

MAMMOGRAPHY AMONG UTAH WOMEN

2023 Update

HOW DOES UTAH STACK UP?

Utah remains one of the lowest-ranking states for mammography screenings.

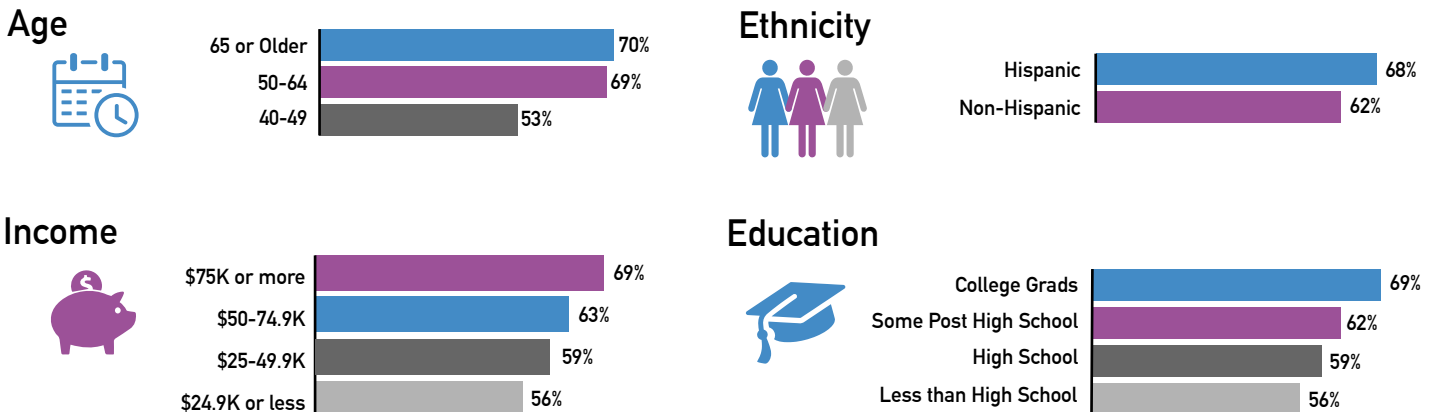

HEALTH RECOMMENDATIONS

Major healthcare systems in Utah recommend yearly mammograms

AFTER **40** YEARS OF AGE

WHO IS GETTING SCREENED IN UTAH?

REASONS FOR LACK OF SCREENINGS

There are many reasons why Utah women are not getting screened.

Not always covered by insurance

Services were reduced during COVID-19

Low accessibility of services

Other priorities or lack of time

Lack of childcare

Fear of diagnosis

WHAT CAN WE DO?

Companies, policy makers, organizations, and individuals can all help to improve screening rates.

Providers

 Increase mobile screening units and screening reminders.

Governments

 Support awareness programs.

Healthcare Systems

 Establish clear, consistent guidelines for screenings.

Employers

 Encourage female employees to complete screenings.
