UTAH VALLEY UNIVERSITY – TESTING SERVICES

# What is the ALEKS?

---

ALEKS PPL (Preparation Placement and Learning) is the math placement tool utilized at UVU to help students learn what course aligns with their current math knowledge. It is also a valuable tool for students to brush up on previous knowledge through assessment and study to regain their math skills leading up to registering for a math course.

Required for UVU students to place them into Math Classes if their ACT score does not satisfy their major requirements.

Students are encouraged to work in the ALEKS PPL system and take their math placement assessments in the semester before they plan on taking math courses.

In your ALEKS account, you will have a total of 5 testing attempts. After taking your first exam, the ALEKS system will generate learning modules designed to help you practice concepts that you missed and ultimately help you to improve your score.
