

Paramedic Student Clinical Rotation Overview for Preceptors

Paramedic students rotate through multiple hospital departments to develop clinical competence, strengthen decision-making, and improve continuity between prehospital and in-hospital care. The following provides a brief overview of the intended focus.

Cardiac Catheterization Lab (Cath Lab)

The Cath Lab rotation is designed to build awareness of cardiac intervention workflows, with emphasis on team coordination, sterile environment expectations, and effective patient handoff. This experience supports improved collaboration between EMS and cardiac teams, particularly in time-sensitive cardiac events.
