

Priyanka Prem Kumar

Priyanka is a student pursuing her second Master's in Data Science from Indian University, Bloomington, while she already has her Master's in Electronics Engineering from Anna University, India. As a member of the Utah International Mountain Forum, she has done her research on improving food security and sustainable food systems (SDG 2.4) for smallholder farmers and also researched and performed data analysis to understand the economic status and sustainable education outcomes (SDG 4), especially for women in the mountainous region. Her research "Assessment of Sustainable Food Systems in Mountain Regions of India Through Climate Smart Agriculture During Covid-19 Pandemic: The Case Study of AI for Rural" has been published in the book "Why It Matters" and was handed over to the UN Dag Hammarskjold library in March 2023 in the Proceedings of the UN International Academic Conference on SDGs "Why It Matters." Also, she was a youth representative speaker of the Asia-Pacific sub-committee of the former conference held in Utah, wherein she was fortunate to speak at the closing ceremony. Priyanka was also part of the UN- Commission of the Status of Women - 67 and 68 held in New York and spoke to support women in IT and mountains in India and globally. Along with being a positive person, she is also an intelligent worker, problem solver, and leader. She is always willing to learn new skills with solid communication and organizational techniques.
