Pre-Program

1

CenCore's National Security Program (NSP) is broken up into three stages: 1. Pre-Program 2. Program 3. Post-Program. It is CenCore's goal to help you move through the program stages quickly and to launch your career.

The Pre-Program stage is comprised of Submitting applications and security paperwork for in CenCore's NSP for your clearance. Because the clearance process takes time waiting for the government to complete your investigation, it is in your best interest to move through this stage as quickly as possible.

Through CenCore's NSP, you will receive a **Top Secret clearance with SCI, TK, and a Full-Scope polygraph**. Your clearance investigation will take about **7-9 months**. *The Intelligence Community agencies can get you the equivalent clearance in roughly 12-24 months.* This clearance will be very valuable as you pursue a career within these agencies.

The process for the Pre-Program stage:

1. Send in your resume and the NSP application
2. Interview
3. Take the Officer Exam, Drug & Physical (Don't worry, CenCore pays for these)
4. Receive and complete security paperwork
5. Send in completed paperwork to the Office of Personnel Management (OPM)

Don't stress! CenCore will help you throughout the entire process.

Program

2

The Program stage is where the fun begins and this stage begins **after** you receive your clearance. **In this stage, you will be working on a contract in the D.C. area** providing Access Control Specialist (ACS) duties in a highly-secured government facility.

Your job as an ACS will be to protect this facility against all forms of technical espionage, acts of terror, and crime against the U.S. government. This is highly critical to U.S. national security.

CenCore's National Security Program is designed to allow everyone, no matter your previous work experience, an opportunity to receive a clearance and start your career within a government agency. **CenCore uses this contract as a way for you to receive your clearance and gain relevant experience** so CenCore can then place you in a more advanced position, launching your career within an otherwise impenetrable industry.

While working as an Access Control Specialist, you will be paid anywhere from **~\$20/hour** to start. You will have opportunities to make more as you are trained to work other posts.

This program is designed to help you receive your clearance, gain work-experience and launch your career within the national security arena.

Post Program

3

The Post-Program stage is where your career really begins. Whether you are interested in working within the Intelligence Community doing; information systems, information technology, engineering, cyber security, intelligence analysis, or just about anything you are interested in.

CenCore will work tirelessly to help launch your career and get a job you are excited to do.

It is CenCore's goal to keep you as a CenCore employee while you work with any government agency. There are many benefits to working for a contractor instead of an agency directly. The biggest benefit is that you can work for almost any agency while working for CenCore. Whereas, when you work directly for an agency you do not have that option. It is also very difficult to transfer between agencies and can often take months or even years to be transferred. With a contractor, it is a couple of weeks and some paperwork we submit to get you moved over.

CenCore can help you launch your career within government agencies that make up the Intelligence Community as well as others. If you are interested in pursuing CenCore's National Security Program, please email your resume to the following email address:
