

## **Paramedic Student Clinical Rotation Overview for Preceptors**

Paramedic students rotate through multiple hospital departments to develop clinical competence, strengthen decision-making, and improve continuity between prehospital and in-hospital care. The following provides a brief overview of the intended focus.

### **Intensive Care Unit (ICU)**

The ICU provides exposure to patients with complex, multi-system conditions and comorbidities. Students should focus on understanding advanced treatment modalities, monitoring, and the clinical considerations involved in critical care transport and transitions of care.

These experiences are intended to provide exposure, context, and skill development rather than impose expectations. Any guidance, teaching, or opportunities you provide are greatly appreciated and contribute significantly to the student's growth and readiness for patient care in the prehospital setting.

For any questions or concerns, please contact **Clinical Director Steve Allred at 801-368-9821**
