	DATE	INST	DATE	INST	PASS	
SCBA's, cont.						11C. Emergency procedures in event of interruption/restricted air flow.
						11D. Emergency procedures for 1 <sup>st</sup> stage regulator failure.
						11E. Emergency procedures in the event of "Free-flow" of air.
						11F. Emergency procedures in event of Exhalation valve failure.
						12. Doff & perform check of SCBA after use with a cylinder change
						13. Inspect/clean/sanitize SCBA.
EMER. RESP.						14. Demonstrate safety during emergency response.
						15. Proper care, maintenance of forcible entry tools / equip.
FORCIBLE ENTRY						16A. Force entry on swinging door.
						16B. Force entry on sliding door.
						16C. Force entry on overhead door.
						17A. Force entry on sliding window.
						17B. Force entry on double hung window.
						17C. Force entry on casement window.
SAFETY						18A. Demonstrate breaching on masonry wall.
						18B. Demonstrate breaching on metal wall.
						18C. Demonstrate breaching on wood wall.
						19A. Demonstrate use of SCBA to exit through a low restricted passage without removing SCBA.
						19B. Demonstrate use of SCBA to exit a full escape constricted passage.
						20A. Demonstrate exiting using a hose line.
					20B. Demonstrate exiting using a wall.	

SECTION	TRAINING RECORD		IN-HOUSE COMP. EXAM			MANIPULATIVE SKILL DEMONSTRATE	
	DATE	INST	DATE	INST	PASS		
<b>LADDERS</b>						21. Demonstrate proper carry, position, raise & lower of a single ladder	
						22. Demonstrate carry/position/raise/lower ladders/24ft & 35 ft.	
						23. Demonstrate climbing, working on and descending ladder.	
						24. Demonstrate bringing a victim down a ladder.	
						25. Deploy roof ladder on pitched roof.	
						26. Inspect, maintain, and clean aerial or ground ladder.	
						27. Demonstrate set-up a Master stream device.	
						<b>28. Demonstrate proper method for extending a charged line.</b>	
						<b>29. Demonstrate proper method for replacing burst section.</b>	
						30A. Couple/uncouple hose: foot-tilt method.	
						30B. Couple/uncouple hose: two-firefighter method.	
						<b>31A. Advance attack line into structure.</b>	
						31B. Advance attack line up ladder: second floor window or roof.	
						31C. Advance attack line up/down inside/outside stairway.	
						32. Connect hose to standpipe and advance.	
						33A. Single section drain and carry.	
						33B. Accordion shoulder carry.	
						34A. Load supply hose using flat or accordion hose loads.	
						34B. Load attack hose lines using flat, Triple layer, Minuteman.	
						35A. Demonstrate a Straight roll.	
						35B. Demonstrate a Donut roll.	
						36A. Demonstrate cleaning, inspecting, maintaining fire hose.	
						36B. Demonstrate cleaning, inspecting, maintaining nozzles.	
	<b>HOSES, NOZZLES, APPLIANCES</b>						

SECTION	TRAINING RECORD		IN-HOUSE COMP. EXAM			MANIPULATIVE SKILL-DEMONSTRATE
	DATE	INST	DATE	INST	PASS	
SEARCH AND RESCUE						37. Search for victim in structure and remove.
						38A. Move victim 40' using extremities carry.
						38B. Move unconscious firefighter 40ft. using coat drag.
						38C Move an unconscious victim 40 ft. using a blanket drag.
VENTILATION						39. Determine integrity of a roof by sounding.
						40 A. Break glass while working from ground.
						40 B. Break glass while working from ladder.
						41A. Open ventilation on a Pitched/Flat roof.
						41B. Open ventilation on a floor.
						42. Set-up blower fan for "positive" pressure.
OVERHAUL						43. Expose hidden fires in walls, ceilings, and floors.
						44. Fold / roll salvage cover for a one or two-firefighter spread.
SALVAGE						45A. One-firefighter deployment.
						45B. Two-firefighter deployment (balloon throw).
						46. Construct water chute.
						47. Construct catchall.
						48. Cover/close building openings.
						49. Separate charred from uncharred material.
						50. Stop flow from discharging sprinkler head.
						51. Operate main control valve.
						52. Inspect/clean/maintain salvage cover.
