Computer
Monitors
Headphone Amp

Getting microphone signal into Audient board, then into Pro Tools, and back:

1. Plug microphone into mic panel 1 in recording room.
2. Input monitor your track in Pro Tools.
3. Press MTR button and, if needed, select phantom power.
4. Turn up gain knob to see your signal on the board.
5. Select line 1 in routing switches to send to Pro Tools input ln1.
6. Hit MIX button by short fader to send signal to master fader.
7. Turn up short fader and master fader.
8. Turn up main monitor level to hear the signal.
9. Hit MIX by long fader for the board to receive Pro Tools signal back.
10. Turn up long fader to send the received signal to monitors.
