculus-based sciences. Is an honors course with student projects.

MATH 1220
Calculus II
5:5:0 Fall, Spring, Summer
* Prerequisite(s): MATH 1210 or MATH 121H with a grade of C or higher

Includes integration techniques, arc length, area of a surface of revolution, moments and centers of mass, sequences and series, parametrization of curves and polar coordinates, vectors in 3-space, and quadric surfaces.

MATH 122H
Calculus II
5:5:0 Fall, Spring
* Prerequisite(s): MATH 1210 or MATH 121H with a grade of C or higher

Includes integration techniques, arc length, area of a surface of revolution, moments and centers of mass, sequences and series, parametrization of curves and polar coordinates, vectors in 3-space, and quadric surfaces. Honors course which requires a student project.

MATH 2000
Algebraic Reasoning with Modeling
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years, one of the following: MAT 1000 or MAT 1010 with a grade of C or better or an appropriate math placement score.

Presents the basic ideas of sets and functions in the context of and motivated by modeling bivariate data. Includes basic set theory such as unions, intersections, Venn diagrams, etc. Includes the basic ideas and the algebra of functions including polynomial, exponential, and logarithmic functions. Also includes some basic combinatorics and counting principles as well as arithmetic and geometric sequences. Culminates in a pictorial introduction to the basic ideas of calculus presented with minimal computation.

MATH 2100
Mathematics for Elementary Teachers I
3:3:0 Fall, Spring, Summer
* Prerequisite(s): Within the past two years: MATH 1050 or MATH 1055 or MATH 2000 with a grade of C or better or appropriate math placement score.

Is for pre-elementary education majors. Includes problem solving, sets, numeration systems, arithmetic of whole numbers, integers, rational numbers, real numbers, elementary number theory, ratios, proportions, decimals, and percents.

MATH 2210
Calculus III
3:3:0 Fall, Spring, Summer
* Prerequisite(s): MATH 1220 or MATH 122H with a grade of C or higher

Includes partial derivatives, gradient, Lagrange multipliers, multiple integrals, line integrals, Green's Theorem, surface integrals, the Divergence Theorem, and Stokes' Theorem. Is for pre-elementary education majors. Includes topics on probability, statistics, geometry and measurement.

MATH 221H
Calculus III
3:3:0 Fall, Spring
* Prerequisite(s): MATH 1220 or MATH 122H with a grade of C or higher

Includes partial derivatives, gradient vectors, Lagrange multipliers, multiple integrals, line integrals, Green's Theorem, surface integrals, the Divergence Theorem, and Stokes' Theorem. Is an honors course which includes a student project.

MATH 2250
Differential Equations and Linear Algebra
4:4:0 On Sufficient Demand
* Prerequisite(s): MATH 1220 or MATH 122H with a grade of C or higher

Is for engineering students. Includes separable equations, linear differential equations, differential operators and annihilators, variation of parameters, Laplace transforms, systems of linear differential equations, and numerical methods. Introduces basic concepts of linear algebra including matrices, Gaussian elimination, determinants, linear independence, and eigenvalues and eigenvectors.

MATH 2270
Linear Algebra
3:3:0 Fall, Spring
* Prerequisite(s): MATH 1220 or MATH 122H with a grade of C or higher

Includes matrices and systems of equations, determinants, vector spaces, linear transformations, orthogonality, and eigenvalues and eigenvectors.
MATH 2280
Ordinary Differential Equations
3:3:0 Fall, Spring
* Prerequisite(s): MATH 2210 or MATH 221H with a grade of C or higher

MATH 281R
Cooperative Work Experience
2 to 9:2 to 9:0 Fall, Spring, Summer
* Prerequisite(s): Approval of Cooperative Coordinator
Designed for mathematics majors. Provides paid work experiences in the student's major. Course content is individualized, with the student setting the objectives by consulting with a faculty coordinator and the on-the-job supervisor. Credit is determined by the number of hours the student works during the semester. Repeatable for a maximum of 16 credits toward graduation. May be graded credit/no credit.

MATH 290R
Topics in Mathematics
3 to 5:3 to 5:0 On Sufficient Demand
* Prerequisite(s): Departmental approval
Studies a chosen topic in mathematics; topic will vary depending upon student demand and course development needs. May be taken more than once for different topics and for a maximum of 6 credit hours counted toward graduation.

MATH 3000
History of Mathematics
3:3:0 Spring
* Prerequisite(s): MATH 2210 or MATH 221H with a grade of C or higher and University Advanced Standing
Provides a survey of the history of mathematics.

MATH 3010
Methods of Secondary School Mathematics Teaching
3:3:0 Fall
* Prerequisite(s): MATH 2210 or MATH 221H with a grade of C or higher and EDSC 4550 with a grade of B- or higher and University Advanced Standing
Teaches the principles and mathematics required to support and assess the learning of algebra. Focuses on deeper understanding of rational numbers, ratios and proportions, meaning and use of variables, functions (e.g., exponential, logarithmic, polynomials, rational, quadratic), and inverses.

MATH 3030
Algebra for Secondary Mathematics Teaching
3:3:0 Spring
* Prerequisite(s): Math 1210 with a grade B- or higher and University Advanced Standing and Mathematics Department Adviser Approval
For Mathematics Education Majors: Includes the exploration of important conceptual underpinnings, common misconceptions and students’ ways of thinking, appropriate use of technology, and instructional practices to support and assess the learning of algebra. Teaches algebra as an extension of number, operation, and quantity; various ideas of equivalence as it pertains to algebraic structures; patterns of change as covariation between quantities; connections between representations (tables, graphs, equations, geometric models, context); and the historical development of content and perspectives from diverse cultures. Focuses on deeper understanding of rational numbers, ratios and proportions, meaning and use of variables, functions (e.g., exponential, logarithmic, polynomials, rational, quadratic), and inverses.

MATH 3100
Foundations of Geometry
3:3:0 Fall, Spring
* Prerequisite(s): MATH 2270 with a grade of C or higher and MATH 2210 with a grade of C or higher and University Advanced Standing
* Prerequisite(s or Corequisite(s): MATH 2280
Introduces logic and mathematical proof. Offers an axiomatic development of Euclidean and non-Euclidean geometries.

MATH 3100
Foundations of Geometry
3:3:0 Fall, Spring
* Prerequisite(s): MATH 2270 with a grade of C or higher and MATH 2210 with a grade of C or higher and University Advanced Standing
Introduces logic and mathematical proof. Offers an axiomatic development of Euclidean and non-Euclidean geometries.

MATH 3200
Foundations of Analysis
3:3:0 Spring, Summer
