

Wolverine Track and Planner [WT/planner]

Watch the tutorials on how to use WT/planner: www.uvu.edu/wolverinetrack/

WT/planner is an application that helps students know what courses are required for their degree as well as any associated pre-requisites for those courses. In addition, the planner is used to form a customized map for each individual student based on their major and/or career path.

In order to empower students and facilitate participation in your education/career choices, all Exercise Science students are required to actively use their Wolverine Track and Planner [WT/planner] and have 2-4 semesters planned ahead at ALL times. Using the instructions below, please plan at least 2 semesters and email your advisor: farnswkr@uvu.edu or KWilson@uvu.edu (include your UV ID). Once received, your advisor will review your planner, email any suggestions and comments, and if all is well- remove your AC hold.

NOTE: Please make the course information below a priority when planning:

-MAT/MATH and ENGH/ENGL Courses: To find what course you have placed into: click on the following after logging into UVLINK: Student Tab > My Academics > Assessment Test Scores

-Exercise Science Students: To take most EXSC courses you must complete the following courses: ENGL 1010, BIOL 1010 or 1610 & 1615, CHEM 1110 or 1210 & 1215, ZOO 2320 & 2325, ZOO 2420 & 2425, and EXSC 270G all with a C- or higher and completion of MATH 1050.

-Outdoor Rec Students: To take your EXSC/OREC core classes you must complete the following courses: ZOO 1090 and REC 2200 both with a C- or higher and completions of MATH 1040 or MATH 1050.

[IMPORTANT: If you are planning on a graduate program after you complete your BS/BA in Exercise Science/OREC, you are strongly encouraged to research those programs and understand what course pre-requisites are required in order to apply. Knowing this information will assist you in making the best and most appropriate choices regarding your courses.]

WT/planner Instructions

- Launch your WT by logging into myUVU and clicking on the Wolverine Track icon on the upper right of the page OR by clicking on the following: Student tab > Planning My Education > Wolverine Track. This will open the "Audits" view of your WT. *[If your Wolverine Track does not appear, you may need to use a different browser; Google Chrome is suggested. Please note that iPhone and iPad will not save your plan.]*
- Using the fact sheet for your emphasis (Exercise Science or Outdoor Recreation), click on each of the classes listed next to a requirement and write down the pre-requisite(s) and co-requisites in the right column of the fact sheet.
- Once you have written down all pre-req info, click on the "PLANNER" tab on the upper left of the page. This will launch your WT/planner.
- In the description box type in a name for your planner and if possible include your future plans (Examples: EXSC – Physical Therapy; EXSC – Pre Med; EXSC – Per Training; OREC – Natl Forest; OREC – Entrepreneur; OREC – Retail; etc.).
- Use the pull-down menu at the top of each semester to label the semesters appropriately (always label a summer semester even if you don't plan to attend during the summer).
- Based on pre-reqs and rigor of course, drag and drop classes from the left side into the appropriate semesters to the right. (If a course is not listed on the left side, type it in a box under the appropriate semester. Make sure you use the correct form (example: MAT 1010, ENGH 1000, BIOL 1610, etc.). Don't worry about the credits as they will be populated when you save your plan...provided that you have typed the course in correctly.
- Click "Save Plan" at the bottom of the page often
- Once you have planned at least two semesters in your planner, please email your advisor for a review. Include your UV ID number. Once your advisor has received your email he/she will review your planner, email any suggestions/recommendations, and if all is well remove your AC hold. *[While reviewing I will be looking to see that 1) you know how to use your Wolverine Track; and 2) You know how to look up course pre-requisites and co-requisites.]*
