Instructor: Dennis Goudy

Mr. Goudy is a program manager with the Utah Fire and Rescue Academy. He currently oversees the Quality Assurance Office. Previously, he served as a lead associate with Booz Allen Hamilton as a subject matter expert (SME) and was assigned to USARPAC CBRNE (Chemical, Biological, Radiological, Nuclear, and Explosive) Division at Ft. Shafter, Hawaii. Serving in Hawaii, he conducted incident command system training to U.S. responders in Japan, Hawaii, Alaska, Bangladesh, Indonesia, American Samoa, and the Republic Philippines.

Prior to this, Mr. Goudy served as a program manager for the Institute of Emergency Services and Homeland Security within the Utah Fire and Rescue Academy. While there, Mr. Goudy designed and built the Incident Command Training Center to serve All Risk responders, both locally and regionally.

Mr. Goudy also assisted other program managers at the institute in upgrading their emergency management training programs.

Prior to taking a position with the institute, Mr. Goudy spent over 29 years with the Salt Lake City Fire Department. His last 12 years were spent in management positions, primarily in fire training, fire apparatus, special operations, and field supervision. Mr. Goudy’s claim to fame was the development of the Joint Base Pearl Harbor/Hickam Emergency Operation Center. He assisted base commanders in developing working incident action plans and disaster response planning. Prior to that work in the South Pacific, he designed the Urban Domain Venue for the 2002 Olympic Winter Games in Salt Lake City, Utah. The Urban Domain Venue encompassed all of the emergency response changes necessary to provide protection within Salt Lake City’s geographical boundaries.

Training and incident management have always been a passion for Mr. Goudy. His career includes many accomplishments, including the development of various training programs, such as the development of a state, local, and regional CBRNE Task Force, emergency vehicle operations, operational field guides, and operational procedures for the Salt Lake Valley Fire Alliance (a group of ten fire departments throughout the Salt lake Valley that combine resources, training, etc.). Working as a member of the UFRA Incident Management Training Team allows Mr. Goudy to share his knowledge and experience while continuing to contribute to the emergency management profession.
