Web Community Meeting September 2016

Maps, OU Campus Training, and Web Tools

Gaining access to the OU Campus Training

- Email websupport@uvu.edu to request access

What is the value in the new training for experienced content contributors?

- New information on captioning, Terms of Use Agreement, etc.
- Browse through the library at my.uvu.edu/uvulearn

Will the maps eventually sync with the current accessibility maps?

- Following completion of the exterior base map, new layers will be added over time. These layers will include dining, accessibilities, location tags, parking, and a variety of other features. In short, yes.

Is there potential for a tab that allows for you to find an event?

- This will be discussed in the future as we begin to add layers to the base map. You will be able to add links to your sites that point to a specific location on the map, but that is a function to come in the future.
