

Stay focused. Stay organized. Stay ahead.

Stride: A Personal Productivity App

Empowers users to take control of their time by:

- Creating tasks
- Linking tasks to custom categories
- Scheduling events with ease

Designed to help users balance:

- Classes
- Work
- Personal goals

Offers an intuitive interface to:

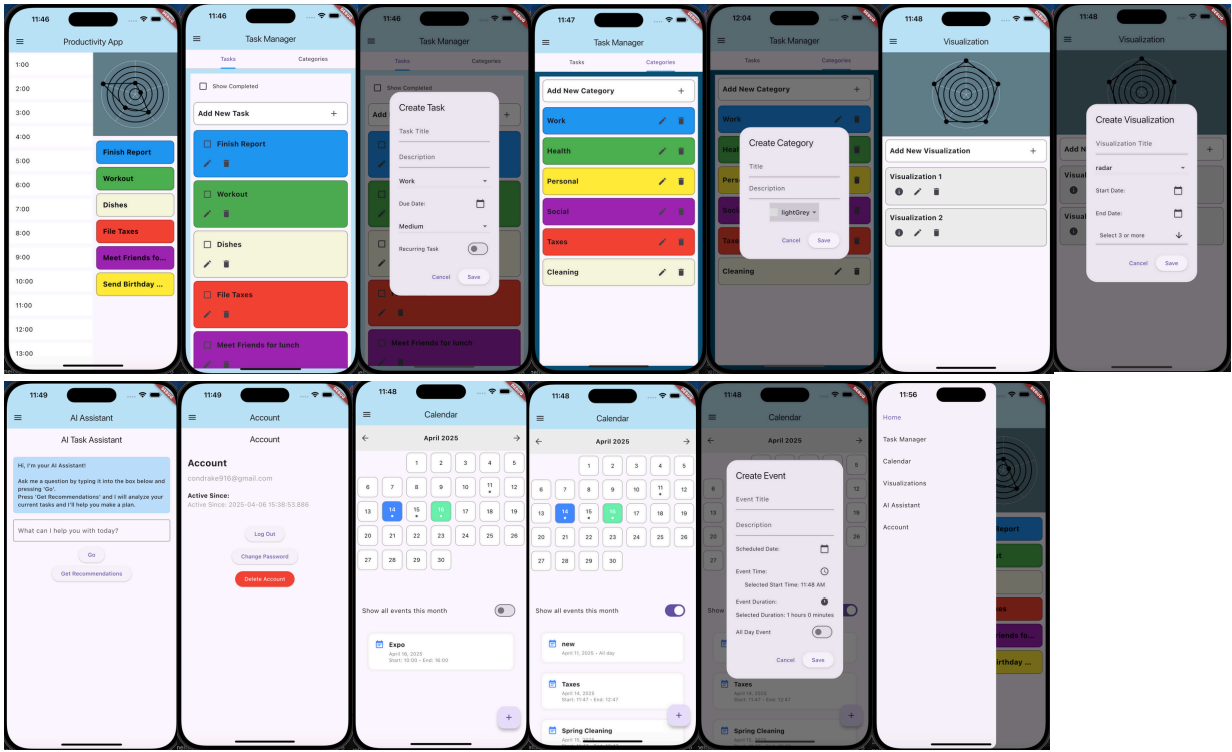

- Plan efficiently
- Track progress in one place
- Make Productivity feel effortless

Uses Firebase Authentication:

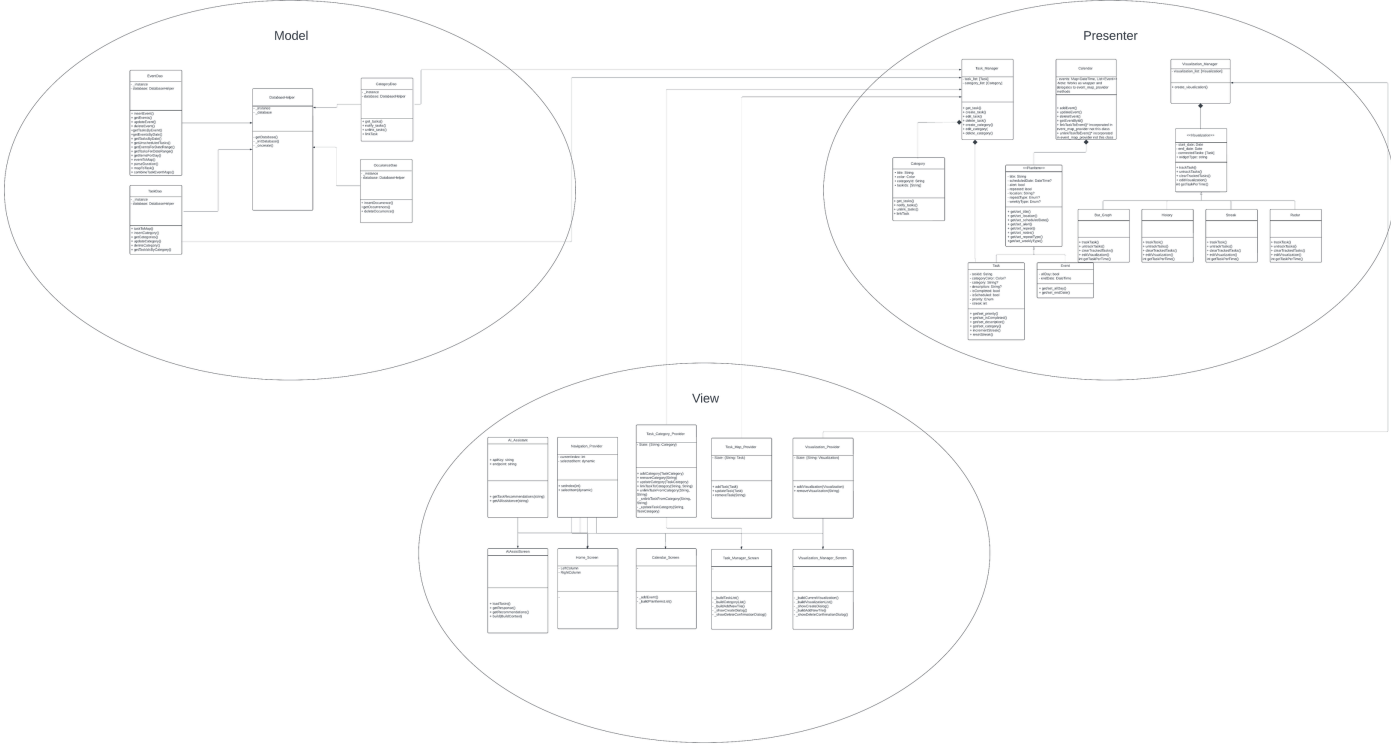

- To keep user data safe
- Allow cloud backup

Intuitive user interface. Categorize tasks, visualize patterns

Design

- Interface allows users to:
- Categorize and track daily tasks
 - Visualize progress to understand personal behavioral patterns
- Linking tasks, events, and categories helps:
- Provide a clear view of daily work and progress
 - Support goal-oriented planning and life management
- Encourages motivation by:
- Revealing behavioral trends
 - Helping users identify what works best for them
- Aims to maximize:
- Personal growth
 - Daily Efficiency

Personalized AI Assistant

AI

Integrates ChatGPT API to provide a personalized productivity experience based on:

- User Tasks
- Schedule
- Goals

Analyzes user input and task data to:

- Offer personalized suggestions
- Provide guidance on time management and focus techniques

Supports users who are:

- Overwhelmed by a long list
- Unsure of where to start

Allows users to ask open-ended productivity questions, such as:

- How to beat procrastination
- How to structure a study schedule
- How to build better habits and break bad ones.

Quality Control You Can Trust

QA

Delivers a dependable, high-performance experience to help users stay on top of their goals

Development process follows a rigorous quality assurance pipeline:

- No code path goes untested

Backend methods are protected by:

- Dedicated unit tests to catch and resolve defects early

Integration testing ensures:

- Smooth performance across complex widgets and interactions

Database undergoes extensive load testing to:

- Simulate real-world concurrency and data volumes
- Confirm responsiveness and stability at scale

Combines:

- Automated unit tests
- End-to-end integration checks
- Robust load simulations

Metric Visual

Your goals, organized — your future, optimized.

Conclusion

With our AI-assisted productivity app, you’re not just checking off tasks — you’re building momentum

Supports you from:

- Task creation
- To progress tracking

Helps you:

- Stay accountable
- Stay in control

Encourages users to:

- Plan smarter
- Achieve more
