

Paramedic Student Clinical Rotation Overview for Preceptors

Paramedic students rotate through multiple hospital departments to develop clinical competence, strengthen decision-making, and improve continuity between prehospital and in-hospital care. The following provides a brief overview of the intended focus.

Labor & Delivery (L&D) / NICU

This rotation emphasizes exposure to live deliveries and neonatal care; populations infrequently encountered in the field. Students are encouraged to participate in newborn assessments under staff guidance. When delivery volume is low, opportunities in the NICU are beneficial to reinforce neonatal assessment and management principles.

These experiences are intended to provide exposure, context, and skill development rather than impose expectations. Any guidance, teaching, or opportunities you provide are greatly appreciated and contribute significantly to the student's growth and readiness for patient care in the prehospital setting.
