

BehavePlus Fire Modeling System

All students are responsible to bring their own laptop computer with BehavePlus 6.0.0 software loaded. You are responsible to double check your enrollment status, current address, phone number, and email address. This will help ensure you as the student to receive any and all information pertaining to the class you enrolled in. **If you supervisor has enrolled/nominated you, its critical that you double check your enrollment status.**

By clicking on the **ROLL** for each class, you can see an updated class enrollment. This will be done weekly. Any questions or concerns call Angie Menlove (801)863-7704 and or Dan Cather (801)863-7423.

Course Description:

This is a classroom-based skills course that serves to develop basic fire behavior knowledge and skills using the BehavePlus fire behavior software program.

Objectives:

- Overview of fire modeling capabilities of BehavePlus.
- Introduction to basic BehavePlus operations.
- Demonstrate and discuss the fire modeling operations found in the BehavePlus program.
- Become proficient in the use of BehavePlus in prescribed and wildland fire operations.

Target Group:

Personnel involved in developing fire behavior predictions in both prescribed and wildland fire operations.

Course Prerequisites:

Have basic computer skills

Have basic fire behavior and fuels knowledge.

*Students will receive a certificate of attendance at the completion of this course. NWCG certificates will not be handed out for this class.
