

## **Paramedic Student Clinical Rotation Overview for Preceptors**

Paramedic students rotate through multiple hospital departments to develop clinical competence, strengthen decision-making, and improve continuity between prehospital and in-hospital care. The following provides a brief overview of the intended focus.

### **Emergency Department (ED)**

The primary goal in the emergency department is broad exposure to patient demographics and pathologies, with emphasis on conditions commonly encountered in the prehospital environment. Students benefit from hands-on opportunities such as IV access, medication administration (IM, IV bolus, and infusions), and trauma care. Any additional patient care experiences that enhance understanding of assessment, treatment, and interfacility transport considerations are highly valuable.
