

Paramedic Student Clinical Rotation Overview for Preceptors

Paramedic students rotate through multiple hospital departments to develop clinical competence, strengthen decision-making, and improve continuity between prehospital and in-hospital care. The following provides a brief overview of the intended focus.

EKG / Cardiology

The goal of this rotation is to strengthen the student's ability to acquire and interpret 12-lead EKGs. Hands-on practice combined with discussion alongside EKG technicians enhances rhythm recognition and clinical correlation, directly supporting field performance.
