

Using Spirion's Windows Client to Scan for PSI

Now you are ready to start the search. Navigate to the Main tab at the top and select Start under the Search section.

The Status window should now open and show you the status of the search. Searches typically can take around 30 minutes to complete, however the more often you scan your computer the faster the scans will be. The scan time is based on how much information needs to be searched and the power of the computer.

Status													
SPIRION													
Searching: Outlook: Progress:	: UVU Security g Matches/To	AM Fri 3/24/	/2017> Overall: Total Matches Found:	01/03									
Files:	0 0	Messages:	252 10										
Social Security:	0	😽 Date of Birth:	0	🚯 Health Info: 💽 SIN(Canada):	0	هر Keyword: هر RegEx:	0						
* Password:	0	E-Mail Addr:	0	NINO(UK);	0	A Dictionary:	0						

When the search is complete the Spirion Notification Icon will display a small text window to let you know the search is complete. You can now go back to the Spirion application by clicking this notification. The Spirion Search Summary will display and ask you how you would like to proceed with evaluating the results.
