

Paramedic Student Clinical Rotation Overview for Preceptors

Paramedic students rotate through multiple hospital departments to develop clinical competence, strengthen decision-making, and improve continuity between prehospital and in-hospital care. The following provides a brief overview of the intended focus.

Operating Room (OR)

The operating room provides a focused environment for airway management and ventilatory support. Students should seek opportunities to observe and, when appropriate, participate in endotracheal intubation, supraglottic airway placement, and bag-valve-mask ventilation, while gaining familiarity with controlled airway procedures and monitoring.
