OVERVIEW
Substance use disorders have reached crisis levels among Utah women.

SPOTLIGHT ON WOMEN IN TREATMENT

Substance Use Disorders and Pregnancy

Thousands of women are treated for substance use disorders at public facilities each year. The most common drug admitted to use of multiple substances is methamphetamines and heroin.

WHAT CAN WE DO?
Various stakeholders can work to reduce substance use disorders in Utah.

Substance use during pregnancy can have serious consequences.

Utah women on Medicaid were given opioid prescriptions twice as much as women nationally. Utah is highest in the nation for this indicator.

HOW DOES UTAH STACK UP?

Utah substance use rankings vary according to drug type.

Substance use disorders have reached crisis levels among Utah women. Adults who use illicit drugs are more likely to die from drug overdoses from 2013-2015.

Newborns and Drugs

7% of newborns in Utah were exposed to opioids in pregnancy.

Opioids During Pregnancy

In the number of infants diagnosed with neonatal abstinence syndrome (NAS) in Utah.

WHAT ARE THE PREVALENCE OF SUBSTANCE USE DISORDERS IN UTAH WOMEN?
