

Numerical Reasoning

Pizza Style: Chicago Deep Dish Pizza

With its thick crust and layers of toppings, Chicago deep dish pizza is like a numerical puzzle, requiring you to calculate the ratio of toppings to dough and cheese to sauce as you slice through its hearty layers.

Visual Comparison Speed

Pizza Style: New York Style

Characterized by its large, thin slices and wide variety of toppings, New York-style pizza demands quick visual comparison as you scan through the options at a bustling pizzeria, deciding which slice looks the most appealing in a split second.

Spatial Visualization

Pizza Style: Neapolitan Pizza

Neapolitan pizza, with its thin, soft crust and minimalist toppings, requires spatial visualization as you imagine the perfect balance of sauce, cheese, and toppings spread across its circular surface before taking a bite.

Sequential Reasoning

Pizza Style: Sicilian Pizza

Sicilian pizza, with its rectangular shape and distinct layers of dough, sauce, and cheese, challenges sequential reasoning as you consider the order in which each ingredient was added and anticipate the flavors with each bite.

Timeframe Orientation

Pizza Style: California-Style Pizza

California-style pizza, known for its innovative toppings and unconventional combinations, requires timeframe orientation as you consider the evolution of pizza over time and how this modern twist fits into the history of this beloved dish.

What type of Pizza best describes your Aptitude??

Put your name, email address, and school on a slip of paper and put it in the Pizza/Aptitude box that best describes you.

Use the results from the brain games if you know them.
