A10 The Thrill of the Risk In Times of Uncertainty

Take a risk and turn uncertainty into personal power!! The challenges of everyday life can divert your focus away from personal success and fulfillment. Learn how "risking" can re-focus your priorities. Risking is a "tool" that creates increased happiness, peace of mind, personal clarity and higher levels of success in all aspects of life.

Presenter: Darren Leighton, Impact Trainings

Time: 9:50 a.m. to Noon

Presentation Type: Personal Interest and Enrichment

Concurrent Workshops A12-A21 (11:00 a.m. to Noon)

A12 Women in Science: What are the Issues?

At a conference on diversity back in January, Harvard University President Lawrence Summers proposed three explanations for women's generally lesser standing in the sciences: 1) that women may be less interested than men in making the sacrifices required for high-powered jobs and status; 2) that women may have less "intrinsic aptitude" for science; and 3) that women may be victims of sex discrimination. Summers' remarks provoked an avalanche of responses—mostly angry but occasionally sympathetic—both in academia and outside it. Why has there been such a furor, what is at stake in Summers' proposals, and what should be the response? These are some of the questions to be explored in this talk.

Presenter: Janet Kourany, Fellow, John J. Reilly Center for Science, Technology, and Values, and Associate Professor of Philosophy, University of Notre Dame

Time: 11:00 a.m. to Noon

Presentation Type: Special Interest and Education

A13 Redesigning the Future of Advising at UVSC

The recent accreditation process, our commitment to student service, and the current emphasis on improving retention have revealed the need to develop a coherent model for advising at UVSC. In this session, you will be invited to participate in the development of this model. The session begins by outlining the strengths of departmental, professional, and faculty advisors. Various models for capitalizing on these strengths are then presented and participants are invited to engage in designing the “UVSC” model. This is a chance to contribute your vision to the development of a plan that will guide strategic decisions regarding the future of advising at UVSC.

Time: 11:00 a.m. to Noon

Presentation Type: Current Information

A17 The Chains That Bind Us

This presentation is about going above and beyond your job description by becoming a mentor to the students at UVSC. Oftentimes we are too caught up in our own life to recognize that someone else may need our help, but I highly admonish the staff and faculty here at UVSC to extend their hand to the students and to become a lifeline for them. I know for a fact that I would not be alive today if it wasn't for the person in my life who became my lifeline, the person who helped me overcome my problem with drug addiction and depression, the person who ultimately saved my life.

***Presenter:** Chris Gaus, Inspirational Speaker and Student*

***Time:** 11:00 a.m. to Noon*

***Presentation Type:** Personal Interest and Enrichment*

C02 What Is the Politicization of Science Controversy Really About?

Nearly two years ago (in July 2003) two conservative think tanks, the Hoover Institution at Stanford University and the George C. Marshall Institute in Washington, D.C., published a collection of essays suggesting that the science that informs policy making in this country has been manipulated, distorted, or suppressed to advance liberal causes, to the detriment of society. The next month (in August 2003) Congressman Henry Waxman, a liberal Democrat, released a report suggesting that the science that informs policy making in this country has been manipulated, distorted, or suppressed to advance conservative causes. Since then further complaints about politicization have appeared, including one signed by over 6,000 scientists, and many have said that the future of American public policy, and even, in significant ways, American science, hangs in the balance. This talk will consider the kinds of politicization at the core of the debate and the kinds of action that can and should be taken in response.

D02 What Is the Politicization of Science Controversy Really About?

Nearly two years ago (in July 2003) two conservative think tanks, the Hoover Institution at Stanford University and the George C. Marshall Institute in Washington, D.C., published a collection of essays suggesting that the science that informs policy making in this country has been manipulated, distorted, or suppressed to advance liberal causes, to the detriment of society. The next month (in August 2003) Congressman Henry Waxman, a liberal Democrat, released a report suggesting that the science that informs policy making in this country has been manipulated, distorted, or suppressed to advance conservative causes. Since then further complaints about politicization have appeared, including one signed by over 6,000 scientists, and many have said that the future of American public policy, and even, in significant ways, American science, hangs in the balance. This talk will consider the kinds of politicization at the core of the debate and the kinds of action that can and should be taken in response.

D05 The Process of New Idea & Innovation Generation: Key to the Knowledge Economy Future

Today society focuses on the computer and Internet as the icons of economic progress. However, it is the process of generating new ideas and innovations rather than the technologies themselves that is the real force sustaining economic growth. In this short workshop you will learn what the **best processes are for generating new ideas and innovations**, and how to apply those processes to your college responsibilities to save time, cost, and be more productive...while having more FUN! Come see the old theories of labor, capital and productivity turned “back to the future” right before your eyes! Then return back to your future with **new ways to better handle your various tasks and responsibilities**, including those in your personal life. There may even be a FREE “time machine” in it for you!
