Phillip Johnson

Phillip Johnson is the youngest of seven and was born and raised in the middle of nowhere, Gunnison, Utah. He has been interested in becoming a hacker since his early teenage years. He will graduate summer of 2022 from Snow College with his Associate of Applied Science in Computer Information Systems (CIS). He will then move on to Utah Valley University and work towards getting a bachelor's degree in Information Technology with an emphasis in Network Administration and Security, as well as two minors in Physics and Chemistry. He wants to continue toward his goal of becoming a hacker.

Phillip is a member of the Church of Jesus Christ of Latter-Day Saints. He wants to have a family and continue working toward making the world a better place for them and other families both in Utah and across the world. He has already begun doing so with his position as the President of the Student Nation Organization Club at Snow College, and by helping others with the Student Engage Learn (SEL) module to help achieve their goals.
